

## GEOBASE

*Engineering Village, the essential engineering research database, provides a searchable index of the most comprehensive engineering literature and patent information available. Designed by, and for, the engineering community, this comprehensive, all-inclusive platform gives academic institutions, corporations and government agencies, access to peer-reviewed, deeply indexed, relevant and accurate engineering research content – all in a single, easy-to-use interface.*

## GEOBASE

GEOBASE is a database of indexed research literature unequalled in its coverage of the international geoscience literature: Earth sciences, ecology, geology, human and physical geography, environmental sciences, oceanography, geomechanics, alternative energy sources, pollution, waste management and nature conservation. The content crosses subject, language and cultural boundaries, providing a unique research tool to users. GEOBASE covers 3,050,046 abstract records of multidisciplinary content enabling comprehensive geological evaluation of any desired region. This includes geological structure and relation to natural resources as well as linking resource management, transport, and regional and urban planning.

### GEOBASE Facts

#### Content size (and counting<sup>1</sup>)

- 3+ million records
- 2+ million journal articles
- 70,000 conference papers
- 3,000 monograph chapters
- 200,000 records added annually

#### Content sources (and counting<sup>1</sup>)

- 879 publishers from 68 countries
- 2,113 journals
- 48 trade publications
- 14 conference proceedings
- 67 book series & 277 books

#### Content sources

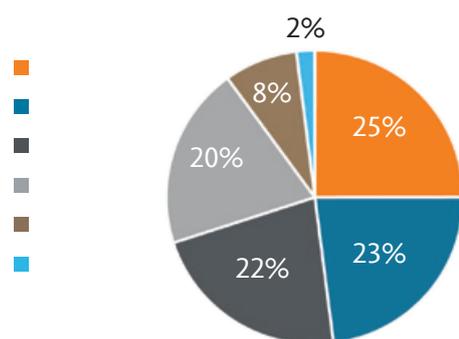

There are 7 print abstract & indexing journals that are subsets of the GEOBASE database

ISSN	Title	Start Year
0305-196X	Ecological Abstracts	1974
0954-0504	Geographical Abstracts. Physical Geography	1989
0953-9611	Geographical Abstracts. Human geography	1989
0954-0512	Geological Abstracts	1989
1365-1617	Geomechanics Abstracts	1997
0262-0855	International Development Abstracts	1982
0967-0653	Oceanographic Literature Review	1993

<sup>1</sup> Count as of January 2016

#### GEOBASE subject coverage

- Human Geography – 25%
- Environmental Sciences – 23%
- Physical Geography – 22%
- Geology – 20%
- Oceanography – 8%
- Geomechanics – 2%

# GEOBASE

## Why GEOBASE on Engineering Village?

GEOBASE is indexed specifically for geoscientists using GEOTREE (REGTREE / ORGTREE), making search results consistently accurate and relevant. By using GEOBASE on Engineering Village, geoscientists get full access to powerful search features and tools that help them save time, locate critical information and stay current. Engineering Village's unique mapping tool uses Google Maps technology to put results in a geographic context:

- Visualize a topic's associations with different areas of the world or geological features
- Facilitate discovery of features or locations not initially associated with a topic
- Encourage a third dimension of insight and easy narrowing of results
- Access to citation counts, citation details and author profiles from Scopus

## TOP 5 reasons to use GEOBASE on Engineering Village<sup>2</sup>

1. Saves time and improves research success
2. Comprehensive search results
3. Controlled vocabulary
4. Easy to navigate
5. Interactive tutorials and helpful search features

*“Engineering Village provides the most comprehensive database of engineering literature”*

Sr Researcher, India

## Who uses Engineering Village?

96% of US  
top 25 universities  
(US News & World Report)

72% of global  
top 50 universities  
(QS Top Universities)

*“Speed, thoroughness, ease of use”*

Post Graduate, Australia
