

Recently published doctoral theses

Title	Gelatin Nanoparticles for Targeted Oligonucleotide Delivery to Kupffer Cells – Analytics, Formulation Development, Practical Application
Author	Jan Zillies
Key words	Nanoparticles drug targeting controlled drug delivery gene therapy oligonucleotides lyophilization
Supervisors	Gerhard Winter
Institution	Department of Pharmacy, Pharmaceutical Technology and Biopharmaceutics, Ludwig-Maximilians-University Munich, Butenandstrasse 5, D-81377 Munich, Germany
Language	English
Price	
Address for ordering	Verlag Dr. Hut, Sternstrasse 18, D-80538 Munich, Germany ISBN 13: 978-3-89963-489-1
Fax/e-mail	zillies@web.de
Title	Bulk- and Surface-Erodable Polymers: Effects of Polymer Structure on Physico-Chemical and Biological Properties
Author	Florian Unger
Key words	Biodegradable polymers; biocompatibility;; parenteral delivery; controlled drug delivery; polymer characterization
Supervisor	Prof. Dr. Thomas Kissel
Institution	Philipps-University Marburg, Faculty of Pharmacy, Department of Pharmaceutics and Biopharmacy, D-35037 Marburg, Germany
Language	English
Price	0
Address for ordering	Download at: http:// archiv.ub.uni-marburg.de
Fax/e-mail	Florian_unger@web.de

Title	Crystallization as a tool for controlling and designing properties of pharmaceutical solids
Author	Sabiruddin Mirza
Key words	Physical pharmacy, polymorphism, powder technology, solid formulation
Supervisors	Prof. Jouko Yliruusi, Doc. Jyrki Heinämäki, Prof.
Institution	Division of Pharmaceutical Technology Faculty of Pharmacy O.O.Box 56 00014 University of Helsinki Helsinki, Finland
Language	English
Price	0
Address for ordering	Download at http://ethesis.helsinki.fi/
Fax/e-mail	Sabir.mirza@helsinki.fi
