

Hospital Infection Society

Registered Charity No. 286064

Research Grants

Applications are invited for project grants to support work on the subject of 'hospital infection control', to be carried out in the UK or Eire only.

Two types of funding are available:

Major Research Grant up to £20,000 per annum for 1-3 years

This grant would be suitable to support a PhD studentship, MD or other research worker and related consumables/equipment. Grants for longer than one year will be subject to satisfactory annual reports.

Small Research Grants up to £5,000

These would be suitable to support small-scale research projects, or possibly the costs associated with the visit of an overseas research fellow. Small grants are normally non-recurring.

In addition, applications for Travel Grants would be welcomed. These are primarily intended to enable trainees to attend meetings of educational benefit, particularly if work is to be presented.

The closing date for applications is the 31st July 2004.
