Preface	V	
List of Contributors	VII	
Chapter 1	Migration of Charged Sample Components and Electroosmotic Flow in Packed Capillary Columns.	1
	<i>Anurag S. Rathore and Casaba Horváth</i>	
1.1	Introduction.	2
1.2	Flow of ions in open tubes.	3
1.3	Electroosmotic flow in open tubes.	5
1.4	Flow of ions in open tubes.	6
1.5	Electroosmotic flow through packed columns.	12
1.6	Conclusions.	35
1.7	Symbols and abbreviations.	36
1.8	References.	37
Chapter 2	Instrumentation for Capillary Electrochromatography.	39
	<i>Gerard P. Rozing, Anna Dermaux and Pat Sandra</i>	
2.1	Introduction.	40
2.2	Instrumentation requirements.	41
2.3	Gradient-CEC instrumentation.	58
2.4	Detection.	75
2.5	Summary and conclusion.	82
2.6	References.	83
Chapter 3	Modes of CEC Separation.	87
	<i>Christopher M. Johnson, Alan P. McKeown and Melvin R. Euerby</i>	
3.1	Introduction.	88
3.2	Definitions.	89
3.3	Unmodified packings.	89
3.4	Modified packings.	94
3.5	Chiral stationary phases.	100
3.6	Gel CEC.	101
3.7	Monoliths.	101
3.8	Size exclusion CEC.	102
3.9	Gradient CEC.	103
3.10	Selectivity compared with LC.	103
3.11	Guidelines for the analysis of acidic basic and neutral compounds.	104
3.12	Conclusions.	106
3.13	Abbreviations.	106
3.14	References.	106

Chapter 4	Packed Bed Columns.	111
	<i>Luis A. Colón, Todd D. Maloney and Adam M Fermier</i>	
4.1	Introduction.	112
4.2	Column fabrication.	112
4.3	Packing methods.	150
4.4	Comparison of packing procedures	156
4.5	Conclusions.	158
4.6	Acknowledgements.	158
4.7	Abbreviations.	159
4.8	References.	159
Chapter 5	Capillary Electrochromatography on Monolithic Silica Columns	165
	<i>Nobuo Tanaka and Hiroshi Kobayashi</i>	
5.1	Introduction.	165
5.2	Monolithic silica columns.	167
5.3	Preparation procedure of silica monoliths from silane monomers.	169
5.4	Structural properties of monolithic silica columns prepared in a capillary.	170
5.5	Performance of monolithic silica columns in CEC	173
5.6	References.	180
Chapter 6	Capillary Column Technology: Continuous Polymer Monoliths.	183
	<i>František Švec</i>	
6.1	Introduction.	184
6.2	Replaceable polymeric stationary phases.	185
6.3	Polymer gels.	187
6.4	Highly crosslinked acrylamide-based monoliths.	189
6.5	Imprinted enantioselective monoliths.	206
6.6	Polystyrene-based monoliths.	207
6.7	Methacrylate ester-based monolithic columns.	212
6.8	Assessment of porous structure	220
6.9	Effects of properties on the separation ability	223
6.10	Other applications of porous polymer monoliths in CEC column technology.	232
6.11	Acknowledgement.	237
6.12	References.	238
Chapter 7	Open Tubular Approaches to Capillary Electrochromatography.	241
	<i>Joseph J. Pesek and Maria T. Matyska</i>	
7.1	Introduction.	242
7.2	Chemical etching process.	244
7.3	Chemical modification process.	245
7.4	Characterisation of etched, chemically modified capillaries.	247
7.5	Applications of OTCEC.	257
7.6	Conclusions.	266
7.7	Abbreviations.	267
7.8	References.	268

Chapter 8	Hyphenation of Capillary Electrochromatography and Mass Spectrometry: Instrumental Aspects, Separation Systems, and Applications.	271
	<i>Christian G. Huber and Georg Hölzl</i>	
8.1	Introduction.	272
8.2	Instrumentation and technology for coupling of CEC and MS.	273
8.3	Stationary phase-mobile phase systems used for CEC-MS.	296
8.4	Optimisation of electrochromatographic and mass spectrometric conditions.	298
8.5	Examples of application.	305
8.6	Acknowledgements.	312
8.7	References.	313
Chapter 9	Pressure Supported CEC: A High-Efficiency Technique for Enantiomer Separation.	317
	<i>Dorothee Wistuba and Volker Schurig</i>	
9.1	Introduction.	318
9.2	Techniques of pressurising.	319
9.3	Theory.	321
9.4	Instrumentation.	325
9.5	Applications.	326
9.6	Advantages and disadvantages of pressurised CEC.	335
9.7	Conclusions and future trends.	336
9.8	Abbreviations.	337
9.9	Acknowledgement.	337
9.10	References.	337
Chapter 10	Applications. Index of compounds separated.	341
	<i>Zdeněk Deyl and Ivan Mikšik</i>	
10.1	Introduction.	341
10.2	Preconcentration procedures.	342
10.3	Hydrocarbons.	343
10.4	Ketones.	347
10.5	Carbohydrates.	348
10.6	Fatty acids.	350
10.7	Triglycerides.	352
10.8	Steroids.	355
10.9	Amino acids.	358
10.10	Peptides.	359
10.11	Nucleic acids constituents.	362
10.12	Drugs.	363
10.13	Antibiotics.	368
10.14	Pesticides.	369
10.15	Available applications (summarising Table).	369
10.16	References.	413

Index of Compounds Separated.
