

Electronic transmission of accepted papers. After a manuscript has been accepted for publication and *all revisions have been incorporated*, authors are requested to transmit the text source and figures of the manuscript in electronic form whenever possible.

Manuscripts prepared using LaTeX(2e) are strongly preferred, but TeX or LaTeX are welcome, and Word (.doc) files are acceptable when LaTeX is not feasible. The Elsevier LaTeX package (including detailed instructions for LaTeX preparation) is available at www.elsevier.com/locate/latex. Note that the use of other specialized versions of TeX or extensive use of custom macros may necessitate conventional typesetting from a printed manuscript. The manuscript will be edited according to the style of the journal. Page proofs will be sent (electronically whenever possible) to authors for final proofreading.

Transmission by e-mail. Transmission of the manuscript source and all auxiliary files as attachments in a single e-mail to IC@elsevier.com is most preferred. Files may also be attached as a single archive. The size of the email should not exceed 2 megabytes.

Transmission by FTP client. For ftp transmission, the use of ftp client software is encouraged. Using an ftp client, navigate to the Elsevier ftp site

Site address: <ftp://ftp.elsevier.com>

Then log in “pseudoanonymously” with

Username: anon

Password: essd4acc

After successful login, navigate to the subfolder, yinco, and transmit your materials.

FTP from a web browser. If an ftp client is not available, a web browser may be used to transmit files. Browse to the address

<ftp://anon:essd4acc@ftp.elsevier.com>

that leads to the journal folder area where the yinco subfolder can be found. Copy your files into this subfolder.

File-naming convention: Long filenames are OK, but names with unusual characters may generate a “restricted access” error. Try renaming your files if you get this error message.

File protection: The system is configured to protect materials deposited on the site. Users can monitor their own uploads normally, viz., see the file being copied to the destination, but the files cannot be read by other users. Authors should receive a confirmation of receipt from the journal staff within one week of transmission.

Questions. Questions about **transmission of manuscripts** to the publisher should be directed to IC@elsevier.com. Instructions for *submission of new manuscripts* for review are available at <http://theory.lcs.mit.edu/~iandc>.
