## Publisher's note

The *Journal of Biomedical Informatics* now publishes color figures online free of charge!

Beginning with Volume 36, Number 1, the *Journal of Biomedical Informatics* will be included in a new initiative from Elsevier called Colorful e-Products. At that point, figures that appear in black and white in the printed version of the issue of the journal may appear **in color**, online, on ScienceDirect.

Scientists in many disciplines need to be able to publish their work in color, but the cost of color printing can be prohibitive. We realize that not all scientists have appropriate funds to cover the charges. This "colorful e-products" solution provides a welcome step forward, particularly now that scientists increasingly access information online.

Authors wishing to make use of this facility should ensure that the artwork is in an acceptable format (TIFF, EPS, or MS Office files) and at the correct resolution. Note that when you intend to publish your figures in color online but in black and white in print, both color and black and white artwork (file and/or hard copy) must be provided.

There is *no extra charge* for authors who take advantage of this new service. Further information on electronic artwork can be found at <http://authors.elsevier.com/artwork>.

To view the articles online, please access the journal from the ScienceDirect Web site at <http://www.sciencedirect.com>.
