

# Contents

1. Basic Physics of Lasers.....	1
1.1 Spontaneous and Stimulated Transitions. Einstein Coefficients. Properties of Stimulated Radiation.....	1
1.2 Laser Operation Basics.....	7
1.3 Population Inversion.....	14
1.4 Amplification and Saturation .....	18
2. Distribution of the Electromagnetic Field in the Optical Resonator .....	22
2.1 Longitudinal Modes.....	22
2.2 Quality Factor of Resonator $Q$ . Relationship between Line Width of Stimulated Emission and Resonator Quality Factor .....	25
2.3 Transverse Modes.....	29
3. Generation of Ultrashort Laser Pulses .....	35
3.1 Modelocking. Relationship between Line Width of Stimulated Emission and Pulse Duration.....	36
3.2 Methods of Modelocking. Active and Passive Modelocking.....	46
3.3 $Q$ -Switching.....	59
3.4 Cavity Dumping .....	64
4. Lasers .....	72
4.1 Ruby Laser.....	73
4.2 Molecular Gas Lasers from the Infrared Region .....	75
4.2.1 Lasers Operating on Rotational Transitions.....	75
4.2.2 Lasers Operating on Vibrational-Rotational Transitions: $\text{CO}_2$ and $\text{CO}$ .....	78
4.3 Chemical Lasers .....	83
4.4 Solid-State Lasers .....	85
4.4.1 Neodymium Laser and another Rare Earth Lasers.....	86
4.4.2 Solid-State Tunable Lasers (Vibronic Lasers).....	91
4.4.3 Fiber Lasers .....	97
4.5 Gas Lasers from Visible Range.....	102
4.5.1 Helium-Neon Laser .....	102
4.5.2 Ion Gas Lasers. Argon and Krypton Lasers .....	103
4.6 Liquid Dye Lasers .....	105
4.7 Gas Lasers from Ultraviolet Range .....	109

4.7.1	Excimer Lasers .....	109
4.7.2	Nitrogen Laser .....	113
4.8	Diode Lasers .....	113
4.8.1	Intrinsic Semiconductors. Doped Semiconductors. <i>n-p</i> Junction .....	113
4.8.2	Diode Lasers .....	119
5.	Nonlinear Optics .....	133
5.1	Second Order Nonlinear Phenomena .....	136
5.2	Phase Matching Methods .....	140
5.3	Practical Aspects of the Second Harmonic Generation.....	147
5.3.1	SHG for Pico- and Femtosecond Pulses.....	150
5.4	Parametric Oscillator .....	154
5.5	The Third Order Nonlinear Processes .....	160
5.5.1	Stimulated Raman Scattering .....	162
5.5.2	Coherent Anti-Stokes Raman Scattering (CARS).....	166
5.5.3	The other Techniques of Nonlinear Stimulated Raman Scattering.....	168
5.6	Nonlinear Dispersion Phenomena Affecting Picosecond and Femtosecond Pulse Duration – Group Velocity Dispersion (GVD) and Self Phase Modulation (SPM) .....	170
6.	Pulse Amplification.....	181
6.1	Introduction .....	181
6.2	Theoretical Background .....	182
6.3	Design Features of Amplifiers.....	184
6.4	Regenerative Amplifier .....	187
6.4.1	Pockels Cell.....	189
6.5	Chirped Pulse Amplification (CPA).....	192
7.	The Measurement of Ultrashort Laser Pulses.....	198
7.1	Autocorrelation Techniques .....	199
7.2	FROG Techniques .....	209
8.	Selected Methods of Time-Resolved Laser Spectroscopy .....	213
8.1	Fluorescence Decay .....	214
8.2	The Pump-Probe Method .....	223
8.3	CARS as a Time Resolved Method.....	229
8.4	Photon Echo.....	232
8.4.1	Spin Echo in NMR .....	232
8.4.2	Optical Resonance.....	240

8.4.3 Quantum-Classical Description of the Photon Echo .....	244
Weak Field Approximation .....	245
Rotating-Wave Approximation.....	246
Strong Field Approximation. Rabi Frequency.....	247
8.4.4 Practical Advantages of Photon Echo Applications.....	252
8.5 Quantum Beats .....	256
8.5.1 Quantum Description .....	257
8.5.2 Examples of Quantum Beats Applications.....	259
9. Ultrafast Chemical and Physical Processes .....	263
9.1 Femtochemistry. Wave packet dynamics. Theory.....	266
9.2 Femtochemistry. Spectroscopic Application of Wave Packet Dynamics .....	274
9.2.1 Excited-State Vibrational Coherence .....	277
9.2.2 Vibrational Coherence in “Reacting” Excited-State Molecules. Bacteriorhodopsin ....	278
9.2.3 H-Bond Dynamics .....	284
9.3 Photoisomerization .....	287
9.3.1 Photoisomerization of <i>cis</i> - and <i>trans</i> -Stilbene .....	287
9.4 Intramolecular Charge Transfer .....	290
9.5 Molecular Reorientations .....	292
9.6 Intermediates Investigation .....	293
9.6.1 Photoreduction.....	294
9.6.2 Carbenes .....	295
9.6.3 Excited State Proton Transfer.....	296
9.7 Ultrafast Coherent Spectroscopy. Vibrational Dynamics.....	299
9.7.1 Energy Relaxation $T_1$ and Phase Relaxation $T_2$ .....	301
9.8 Dynamics of an Excess Electron. Solvated Electron.....	308
9.9 Excess Electron Spectroscopy .....	311
10. Lasers in Medicine .....	322
10.1 Introduction .....	322
10.2 Photochemical Interactions.....	326
10.2.1 Photodynamic Therapy.....	326
10.2.2 Sensitizers.....	327
10.2.3 Sensitizers Photochemistry.....	329
10.3 Thermal Interaction .....	330
10.4 Photoablation.....	332
10.5 Plasma-Induced Ablation .....	332

10.6 Application of Lasers in Medicine .....	334
11. Potential Hazards Associated with Inappropriate Use of Lasers .....	339
11.1 Radiation Hazards .....	340
11.1.1 Eye Hazards .....	341
11.1.2 Skin Hazard .....	345
11.2 Other Hazards .....	346
12 Detectors .....	347
12.1 Detectors Types and Detectors Characterizing Parameters.....	348
12.2 Photoemissive Detectors .....	352
12.3 Semiconductor Detectors.....	356
12.4 Multichannel Detectors PDA and CCD .....	357
Subject Index .....	369
