Carbon Calendar

25–26 June 2008

Platts Carbon Capture and Sequestration. The Opportunity to make a huge contribution in cutting emissions has arrived with carbon capture and sequestration, but developers face many challenges, including high capital costs, availability of pipelines, and the legal status of storing CO₂ underground. This conference gives you the latest information on new projects in different regions of the US and Canada, and an understanding of the costs and risks of development. The event will be held at the Renaissance Hotel, Houston Texas. For more conference information or to register visit <http://www.platts.com/Events/2008/pc819/> or contact Ron Berg at: Ron_Berg@platts.com 781-430-2118.

13–18 July 2008

Carbon 2008, the 2008 World Conference on Carbon, to be held at the Hotel Metropolitan Nagano, Nagano, Japan. The conference will be hosted by the Carbon Society of Japan and Science Council of Japan. For preliminary details visit the conference web site at: <http://endomoribu.shinshu-u.ac.jp/carbon2008/> or contact Morinobu Endo at: endo@endomoribu.shinshu-u.ac.jp

3–5 September 2008

7th European Conference on Coal Research and its Applications to be held at Cardiff University, Cardiff, Wales, UK. The conference will bring together researchers in universities with participants from industry who also carry out research or are interested in the application of research in industry. Papers are invited that describe applications in coal utilization and preparation with particular reference to the following areas: Improving efficiency and reducing emissions in conventional power generation, gasification, fluidized bed technology, CO₂ removal and storage technology, advanced power generation, modeling, sensors, instrumentation and control, emissions issues – including mercury, VOCs and fine particulates, co-firing of coal, particularly with biomass and wastes, carbonization and other metallurgical uses, coal preparation and handling, and other coal conversion processes. For further information contact Dr. A.W. Thompson at: awt_crf@btinternet.com or see <http://www.coalresearchforum.org>

7–11 September 2008

19th European Conference on Diamond, Diamond-like Materials, Carbon Nanotubes, and Nitrides to be held in Sitges, Spain. The conference coverage includes growth and processing technologies of diamond and nanodiamond; characterisation; electronic and optical properties, applications and devices; biochemical, electrochemical, mechanical, thermal, properties and applications; carbon nanotubes – growth, properties, applications; graphene; and diamond-like carbon growth, properties and applications. For further information see <http://www.diamond-conference.elsevier.com>

10–12 September 2008

Fifth International Symposium on The Physics and Chemistry of Carbon Materials/Nanoengineering to be held in Almaty, Kazakhstan. Details from Prof. S.Kh. Aknazarov, Combustion Problems Institute, Bogenbay Batyr str., 172, 050012 Almaty, Republic of Kazakhstan. Tel.: +7-727-292-35-65, Fax: +7-727-292-58-11, E-mail addresses: Sestager.Aknazarov@kaznu.kz; Danara.Nurgozhina@kaznu.kz

14–19 June 2009

Carbon 2009, the 2009 World Conference on Carbon, to be held in Biarritz, France. The Conference will be hosted by the French Carbon Group (GFEC). For preliminary details contact Marc Monthieux at: marc.monthieux@cemes.fr
