INTRODUCTION

FEBS Letters is a world-renowned journal for rapid publication of short reports describing novel and specific effects with a biologically or biochemically significant function. Bringing together the most important developments in the molecular biosciences, *FEBS Letters* provides an international forum for Research Letters, Reviews and Hypotheses describing or discussing mechanistic insights at the molecular level, which would be interesting to a broad readership. *FEBS Letters* is published by *Elsevier* on behalf of the *Federation of European Biochemical Societies (FEBS)*.

Aims, scope and subject coverage

Papers should be short but complete and essentially final reports. The subject area of *FEBS Letters* is broad. It covers biochemistry (protein chemistry, enzymology, nucleic acid chemistry, metabolism, and immunochemistry), molecular biology, molecular cell biology (signal transduction, intracellular traffic, regulation of cellular proliferation, cell-cell interactions), structural biology, biophysics, computational biology (genomics, proteomics, bioinformatics), molecular genetics and systems biology.

As a general policy, *FEBS Letters* does not consider preliminary or fragmentary observations, cloning and sequencing of cDNA or genes that have previously been reported for other species, conventionally achieved expression or crystallization of proteins, correlative studies or negative observations. Moreover, methodological papers are not published unless they are truly novel and significant.

Page charges

FEBS Letters has no page charges.

BEFORE YOU BEGIN

Fast-Track Publication

FEBS Letters offers expedited handling of manuscripts that have been rejected from high-level journals. Authors should enclose reviews and/or comments from the editor of previously reviewed manuscripts to expedite their handling as the manuscript may be accepted based on the previous reviews. You will receive a final decision from the Managing Editor within a few days of submitting your manuscript.

Ethics in publishing

For information on Ethics in publishing and Ethical guidelines for journal publication see <http://www.elsevier.com/publishingethics> and <http://www.elsevier.com/ethicalguidelines>.

Policy and ethics

The work described in your article must have been carried out in accordance with *The Code of Ethics of the World Medical Association (Declaration of Helsinki) for experiments involving humans* <http://www.wma.net/en/30publications/10policies/b3/index.html>, *EU Directive 2010/63/EU for animal experiments* http://ec.europa.eu/environment/chemicals/lab_animals/legislation_en.htm, *Uniform Requirements for manuscripts submitted to Biomedical journals* <http://www.icmje.org>. This must be stated at an appropriate point in the article.

Conflict of interest

All authors are requested to disclose any actual or potential conflict of interest including any financial, personal or other relationships with other people or organizations within three years of beginning the submitted work that could inappropriately influence, or be perceived to influence, their work. See also <http://www.elsevier.com/conflictsofinterest>.

Submission declaration and verification

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection software *iThenticate*. See also <http://www.elsevier.com/editors/plagdetect>.

Authorship

All authors should have made substantial contributions to all of the following: (1) the conception and design of the study, or acquisition of data, or analysis and interpretation of data, (2) drafting the article or revising it critically for important intellectual content, (3) final approval of the version to be submitted.

Role of the funding source

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in

study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated. Please see:

<http://www.elsevier.com/funding>.

Funding body agreements and policies

FEBS Letters complies with current NIH public access policy.

Sponsored articles

Worldwide approximately 10 million scientists, faculty members and graduate students can access *FEBS Letters* through institutional subscriptions. *FEBS Letters* offers authors the option to sponsor an article and make it available online to non-subscribers via *ScienceDirect*. Authors can only select this option after receiving notification that their article has been accepted for publication. This prevents a potential conflict of interest where *FEBS Letters* would have a financial incentive to accept an article.

The author charge for article sponsorship is \$3,000. This charge is necessary to offset publishing costs - from managing article submission and peer review, to typesetting, tagging and indexing of articles, hosting articles on dedicated servers, supporting sales and marketing costs to ensure global dissemination via *ScienceDirect*, and permanently preserving the published journal article. The fee excludes taxes and other potential author fees such as optional charges for extra reprints.

Authors who have had their article accepted and who wish to sponsor their article to make it available to non-subscribers should complete and submit the order form:

http://www.elsevier.com/framework_authors/Sponsoredarticles/sponsoredarticleoption.pdf.

MANUSCRIPT PREPARATION

Manuscript preparation is crucial for the success of your article. Along with evaluating the novelty and technical quality of your results, the *Editor* and reviewers judge your manuscript based on language, overall clarity and intelligibility. Poorly and sloppily written articles, as well as spelling and grammatical mistakes, may ultimately lead to the rejection of your article, even though the scientific quality would warrant publication.

Language and language services

Please write your text in good English (British or American usage is accepted). Authors who require information about language editing and copyediting services pre- and post-submission please visit <http://webshop.elsevier.com/languageservices> or *Elsevier's* customer support site at <http://support.elsevier.com> for more information.

Word processing software

To prepare your manuscript, any word processing software can be used as long as the files are saved in any of the common text file formats. The text should be in single-column format and the layout of the text should be kept as simple as possible. In particular, do not justify text or hyphenate words at the end of lines. However, the use of bold face, italics, subscripts, superscripts etc. is permitted. Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on *Figures*. To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor if available.

Article structure

Title Page and Abstract

Title

The title should be a maximum of 150 characters (including spaces). Titles should clearly and concisely state the subject of the manuscript. Avoid abbreviations and formulae where possible. *FEBS Letters* reserves the right to edit titles for length and clarity.

Author names and affiliations

The full names and affiliations should be provided for all authors. The corresponding author should also provide a full postal address, telephone and fax number (including country code), and an e-mail address.

Abstract

The abstract should be a maximum of 100 words. The abstract should state the purpose of the research, the principal results and major conclusions. Avoid non-standard or uncommon abbreviations and formulae where possible. *FEBS Letters* reserves the right to edit abstracts for length and clarity.

Keywords

The keywords should reflect the significant factors of the investigation as a whole. A maximum of six keywords should be selected and included with the submitted manuscript.

Abbreviations

Define non-standard or uncommon abbreviations. Ensure consistency of abbreviations throughout the article.

Highlights

Highlights consist of a short collection of bullet points that convey the core findings of the article and should be submitted in a separate file in the online submission system. Please use 'Highlights' in the file name and include 3 to 5 bullet points (maximum 85 characters (including spaces) per bullet point). See <http://www.elsevier.com/highlights> for examples.

Manuscript text

The length of the submitted manuscript should not exceed 4000 words, including figure legends, tables, and references. Editors will accept longer papers only when there are compelling reasons to do so. The manuscript text should be divided in the following sections:

Introduction

Materials and Methods

Results

Discussion

Acknowledgements

References

Figure legends

References

References should be numbered in square brackets, e.g. [7], or [11-13,17], in order of citation in the text. The actual authors can be referred to, but the reference number(s) must always be given. Example: "..... as demonstrated [3,6]. Barnaby and Jones [8] obtained a different result"

Number the references (numbers in square brackets) in the list in the order in which they appear in the text.

Reference to a journal publication:

[1] MacKinnon, R. (2003). Potassium channels. *FEBS Lett.* 555, 62-5.

[2] Hardie, D.G., Scott, J.W., Pan, D.A., and Hudson, E.R. (2003). Management of cellular energy by the AMP-activated protein kinase system. *FEBS Lett.* 546, 113-120.

Reference to a chapter in an edited book:

[3] Langer, T. and Neupert, W. (1994) Chaperoning mitochondrial biogenesis. In *The Biology of Heat Shock Proteins and Molecular Chaperones* (Morimoto, R.I., Tissieres, A. and Georgopoulos, C., eds), pp. 53-83. Cold Spring Harbor Laboratory Press, Plainview, NY.

[4] Feldmann, H. (2004) *Forty years of FEBS*, Blackwell Publishing Ltd. Oxford.

FEBS Letters has standard templates available in key reference management packages:

EndNote (<http://www.endnote.com/support/enstyles.asp>) and *Reference Manager*

(<http://refman.com/support/rmstyles.asp>). Using plug-ins to word processing packages, authors only need to select the appropriate journal template when preparing their article and the list of references and citations to these will be formatted according to the journal style.

Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

Tables

Number tables consecutively in accordance with their appearance in the text. Place footnotes to tables below the table body and indicate them with superscript lowercase letters.

Figures

Figures should be submitted as separate files. Please make sure that figure files are in an acceptable format (TIFF, EPS, PDF or MS Office files) and that the resolution is at least 300dpi. Figures should be approximately the same size as you would like them to appear in press. TIFF files may be saved with using LZW compression. Colour figures will appear in colour on the web (e.g., ScienceDirect and other sites). *FEBS Letters* reserves the right to decide whether figures will be reproduced in colour in print. For further information on the preparation of artwork, please see <http://www.elsevier.com/artworkinstructions>.

Supplementary material

You have the option to submit supporting data, tables, figures and movies as supplementary material to be published online alongside the electronic version of your article. In order to ensure that your submitted material is directly usable, please provide the data in well-known and common file formats.

Reviews and Hypotheses

Reviews and Hypotheses should be topical and of interest not only to specialists in the field but also to the general reader. Hypothesis should present novel ideas or new interpretations of established observations, but should be based on sound data and avoid excessive speculation. Unlike Research Letters and Hypotheses, Reviews do not have a word limit. Prior to submitting a Review or Hypothesis, authors should contact the *Editorial Office* at

febs.letters@bzh.uni-heidelberg.de, providing a title, abstract and key references of the article to be considered.

Database linking and Accession numbers

FEBS Letters aims at connecting online articles with external databases which are useful in their respective research communities. If your article contains relevant unique identifiers or accession numbers linking to information on entities (genes, proteins, diseases, etc.) or structures deposited in public databases, then please indicate those entities according to the standard explained below. Please use the following format: Database ID: xxx (specific examples are given in parentheses):

GenBank: Genetic sequence database at the National Center for Biotechnical Information (NCBI) (GenBank ID: BA123456)

PDB: Worldwide Protein Data Bank (PDB ID: 1TUP)

CCDC: Cambridge Crystallographic Data Centre (CCDC ID: AI631510)

TAIR: The Arabidopsis Information Resource database (TAIR ID: AT1G01020)

NCT: ClinicalTrials.gov (NCT ID: NCT00222573)

OMIM: Online Mendelian Inheritance in Man (OMIM ID: 601240)

MINT: Molecular INTeractions database (MINT ID: 6166710)

MI: EMBL-EBI OLS Molecular Interaction Ontology (MI ID: 0218)

UniProt: Universal Protein Resource Knowledgebase (UniProt ID: Q9H0H5)

Nomenclature and units

Follow internationally accepted rules and conventions: use the international system of units (SI). If other quantities are mentioned, give their equivalent in SI. You are urged to consult IUBMB: Biochemical Nomenclature and Related Documents <http://www.chem.qmw.ac.uk/iubmb/> for further information.

Reviewers

Please submit the names, addresses and e-mail addresses of potential reviewers. You can also specify whom you would like to exclude from reviewing the manuscript. Note that the *Editor* retains the sole right to decide whether the suggested and excluded reviewers are used or not.

MANUSCRIPT SUBMISSION

Submission to *FEBS Letters* proceeds online at <http://ees.elsevier.com/febsletters>, where you will be guided stepwise through the creation and uploading of your files. The system automatically converts source files to a single PDF file of the article, which is used in the

peer-review process. For questions on the submission process, please contact the *Editorial Office* prior to submission at febs.letters@bzh.uni-heidelberg.de. All correspondence, including notification of the Editor's decision and requests for revision, takes place by e-mail.

Papers should be submitted using the *FEBS Letters* online submission system, <http://ees.elsevier.com/febsletters>. For general information about publishing with *Elsevier* see: <http://www.elsevier.com/guidepublication>.

AFTER ACCEPTANCE

Changes to authorship

Requests to add or remove an author, or to rearrange the author names, must be sent to the *Editorial Office* and must include: (a) the reason the name should be added or removed, or the author names rearranged and (b) written confirmation (e-mail, fax, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Any requests to add, delete, or rearrange author names in an already published article will follow the same policies as noted above and result in a corrigendum.

Copyright

Upon acceptance of an article, the author(s) will be asked to transfer copyright of the article to the *Federation of European Biochemical Societies*. This transfer will ensure the widest possible dissemination of information. An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

Authors or a third party wishing to reproduce figures, tables or brief quotations from the text of articles published in *FEBS Letters* for non-commercial purposes may do so, providing the original publication is acknowledged accordingly and the authors' approval is obtained. No special permission is needed from *FEBS* or *Elsevier*. If authors or a third party wish to use a major part of an article or an entire article elsewhere, whether in English or any translation, permission must be asked from *Elsevier*, who will if necessary contact *FEBS*, the copyright holder.

For additional information see: <http://www.elsevier.com/copyright> and <http://www.elsevier.com/permissions>.

Retained author rights

As an author you (or your employer and/or institution) retain certain rights. For details see: <http://www.elsevier.com/authorsrights>.

Proofs

One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author or a link will be provided in the e-mail so that authors can download the files themselves. *Elsevier* provides authors with PDF proofs which can be annotated; for this you will need to download *Adobe Reader* available free from <http://get.adobe.com/reader>. Instructions on how to annotate PDF files will accompany the proofs.

If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to *Elsevier* in an e-mail. Please list your corrections quoting line numbers. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the *Query Form*) on a printout of your proof and return by fax, or scan the pages and e-mail. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the *Editorial Office*. *Elsevier* will do everything possible to get your article published quickly and accurately. It is important to ensure that all corrections are sent back to *Elsevier* in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility. Note that *Elsevier* may proceed with the publication of your article if no response is received within 48 hours. Thereafter, proofs will be processed and included in the first available issue. Late corrections cannot be accepted.

Offprints

The corresponding author, at no cost, will be provided with a PDF file of the article via e-mail or, alternatively, 25 free paper offprints. If the corresponding author opts for paper offprints, this preference must be indicated via the offprint order form which is sent once the article is accepted for publication. Additional paper offprints can also be ordered via this form for an extra charge. The PDF file is a watermarked version of the published article and includes a cover sheet with the journal cover image and a disclaimer outlining the terms and conditions of use.

AUTHOR INQUIRIES

For questions on the submission or reviewing process, please contact the *Editorial Office* at febs.letters@bzh.uni-heidelberg.de. Contact details for questions arising after acceptance of an article, especially those relating to proofs, will be provided by the publisher. You can track

accepted articles at <http://www.elsevier.com/trackarticle>. You can also check *Elsevier's Author FAQs* (<http://www.elsevier.com/authorFAQ>) or contact *Elsevier's Customer Support* via <http://support.elsevier.com>.
