

## ***Gynecologic Oncology* Conflict of Interest Policy Form**

### **Declarations**

*Gynecologic Oncology* requires that **all authors** sign a declaration of conflicting interests. If you have nothing to declare in any of these categories then this should be stated.

In consideration for my being a *Gynecologic Oncology* author I hereby agree as follows:

- To abide by *Gynecologic Oncology*'s Confidentiality Policy
- To protect the integrity of the Journal by not using my position as a *Gynecologic Oncology* author in the commercial promotion of medical products or services.
- To notify the Journal immediately if there has been any adverse action taken against my medical license in any jurisdiction, or if I am no longer certified by the American Board of Obstetrics and Gynecology, Inc. (or other certifying Board).
- To disclose any relevant financial relationship with a commercial interest. *This includes any change in relevant financial relationships with commercial interests that may occur after I have signed this statement.* I also recognize that **if I refuse to disclose whether a relevant financial relationship exists, I will not be able to participate as a *Gynecologic Oncology* author.**

For purposes of this agreement and to promote independence of continuing medical education (CME) from commercial interests and to separate promotion from education, *Gynecologic Oncology* has adopted the Accreditation Council for Continuing Medical Education's (ACCME) definition of relevant financial relationships and conflict of interest. Authors and reviewers must disclose all relevant financial relationships with any commercial interest.

- A **relevant financial relationship** is defined as "financial relationships in any amount occurring within the past 24 months that create a conflict of interest."<sup>1</sup> Financial relationships include "those relationships in which the individual benefits by receiving a salary, royalty, intellectual property rights, consulting fee, honoraria, ownership interest (e.g. stocks, stock options or other ownership interest, excluding diversified mutual funds), or other financial benefit. Financial benefits are usually associated with roles such as employment, management position, independent contractor (including contracted research), consulting, speaking and teaching, membership on advisory committees or review panels, board membership, and other activities from which remuneration is received or expected."<sup>2</sup> Relationships of the person involved in the Journal activity include financial relationships of a spouse or partner.<sup>2</sup>
- **Commercial interest** is defined as "any proprietary entity producing health care goods or services, with the exemption of non-profit or government organizations and non-health care related companies."<sup>1</sup>
