Ref.: Information for Authors of a Review Article for “Progress in Particle and Nuclear Physics (PPNP)” (ELSEVIER)

Dear Author(s),

I am delighted, that you are interested in writing a review article for “Progress in Particle and Nuclear Physics (PPNP)”.

PPNP ranks, according to the ISI Impact Factor listings, at 3<sup>rd</sup> place in Nuclear Physics and at 7<sup>th</sup> place in Particle Physics among all the journals in these fields.

Information about the Journal can be found on the home page:

[www.elsevier.nl/locate/ppartnuclphys](http://www.elsevier.nl/locate/ppartnuclphys)

Specific instructions:

**A review for PPNP can have no more than 70 published pages. Authors should keep strictly to this page upper limit.**

The manuscript must be prepared as a TeX or LaTeX file. It can be submitted, before the agreed DEADLINE, in three different ways:

1. Preferentially, you can place the manuscript, as a pdf or ps file with figures included, in an ftp- or web-server from where I can download it. Do not forget to send me the address of the server.
2. Alternative, the article, as a pdf or ps file, can also be submitted to me as an e-mail attachment. If the article is larger than 8 Mega bytes, please divide it into several smaller files.

3. Finally, as a last resort you could submit the article by normal mail as three hard copies or in form of a disquette with the pdf or ps file of the article.

Regardless of how you submit, the figures, captions, tables and references must be included in place. The figure captions must be below the figures and the table captions must be above the tables and inside the text. You will receive from me an example of an article for PPNP, according to which you should prepare your manuscript.

Once the paper is refereed and I have approved it for publication we will need to receive from you the source files of your paper (TeX or LaTeX or other word processor formats).

After typesetting you will receive proofs of your paper around 4 weeks after you submitted the final version. Your paper will appear online around 8 weeks after you submitted the final version.

If your article uses figures from other articles, you must ask the author and the journal for a written permission to reuse (e-mail is fine). If the journal is an ELSEVIER journal, you need only the permission of the author. You must reference the source of the figure correctly in your list of references.

All figures are reproduced as black and white. If you have color figures you must make sure that the figure can still be understood in black and white. The caption should not contain a phrase: "The green curve displays..."

The article will be refereed by two referees.

ELSEVIER pays after publication of the issue (after the article appears online) per page 12.50 \$ up to a total of 500 \$. It is up to the corresponding author how to share this payment with any co-authors. The corresponding author of an article receives a free copy of the whole issue. Reprints can be ordered against payment.

In order to receive this honorarium, a contract will be signed between you (and perhaps co-authors) and ELSEVIER as the publisher. To prepare this contract ELSEVIER requests the following information within the next four weeks to reserve the slot in one of the issues, which I indicate in my e-mail to you. (See the e-mail with the date of the DEADLINE.)

1. Working Title of the Review Article.
2. Names and postal addresses of all the authors.
3. Phone and Fax numbers of the authors.
4. E-mail addresses of all the authors.
5. Preliminary abstract of the article (not more than one page) in the form of headings and subheadings.  
(The maximum number of pages for the final review article is 70.)
6. The agreed DEADLINE of the article, which must be strictly obeyed.  
A delay in delivering your article prevents the publication of the whole issue with all the other articles.

I look forward to receiving from you the information requested in items 1 to 5 above with the preliminary abstract within the next four weeks. ELSEVIER will then send you a contract including the DEADLINE and information about the honorary.

With best regards,

**Amand Fässler**

Editor of "Progress in Particle and Nuclear Physics (PPNP)"
