

# TRANSPLANTATION PROCEEDINGS

ONLINE SUBMISSION  
NOW REQUIRED FOR ALL  
ORIGINAL MANUSCRIPT  
SUBMISSIONS

ABSTRACT REQUIRED

**MANUSCRIPT SUBMISSION:** Manuscripts will no longer be accepted in paper form for the June or December Clinical Issues. TRANSPLANTATION PROCEEDINGS exclusively accepts online submissions of original clinical manuscripts through Editorial Manager™. Manuscripts submitted through this online system can easily be tracked by the authors, editors, and reviewers through final disposition. Everyone involved with a specific manuscript receives automatic e-mail notification as the manuscript proceeds through the system. To begin using this system go to <http://transproc.edmgr.com>. Click the "Register" link on the toolbar at the top left to input your demographics and set up your account. After your registration is complete, a notice will be sent almost immediately to your e-mail address indicating your user ID and password. Use this information to log into Editorial Manager™ as an author by choosing the "Login" link on the toolbar and select "Submit New Manuscript." Follow the prompts to complete your submission according to the specifications below. Please be aware that you will need to prepare your abstract, manuscript, each table, and each figure as separate files following the guidelines listed below. For detailed, step-by-step instructions on manuscript submission and revision go to <http://transproc.edmgr.com> and click on "Submission Guidelines" then click "Manuscript Submission" under "Step-By-Step Guides." Further questions may be directed to our office by e-mail to [bjohnson@transplantation-proceedings.org](mailto:bjohnson@transplantation-proceedings.org). You can change your ID and password at any time by clicking on the "Update My Information" link. PLEASE NOTE that once a manuscript has been submitted to our office online it is NOT necessary to send a hard copy to our office as we are now exclusively accepting manuscripts for original works through the online system. In cases where online submission is not possible please contact our office for further instruction.

**ABSTRACTS:** All manuscripts MUST contain an abstract of no more than 250 words that briefly summarizes the content. Abstracts must be typewritten, double spaced, single columned with a minimum of 1-inch margins on all four edges using an 11 point font. Manuscripts submitted without an abstract will NOT be considered for publication. Abstracts will not count toward the total manuscript page count and must be on a separate page from the manuscript.

**LENGTH OF MANUSCRIPTS:** The publishers will provide FOUR manuscript pages (not printed pages) free of charge for any manuscript submitted for the Clinical Proceedings. All submitted manuscript pages will be charged US \$99.95 for each manuscript page submitted in excess of the page allotment, including title, author names, text, footnotes, references, legends, and illustrations. Please do not prepare a separate title page, and please do not put your manuscript in columns. Doing so will result in extra page charges. Each table or illustration is counted as one manuscript page due to the increased production time needed for this material. Your submission of a manuscript for the Clinical Proceedings will constitute expression of your commitment to defray all page charges in excess of FOUR for your manuscript.

**STYLE, ABBREVIATIONS, AND REFERENCES:** References must contain the full title of the citation. Authors are encouraged to refer to the *American Medical Association Manual of Style*, 9th Edition as a specific style guide. Your manuscript must be typewritten, doublespaced, single columned with a minimum of 1 inch margins on all four edges. Only standard size type in 11 point font may be used. The first page of your manuscript should begin with the title of the paper in capital letters, followed by the names of the authors. Please be sure to leave sufficient space at the bottom of the first page to provide for the name of the institution, as well as grant support. It is not necessary to create a separate title page. The ABSTRACT should be prepared according to the guidelines listed above and will be uploaded separate from the manuscript itself. DOUBLESPACE THE

MANUSCRIPT, FOOTNOTES, AND REFERENCES. Use of a smaller font, single spacing, or columns will result in an increase in the total number of manuscript pages and, therefore, additional page charges.

The Editors strongly recommend that authors use tables and/or figures to document the findings described in the manuscript. Abbreviations should be used sparingly unless they are commonly accepted such as RNA, Csa, etc. When such a word appears for the first time, it should be written out in full, followed by the abbreviation in parentheses. This abbreviation may then be used subsequently when referring to the same term. Abbreviations for titles of medical periodicals should conform to those used in the latest edition of *Index Medicus*. (A "List of Journals Indexed in Index Medicus" - with abbreviations is obtainable from the Superintendent of Documents, US Government Printing Office, Washington, DC 20402 at a modest charge.) References should be listed by number in the body of the text, and should be listed in the reference section in the same order in which they appear in the manuscript. Include authors' last names and initials, journal, volume, page, and year. Include the city and the publisher's name for books. Authors MUST submit the entire manuscript, including the abstract and any graphics, using Editorial Manager™ in a format programmed for PCs in Word Format (.doc) or Rich Text Format (.rtf).

**TABLES AND FIGURES:** All figures should be submitted in final form ready for publication (this includes all labeling, shading, arrows, and other aspects of the figure). Prepare your figures for reduction in size of at most 50% and ensure that the lettering does not vary in size. The final font size (after reduction) should be 6-8 point. The physical dimensions of your figures should match the dimension of the journal. Most figures will be reduced to fit one-column width (3 ¼ inches). Computer-generated illustrations and halftones/line/tones (either color or black & white) are acceptable. Figures should be submitted in a Graphics Format for PCs (.tif, .eps) on Editorial Manager™ along with the manuscript. Since we cannot guarantee that the online graphic files will be useable, original hardcopies of ALL ILLUSTRATIONS will be required by the publisher upon manuscript acceptance in all cases. Please note that there is an additional charge for color printing, therefore please ensure that your color illustrations are essential to your paper to avoid unnecessary charges. All illustrations should be provided as separate files and as hardcopy on separate sheets. Uniform lettering, sizing, type of software used, and logical naming for the artwork files is strongly encouraged when submitting electronically. Files may be submitted on floppy, ZIP, JAZ, or CD-ROM disks. Line graphs and bar charts should be sent in bitmap TIFF files with a minimum resolution of 1200 dpi, or as EPS files, with a preferred line width of 1 pt (minimum line width of 0.5 pt). Bitmap images should be sent as TIFF files and not placed within EPS files. Pictures, photographs and micrographs should be sent as Grayscale TIFF files with a minimum resolution of 300 dpi without lettering, and 500 dpi with lettering. Color images should be sent as CMYK-encoded TIFF images. RGB-encoded color images will be difficult to match for color. Graphs produced in software such as Excel or Word should be submitted in black and white (hard copy) with different types of dashed lines for total clarity. Please visit the publisher's website (<http://www.elsevier.com/locate/authorartwork>) for detailed instructions and visual guidelines.

**ALL ILLUSTRATIONS SHOULD SHOW OPTIMAL CLARITY OF DETAIL:** All photographs should be accompanied by a suitable descriptive text.

**REVIEW:** Manuscripts are reviewed by the Editor-in-Chief and two members of the Editorial Advisory Board. Authors will receive automatic communication from EDITORIAL MANAGER™ regarding the manuscript status and outcome of review.
