

Call for Papers for Special Issues of Aquatic Toxicology

Theme issues in Aquatic Toxicology will be started. As the first one, an issue on Amphibian Toxicology will be compiled.

Manuscripts that authors wish to be included should be submitted by May 31 on the EES site of Aquatic Toxicology (<http://ees.elsevier.com/aqtox>) for this special issue of Aquatic Toxicology. In addition, manuscripts gone through the normal submission channel and accepted for publication can be included in the issue at the authors' agreement.

Similarly, the next theme issue on "Zebrafish in Aquatic Toxicology" will be compiled with manuscript deadline at December 31, 2008.

The editors of the journal are happy to take any suggestions for theme issues that the readers may have.
