

# COMPUTERS & GRAPHICS

An International Journal of Systems & Applications in Computer Graphics

## AUTHOR INFORMATION PACK

### TABLE OF CONTENTS

●	<b>Description</b>	<b>p.1</b>
●	<b>Audience</b>	<b>p.1</b>
●	<b>Impact Factor</b>	<b>p.1</b>
●	<b>Abstracting and Indexing</b>	<b>p.2</b>
●	<b>Editorial Board</b>	<b>p.2</b>
●	<b>Guide for Authors</b>	<b>p.5</b>

ISSN: 0097-8493

### DESCRIPTION

*Computers & Graphics* is dedicated to disseminate information on research and applications of **computer graphics** (CG) techniques. The journal encourages articles on:

1. Research and applications of **interactive computer graphics**. We are particularly interested in novel interaction techniques and applications of CG to problem domains.
2. State-of-the-art papers on late-breaking, cutting-edge research on CG.
3. Information on innovative uses of graphics principles and technologies.
4. Tutorial papers on both teaching CG principles and innovative uses of CG in education.

*Computers & Graphics* provides a medium to communicate information concerning interactive CG and CG applications. The journal focuses on interactive computer graphics, visualization and novel input modalities including virtual environments, and, within this scope, on graphical models, data structures, languages, picture manipulation algorithms and related software.

#### Benefits to authors

We also provide many author benefits, such as free PDFs, a liberal copyright policy, special discounts on Elsevier publications and much more. Please click here for more information on our [author services](#).

Please see our [Guide for Authors](#) for information on article submission. If you require any further information or help, please visit our support pages: <http://support.elsevier.com>

### AUDIENCE

Information Technologists concerned with graphical man/machine interaction and the application of computer graphics, Researchers and Practitioners in architectural design, transportation systems and mathematical problem solving.

### IMPACT FACTOR

2013: 1.029 © Thomson Reuters Journal Citation Reports 2014

## EDITORIAL BOARD

---

### *Editor-in-Chief*

**Joaquim Jorge**, Depto. de Engenharia Informatica, IST/UTL, Avenida Rovisco Pais, 1000-049 Lisboa, Portugal  
Sketch-Based Interfaces and Modeling, Multimodal User Interfaces, Graphical Modeling

### *Associate Editors*

**Bedrich Benes**, Purdue University, West Lafayette, IN, USA  
Procedural Modeling, Simulation of Natural Phenomena, Geometry Processing

**Mark Billinghurst**, University of Canterbury, Christchurch, New Zealand  
Augmented Reality, Virtual Reality, 3D User Interfaces, Mobile and Wearable computing. HCI

**Mario Botsch**, Universität Bielefeld, Bielefeld, Germany  
Geometry Processing, Shape Deformation

**Stefan Bruckner**, University of Bergen, Bergen, Norway  
Biomedical Visualization, Visual Exploration, Volume Visualization, Illustrative Techniques

**Min Chen**, University of Wales, Ceredigion, UK  
Visualization and Computer Graphics, Video Processing and Visualization, Interactive Techniques and Multimedia Communications, Aspects of Image Analysis and Computer Vision

**Yiorgos Chrysanthou**, University of Cyprus, Nicosia, Cyprus  
Crowd simulation, animation, rendering, computer games

**John Collomosse**, University of Surrey, Guildford, Surrey, England, UK  
Non-photorealistic rendering, 3D Performance Capture, Sketch based visual search, Computer Vision, Machine Learning.

**Carsten Dachsbacher**, Karlsruhe Institute of Technology (KIT), Karlsruhe, Germany  
Interactive Rendering, Global Illumination, Visualization

**Julie Dorsey**, Yale University, New Haven, CT, USA  
Appearance Modeling, Rendering, Sketch-Based Interfaces and Modeling

**Elmar Eisemann**, Delft University of Technology, Delft, Netherlands  
Real-time rendering, Perceptual rendering, Non-photorealistic rendering, GPU

**Hongbo Fu**, City University of Hong Kong, Hong Kong, China

**Diego Gutierrez**, Universidad de Zaragoza, Zaragoza, Spain  
Computational imaging, rendering, applied perception

**Alexander Hornung**, The Walt Disney Company (Switzerland), Zurich, Switzerland  
Light fields, stereoscopy, image-based rendering and 3D reconstruction

**Shi-Min Hu**, Tsinghua University, Beijing, China  
Geometry processing, Image/Video processing, deformation and morphing

**Victoria Interrante**, University of Minnesota, Minneapolis, USA  
Virtual Reality, Applied Perception, Scientific and Information Visualization

**Tobias Isenberg**, Rijksuniversiteit Groningen, Groningen, Netherlands  
Non-photorealistic rendering, illustrative visualization, interactive visualization, large displays, direct-touch interaction

**Gudrun Klinker**, Technische Universität München, Garching bei München, Germany  
Augmented Reality, Virtual Reality, 3D User Interfaces

**Leif Kobbelt**, RWTH Aachen University (RWTH), Aachen, Germany

Geometry Processing, Curves and Surfaces, 3D Reconstruction, Interactive 3D Modeling  
**Tong-Yee Lee**, National Cheng Kung University, Tainan, Taiwan, ROC  
 Image/video resizing, NPR, focus+context visualization  
**Aditi Majumder**, University of California at Irvine, Irvine, CA, USA  
 Projection-Based Displays, Computational Cameras and Displays, Registration and Calibration, Image and Video Editing  
**Ralph Martin**, Cardiff University, Roath, Cardiff, UK  
 Solid and surface modeling, mesh processing, video processing  
**Victor Ostromoukhov**, Université de Lyon, Lyon, France  
 Photorealistic and Non-Photorealistic Rendering, Digital Halfoning, Sampling Theory, Color Science, Weird Math, Monte-Carlo and Quasi-Monte-Carlo Methods  
**Beryl Plimmer**, University of Auckland, Auckland, New Zealand  
 Sketching Interfaces, Digital Ink Recognition, Tangible Interfaces  
**Dirk Reiners**, University of Louisiana at Lafayette, Lafayette, LA, USA  
 Virtual Reality, Real-time Rendering, Visualization  
**Holly Rushmeier**, Yale University, New Haven, CT, USA  
 Rendering, 3D scanning, cultural heritage, perception  
**Faramarz Samavati**, University of Calgary, Calgary, AB, Canada  
 Computer Graphics, Modeling, Rendering, Animation, Visualization.  
**Luís Paulo Santos**, Universidade do Minho, Braga, Portugal  
 Interactive Rendering, Physically Based Global Illumination, Parallel Processing  
**Heidrun Schumann**, Universität Rostock, Rostock, Germany  
 Visual Analytics, Visualization of multivariate data in time and space, Graph Visualization, Scalable Visual Interfaces  
**Andrei Sharf**, Ben Gurion University of the Negev, Beersheva, Israel  
 Modeling, Geometry Processing, Interactive Techniques  
**Michela Spagnuolo**, IMATI - Institute of Applied Math & Information Technologies, Genova, Italy  
 Shape Modelling, Geometry Processing, Computational Topology, 3D Search and Retrieval  
**Oliver Staadt**, Universität Rostock, Rostock, Germany  
 Virtual Reality, Visual Computing, Telepresence  
**Anthony Steed**, University College London (UCL), London, England, UK  
 Virtual reality, networked graphics, 3D user interfaces  
**Lászlo Szirmay-Kalos**, Technical University of Budapest, Budapest, Hungary  
 Rendering, Global Illumination, Monte Carlo methods, Medical imaging, GPGPU  
**Ayellet Tal**, Technion - Israel Institute of Technology, Haifa, Israel  
 Geometry processing, Shape Analysis  
**Matthias Teschner**, Albert-Ludwigs-Universität Freiburg, Freiburg, Germany  
 Real-time rendering, Scientific Computing, Physical Simulation, Computer Animation, Computational Geometry, Collision Handling, and human perception of motion with applications in entertainment technology and medical simulation  
**Anna Vilanova i Bartrolí**, Technische Universiteit Eindhoven, Eindhoven, Netherlands  
 Medical visualization, Volume visualization, Multivalued visualization, Medical image analysis  
**Wenping Wang**, The University of Hong Kong, Pokfulam, Hong Kong, Hong Kong  
**Tim Weyrich**, University College London (UCL), London, England, UK  
 Appearance modelling, fabrication, digital humanities, point-based graphics  
**Michael Wimmer**, Technische Universität Wien, Wien, Austria  
 Real-time rendering, Shadows, Procedural modeling  
**Kai (Kevin) Xu**, National University of Defense Technology, Hunan, China  
 Data-driven Shape Analysis and Processing, Computer Vision, and Machine Learning in Graphics  
**KangKang Yin**, National University of Singapore (NUS), Singapore, Singapore  
 Physics-based Character Animation, Motion Control, Geometry Processing, Deformation  
**Anders Ynnerman**, Linköping University, Sweden  
 Medical Visualization, Astrovisualization, Volume Rendering, Immersive Visualization.  
**Jun-Hai Yong**, Tsinghua University, Beijing, China  
 Computer Aided Geometric Design, Geometric Modeling, Shape Analysis

#### ***Editor Emeritus***

**José Encarnação**, Technische Universität Darmstadt, Darmstadt, Germany

#### ***Editorial Advisory Board***

**Peter Bono**, Peter R. Bono Associates, Inc., Niantic, Connecticut, USA

**Bianca Falcidieno**, Torre Di Francia, Genova, Italy

Shape Modelling, Geometry Processing, Computational Topology, 3D Search and Retrieval

**Steven Feiner**, Columbia University, New York, NY, USA

Augmented Reality, Virtual Reality, 3D User Interfaces, Knowledge-Based Design of Graphics and Multimedia, Mobile and Wearable Computing, Computer Games

**James Foley**, Yamacraw Mission, Atlanta, GA, USA

**Henry Fuchs**, University of North Carolina at Chapel Hill, Chapel Hill, North Carolina, USA

**Ming C. Lin**, University of North Carolina at Chapel Hill, Chapel Hill, North Carolina, USA

**Werner Purgathofer**, Technische Universität Wien, Wien, Austria

Rendering, Virtual Reality, Color, Visualization

**Jarek Rossignac**, Georgia Institute of Technology, Atlanta, GA, USA

CSG, BRep, Steady Motions

**Vaclav Skala**, University of West Bohemia, Plzen, Czech Republic

Algorithms, Fundamental Algorithms, Visualization, Projective Geometry

**Wolfgang Strasser**, Eberhard-Karls-Universität Tübingen, Tübingen, Germany

**Lee Yong Tsui**, Nanyang Technological University, Singapore, Singapore

Computer graphics, geometric modelling, CAD/CAM, 3D data recovery

**Andries van Dam**, Brown University, Providence, RI, USA

**Brian Wyvill**, University of Victoria, Victoria, BC, Canada

Implicit Modelling, Computational Aesthetics, Non-Photo realistic rendering

## GUIDE FOR AUTHORS

---

*Computers & Graphics* is dedicated to disseminate information on research and applications of computer graphics (CG) techniques. The journal encourages articles on: 1. Research and applications of interactive computer graphics. We are particularly interested in novel interaction techniques and applications of CG to problem domains. 2. State-of-the-art papers on late-breaking, cutting-edge research on CG. 3. Information on innovative uses of graphics principles and technologies. 4. Tutorial papers on advanced CG topics and pedagogical papers on innovations in CG education or novel uses of CG in education.

*Computers & Graphics* provides a medium to communicate information concerning interactive CG and CG applications. The journal focuses on interactive computer graphics, visualization and novel input modalities including virtual environments, and, within this scope, on graphical models, data structures, languages, picture manipulation algorithms and related software.

### BEFORE YOU BEGIN

Be sure to read and follow the instructions below carefully before uploading. Please ensure your manuscript is set as double-column and that line numbers are included. For convenience, please use [this template](#) in addition to the [elsarticle class](#) for generating a LaTeX manuscript. The review process for this journal is double blind, so please remove any identifying items from your submission. Please **do not** submit any source files for your original manuscript. At this stage only a PDF of your manuscript, containing all figures, tables etc. should be provided. If a revised version of your paper is requested then source files should be uploaded at this stage.

### *Ethics in publishing*

For information on Ethics in publishing and Ethical guidelines for journal publication see <http://www.elsevier.com/publishingethics> and <http://www.elsevier.com/journal-authors/ethics>.

### Cover Letter

Each submission should be accompanied by a cover letter.

### In the Cover Letter, Please

- (1) provide a concise summary of the main contributions reported in your submission,
- (2) include the full reference and status (submitted, accepted, published) of the closest prior art, including your own, and
- (3) clarify how the material reported here differs from that prior art. This information should also be found in the manuscript itself. If a prior submission of your paper has been rejected, you may, if you wish, submit (as accompanying material) a description of what problems or concerns raised by the reviewers you have addressed in this version and how. This information may be particularly useful if we happen to invite a reviewer who has assessed your previous submission.

### Anonymization policy

Computers and Graphics uses double blind reviewing - i.e., during and after the review process, the reviewers are not supposed to know who the authors were, and authors are not supposed to know who reviewed their papers. Authors are asked to anonymize their submissions - submissions that are not appropriately anonymized will not be reviewed (except for extended versions of conference papers, see below). In particular, please mind the following: - Remove author and institutional identities (i.e., your name, the name of your university or company) from the title and header areas of the paper. - Remove any acknowledgements and references to funding agencies. - Keep citations to your previous work, so that reviewers can check that all relevant prior research has been taken into account, and cite your own work in the third person. Specifically you should avoid self references such as "As described in our previous work [4], " and preferably use "As described by Brian et al. [4], ".

### Extended Versions of Conference Papers

Computers and Graphics encourages authors of excellent conference papers to submit extended and significantly revised versions of their manuscripts to be considered for publication. Below are the guidelines for such submissions:

- (1) Submissions to the Journal should use a different title than the conference paper.

(2) The revised version should explicitly cite the conference paper. In particular, the revised introduction / related work section / paper should clearly state the extensions and changes as compared to the conference paper. These changes should also be reflected in the revised abstract and conclusions. This means that the anonymity of the authors cannot be kept secret, so for these extended submissions the anonymization policy described above does not hold. Please also include a copy of the original conference paper with the submission.

(3) Overall the submission should contain at least 30% new material (approximately 2-3 pages in case of an 8-page conference paper). New material could include more in-depth discussion of the presented technique (including new images), additional results, or new extensions or applications to the technology presented in the conference paper. While authors are encouraged to significantly reword their submissions, simply rewording the conference paper cannot count as new material.

### **Conflict of interest**

All authors are requested to disclose any actual or potential conflict of interest including any financial, personal or other relationships with other people or organizations within three years of beginning the submitted work that could inappropriately influence, or be perceived to influence, their work. See also <http://www.elsevier.com/conflictsofinterest>. Further information and an example of a Conflict of Interest form can be found at: [http://help.elsevier.com/app/answers/detail/a\\_id/286/p/7923](http://help.elsevier.com/app/answers/detail/a_id/286/p/7923).

### **Submission declaration and verification**

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis or as an electronic preprint, see <http://www.elsevier.com/postingpolicy>), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection service CrossCheck <http://www.elsevier.com/editors/plagdetect>.

### **Changes to authorship**

This policy concerns the addition, deletion, or rearrangement of author names in the authorship of accepted manuscripts:

*Before the accepted manuscript is published in an online issue:* Requests to add or remove an author, or to rearrange the author names, must be sent to the Journal Manager from the corresponding author of the accepted manuscript and must include: (a) the reason the name should be added or removed, or the author names rearranged and (b) written confirmation (e-mail, fax, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Requests that are not sent by the corresponding author will be forwarded by the Journal Manager to the corresponding author, who must follow the procedure as described above. Note that: (1) Journal Managers will inform the Journal Editors of any such requests and (2) publication of the accepted manuscript in an online issue is suspended until authorship has been agreed.

*After the accepted manuscript is published in an online issue:* Any requests to add, delete, or rearrange author names in an article published in an online issue will follow the same policies as noted above and result in a corrigendum.

### **Article transfer service**

This journal is part of our Article Transfer Service. This means that if the Editor feels your article is more suitable in one of our other participating journals, then you may be asked to consider transferring the article to one of those. If you agree, your article will be transferred automatically on your behalf with no need to reformat. Please note that your article will be reviewed again by the new journal. More information about this can be found here: <http://www.elsevier.com/authors/article-transfer-service>.

### **Copyright**

Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (for more information on this and copyright, see <http://www.elsevier.com/copyright>). An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the Publisher is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations

(please consult <http://www.elsevier.com/permissions>). If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. Elsevier has preprinted forms for use by authors in these cases: please consult <http://www.elsevier.com/permissions>.

For open access articles: Upon acceptance of an article, authors will be asked to complete an 'Exclusive License Agreement' (for more information see <http://www.elsevier.com/OAauthoragreement>). Permitted third party reuse of open access articles is determined by the author's choice of user license (see <http://www.elsevier.com/openaccesslicenses>).

### **Author rights**

As an author you (or your employer or institution) have certain rights to reuse your work. For more information on author rights for (a) subscription articles please see <http://www.elsevier.com/journal-authors/author-rights-and-responsibilities>; (b) for open access articles please see <http://www.elsevier.com/OAauthoragreement>.

### **Role of the funding source**

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

### **Funding body agreements and policies**

Elsevier has established a number of agreements with funding bodies which allow authors to comply with their funder's open access policies. Some authors may also be reimbursed for associated publication fees. To learn more about existing agreements please visit <http://www.elsevier.com/fundingbodies>.

### **Open access**

This journal offers authors a choice in publishing their research:

#### **Open access**

- Articles are freely available to both subscribers and the wider public with permitted reuse
- An open access publication fee is payable by authors or on their behalf e.g. by their research funder or institution

#### **Subscription**

- Articles are made available to subscribers as well as developing countries and patient groups through our universal access programs (<http://www.elsevier.com/access>).
- No open access publication fee payable by authors.

Your publication choice will have no effect on the peer review process or acceptance of submitted articles.

For open access articles, permitted third party (re)use is defined by the following Creative Commons user licenses:

#### *Creative Commons Attribution (CC BY)*

Lets others distribute and copy the article, create extracts, abstracts, and other revised versions, adaptations or derivative works of or from an article (such as a translation), include in a collective work (such as an anthology), text or data mine the article, even for commercial purposes, as long as they credit the author(s), do not represent the author as endorsing their adaptation of the article, and do not modify the article in such a way as to damage the author's honor or reputation.

#### *Creative Commons Attribution-NonCommercial-NoDerivs (CC BY-NC-ND)*

For non-commercial purposes, lets others distribute and copy the article, and to include in a collective work (such as an anthology), as long as they credit the author(s) and provided they do not alter or modify the article.

The open access publication fee for this journal is **\$2400**, excluding taxes. Learn more about Elsevier's pricing policy: <http://www.elsevier.com/openaccesspricing>.

## Language (usage and editing services)

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's WebShop (<http://webshop.elsevier.com/languageediting/>) or visit our customer support site (<http://support.elsevier.com>) for more information.

Please submit at <http://ees.elsevier.com/cag>.

## Referees

Please submit the names and institutional e-mail addresses of several potential referees. For more details, visit our [Support site](#). Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

## PREPARATION

### *Preferred Formats*

Although we accept submissions in different formats, PDF files produced using LaTeX are preferred. Always keep a backup copy of the electronic file for reference and safety. Save your files using the default extension of the program used.

### *Latex*

Please use the Elsevier "elsarticle" LaTeX style to prepare your document. It can be found here along with detailed instructions for LaTeX preparation: <http://www.elsevier.com/latex>. Please ensure your manuscript is set as double-column and that line numbers are included. For convenience, please use [this template](#) together with the elsarticle class. Please do not submit any source files for your **original** manuscript. At this stage only a PDF of your manuscript, containing all figures, tables etc. should be provided. If you need high-resolution versions of images, please provide them as attachments for reviewer convenience. If a **revised** version of your paper is requested, then source files should be uploaded at this stage. If the LaTeX file is suitable, proofs will be produced without the need to rekeying the text, thus considerably speeding up final copyediting.

Figures may be inserted in the usual way using an `\includegraphics` command, at the position in the article where they are cited.

Your LaTeX file will be most useful as input for the printed article if you obey the following rules of thumb:

1. Be consistent. If you use a macro for a phrase, use it throughout.
2. Use standard LaTeX mark-up. Do not hardcode your own layout for e.g. section headings, but use the usual LaTeX macro for this purpose.
3. Keep it simple. Do not define macros that accomplish complicated layout. They will also make the input process complicated.

## Article structure

### *Use of wordprocessing software*

It is important that the file be saved in the native format of the wordprocessor used. The text should be in double-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the wordprocessor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier: <http://www.elsevier.com/guidepublication>). Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on Electronic illustrations.

To avoid unnecessary errors you are strongly advised to use the "spell-check" and "grammar-check" functions of your wordprocessor.

### *Subdivision - numbered sections*

Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text'. Any subsection may be given a brief heading. Each heading should appear on its own separate line.

### *Introduction*

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

### *Appendices*

If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

### **Abstract**

A concise and factual abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, References should be avoided, but if essential, then cite the author(s) and year(s). Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

### *Graphical Abstract*

Please provide, when submitting your article, a graphical abstract. This comprises the title, authors and affiliations, identical to the article itself, a summary of about 25 words, and a pictogram: one figure representative of the work described. Maximum final dimensions of the pictogram are 5 x 5 cm: bear in mind readability after reduction, especially if using one of the figures from the article itself. Graphical abstracts will be collated to provide a contents list for rapid scanning.

### **Highlights**

Highlights are mandatory for this journal. They consist of a short collection of bullet points that convey the core findings of the article and should be submitted in a separate editable file in the online submission system. Please use 'Highlights' in the file name and include 3 to 5 bullet points (maximum 85 characters, including spaces, per bullet point). See <http://www.elsevier.com/highlights> for examples.

### **Keywords**

Immediately after the abstract, provide a maximum of 6 keywords, using American spelling and avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

### **Abbreviations**

Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article.

### **Acknowledgements**

Please upload acknowledgements as a separate file and do not include them at the end of your manuscript.

### **Units**

Follow internationally accepted rules and conventions: use the international system of units (SI). If other units are mentioned, please give their equivalent in SI.

### **Math formulae**

Please submit math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

### **Footnotes**

Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors can build footnotes into the text, and this feature may be used. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list.

### *Electronic artwork*

#### *General points*

- Make sure you use uniform lettering and sizing of your original artwork.

- Embed the used fonts if the application provides that option.
- Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Provide captions to illustrations separately.
- Size the illustrations close to the desired dimensions of the printed version.
- Submit each illustration as a separate file.

A detailed guide on electronic artwork is available on our website:

<http://www.elsevier.com/artworkinstructions>

**You are urged to visit this site; some excerpts from the detailed information are given here.**

#### *Formats*

If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format.

Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please 'Save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

EPS (or PDF): Vector drawings, embed all used fonts.

TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.

TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.

TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi.

#### **Please do not:**

- Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

#### Line drawings

The lettering and symbols, as well as other details, should have proportionate dimensions, so as not to become illegible or unclear after possible reduction; in general, the figures should be designed for a reduction factor of two to three. The degree of reduction will be determined by the Publisher. Illustrations will not be enlarged. Consider the page format of the journal when designing the illustrations.

Do not use any type of shading on computer-generated illustrations.

#### Photographs (halftones)

Remove non-essential areas of a photograph. Do not mount photographs unless they form part of a composite figure. Where necessary, insert a scale bar in the illustration (not below it), as opposed to giving a magnification factor in the caption.

#### *Color artwork*

Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF), or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color in the printed version. **For color reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article.** Please indicate your preference for color: in print or online only. For further information on the preparation of electronic artwork, please see <http://www.elsevier.com/artworkinstructions>.

Please note: Because of technical complications that can arise by converting color figures to 'gray scale' (for the printed version should you not opt for color in print) please submit in addition usable black and white versions of all the color illustrations.

#### *Figure captions*

Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (**not** on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

### *Text graphics*

Text graphics may be embedded in the text at the appropriate position. If you are working with LaTeX and have such features embedded in the text, these can be left. See further under Electronic artwork.

### **Tables**

Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate page(s) at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules.

### **References**

#### *Citation in text*

Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

#### *Web references*

As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

#### *Reference management software*

This journal has standard templates available in key reference management packages EndNote (<http://www.endnote.com/support/enstyles.asp>) and Reference Manager (<http://refman.com/support/rmstyles.asp>). Using plug-ins to wordprocessing packages, authors only need to select the appropriate journal template when preparing their article and the list of references and citations to these will be formatted according to the journal style which is described below.

#### *Reference style*

*Text:* Indicate references by number(s) in square brackets in line with the text. The actual authors can be referred to, but the reference number(s) must always be given.

*List:* Number the references (numbers in square brackets) in the list in the order in which they appear in the text.

#### *Examples:*

Reference to a journal publication:

[1] Van der Geer J, Hanraads JAJ, Lupton RA. The art of writing a scientific article. *J Sci Commun* 2010;163:51–9.

Reference to a book:

[2] Strunk Jr W, White EB. *The elements of style*. 4th ed. New York: Longman; 2000.

Reference to a chapter in an edited book:

[3] Mettam GR, Adams LB. How to prepare an electronic version of your article. In: Jones BS, Smith RZ, editors. *Introduction to the electronic age*, New York: E-Publishing Inc; 2009, p. 281–304.

Note shortened form for last page number. e.g., 51–9, and that for more than 6 authors the first 6 should be listed followed by 'et al.' For further details you are referred to 'Uniform Requirements for Manuscripts submitted to Biomedical Journals' (*J Am Med Assoc* 1997;277:927–34) (see also [http://www.nlm.nih.gov/bsd/uniform\\_requirements.html](http://www.nlm.nih.gov/bsd/uniform_requirements.html)).

#### *Journal abbreviations source*

Journal names should be abbreviated according to the List of Title Word Abbreviations: <http://www.issn.org/services/online-services/access-to-the-ltwa/>.

### **Video data**

Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file's content. In order to ensure that your video or animation material is directly

usable, please provide the files in one of our recommended file formats with a preferred maximum size of 50 MB. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect: <http://www.sciencedirect.com>. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our video instruction pages at <http://www.elsevier.com/artworkinstructions>. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

### **AudioSlides**

The journal encourages authors to create an AudioSlides presentation with their published article. AudioSlides are brief, webinar-style presentations that are shown next to the online article on ScienceDirect. This gives authors the opportunity to summarize their research in their own words and to help readers understand what the paper is about. More information and examples are available at <http://www.elsevier.com/audioslides>. Authors of this journal will automatically receive an invitation e-mail to create an AudioSlides presentation after acceptance of their paper.

### **Supplementary data**

Elsevier accepts electronic supplementary material to support and enhance your scientific research. Supplementary files offer the author additional possibilities to publish supporting applications, high-resolution images, background datasets, sound clips and more. Supplementary files supplied will be published online alongside the electronic version of your article in Elsevier Web products, including ScienceDirect: <http://www.sciencedirect.com>. In order to ensure that your submitted material is directly usable, please provide the data in one of our recommended file formats. Authors should submit the material in electronic format together with the article and supply a concise and descriptive caption for each file. For more detailed instructions please visit our artwork instruction pages at <http://www.elsevier.com/artworkinstructions>.

### **MATLAB FIG files**

MATLAB FIG files (optional): You can enrich your online articles by providing supplementary MATLAB figure files with the .FIG file extension. These files will be visualized using an interactive viewer that allows readers to explore your figures within the article. The FIG files can be uploaded in our online submission system, and will be made available to download from your online article on ScienceDirect. For more information, please see <http://www.elsevier.com/matlab>.

### **Interactive plots**

This journal encourages you to include data and quantitative results as interactive plots with your publication. To make use of this feature, please include your data as a CSV (comma-separated values) file when you submit your manuscript. Please refer to <http://www.elsevier.com/interactiveplots> for further details and formatting instructions.

### **Submission checklist**

The following list will be useful during the final checking of an article prior to sending it to the journal for review. Please consult this Guide for Authors for further details of any item.

#### **Ensure that the following items are present:**

One author has been designated as the corresponding author with contact details:

- E-mail address
- Full postal address
- Phone numbers

All necessary files have been uploaded, and contain:

- Keywords
- All figure captions
- All tables (including title, description, footnotes)

Further considerations

- Manuscript has been 'spell-checked' and 'grammar-checked'
- References are in the correct format for this journal
- All references mentioned in the Reference list are cited in the text, and vice versa
- Permission has been obtained for use of copyrighted material from other sources (including the Internet)

Printed version of figures (if applicable) in color or black-and-white

- Indicate clearly whether or not color or black-and-white in print is required.

- For reproduction in black-and-white, please supply black-and-white versions of the figures for printing purposes.

For any further information please visit our customer support site at <http://support.elsevier.com>.

- Please review and approve your submission after your files have been uploaded.
- Please note that you should consider your submission as incomplete until you receive an email confirming receipt of your manuscript.
- Please note that even though manuscript source files are converted to PDF at submission for the review process, these source files are needed for further processing after acceptance.

## **AFTER ACCEPTANCE**

### **Use of the Digital Object Identifier**

The Digital Object Identifier (DOI) may be used to cite and link to electronic documents. The DOI consists of a unique alpha-numeric character string which is assigned to a document by the publisher upon the initial electronic publication. The assigned DOI never changes. Therefore, it is an ideal medium for citing a document, particularly 'Articles in press' because they have not yet received their full bibliographic information. Example of a correctly given DOI (in URL format; here an article in the journal *Physics Letters B*):

<http://dx.doi.org/10.1016/j.physletb.2010.09.059>

When you use a DOI to create links to documents on the web, the DOIs are guaranteed never to change.

### **Proofs**

One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or, a link will be provided in the e-mail so that authors can download the files themselves. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to download Adobe Reader version 9 (or higher) available free from <http://get.adobe.com/reader>. Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the Adobe site: <http://www.adobe.com/products/reader/tech-specs.html>.

If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and return by fax, or scan the pages and e-mail, or by post. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

### **Offprints**

The corresponding author, at no cost, will be provided with a personalized link providing 50 days free access to the final published version of the article on [ScienceDirect](http://www.sciencedirect.com). This link can also be used for sharing via email and social networks. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier's WebShop (<http://webshop.elsevier.com/myarticleservices/offprints>). Authors requiring printed copies of multiple articles may use Elsevier WebShop's 'Create Your Own Book' service to collate multiple articles within a single cover (<http://webshop.elsevier.com/myarticleservices/booklets>).

## **AUTHOR INQUIRIES**

You can track your submitted article at [http://help.elsevier.com/app/answers/detail/a\\_id/89/p/8045/](http://help.elsevier.com/app/answers/detail/a_id/89/p/8045/). You can track your accepted article at <http://www.elsevier.com/trackarticle>. You are also welcome to contact Customer Support via <http://support.elsevier.com>.
