DESCRIPTION

The International Dairy Journal publishes research and critical reviews that advance **dairy science and technology, and nutritional and health aspects of dairy foods**. Within this scope, the journal pays particular attention to applied research and its interface with the dairy industry.

The journal communicates research in dairy science that is of significant relevance to the broader international community, including the research and development of dairy products from milk of bovine and non-bovine species.

The journal's coverage includes:

- Biosynthesis, chemistry and physico-chemical properties of milk constituents
- Microbiology, enzymology, biotechnology
- New developments in processing and engineering
- Relevant emulsion science, food structure and texture
- Raw material quality and effect on relevant products
- Flavour and off flavour development
- Technological functionality and applications of dairy ingredients
- Relevant sensory science/consumer studies
- Analytical techniques
- Nutrition and substantiation of human health implications of milk components or dairy products

Unless there is a clear relationship to dairy technology, human health or final product quality, *International Dairy Journal* does not publish papers related to milk production, animal health and other aspects of on-farm milk production.

Benefits to authors

We also provide many author benefits, such as free PDFs, a liberal copyright policy, special discounts on Elsevier publications and much more. Please click here for more information on our [author services](#).

Please see our [Guide for Authors](#) for information on article submission. If you require any further information or help, please visit our support pages: <http://support.elsevier.com>

GUIDE FOR AUTHORS

INTRODUCTION

The International Dairy Journal publishes research and critical reviews that advance **dairy science and technology, and nutritional and health aspects of dairy foods**. Within this scope, the journal pays particular attention to applied research and its interface with the dairy industry.

The journal communicates research in dairy science that is of significant relevance to the broader international community, including the research and development of dairy products from milk of bovine and non-bovine species.

The journal's coverage includes:

- Biosynthesis, chemistry and physico-chemical properties of milk constituents
- Microbiology, enzymology, biotechnology
- New developments in processing and engineering
- Relevant emulsion science, food structure and texture
- Raw material quality and effect on relevant products
- Flavour and off flavour development
- Technological functionality and applications of dairy ingredients
- Relevant sensory science/consumer studies
- Analytical techniques
- Nutrition and substantiation of human health implications of milk components or dairy products

Unless there is a clear relationship to dairy technology, human health or final product quality, *International Dairy Journal* does not publish papers related to milk production, animal health and other aspects of on-farm milk production.

Types of paper

Original full-length research papers should contain material that has not been previously published elsewhere, except in a preliminary form. These papers should not exceed 8000 words (text and references) or about 25 manuscript pages.

Critical Review papers will be accepted in areas of topical interest. These papers should not exceed 10,000 words.

Short Communications are research papers constituting a concise but complete description of a limited investigation, which will not be included in a later paper. Short Communications should be as completely documented, both by reference to literature, and description of the experimental procedures employed, as a regular paper. They should not occupy more than 2,000 words or about 8 manuscript pages, including figures, tables and references. They will be reviewed in the same way as research papers.

Letters to the Editor are published from time to time on subjects of topical interest.

Submission of Revised Papers

Revised papers received more than three months after reviewers' comments were sent may be treated as new submissions, at the discretion of the Editor. If the author has not replied to reminders/enquiries about revisions within 6 months, the paper will be considered to have lapsed, and any subsequent submission will be treated as a new submission and must be submitted to the journal using the above process, addressed to the Editor-in-Chief, with an explanation that it had previously been submitted to the journal.

Questions regarding content of a proposed submission can be directed to the Editor-in-Chief:

International Dairy Journal
c/o Professor P. Jelen, Editor-in-Chief
University of Alberta
Alberta, Canada
E-mail: idj.jelen@interbaun.com

Contact details for submission

Submission of all types of manuscripts to *International Dairy Journal* proceeds totally online. Via the Elsevier Editorial System (EES) website for this journal (<http://ees.elsevier.com/inda>) you will be guided step-by-step through the creation and uploading of the various files.

BEFORE YOU BEGIN

Ethics in publishing

For information on Ethics in publishing and Ethical guidelines for journal publication see <http://www.elsevier.com/publishingethics> and <http://www.elsevier.com/journal-authors/ethics>.

Plagiarism and Ethical Concerns

By submitting this manuscript, the authors agree that text, equations, or figures from previously published articles or books have been clearly identified in full and their origin clearly explained in the adjacent text, with appropriate references given at the end of the paper. Duplication of text is rarely justified, even with diligent referencing. Exceptions may be made for descriptions of standard experimental techniques, or other standard methods used by the author in the investigation; but an appropriate citation is preferable. Authors who duplicate material from their own published work in a new article, without clearly identifying the repeated material and its source as outlined above, are self-plagiarising.

Human and animal rights

If the work involves the use of animal or human subjects, the author should ensure that the work described has been carried out in accordance with The Code of Ethics of the World Medical Association (Declaration of Helsinki) for experiments involving humans <http://www.wma.net/en/30publications/10policies/b3/index.html>; EU Directive 2010/63/EU for animal experiments http://ec.europa.eu/environment/chemicals/lab_animals/legislation_en.htm; Uniform Requirements for manuscripts submitted to Biomedical journals <http://www.icmje.org>. Authors should include a statement in the manuscript that informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

Conflict of interest

All authors are requested to disclose any actual or potential conflict of interest including any financial, personal or other relationships with other people or organizations within three years of beginning the submitted work that could inappropriately influence, or be perceived to influence, their work. See also <http://www.elsevier.com/conflictsofinterest>. Further information and an example of a Conflict of Interest form can be found at: http://help.elsevier.com/app/answers/detail/a_id/286/p/7923.

Submission declaration and verification

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis or as an electronic preprint, see <http://www.elsevier.com/postingpolicy>), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection service CrossCheck <http://www.elsevier.com/editors/plagdetect>.

Changes to authorship

This policy concerns the addition, deletion, or rearrangement of author names in the authorship of accepted manuscripts:

Before the accepted manuscript is published in an online issue: Requests to add or remove an author, or to rearrange the author names, must be sent to the Journal Manager from the corresponding author of the accepted manuscript and must include: (a) the reason the name should be added or removed, or the author names rearranged and (b) written confirmation (e-mail, fax, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Requests that are not sent by the corresponding author will be forwarded by the Journal Manager to the corresponding author, who must follow the procedure as described above. Note that: (1) Journal Managers will inform the Journal Editors of any such requests and (2) publication of the accepted manuscript in an online issue is suspended until authorship has been agreed.

After the accepted manuscript is published in an online issue: Any requests to add, delete, or rearrange author names in an article published in an online issue will follow the same policies as noted above and result in a corrigendum.

Copyright

This journal offers authors a choice in publishing their research: Open access and Subscription.

For subscription articles

Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (for more information on this and copyright, see <http://www.elsevier.com/copyright>). An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the Publisher is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations (please consult <http://www.elsevier.com/permissions>). If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. Elsevier has preprinted forms for use by authors in these cases: please consult <http://www.elsevier.com/permissions>.

For open access articles

Upon acceptance of an article, authors will be asked to complete an 'Exclusive License Agreement' (for more information see <http://www.elsevier.com/OAauthoragreement>). Permitted reuse of open access articles is determined by the author's choice of user license (see <http://www.elsevier.com/openaccesslicenses>).

Retained author rights

As an author you (or your employer or institution) retain certain rights. For more information on author rights for:

Subscription articles please see <http://www.elsevier.com/journal-authors/author-rights-and-responsibilities>.

Open access articles please see <http://www.elsevier.com/OAauthoragreement>.

Role of the funding source

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

Funding body agreements and policies

Elsevier has established agreements and developed policies to allow authors whose articles appear in journals published by Elsevier, to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit <http://www.elsevier.com/fundingbodies>.

Open access

This journal offers authors a choice in publishing their research:

Open access

- Articles are freely available to both subscribers and the wider public with permitted reuse
- An open access publication fee is payable by authors or their research funder

Subscription

- Articles are made available to subscribers as well as developing countries and patient groups through our access programs (<http://www.elsevier.com/access>)
- No open access publication fee

All articles published open access will be immediately and permanently free for everyone to read and download. Permitted reuse is defined by your choice of one of the following Creative Commons user licenses:

Creative Commons Attribution (CC BY): lets others distribute and copy the article, to create extracts, abstracts, and other revised versions, adaptations or derivative works of or from an article (such as a translation), to include in a collective work (such as an anthology), to text or data mine the article, even for commercial purposes, as long as they credit the author(s), do not represent the author as endorsing their adaptation of the article, and do not modify the article in such a way as to damage the author's honor or reputation.

Creative Commons Attribution-NonCommercial-ShareAlike (CC BY-NC-SA): for non-commercial purposes, lets others distribute and copy the article, to create extracts, abstracts and other revised versions, adaptations or derivative works of or from an article (such as a translation), to include in a collective work (such as an anthology), to text and data mine the article, as long as they credit the author(s), do not represent the author as endorsing their adaptation of the article, do not modify the article in such a way as to damage the author's honor or reputation, and license their new adaptations or creations under identical terms (CC BY-NC-SA).

Creative Commons Attribution-NonCommercial-NoDerivs (CC BY-NC-ND): for non-commercial purposes, lets others distribute and copy the article, and to include in a collective work (such as an anthology), as long as they credit the author(s) and provided they do not alter or modify the article.

To provide open access, this journal has a publication fee which needs to be met by the authors or their research funders for each article published open access.

Your publication choice will have no effect on the peer review process or acceptance of submitted articles.

The open access publication fee for this journal is **\$3,000**, excluding taxes. Learn more about Elsevier's pricing policy: <http://www.elsevier.com/openaccesspricing>.

Language (usage and editing services)

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's WebShop (<http://webshop.elsevier.com/languageediting/>) or visit our customer support site (<http://support.elsevier.com>) for more information.

Authors are strongly advised that papers not conforming to the required standards will be rejected without review.

Submission

Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

Authors must provide and use an email address unique to themselves and not shared with another author registered in EES, or a department.

Referees

Please submit the names and institutional e-mail addresses of several potential referees. For more details, visit our [Support site](#). Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

It is the journal's policy to keep the peer review process anonymous. The name of a reviewer will only be revealed with the approval of the reviewer. When submitting a manuscript, authors may indicate names of experts who are not suitable/appropriate for reviewing the paper.

PREPARATION

Use of wordprocessing software

It is important that the file be saved in the native format of the wordprocessor used. The text should be in single-column format, and double-spaced throughout. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the wordprocessor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are

using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier: <http://www.elsevier.com/guidepublication>). Note that source files of figures, tables and text graphics will be required, submissions to *International Dairy Journal* should not have tables or figures embedded in the text. See also the section on Electronic artwork.

To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your wordprocessor.

All pages of the manuscript must be numbered. All lines must be numbered continuously throughout the manuscript. Line spacing should be at least 1.5 - do not use single line spacing.

Article structure

Subdivision - numbered sections

Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text'. Any subsection may be given a brief heading. Each heading should appear on its own separate line.

Introduction

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

Material and methods

Provide sufficient detail to allow the work to be reproduced. Methods already published should be indicated by a reference: only relevant modifications should be described.

Results

Results should be clear and concise.

Discussion

This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

Conclusions

The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

Conclusions must not reiterate any discussion or introductory comments, they must be genuine conclusions drawn from the results of the study.

Appendices

If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

Essential title page information

- **Title.** Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
- **Author names and affiliations.** Where the family name may be ambiguous (e.g., a double name), please indicate this clearly. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
- **Corresponding author.** Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. **Ensure that phone numbers (with country and area code) are provided in addition to the e-mail address and the complete postal address. Contact details must be kept up to date by the corresponding author.**
- **Present/permanent address.** If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

- A concise and factual abstract is required.

Units and Abbreviations

System International (SI) units must be used. You may wish to consult the website of the Bureau International des Poids et Mesures for guidance, <http://www1.bipm.org/en/si>.

Abbreviations for units should follow British Standards Institute standard *SI units and recommendations for the use of their multiples and of certain other units* (BS ISO 1000:1992, supersedes BS 5555). Further information is available on the BSI website <http://www.bsi-global.com>. The unit 'litre' must be abbreviated as 'L' (also mL, μ L, etc.). Use the negative index system for all combinations of unit abbreviations (e.g. g mL⁻¹, not g/mL). However, the solidus can be used in cases of % w/w or % w/v. The unit billion (10⁹ in America, 10¹² in Europe) must not be used as it is ambiguous. Temperatures should be given in degrees Celsius (e.g. 37 °C).

In general, the journal follows the conventions of the *CBE Style Manual* (Council of Biology Editors, Bethesda, MD, 1983, 5th edn). Follow *Chemical Abstracts* and its indexes for chemical names. Enzyme nomenclature should follow the IUBMB Enzyme Commission recommendations (<http://www.chem.qmul.ac.uk/enzyme/>) (relevant EC numbers should be given). Standard abbreviations of units of measurement should be used to identify the data. Please ensure that all figures have axes labelled properly, and the quantities on the axes specify the units used (use the negative index system, e.g. g mL⁻¹, not g/mL). Tables should not duplicate results presented in the manuscript as a different form (e.g. in graphs).

Abbreviations should be defined in brackets after their first mention in the text. Standard units of measurements and chemical symbols of elements may be used without definition in the body of the paper.

Milk is considered to be a "mass" or "non-countable" noun. Other such examples are ice, rice, wool, air, oxygen, weather, furniture, traffic, advice, sunshine, harm and so on. These nouns can be preceded by some, any, enough, this, that, and much. It is appropriate to precede these nouns with a definite or indefinite article - for example, the sunshine, the ice - but they frequently appear with no article. As milk is considered to be a non-countable noun, it is generally grammatically incorrect to use the term milks, except in some limited uses. What is generally "counted" are the samples or cartons or types of milk.

Acknowledgements

Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

Database linking

Elsevier encourages authors to connect articles with external databases, giving their readers one-click access to relevant databases that help to build a better understanding of the described research. Please refer to relevant database identifiers using the following format in your article: Database: xxxx (e.g., TAIR: AT1G01020; CCDC: 734053; PDB: 1XFN). See <http://www.elsevier.com/databaselinking> for more information and a full list of supported databases.

Formulae and Equations

- Formulae must be typewritten, each on a separate line. Leave ample space around the formulae.
- Subscripts and superscripts should be clear.
- Take special care to show clearly the difference between zero (0) and the letter O, and between one (1) and the letter l.
- Give the meaning of all symbols immediately after the equation in which they are first used.
- For simple fractions use the solidus (/) instead of a horizontal line.
- All equations should be numbered serially at the right-hand side in parentheses.
- The use of fractional powers instead of root signs is recommended. Also powers of e are often more conveniently denoted by exp.
- Levels of statistical significance which can be mentioned without further explanation are $P < 0.05$, $P < 0.01$ and $P < 0.001$.
- In chemical formulae, valence of ions must be given as e.g. Ca²⁺ and CO₃²⁻, not as Ca⁺⁺ or CO₃⁻⁻.
- Isotope numbers should precede the symbols, e.g. ¹⁸O.

- The repeated writing of complicated chemical formulae in the text is to be avoided where reasonably possible; instead, the name of the compound followed by its abbreviation (ethylene-diamine-tetra-acetic acid, EDTA) should be given in full. The abbreviation is to be used in the case of a very long name or in the case of a compound being described as the end product of a gravimetric determination (e.g. phosphate as P2O5).

Footnotes

Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors can build footnotes into the text, and this feature may be used. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list.

Artwork

Electronic artwork

General points

- Make sure you use uniform lettering and sizing of your original artwork.
- Embed the used fonts if the application provides that option.
- Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Provide captions to illustrations separately.
- Size the illustrations close to the desired dimensions of the printed version.
- Submit each illustration as a separate file.

A detailed guide on electronic artwork is available on our website:

<http://www.elsevier.com/artworkinstructions>

You are urged to visit this site; some excerpts from the detailed information are given here.

Formats

If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format.

Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please 'Save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

EPS (or PDF): Vector drawings, embed all used fonts.

TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.

TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.

TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi.

Please do not:

- Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

Color artwork

Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF), or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color in the printed version. **For color reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article.** Please indicate your preference for color: in print or online only. For further information on the preparation of electronic artwork, please see <http://www.elsevier.com/artworkinstructions>.

Please note: Because of technical complications that can arise by converting color figures to 'gray scale' (for the printed version should you not opt for color in print) please submit in addition usable black and white versions of all the color illustrations.

Figure captions

Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (**not** on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

Tables

Number tables consecutively in accordance with their appearance in the text. Make sure each table has a caption placed on top of the table. Place footnotes to tables below the table body and indicate them with superscript lowercase letters. Avoid vertical rules. Be sparing in the use of tables and ensure that the data presented in tables do not duplicate results described elsewhere in the article.

References

Citation in text

Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

All citations in the text should refer to:

1. Single author: the author's name (without initials, unless there is ambiguity) and the year of publication (Smith, 2003);
2. Two authors: both authors' names and the year of publication (Smith & Jones, 2004);
3. Three, four or five authors: all authors names and year of publication (Smith, Jones, & Brown, 2005). For all subsequent citations of this work use et al. (Smith et al., 2005).
4. Six or more authors: first author's name followed by et al. and the year of publication (Black et al., 2007).

Citations may be made directly or parenthetically. Groups of references should be listed first alphabetically, then chronologically. Examples: "as demonstrated (Allan, 1996a, b, 1999; Allan & Jones, 1995; Allen et al., 1994). Kramer et al. (2000) have recently shown..."

Web references

As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

References in a special issue

Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

Reference management software

This journal has standard templates available in key reference management packages EndNote (<http://www.endnote.com/support/enstyles.asp>) and Reference Manager (<http://refman.com/support/rmstyles.asp>). Using plug-ins to wordprocessing packages, authors only need to select the appropriate journal template when preparing their article and the list of references and citations to these will be formatted according to the journal style which is described below.

5: APA (American Psychological Association)

Text: Citations in the text should follow the referencing style used by the American Psychological Association. You are referred to the Publication Manual of the American Psychological Association, Sixth Edition, ISBN 978-1-4338-0561-5, copies of which may be ordered from <http://books.apa.org/books.cfm?id=4200067> or APA Order Dept., P.O.B. 2710, Hyattsville, MD 20784, USA or APA, 3 Henrietta Street, London, WC3E 8LU, UK.

List: references should be arranged first alphabetically and then further sorted chronologically if necessary. More than one reference from the same author(s) in the same year must be identified by the letters 'a', 'b', 'c', etc., placed after the year of publication.

Examples:

Reference to a journal publication:

Guggisberg, D., Cuthbert-Steven, J., Piccinali, P., Bütikofer, U., & Eberhard, P. (2009). Rheological, microstructural and sensory characterization of low-fat and whole milk set yoghurt as influenced by inulin addition. *International Dairy Journal*, 19, 107-115.

Reference to a book:

Fox, P. F., Guinee, T. P., Cogan, T. M., & McSweeney, P. L. H. (2000). *Fundamentals of cheese science* (1st edn., Chapt. 10). Gaithersburg, MD, USA: Aspen Publishers, Inc.

Reference to a chapter in an edited book:

Gripon, J. C., Monnet, V., Lamberet, G., & Desmazeaud, M. J. (1991). Microbial enzymes in cheese ripening. In P. F. Fox (Ed.), *Food enzymes* (pp. 131-168). London, UK: Elsevier Applied Science.

Patent Reference:

Boots, J. -W. P. (2009). *Protein hydrolysate enriched in peptides inhibiting DPP-IV and their use*. Patent 11/722,667 (US 2009/0075904) Campina Nederland Holding B.V., Amsterdam, The Netherlands.

Thesis or dissertation:

Mcleod, J. (2007). *Nucleation and growth of alpha lactose monohydrate*. PhD thesis, Massey University. Palmerston North, New Zealand. Retrieved insert the date from <http://mro.massey.ac.nz/handle/10179/1444>.

AOAC Methods:

AOAC. (2005). *Babcock method, method no. 989.04*. In W. Horowitz (Ed.), *Official methods of analysis of AOAC International* (18th ed.). (pp. 19-21). Gaithersburg, MD, USA: AOAC International.

IDF/ISO Methods:

ISO/IDF. (2010). *Current situation and compilation of commercially available screening methods for the detection of inhibitors/antibiotic residues in milk*. *IDF bulletin N° 42*. Brussels, Belgium: International Dairy Federation.

Video data

Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file's content. In order to ensure that your video or animation material is directly usable, please provide the files in one of our recommended file formats with a preferred maximum size of 50 MB. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect: <http://www.sciencedirect.com>. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our video instruction pages at <http://www.elsevier.com/artworkinstructions>. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

AudioSlides

The journal encourages authors to create an AudioSlides presentation with their published article. AudioSlides are brief, webinar-style presentations that are shown next to the online article on ScienceDirect. This gives authors the opportunity to summarize their research in their own words and to help readers understand what the paper is about. More information and examples are available at <http://www.elsevier.com/audioslides>. Authors of this journal will automatically receive an invitation e-mail to create an AudioSlides presentation after acceptance of their paper.

Supplementary Data

International Dairy Journal accepts certain types of electronic supplementary material to support and enhance your scientific research. Supplementary files can be considered as allowable if they support the key messages in the paper. Within the scope of International Dairy Journal, supplementary material could consist of e.g., full lists of volatiles analyzed, full lists of bacteria identified, procedures for the synthesis of chemicals, the background to mathematical modelling applied or microscopy images. In all cases, the author should provide in the cover letter valid reasons as to why any supplementary material needs to be published. Short communications are generally not appropriate vehicles for extensive additional data and should not contain supplementary data. Not allowed as supplementary material are data that do not support the key message in the paper or containing information previously described in other papers (including materials and methods). Supplementary information will be reviewed by expert reviewers and the handling editor(s) according to the same standards as the main article. Supplementary files deemed appropriate will be published online alongside the electronic version of your article in Elsevier Web products, including ScienceDirect: <http://www.sciencedirect.com>. In order to ensure that your submitted material is directly usable, please provide the data in one of our recommended file formats. Authors should

submit the material in electronic format together with the article and supply a concise and descriptive caption for each file. For more detailed instructions please visit our artwork instruction pages at <http://www.elsevier.com/artworkinstructions>.

Submission checklist

The following list will be useful during the final checking of an article prior to sending it to the journal for review. Please consult this Guide for Authors for further details of any item.

Ensure that the following items are present:

One author has been designated as the corresponding author with contact details:

- E-mail address
- Full postal address
- Phone numbers

All necessary files have been uploaded, and contain:

- All figure captions
- All tables (including title, description, footnotes)

Further considerations

- Manuscript has been 'spell-checked' and 'grammar-checked'
- References are in the correct format for this journal
- All references mentioned in the Reference list are cited in the text, and vice versa
- Permission has been obtained for use of copyrighted material from other sources (including the Web)
- Color figures are clearly marked as being intended for color reproduction on the Web (free of charge) and in print, or to be reproduced in color on the Web (free of charge) and in black-and-white in print
- If only color on the Web is required, black-and-white versions of the figures are also supplied for printing purposes

For any further information please visit our customer support site at <http://support.elsevier.com>.

AFTER ACCEPTANCE

Use of the Digital Object Identifier

The Digital Object Identifier (DOI) may be used to cite and link to electronic documents. The DOI consists of a unique alpha-numeric character string which is assigned to a document by the publisher upon the initial electronic publication. The assigned DOI never changes. Therefore, it is an ideal medium for citing a document, particularly 'Articles in press' because they have not yet received their full bibliographic information. Example of a correctly given DOI (in URL format; here an article in the journal *Physics Letters B*):

<http://dx.doi.org/10.1016/j.physletb.2010.09.059>

When you use a DOI to create links to documents on the web, the DOIs are guaranteed never to change.

Proofs

One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or, a link will be provided in the e-mail so that authors can download the files themselves. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to download Adobe Reader version 9 (or higher) available free from <http://get.adobe.com/reader>. Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the Adobe site: <http://www.adobe.com/products/reader/tech-specs.html>.

If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and return by fax, or scan the pages and e-mail, or by post. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

Offprints

The corresponding author, at no cost, will be provided with a personalized link providing 50 days free access to the final published version of the article on [ScienceDirect](#). This link can also be used for sharing via email and social networks. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier's WebShop (<http://webshop.elsevier.com/myarticleservices/offprints>). Authors requiring printed copies of multiple articles may use Elsevier WebShop's 'Create Your Own Book' service to collate multiple articles within a single cover (<http://webshop.elsevier.com/myarticleservices/booklets>).

AUTHOR INQUIRIES

You can track your submitted article at http://help.elsevier.com/app/answers/detail/a_id/89/p/8045/. You can track your accepted article at <http://www.elsevier.com/trackarticle>. You are also welcome to contact Customer Support via <http://support.elsevier.com>.
