NEURAL NETWORKS
The Official Journal of the International Neural Network Society, European Neural Network Society & Japanese Neural Network Society

TABLE OF CONTENTS

ISSN: 0893-6080

DESCRIPTION

Neural Networks is the archival journal of the world's three oldest neural modeling societies: the International Neural Network Society (INNS), the European Neural Network Society (ENNS), and the Japanese Neural Network Society (JNNS). A subscription to the journal is included with membership in each of these societies.

Neural Networks provides a forum for developing and nurturing an international community of scholars and practitioners who are interested in all aspects of **neural networks** and related approaches to **computational intelligence**. *Neural Networks* welcomes high quality submissions that contribute to the full range of neural networks research, from behavioral and brain modeling, learning algorithms, through mathematical and computational analyses, to engineering and technological applications of systems that significantly use **neural network concepts** and techniques. This uniquely broad range facilitates the cross-fertilization of ideas between biological and technological studies, and helps to foster the development of the interdisciplinary community that is interested in biologically-inspired **computational intelligence**. Accordingly, *Neural Networks* editorial board represents experts in fields including psychology, neurobiology, computer science, engineering, mathematics, and physics. The journal publishes articles, letters and reviews, as well as letters to the editor, editorials, current events, software surveys, and patent information. Articles are published in one of five sections: Cognitive Science, Neuroscience, Learning Systems, Mathematical and Computational Analysis, Engineering and Applications.

The journal is published twelve times a year. *Neural Networks* can be accessed electronically via Science Direct (http://www.sciencedirect.com/science/journal/08936080), which is used by over eight million individuals world-wide.

Benefits to authors

We also provide many author benefits, such as free PDFs, a liberal copyright policy, special discounts on Elsevier publications and much more. Please click here for more information on our author services.

Please see our Guide for Authors for information on article submission. If you require any further information or help, please visit our support pages: http://support.elsevier.com

AUDIENCE

Computer scientists, artificial intelligence developers, electronic engineers, neuroscientists and psychologists.

EDITORIAL BOARD

Fields of specialization: Neurodynamics, chaos synchronization, complex networks, collective dynamics, consensus, secure communication, bifurcation control

G.A. Carpenter, Boston University, Boston, Massachusetts, USA
Fields of specialization: Machine learning, memory, vision, ART

D.P. Casasent, Carnegie Mellon University, Pittsburgh, Pennsylvania, USA
Fields of specialization: Pattern recognition, classifier neural networks, optical neural network

J. H. Chan, King Mongkut's University of Technology Thonburi, Bangkok, Thailand
Fields of specialization: Modeling and simulation, computational systems biology, bioinformatics, machine learning

K. Chen, University of Manchester, Manchester, England, UK
Fields of Specialization: Machine Learning, speech processing

Z. Chen, New York University (NYU) School of Medicine, New York, New York, USA
Fields of specialization: Machine learning and computational statistics, computational neuroscience, statistics in neuroscience, neural spike train analysis

Y. Choe, Texas A&M University, College Station, Texas, USA
Fields of Specialization: Visual and tactile processing, natural statistics, sensorimotor learning, self-organizing models, thalamocortical circuit models, temporal processing, neuroinformatics

J. Contreras-Vidal, University of Houston, Houston, Texas, USA
Fields of specialization: Brain-machine interfaces, neuroscience, large-scale neural network models, movement disorders, EEG/MEG/fMRI, neural decoding, sensorimotor control

J.-M. Fellous, University of Arizona, Tucson, Arizona, USA
Fields of specialization: Computational neuroscience, emotion and motivation, spatial navigation, neuromodulation

G. Francis, Purdue University, West Lafayette, Indiana, USA
Fields of specialization: Visual perception, cognitive psychology, human factors

F. Gomez
Fields of specialization: Machine learning, neuroevolution, reinforcement learning, recurrent neural networks

X. Gu, Fudan University, Shanghai, China
Fields of specialization: Spatial-temporal coding neural networks, pulse coupled neural networks, oscillations and synchronization

P. Guo, Beijing Normal University, Beijing, China
Fields of specialization: Machine learning, pattern recognition, brain-machine interface, computer vision, EEG data analysis

M. Haruno, NICT Center for Information and Neural Networks, Osaka, Japan
Fields of specialization: Computational neuroscience, social neuroscience, decision making

S. Helie, Purdue University, West Lafayette, Indiana, USA
Fields of specialization: Cognitive neuroscience, fMRI, reinforcement learning

Z.-G. Hou, Chinese Academy of Sciences (CAS), Beijing, China
Fields of specialization: Intelligent control, robotic systems, biomedical engineering

D. Hu, National University of Defense Technology, Hunan, China
Fields of specialization: Neural networks, Identification and control, cognitive neuroscience, robotics

D.S. Huang, Tongji University, Shanghai, China
Fields of specialization: Feedforward networks, pattern recognition, bioinformatics

G.-B. Huang, Nanyang Technological University, Singapore, Singapore
Support vector machines, feedforward networks, brain computer interface, human computer interface, EEG signal based machine learning

K. Ikeda, Nara Institute of Science and Technology, Nara, Japan
Fields of specialization: Learning theory, neurodynamics, adaptive systems

S. Ishii, Kyoto University, Kyoto, Japan
Fields of specialization: Statistical learning, reinforcement learning, bioinformatics, dynamical systems

H. Jaeger, Jacobs University Bremen, Bremen, Germany
Fields of specialization: Reservoir computing, recurrent neural network learning architectures, agent architectures, machine learning applications

N. Kasabov, Auckland University of Technology, Auckland, New Zealand
Fields of specialization: Novel connectionist learning methods, evolving connectionist systems, neuro-fuzzy systems, computational neuro-genetic modeling, EEG data analysis, bioinformatics, gene data analysis, quantum neuro-computation, spiking neural networks, multimodal information processing in the brain, multimodal neural network models for pattern recognition, connectionist-based decision support systems

I. King, Chinese University of Hong Kong, Hong Kong, China
Fields of specialization: Machine learning, social computing, data mining, information retrieval

C. Koch, California Institute of Technology, Pasadena, California, USA
Fields of specialization: Neuroscience, biophysics
R. Kozma, University of Memphis, Memphis, Tennessee, USA
Fields of specialization: Autonomous adaptive systems, mathematical and computational modeling of spatio-temporal dynamics of cognitive processes, chaos, neuro-fuzzy systems, computational intelligence
J. Krichmar, University of California at Irvine, Irvine, California, USA
Fields of specialization: Embodied cognition, neurorobotics, computational neuroscience
V. Kùrková, Academy of Sciences of the Czech Republic, Prague, Czech Republic
Fields of specialization: Mathematical theory of feedforward neural networks, learning theory
H. Lee, University of Michigan, Ann Arbor, Michigan, USA
Fields of specialization: Deep learning; unsupervised learning; semi-supervised learning
M. Lee, Kyungpook National University, Buk-Gu, Dae-gu, South Korea
Field of specialization: Visual perception
Q. Liu, Huazhong University of Science and Technology, Wuhan, China
Fields of specialization: Neurodynamics, recurrent neural networks, computational intelligence
S.-C. Liu, Universität Zürich, Zürich, Switzerland
Fields of specialization: Neuromorphic systems, sensory systems, event-driven processing and hardware
X. Liu, Florida State University, Tallahassee, Florida, USA
Fields of specialization: Machine learning, pattern recognition, computational models of vision, stochastic optimization, statistical inference
B.L. Lu, Shanghai Jiao Tong University, Shanghai, China
Fields of specialization: Supervised learning, brain-computer interface
J. Madrenas
Fields of specialization: Bioinspired and neuromorphic implementations, integrated sensory systems, hardware architectures
A. Minai, University of Cincinnati, Cincinnati
Fields of specialization: Computational neuroscience, neurodynamical models of cognition & behavior, attractor networks, sequence learning, semantic cognition, motor control
F.C. Morabito, University Mediterranea, Reggio C., Italy
Fields of specialization: Engineering applications of computational intelligence (industrial inspection, biomedical signal processing, environmental data modeling), nonlinear systems and complexity
H. Nakahara, RIKEN, Saitama, Japan
Fields of specialization: Computational neuroscience, reinforcement learning, neural coding
T. Poggio, Massachusetts Institute of Technology, Cambridge, Massachusetts, USA
Fields of specialization: Approximation theory, vision
D. Prokhorov, Toyota Research Institute NA, TRD, Ann Arbor, Michigan, USA
Fields of specialization: Recurrent neural networks, gradient-based learning algorithms, approximate dynamic programming, intelligent control, diagnostics, computer vision, autonomous systems
A. R. Rao, IBM Research, Yorktown Heights, New York, USA
Fields of specialization: Visual perception, self-organization, oscillatory networks
A. Roy, Arizona State University, Phoenix, Arizona, USA
Fields of specialization: Radial basis function networks, autonomous learning, semantic cognition, complexity of learning, machine learning
S. Sato, Tohoku University, Sendai, Japan
Fields of specialization: Semiconductor devices and LSI circuits for implementation
S. Satoh, RIKEN, Wako, Japan
Fields of specialization: Vision, neural network, neuroinformatics
S. Schaal, University of Southern California, Los Angeles, California, USA
Fields of specialization: Statistical learning, neuro-motor control, robotics, humanoid robotics, behavioral motor psychophysics, computational neuroscience
T.J. Sejnowski, The Salk Institute for Biological Studies, La Jolla, California, USA
Field of specialization: Neuroscience
T. Shibata, Kyushu Institute of Technology, Fukuoka, Japan
Fields of specialization: Learning robotics, assistive robotics, human-machine cooperation, computational neuroscience, brain-computer interface, motor control
A. Sperduti, Università degli Studi di Padova, Padova, Italy
Fields of specialization: Learning in structured domains, recursive neural networks, deep architectures, kernel methods
N. Srinivasa, Hughes Research Laboratories (HRL), Malibu, California, USA
Fields of specialization: Sensory-motor control, robotics, brain architectures
S. Srinivasan, Robert Bosch LLC, Palo Alto, California, USA

Fields of specialization: Pattern recognition, time series analysis, data mining, applications

M. Sugiyama, University of Tokyo, Tokyo, Japan
Fields of specialization: statistical machine learning, data mining

R. Sun, Rensselaer Polytechnic Institute, Troy, New York, USA
Fields of specialization: Psychological modeling, cognitive architectures, neural network models of consciousness, skill acquisition, reasoning, neuro-symbolic systems, social simulation

R. Tomioka, Toyota Technological Institute at Chicago, Chicago, Illinois, USA
Fields of specialization: Statistical machine learning, optimization, brain-computer interface

T. Toyoizumi, RIKEN, Saitama, Japan
Fields of specialization: Computational neuroscience, synaptic plasticity

J. Triesch, Goethe-Universität Frankfurt, Frankfurt am Main, Germany
Fields of specialization: Vision, recurrent neural networks, unsupervised learning, reinforcement learning

K. Tsuda, National Institute of Advanced Industrial Science and Technology (AIST), Tokyo, Japan
Fields of specialization: Machine learning, bioinformatics

M. Ursino, Università di Bologna, Bologna, Italy
Fields of specialization: Models of cognitive functions, brain rhythms, multisensory integration, semantic memory and object recognition, neural mass models, computational neuroscience

M. M. R. B. Vellasco, Pontifícia Universidade Católica do Rio de Janeiro (PUC-Rio), Rio de Janeiro, Brazil
Fields of specialization: hybrid intelligent systems (neuro-fuzzy, neuro-evolutonairy, etc.), time series forecasting, computational intelligence

Z. Wang, Brunel University, Uxbridge, UK
Fields of specialization: Intelligent data analysis (bioinformatics, neural networks, etc.), signal processing (filter designs, etc.), real-time systems (control of nonlinear and multi-dimensional systems)

S. Wu, Beijing Normal University, Beijing, China
Fields of specialization: Computational neuroscience, machine learning

R.P. Wurtz, Ruhr-University Bochum, Bochum, Germany
Fields of specialization: Object recognition, artificial vision systems, autonomous learning, organic computing

L. Xu, Chinese University of Hong Kong, Hong Kong, China
Fields of specialization: Finite mixture, mixture of experts, EM algorithm, clustering and self-organizing algorithms, RBF net, PCA & ICA, independent factor analysis, state space modeling, Hidden Markov model, model selection, evidence combination, computational finance/financial engineering

Z.G. Zeng, Huazhong University of Science and Technology, Wuhan, China
Fields of specialization: Nonlinear dynamics, hybrid systems, associative memories

L. Zhao, Universidade de São Paulo at São Carlos, São Paulo, Brazil
Fields of specialization: Machine learning, oscillatory networks, chaotic neural networks

Z.-H. Zhou, Nanjing University, Nanjing, China
Fields of specialization: Machine learning, data mining, pattern recognition

GUIDE FOR AUTHORS

INTRODUCTION
The Official Journal of the International Neural Network Society, European Neural Network Society & Japanese Neural Network Society

Types of Paper
Articles
Original, full-length articles are considered with the understanding that they have not been published except in abstract form and are not concurrently under review elsewhere. Authors are welcome, but not required, to suggest an action editor from the editorial board to handle the review process. Authors need to specify one of the five Sections: Cognitive Science, Neuroscience, Learning Systems, Mathematical and Computational Analysis, Engineering and Applications.

Letters
Letters (up to 2500 words) are expected to contain important new research results for which rapid publication is justified. Each Letter should include an abstract (no more than 100 words), and a maximum of 25 references. Figures and tables together with their legends should occupy no more than one of the pages. Authors are welcome, but not required, to suggest an action editor from the editorial board to handle the review process.
A Letter submission undergoes an expedited review cycle, and a major revision is not allowed. If a submission requires a substantial revision, the authors are encouraged to resubmit a revised version as an Article.

Reviews
Topical, comprehensive reviews that summarize significant advances in a broad area of research. Authors should contact the corresponding Editor-in-Chief with a review outline before submitting the full manuscript.

Letters to the Editor
Short communications that comment on, point out errors in, or express a significant disagreement with a previously published paper in this journal. An author of the original paper will be asked to review the submission along with independent reviewers. In the case of substantive disagreement between the authors of a Letter to the Editor and the authors of the original paper, the Editor may invite to a rebuttal from the latter authors. Such letters should be as concise as possible, not exceeding 2 formatted pages. If both the Letter to the Editor and the Rebuttal are accepted, they will be published in the same issue.

Contact Details for Submission
All manuscripts must be submitted through the Elsevier online system: http://ees.elsevier.com/neunet/

Authors should specify the Editor-in-Chief in the corresponding geographic area:
Europe, North and South America: Prof. DeLiang Wang (dwang@cse.ohio-state.edu)
Africa, Asia and Australia: Prof. Kenji Doya (nneo@oist.jp)

Ma

BEFORE YOU BEGIN
Ethics in publishing
For information on Ethics in publishing and Ethical guidelines for journal publication see http://www.elsevier.com/publishingethics and http://www.elsevier.com/journal-authors/ethics.

Conflict of interest
All authors are requested to disclose any actual or potential conflict of interest including any financial, personal or other relationships with other people or organizations within three years of beginning the submitted work that could inappropriately influence, or be perceived to influence, their work. See also http://www.elsevier.com/conflictsofinterest. Further information and an example of a Conflict of Interest form can be found at: http://help.elsevier.com/app/answers/detail/a_id/286/p/7923.

Submission declaration

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis or as an electronic preprint, see http://www.elsevier.com/postingpolicy), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere including electronically in the same form, in English or in any other language, without the written consent of the copyright-holder.

Changes to authorship

This policy concerns the addition, deletion, or rearrangement of author names in the authorship of accepted manuscripts:

Before the accepted manuscript is published in an online issue: Requests to add or remove an author, or to rearrange the author names, must be sent to the Journal Manager from the corresponding author of the accepted manuscript and must include: (a) the reason the name should be added or removed, or the author names rearranged and (b) written confirmation (e-mail, fax, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Requests that are not sent by the corresponding author will be forwarded by the Journal Manager to the corresponding author, who must follow the procedure as described above. Note that: (1) Journal Managers will inform the Journal Editors of any such requests and (2) publication of the accepted manuscript in an online issue is suspended until authorship has been agreed.

After the accepted manuscript is published in an online issue: Any requests to add, delete, or rearrange author names in an article published in an online issue will follow the same policies as noted above and result in a corrigendum.

Article transfer service

This journal is part of our Article Transfer Service. This means that if the Editor feels your article is more suitable in one of our other participating journals, then you may be asked to consider transferring the article to one of those. If you agree, your article will be transferred automatically on your behalf with no need to reformat. Please note that your article will be reviewed again by the new journal. More information about this can be found here: http://www.elsevier.com/authors/article-transfer-service.

Copyright

This journal offers authors a choice in publishing their research: Open access and Subscription.

For subscription articles

Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (for more information on this and copyright, see http://www.elsevier.com/copyright). An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the Publisher is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations (please consult http://www.elsevier.com/permissions). If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. Elsevier has preprinted forms for use by authors in these cases: please consult http://www.elsevier.com/permissions.

For open access articles

Upon acceptance of an article, authors will be asked to complete an 'Exclusive License Agreement' (for more information see http://www.elsevier.com/OAauthoragreement). Permitted reuse of open access articles is determined by the author's choice of user license (see http://www.elsevier.com/openaccesslicenses).

Retained author rights

As an author you (or your employer or institution) retain certain rights. For more information on author rights for:

Subscription articles please see http://www.elsevier.com/journal-authors/author-rights-and-responsibilities.

Open access articles please see http://www.elsevier.com/OAauthoragreement.

Role of the funding source

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

Funding body agreements and policies

Elsevier has established agreements and developed policies to allow authors whose articles appear in journals published by Elsevier, to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit http://www.elsevier.com/fundingbodies.

Open access

This journal offers authors a choice in publishing their research:

Open access
• Articles are freely available to both subscribers and the wider public with permitted reuse
• An open access publication fee is payable by authors or their research funder
Subscription
• Articles are made available to subscribers as well as developing countries and patient groups through our access programs (http://www.elsevier.com/access)
• No open access publication fee

All articles published open access will be immediately and permanently free for everyone to read and download. Permitted reuse is defined by your choice of one of the following Creative Commons user licenses:
Creative Commons Attribution (CC BY): lets others distribute and copy the article, to create extracts, abstracts, and other revised versions, adaptations or derivative works of or from an article (such as a translation), to include in a collective work (such as an anthology), to text or data mine the article, even for commercial purposes, as long as they credit the author(s), do not represent the author as endorsing their adaptation of the article, and do not modify the article in such a way as to damage the author's honor or reputation.
Creative Commons Attribution-NonCommercial-ShareAlike (CC BY-NC-SA): for non-commercial purposes, lets others distribute and copy the article, to create extracts, abstracts and other revised versions, adaptations or derivative works of or from an article (such as a translation), to include in a collective work (such as an anthology), to text and data mine the article, as long as they credit the author(s), do not represent the author as endorsing their adaptation of the article, do not modify the article in such a way as to damage the author's honor or reputation, and license their new adaptations or creations under identical terms (CC BY-NC-SA).
Creative Commons Attribution-NonCommercial-NoDerivs (CC BY-NC-ND): for non-commercial purposes, lets others distribute and copy the article, and to include in a collective work (such as an anthology), as long as they credit the author(s) and provided they do not alter or modify the article.

To provide open access, this journal has a publication fee which needs to be met by the authors or their research funders for each article published open access.
Your publication choice will have no effect on the peer review process or acceptance of submitted articles.

The open access publication fee for this journal is **$3100**, excluding taxes. Learn more about Elsevier's pricing policy: http://www.elsevier.com/openaccesspricing.

Language (usage and editing services)

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's WebShop (http://webshop.elsevier.com/languageediting/) or visit our customer support site (http://support.elsevier.com) for more information.

Submission

Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

PREPARATION

Use of word processing software

It is important that the file be saved in the native format of the word processor used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the word processor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier: http://www.elsevier.com/guidepublication). Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on Electronic artwork.

To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor.

LaTeX

You are recommended to use the Elsevier article class *elsarticle.cls* (http://www.ctan.org/tex-archive/macros/latex/contrib/elsarticle) to prepare your manuscript and BibTeX (http://www.bibtex.org) to generate your bibliography.

For detailed submission instructions, templates and other information on LaTeX, see http://www.elsevier.com/latex.

Article structure

Subdivision - numbered sections
Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text'. Any subsection may be given a brief heading. Each heading should appear on its own separate line.

Introduction
State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

Conclusions
The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

Appendices
If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

Essential title page information

• *Title.* Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.

• *Author names and affiliations.* Where the family name may be ambiguous (e.g., a double name), please indicate this clearly. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.

• *Corresponding author.* Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. **Ensure that phone numbers (with country and area code) are provided in addition to the e-mail address and the complete postal address. Contact details must be kept up to date by the corresponding author.**

• ***Present/permanent address.*** If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

Abstract
A concise and factual abstract is require **which should not exceed 250 words** .

Highlights
Highlights are a short collection of bullet points that convey the core findings of the article. Highlights are optional and should be submitted in a separate editable file in the online submission system. Please use 'Highlights' in the file name and include 3 to 5 bullet points (maximum 85 characters, including spaces, per bullet point). See http://www.elsevier.com/highlights for examples.

Keywords
Immediately after the abstract, provide a maximum of 6 keywords, using American spelling and avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

Acknowledgements
Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

Math formulae
Please submit math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

Footnotes
Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors can build footnotes into the text, and this feature may be used. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list.

Artwork
Electronic artwork
General points
• Make sure you use uniform lettering and sizing of your original artwork.
• Embed the used fonts if the application provides that option.
• Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
• Number the illustrations according to their sequence in the text.
• Use a logical naming convention for your artwork files.
• Provide captions to illustrations separately.
• Size the illustrations close to the desired dimensions of the printed version.
• Submit each illustration as a separate file.
A detailed guide on electronic artwork is available on our website:
http://www.elsevier.com/artworkinstructions
You are urged to visit this site; some excerpts from the detailed information are given here.
Formats
If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format.
Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please 'Save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):
EPS (or PDF): Vector drawings, embed all used fonts.
TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.
TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.

TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi.

Please do not:
• Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
• Supply files that are too low in resolution;
• Submit graphics that are disproportionately large for the content.

Color artwork
Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF), or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color in the printed version. **For color reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article**. Please indicate your preference for color: in print or online only. For further information on the preparation of electronic artwork, please see http://www.elsevier.com/artworkinstructions.
Please note: Because of technical complications that can arise by converting color figures to 'gray scale' (for the printed version should you not opt for color in print) please submit in addition usable black and white versions of all the color illustrations.

Figure captions
Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (**not** on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

Tables
Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate page(s) at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules.

References
Citation in text
Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

Web references
As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

References in a special issue
Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

Reference management software
This journal has standard templates available in key reference management packages EndNote (http://www.endnote.com/support/enstyles.asp) and Reference Manager (http://refman.com/support/rmstyles.asp). Using plug-ins to wordprocessing packages, authors only need to select the appropriate journal template when preparing their article and the list of references and citations to these will be formatted according to the journal style which is described below.

Reference style
Text: Citations in the text should follow the referencing style used by the American Psychological Association. You are referred to the Publication Manual of the American Psychological Association, Sixth Edition, ISBN 978-1-4338-0561-5, copies of which may be ordered from http://books.apa.org/books.cfm?id=4200067 or APA Order Dept., P.O.B. 2710, Hyattsville, MD 20784, USA or APA, 3 Henrietta Street, London, WC3E 8LU, UK.
List: references should be arranged first alphabetically and then further sorted chronologically if necessary. More than one reference from the same author(s) in the same year must be identified by the letters 'a', 'b', 'c', etc., placed after the year of publication.
Examples:
Reference to a journal publication:
Van der Geer, J., Hanraads, J. A. J., & Lupton, R. A. (2010). The art of writing a scientific article. *Journal of Scientific Communications, 163*, 51–59.
Reference to a book:
Strunk, W., Jr., & White, E. B. (2000). *The elements of style.* (4th ed.). New York: Longman, (Chapter 4).
Reference to a chapter in an edited book:
Mettam, G. R., & Adams, L. B. (2009). How to prepare an electronic version of your article. In B. S. Jones, & R. Z. Smith (Eds.), *Introduction to the electronic age* (pp. 281–304). New York: E-Publishing Inc.

Journal abbreviations source
Journal names should be abbreviated according to the List of Title Word Abbreviations: http://www.issn.org/services/online-services/access-to-the-ltwa/.

Video data

Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file's content. In order to ensure that your video or animation material is directly usable, please provide the files in one of our recommended file formats with a preferred maximum size of 50 MB. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect: http://www.sciencedirect.com. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our video instruction pages at http://www.elsevier.com/artworkinstructions. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

AudioSlides

The journal encourages authors to create an AudioSlides presentation with their published article. AudioSlides are brief, webinar-style presentations that are shown next to the online article on ScienceDirect. This gives authors the opportunity to summarize their research in their own words and to help readers understand what the paper is about. More information and examples are available at http://www.elsevier.com/audioslides. Authors of this journal will automatically receive an invitation e-mail to create an AudioSlides presentation after acceptance of their paper.

Supplementary data

Elsevier accepts electronic supplementary material to support and enhance your scientific research. Supplementary files offer the author additional possibilities to publish supporting applications, high-resolution images, background datasets, sound clips and more. Supplementary files supplied will be published online alongside the electronic version of your article in Elsevier Web products, including ScienceDirect: http://www.sciencedirect.com. In order to ensure that your submitted material is directly usable, please provide the data in one of our recommended file formats. Authors should submit the material in electronic format together with the article and supply a concise and descriptive caption for each file. For more detailed instructions please visit our artwork instruction pages at http://www.elsevier.com/artworkinstructions.

MATLAB FIG files

MATLAB FIG files (optional): You can enrich your online articles by providing supplementary MATLAB figure files with the .FIG file extension. These files will be visualized using an interactive viewer that allows readers to explore your figures within the article. The FIG files can be uploaded in our online submission system, and will be made available to download from your online article on ScienceDirect. For more information, please see http://www.elsevier.com/matlab.

Interactive plots

This journal encourages you to include data and quantitative results as interactive plots with your publication. To make use of this feature, please include your data as a CSV (comma-separated values) file when you submit your manuscript. Please refer to http://www.elsevier.com/interactiveplots for further details and formatting instructions.

Submission checklist

The following list will be useful during the final checking of an article prior to sending it to the journal for review. Please consult this Guide for Authors for further details of any item.
Ensure that the following items are present:
One author has been designated as the corresponding author with contact details:
• E-mail address
• Full postal address
• Phone numbers
All necessary files have been uploaded, and contain:
• Keywords
• All figure captions
• All tables (including title, description, footnotes)
Further considerations
• Manuscript has been 'spell-checked' and 'grammar-checked'
• References are in the correct format for this journal
• All references mentioned in the Reference list are cited in the text, and vice versa
• Permission has been obtained for use of copyrighted material from other sources (including the Internet)
Printed version of figures (if applicable) in color or black-and-white
• Indicate clearly whether or not color or black-and-white in print is required.
• For reproduction in black-and-white, please supply black-and-white versions of the figures for printing purposes.
For any further information please visit our customer support site at http://support.elsevier.com.

AFTER ACCEPTANCE

Use of the Digital Object Identifier

The Digital Object Identifier (DOI) may be used to cite and link to electronic documents. The DOI consists of a unique alpha-numeric character string which is assigned to a document by the publisher upon the initial electronic publication. The assigned DOI never changes. Therefore, it is an ideal medium for citing a document, particularly 'Articles in press' because they have not yet received their full bibliographic information. Example of a correctly given DOI (in URL format; here an article in the journal *Physics Letters B*):
http://dx.doi.org/10.1016/j.physletb.2010.09.059
When you use a DOI to create links to documents on the web, the DOIs are guaranteed never to change.

Proofs

One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or, a link will be provided in the e-mail so that authors can download the files themselves. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to download Adobe Reader version 9 (or higher) available free from http://get.adobe.com/reader. Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the Adobe site: http://www.adobe.com/products/reader/tech-specs.html.
If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and return by fax, or scan

the pages and e-mail, or by post. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

Offprints

The corresponding author, at no cost, will be provided with a personalized link providing 50 days free access to the final published version of the article on ScienceDirect. This link can also be used for sharing via email and social networks. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier's WebShop (http://webshop.elsevier.com/myarticleservices/offprints). Authors requiring printed copies of multiple articles may use Elsevier WebShop's 'Create Your Own Book' service to collate multiple articles within a single cover (http://webshop.elsevier.com/myarticleservices/booklets).

AUTHOR INQUIRIES

You can track your submitted article at http://help.elsevier.com/app/answers/detail/a_id/89/p/8045/. You can track your accepted article at http://www.elsevier.com/trackarticle. You are also welcome to contact Customer Support via http://support.elsevier.com.
