### DESCRIPTION

*Health Policy* is intended to be a vehicle for the exploration and discussion of **health policy** and **health system** issues and is aimed in particular at enhancing communication between health policy and system researchers, legislators, decision-makers and professionals concerned with developing, implementing, and analysing health policy, health systems and health care reforms, primarily in high-income countries outside the U.S.A.

**Health care policies** and reforms are made at an ever-increasing pace in countries around the world - and policy-makers are increasingly looking to other countries for solutions to their own problems. *Health Policy* is committed to support this international dialogue to ensure that policies are not just copied but used and adapted based on the specific problems and objectives as well as the respective context. The journal encourages the **submission** of short, full-length, comparative and review articles (as well as groups of articles in "special sections") which address:

1. What is happening in terms of policies, reforms, regulation etc. of health systems;
2. Where the ideas are coming from, i.e. whether they are "imported" from another country or developed within the country, and how innovative they are they in comparison to other countries;
3. Why it is happening, e.g. as a consequence of a change in government, popular dissatisfaction or (perceived) unsustainable cost increases, and what are the objectives;
4. The actors involved (both governmental as well as non-governmental), incl. their roles, their opinions and their strength in the decision and implementation process;
5. Intended and, especially, unintended effects of these policies or reforms on the health system in terms of access, appropriateness, costs, effectiveness, quality, patient experience and equity etc.; and
6. Their final consequences in terms of health outcomes, financial protection and responsiveness to the population's legitimate expectations, i.e. a performance assessment of reforms and health systems.

To achieve the journal's objectives, authors are encouraged to write in a non-technical style, which is understandable to health policy practitioners and specialists from other disciplines and in other countries.

Please submit your article via <http://ees.elsevier.com/heap>.

**Health Policy** is ranked 33rd out of 70 journals in the Health Policy & Services category in the 2013 Journal Citation Reports, published by Thomson Reuters, and has an Impact Factor of 1.725.

**Electronic usage** An increasing number of readers access the journal online via ScienceDirect, one of the world's most advanced web delivery systems for scientific, technical and medical information, and through the journal's web site, [healthpolicyjrnل.com](http://healthpolicyjrnل.com)

2013 Usage:

**44,007** average monthly article downloads on [ScienceDirect](http://ScienceDirect)

**21,813** average monthly pageviews on [healthpolicyjrnل.com](http://healthpolicyjrnل.com)

## AUDIENCE

## GUIDE FOR AUTHORS

---

Health Policy is intended to be a vehicle for the exploration and discussion of health policy issues and is aimed in particular at enhancing communication between health policy researchers, legislators, decision-makers and professionals concerned with developing, implementing, and analysing health policy in high-income countries primarily outside the US.

Health care policies and reforms are made at an ever-increasing pace in countries around the world - and policy-makers are increasingly looking to other countries for solutions to their own problems. Health Policy is committed to support this international dialogue to ensure that policies are not just copied but used and adapted based on the specific problems and objectives as well as the respective context. Articles in Health Policy should thus describe and analyze

1. what is happening in terms of policies, reforms, regulation etc. of health systems;
2. where are the ideas coming from, i.e. are they "imported" from another country or are they developed within the country - and how innovative are they in comparison to what is happening in other countries;
3. why is it happening, e.g. as a consequence of a change in government, popular dissatisfaction, (perceived) unsustainable cost increases or an international requirement, and what are the objectives;
4. the actors involved (both governmental as well as non-governmental including scientists, the media and the public), what are their roles, their opinions and their strength in the decision and implementation process;
5. intended and, especially, unintended effects of these policies or reforms on the health system in terms of access, appropriateness, costs, effectiveness, quality, patient experience and equity etc.; and last but not least
6. their final consequences in terms of health outcomes, financial protection and responsiveness to the population's legitimate expectations, i.e. a performance assessment of reforms and health systems.

To achieve the journal's objectives, authors are encouraged to write in a non-technical style, which is understandable to health policy practitioners and specialists from other disciplines. The use of overly technical tables (e.g. full of regression models) or equations is discouraged or should be placed in the supplementary material.

### Types of Contribution

Health Policy will be accepting submissions in three different formats:

- (1) "Health reform monitor" of around 2,000 words (excluding abstract and references), concentrating on proposed, discussed, just passed and/ or implemented reforms in one of the Health Systems and Policy Monitor member . These do not have to present empirical data but analyze actors and processes.
- (2) "Full-length articles" of around 4,000 words (and not more than 4,500 words), mainly empirical, analyzing the impact of health systems, reforms and policies - both in terms of intended and unintended effects. In addition, more theoretical, conceptual or methodological papers can be submitted.
- (3) "Reviews/comparative analyses" of around 6,000 words (and not more than 7,000 words) can either be
  - (a) systematic reviews of health policy measures
  - (b) or examine certain aspects of health systems or health reforms in a systematic, comparative manner across a number of countries. Such papers may additionally include experience from countries outside the primary focus of the journal.

In all cases, Authors should provide sufficient background and context and discuss their findings in an international context, to ensure that their manuscript can be appreciated by an international readership.

Besides these three main types of submissions, Health Policy is interested in publishing debate among the readers in the form of letters and repiques as well as commissioned editorials.

For all types of submissions, the material should not have been previously published in peer-review journals elsewhere. Publication as an abstract, academic thesis or discussion paper is permissible but needs to be stated in the cover letter to the editor upon submission.

## **Size and Layout**

Manuscripts should be written in English. They should be clear, concise and logical, and follow the suggested word length (see above) as well as the number of tables and figures (see below).

Manuscripts should be structured as follows (if appropriate; e.g. Health Reform Monitor articles may differ): • Cover letter • Title Page (incl. Acknowledgements, e.g. to sponsors, and Conflict of Interest statement) • Abstract • Introduction • Materials and methods • Results • Discussion • Conclusions (especially for policy-makers and international audience) • Appendices (will be included as online supplementary material if the manuscript is accepted).

There should be no footnotes or endnotes in the manuscript.

Manuscripts that do not comply with the above mentioned manuscript guidelines will be considered as non-admissible. All submissions will be checked for plagiarism. The handling editor will be informed about any incorrectly cited text passages/ findings of plagiarism.

## **Figures, tables and equations**

Figures and tables are encouraged but should not be too technical. Technical tables and especially equations or other formulae should be avoided. Except in exceptional circumstances, the admissible number of figures and tables together is 2 for Health Reform Monitor articles, 4 for full-length articles and 6 for reviews and comparative articles. Additional figures and tables may be supplied as supplementary material. Figures and tables should still be legible when reduced in size for printing (for more details see below).

## **BEFORE YOU BEGIN**

### ***Ethics in publishing***

For information on Ethics in publishing and Ethical guidelines for journal publication see <http://www.elsevier.com/publishingethics> and <http://www.elsevier.com/journal-authors/ethics>.

### ***Conflict of interest***

All authors are requested to disclose any actual or potential conflict of interest including any financial, personal or other relationships with other people or organizations within three years of beginning the submitted work that could inappropriately influence, or be perceived to influence, their work. See also <http://www.elsevier.com/conflictsofinterest>. Further information and an example of a Conflict of Interest form can be found at: [http://help.elsevier.com/app/answers/detail/a\\_id/286/p/7923](http://help.elsevier.com/app/answers/detail/a_id/286/p/7923).

### ***Submission declaration***

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or academic thesis or discussion paper, see <http://www.elsevier.com/postingpolicy>), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere including electronically in the same form, in English or in any other language, without the written consent of the copyright-holder.

### ***Changes to authorship***

This policy concerns the addition, deletion, or rearrangement of author names in the authorship of accepted manuscripts:

*Before the accepted manuscript is published in an online issue:* Requests to add or remove an author, or to rearrange the author names, must be sent to the Journal Manager from the corresponding author of the accepted manuscript and must include: (a) the reason the name should be added or removed,

or the author names rearranged and (b) written confirmation (e-mail, fax, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Requests that are not sent by the corresponding author will be forwarded by the Journal Manager to the corresponding author, who must follow the procedure as described above. Note that: (1) Journal Managers will inform the Journal Editors of any such requests and (2) publication of the accepted manuscript in an online issue is suspended until authorship has been agreed.

*After the accepted manuscript is published in an online issue:* Any requests to add, delete, or rearrange author names in an article published in an online issue will follow the same policies as noted above and result in a corrigendum.

### **Copyright**

This journal offers authors a choice in publishing their research: Open access and Subscription.

#### *For subscription articles*

Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (for more information on this and copyright, see <http://www.elsevier.com/copyright>). An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the Publisher is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations (please consult <http://www.elsevier.com/permissions>). If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. Elsevier has preprinted forms for use by authors in these cases: please consult <http://www.elsevier.com/permissions>.

#### *For open access articles*

Upon acceptance of an article, authors will be asked to complete an 'Exclusive License Agreement' (for more information see <http://www.elsevier.com/OAauthoragreement>). Permitted reuse of open access articles is determined by the author's choice of user license (see <http://www.elsevier.com/openaccesslicenses>).

### **Retained author rights**

As an author you (or your employer or institution) retain certain rights. For more information on author rights for:

Subscription articles please see <http://www.elsevier.com/journal-authors/author-rights-and-responsibilities>.

Open access articles please see <http://www.elsevier.com/OAauthoragreement>.

### **Role of the funding source**

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

### **Funding body agreements and policies**

Elsevier has established agreements and developed policies to allow authors whose articles appear in journals published by Elsevier, to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit <http://www.elsevier.com/fundingbodies>.

### **Open access**

This journal offers authors a choice in publishing their research:

#### **Open access**

- Articles are freely available to both subscribers and the wider public with permitted reuse
- An open access publication fee is payable by authors or their research funder

#### **Subscription**

- Articles are made available to subscribers as well as developing countries and patient groups through our access programs (<http://www.elsevier.com/access>)

- No open access publication fee

All articles published open access will be immediately and permanently free for everyone to read and download. Permitted reuse is defined by your choice of one of the following Creative Commons user licenses:

**Creative Commons Attribution-NonCommercial-ShareAlike (CC BY-NC-SA):** for non-commercial purposes, lets others distribute and copy the article, to create extracts, abstracts and other revised versions, adaptations or derivative works of or from an article (such as a translation), to include in a collective work (such as an anthology), to text and data mine the article, as long as they credit the author(s), do not represent the author as endorsing their adaptation of the article, do not modify the article in such a way as to damage the author's honor or reputation, and license their new adaptations or creations under identical terms (CC BY-NC-SA).

**Creative Commons Attribution-NonCommercial-NoDerivs (CC BY-NC-ND):** for non-commercial purposes, lets others distribute and copy the article, and to include in a collective work (such as an anthology), as long as they credit the author(s) and provided they do not alter or modify the article.

Elsevier has established agreements with funding bodies, <http://www.elsevier.com/fundingbodies>. This ensures authors can comply with funding body open access requirements, including specific user licenses, such as CC BY. Some authors may also be reimbursed for associated publication fees. If you need to comply with your funding body policy, you can apply for the CC BY license after your manuscript is accepted for publication.

To provide open access, this journal has a publication fee which needs to be met by the authors or their research funders for each article published open access.

Your publication choice will have no effect on the peer review process or acceptance of submitted articles.

The open access publication fee for this journal is **\$2,500**, excluding taxes. Learn more about Elsevier's pricing policy: <http://www.elsevier.com/openaccesspricing>.

#### *Language (usage and editing services)*

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel or who are informed in this regard by the editors that their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's WebShop (<http://webshop.elsevier.com/languageediting/>) or visit our customer support site (<http://support.elsevier.com>) for more information.

#### **Submission**

Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

#### *Submit your article*

Please submit your article via <http://ees.elsevier.com/heap>.

### **PREPARATION**

#### *Double-blind review*

This journal uses double-blind review, which means that both the reviewer and author name(s) are not allowed to be revealed to one another for a manuscript under review. The identities of the authors are concealed from the reviewers, and vice versa. For more information please refer to <http://www.elsevier.com/reviewers/peer-review>. To facilitate this, please include the following separately:

*Title page (with author details):* This should include the title, authors' names and affiliations, and a complete address for the corresponding author including telephone and e-mail address. Acknowledgements and the Conflict of Interest statement also need to be included here.

*Blinded manuscript (no author details):* The main body of the paper (including the references, figures, tables should not include any identifying information, such as the authors' names or affiliations.

### *Essential title page information*

- **Title.** Be concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae.
- **Author names and affiliations.** Where the family name may be ambiguous (e.g., a double name), please indicate this clearly. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
- **Corresponding author.** Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. **Ensure that phone numbers (with country and area code) are provided in addition to the e-mail address and the complete postal address. Contact details must be kept up to date by the corresponding author.**
- **Present/permanent address.** If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.
- **Acknowledgements**
- **Conflict of Interest statement**

### *Cover letter*

The cover letter is intended for the editors to assist them in their assessment whether the article fits the scope of the journal. Therefore, authors should repeat the information given in the abstract and/or highlights but briefly explain why they see Health Policy as the appropriate journal; this is even more important if the fit with the journal's scope and objectives is not immediately obvious. The authors should also point to important considerations that the editor should know when assigning the manuscript or sending it for review. For example, authors who have discussed their manuscript with an editor prior to submission should indicate this in the cover letter. Previous publication as an abstract, academic thesis or discussion paper should also be stated, and the appropriate sources given.

### **Abstract**

An abstract of 200 words (and not more than 220) must be included in the submitted manuscript. As the abstract is often viewed separately from the article, it must be able to stand alone. It should state briefly and clearly the purpose and setting, the principal findings and major conclusions, and the paper's contribution to knowledge. If applicable, the country/countries/locations should be clearly stated, as should the methods and nature of the sample, the dates, and a summary of the findings/conclusion. Please note that excessive statistical details should be avoided, abbreviations/acronyms used only if essential or firmly established, and the abstract should not contain references to other published work.

### **Graphical abstract**

Although a graphical abstract is optional, its use is encouraged as it draws more attention to the online article. The graphical abstract should summarize the contents of the article in a concise, pictorial form designed to capture the attention of a wide readership. Graphical abstracts should be submitted as a separate file in the online submission system. Image size: Please provide an image with a minimum of 531 × 1328 pixels (h × w) or proportionally more. The image should be readable at a size of 5 × 13 cm using a regular screen resolution of 96 dpi. Preferred file types: TIFF, EPS, PDF or MS Office files. See <http://www.elsevier.com/graphicalabstracts> for examples.

Authors can make use of Elsevier's Illustration and Enhancement service to ensure the best presentation of their images and in accordance with all technical requirements: [Illustration Service](#).

### *Highlights*

Highlights are mandatory for this journal. They consist of a short collection of bullet points that convey the core findings of the article and should be submitted in a separate file in the online submission system. Please use 'Highlights' in the file name and include 3 to 5 bullet points (maximum 12 words per bullet point, please write in complete sentences, avoid using abbreviations). See <http://www.elsevier.com/highlights> for examples.

### **Classification and keywords**

Authors are asked to classify their submission using the provided classification system. They are also asked to include 3 to 6 keywords, preferably from the Medical Subject Headings from *Index Medicus*.

### **Artwork**

## Electronic Artwork (Figures)

### General points

- Make sure you use uniform lettering and sizing of your original artwork.
- Embed the used fonts if the application provides that option.
- Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Provide captions to illustrations separately.
- Size the illustrations close to the desired dimensions of the printed version.
- Submit each illustration as a separate file.

A detailed guide on electronic artwork is available on our website:

<http://www.elsevier.com/artworkinstructions>

**You are urged to visit this site; some excerpts from the detailed information are given here.**

### Formats

If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format.

Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please 'Save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

EPS (or PDF): Vector drawings, embed all used fonts.

TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.

TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.

TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi.

### Please do not:

- Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

### Color artwork

Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF), or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color in the printed version. **For color reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article.** Please indicate your preference for color: in print or online only. For further information on the preparation of electronic artwork, please see <http://www.elsevier.com/artworkinstructions>.

Please note: Because of technical complications that can arise by converting color figures to 'gray scale' (for the printed version should you not opt for color in print) please submit in addition usable black and white versions of all the color illustrations.

### Illustration services

Elsevier's WebShop (<http://webshop.elsevier.com/illustrationservices>) offers Illustration Services to authors preparing to submit a manuscript but concerned about the quality of the images accompanying their article. Elsevier's expert illustrators can produce scientific, technical and medical-style images, as well as a full range of charts, tables and graphs. Image 'polishing' is also available, where our illustrators take your image(s) and improve them to a professional standard. Please visit the website to find out more.

### Figure captions

Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (**not** on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

### Tables

Number tables consecutively in accordance with their appearance in the text. Place footnotes to tables below the table body and indicate them with superscript lowercase letters. Avoid vertical rules. Be sparing in the use of tables and ensure that the data presented in tables do not duplicate results described elsewhere in the article.

Throughout the manuscript text, Authors must indicate where approximately the figures and tables should be included.

## References

### *Citation in text*

Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

### *Reference links*

Increased discoverability of research and high quality peer review are ensured by online links to the sources cited. In order to allow us to create links to abstracting and indexing services, such as Scopus, CrossRef and PubMed, please ensure that data provided in the references are correct. Please note that incorrect surnames, journal/book titles, publication year and pagination may prevent link creation. When copying references, please be careful as they may already contain errors. Use of the DOI is encouraged.

### *Web references*

As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

### *References in a special issue*

Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

### *Reference formatting*

There are no strict requirements on reference formatting at submission. References can be in any style or format as long as the style is consistent. Where applicable, author(s) name(s), journal title/book title, chapter title/article title, year of publication, volume number/book chapter and the pagination must be present. Use of DOI is highly encouraged. The reference style used by the journal is VANCOUVER NUMBERED and will be applied to the accepted article by Elsevier at the proof stage. Note that missing data will be highlighted at proof stage for the author to correct. If you do wish to format the references yourself they should be arranged according to the following examples:

### *Reference style*

*Text:* Indicate references by number(s) in square brackets in line with the text. The actual authors can be referred to, but the reference number(s) must always be given.

*List:* Number the references (numbers in square brackets) in the list in the order in which they appear in the text.

### *Examples:*

Reference to a journal publication:

[1] Van der Geer J, Hanraads JA, Lupton RA. The art of writing a scientific article. *J Sci Commun* 2010;163:51-9.

Reference to a book:

[2] Saltman RB, Busse R, Figueras J, editors. *Social health insurance systems in western Europe*. Berkshire: Open University Press; 2004.

Reference to a chapter in an edited book:

[3] McGlynn E. Measuring clinical quality and appropriateness. In: Smith P, Mossialos E, Papanicolas I, Leatherman S, editors. *Performance measurement for health system improvement experiences, challenges and prospects*. Cambridge: Cambridge University Press; 2009, p. 87-113. Reference to an electronic source:

[4] International Monetary Fund. Greece: stand-by arrangement - Review under the emergency financing mechanism. Country report no.10/217. Washington, DC: IMF; 2010. Available at: <http://www.imf.org/external/pubs/ft/scr/2010/cr10217.pdf> [accessed 10.08.13].

Note shortened form for last page number. e.g., 51–9, and that for more than 6 authors the first 6 should be listed followed by 'et al.' For further details you are referred to 'Uniform Requirements for Manuscripts submitted to Biomedical Journals' (J Am Med Assoc 1997;277:927–34) (see also [http://www.nlm.nih.gov/bsd/uniform\\_requirements.html](http://www.nlm.nih.gov/bsd/uniform_requirements.html)).

### **Video data**

Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file's content. In order to ensure that your video or animation material is directly usable, please provide the files in one of our recommended file formats with a preferred maximum size of 50 MB. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect: <http://www.sciencedirect.com>. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our video instruction pages at <http://www.elsevier.com/artworkinstructions>. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

### **AudioSlides**

The journal encourages authors to create an AudioSlides presentation with their published article. AudioSlides are brief, webinar-style presentations that are shown next to the online article on ScienceDirect. This gives authors the opportunity to summarize their research in their own words and to help readers understand what the paper is about. More information and examples are available at <http://www.elsevier.com/audioslides>. Authors of this journal will automatically receive an invitation e-mail to create an AudioSlides presentation after acceptance of their paper.

### **Supplementary material**

Elsevier accepts electronic supplementary material to support and enhance your scientific research. Supplementary files offer the author additional possibilities to publish supporting applications, high-resolution images, background datasets, sound clips and more. Supplementary files supplied will be published online alongside the electronic version of your article in Elsevier Web products, including ScienceDirect: <http://www.sciencedirect.com>. In order to ensure that your submitted material is directly usable, please provide the data in one of our recommended file formats. Authors should submit the material in electronic format together with the article and supply a concise and descriptive caption for each file. For more detailed instructions please visit our artwork instruction pages at <http://www.elsevier.com/artworkinstructions>.

### **Submission checklist**

The following list will be useful during the final checking of an article prior to sending it to the journal for review. Please consult this Guide for Authors for further details of any item.

#### **Ensure that the following items are present:**

One author has been designated as the corresponding author with contact details:

- E-mail address
- Full postal address
- Phone numbers

All necessary files have been uploaded, and contain:

- Keywords
- All figure captions
- All tables (including title, description, footnotes)

Further considerations

- Manuscript has been 'spell-checked' and 'grammar-checked'
- References are in the correct format for this journal
- All references mentioned in the Reference list are cited in the text, and vice versa
- Permission has been obtained for use of copyrighted material from other sources (including the Web)
- Color figures are clearly marked as being intended for color reproduction on the Web (free of charge) and in print, or to be reproduced in color on the Web (free of charge) and in black-and-white in print
- If only color on the Web is required, black-and-white versions of the figures are also supplied for printing purposes

For any further information please visit our customer support site at <http://support.elsevier.com>.

### **Revised version of the manuscript**

On the basis of the comments of the referees and editors, Authors may be asked to revise their manuscript. In order to facilitate the evaluation of the revisions by the referees and editors, upon revision, Authors are asked:

- to indicate all changes to the original manuscript by means of 'track changes'
- to add a letter for the referees, explaining how they dealt with all of the recommendations and questions from the referees.

Authors should submit their revised version no later than 2 months after they were informed about the decision that the manuscript needs revision. If no revised manuscript is received 2 months after the decision, the manuscript will be considered as rejected. If a second (or third) revision is necessary, the time is usually 1 month for re-submission.

### **AFTER ACCEPTANCE**

#### *Use of the Digital Object Identifier*

The Digital Object Identifier (DOI) may be used to cite and link to electronic documents. The DOI consists of a unique alpha-numeric character string which is assigned to a document by the publisher upon the initial electronic publication. The assigned DOI never changes. Therefore, it is an ideal medium for citing a document, particularly 'Articles in press' because they have not yet received their full bibliographic information. Example of a correctly given DOI (in URL format; here an article in the journal *Health Policy*):

<http://dx.doi.org/10.1016/j.healthpol.2010.09.00>

When you use a DOI to create links to documents on the web, the DOIs are guaranteed never to change.

#### *Online proof correction*

Corresponding authors will receive an e-mail with a link to our online proofing system, allowing annotation and correction of proofs online. The environment is similar to MS Word: in addition to editing text, you can also comment on figures/tables and answer questions from the Copy Editor. Web-based proofing provides a faster and less error-prone process by allowing you to directly type your corrections, eliminating the potential introduction of errors.

If preferred, you can still choose to annotate and upload your edits on the PDF version. All instructions for proofing will be given in the e-mail we send to authors, including alternative methods to the online version and PDF.

We will do everything possible to get your article published quickly and accurately - please upload all of your corrections within 48 hours. It is important to ensure that all corrections are sent back to us in one communication. Please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility. Note that Elsevier may proceed with the publication of your article if no response is received.

### **AudioSlides**

The journal encourages authors to create an AudioSlides presentation with their published article. AudioSlides are brief, webinar-style presentations that are shown next to the online article on ScienceDirect. This gives authors the opportunity to summarize their research in their own words and to help readers understand what the paper is about. More information and examples are available at <http://www.elsevier.com/audioslides>. Authors of this journal will automatically receive an invitation e-mail to create an AudioSlides presentation after acceptance of their paper.

### **Offprints**

The corresponding author, at no cost, will be provided with a personalized link providing 50 days free access to the final published version of the article on [ScienceDirect](#). This link can also be used for sharing via email and social networks. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier's WebShop (<http://webshop.elsevier.com/myarticleservices/offprints>). Authors requiring printed copies of multiple articles may use Elsevier WebShop's 'Create Your Own Book' service to collate multiple articles within a single cover (<http://webshop.elsevier.com/myarticleservices/booklets>).

## **AUTHOR INQUIRIES**

You can track your submitted article at [http://help.elsevier.com/app/answers/detail/a\\_id/89/p/8045/](http://help.elsevier.com/app/answers/detail/a_id/89/p/8045/). You can track your accepted article at <http://www.elsevier.com/trackarticle>. You are also welcome to contact Customer Support via <http://support.elsevier.com>.
