### DESCRIPTION

**The Journal of Emergency Medicine** is an international, peer-reviewed publication featuring original contributions of interest to both the academic and practicing emergency physician. **JEM**, published monthly, contains research papers and clinical studies as well as articles focusing on the training of emergency physicians and on the practice of emergency medicine. The *Journal* features the following sections:

- **Original Contributions**
- **Clinical Communications: Pediatric, Adult, OB/GYN**
- **Selected Topics:** Toxicology, Prehospital Care, The Difficult Airway, Aeromedical Emergencies, Disaster Medicine, Cardiology Commentary, Emergency Radiology, Critical Care, Sports Medicine, Wound Care
- **Techniques and Procedures**
- **Technical Tips**
- **Clinical Laboratory in Emergency Medicine**
- **Pharmacology in Emergency Medicine**
- **Case Presentations of the Harvard Emergency Medicine Residency**
- **Visual Diagnosis in Emergency Medicine**
- **Medical Classics**
- **Emergency Forum**
- **Editorial(s)**
- **Letters to the Editor**
- **Education**
- **Administration of Emergency Medicine**
- **International Emergency Medicine**
- **Computers in Emergency Medicine**
- **Violence: Recognition, Management, and Prevention**
- **Ethics**
- **Humanities and Medicine**
- **American Academy of Emergency Medicine**
- **AAEM Medical Student Forum**
- **Book and Other Media Reviews**
- **Calendar of Events**
- **Abstracts**
- **Trauma Reports**
- **Ultrasound in Emergency Medicine**

## AUDIENCE

---

Emergency Physicians, Nursing Supervisors, Technicians, Trauma Hospital Administrators.

## IMPACT FACTOR

---

2013: 1.175 © Thomson Reuters Journal Citation Reports 2014

## ABSTRACTING AND INDEXING

## EDITORIAL BOARD

---

### *Editor-in-Chief:*

**Stephen Hayden, MD**, University of California at San Diego (UCSD), San Diego, California, USA

### *Founding Editor:*

**Peter Rosen, MD**, Harvard University

### *Associate Editors:*

**George Sternbach, MD**, Stanford University, Stanford, CA, USA

**Gary Vilke, MD**, University of California, San Diego, CA

**Michael Witting, MD, MS**, University of Maryland, Baltimore, MD, USA

**Robert Rodriguez, MD**, University of California, San Francisco, CA, USA

**Dale P. Woolridge, MD, PhD**, University of Arizona, Tucson, AZ, USA

**David E. Slattery, MD**, University of Nevada, Las Vegas, NV, USA

**Maura Kennedy, MD, MPH**, Beth Israel Deaconess Medical Center, Harvard University, Boston, MA, USA

### *Technical Review Editor:*

**Martha C. Martell, MS**, University of California, San Diego, CA, USA

### *Editorial Manager:*

**Terrie Best**, University of California, San Diego, CA, USA

### *Administrative Review Editor:*

**Marina Hayden, RN**, University of California, San Diego, CA, USA

### *Section Editors:*

#### *Original Contributions:*

**Sean Henderson, MD**, Los Angeles, California, USA

**Jacob Ufberg, MD**, Philadelphia, Pennsylvania, USA

#### *Clinical Communications/Adults:*

**Erik Barton, MD**, Salt Lake City, Utah, USA

**Thomas Stair, MD**, Boston, Massachusetts, USA

#### *Clinical Communications/Pediatrics:*

**Paul Ishimine, MD**, San Diego, California, USA

**Dale P. Woolridge**, Tucson, Arizona, USA

***Clinical Communications: OB/GYN***

**Colleen Campbell, MD**, San Diego, California, USA

***Selected Topics:***

***Toxicology***

**Richard F. Clark, MD**, San Diego, California, USA

**Kenneth Kulig, MD**, Denver, Colorado, USA

***Prehospital Care***

**Colleen Buono, MD**, San Diego, California, USA

***The Difficult Airway***

**Daniel Davis, MD**, San Diego, California, USA

***Aeromedical Emergencies***

**Christian Sloane, MD**, San Diego, California, USA

***Disaster Medicine***

**Irving Jacoby, MD**, San Diego, CA, USA

***Cardiology Commentary***

**William Brady, MD**, Charlottesville, Virginia, USA

**Theodore Chan, MD**, San Diego, California, USA

**Richard Harrigan, MD**, Philadelphia, Pennsylvania, USA

***Emergency Radiology***

**John Fox, MD**, Orange, California, USA

***Critical Care***

**Jarrold Mosier, MD**, Tucson, Arizona, USA

**Joseph Varon, MD**, Houston, Texas, USA

***Sports Medicine***

**Prentice Steffen, MD**, Santa Cruz, CA, USA

***Wound Care***

**Davut Savaser, MD**, San Diego, CA

***Psychiatric Emergencies***

**Rachel Lipson Glick, MD**, Ann Arbor, MI, USA

**Michael Wilson, MD, PhD**, San Diego, CA, USA

***Neurological Emergencies***

**Kama Guluma, MD**, San Diego, CA, USA

***Ultrasound in Emergency Medicine***

**David Adler, MD**, Rochester, NY, USA

**Anthony Medak, MD**, San Diego, CA, USA

***Online Contributions***

***Coordinated By:***

**John Fox, MD**, Orange, California, USA

***Best Clinical Practice***

**Amal Mattu, MD**, Baltimore, Maryland, USA

***Techniques and Procedures***

**George Sternbach, MD**, Stanford, California, USA

***Technical Tips***

**Richard Harrigan, MD**, Philadelphia, Pennsylvania, USA

**Jacob Ufberg, MD**, Philadelphia, Pennsylvania, USA

**Gary Vilke, MD**, San Diego, California, USA

***Clinical Laboratory in Emergency Medicine***

**David Jerrard, MD**, Baltimore, MD, USA

***Pharmacology in Emergency Medicine***

**Binh Ly, MD**, San Diego, California, USA

***Trauma Reports***

**Eric Legome, MD**, New York, New York, USA

**Kaushal Shah, MD**, Forest Hills, NY, USA

***Harvard Case Presentations***

**Emily S. Miller, MD**

**Eric S. Nadel, MD**

***Visual Diagnosis in Emergency Medicine***

**Alicia Minns, MD**, San Diego, California, USA

**Lynn Roppolo, MD**, Dallas, Texas, USA

**Mark Silverberg, MD**, New York, New York, USA

***Medical Classics***

**George Sternbach, MD**, Stanford, California, USA

***Education***

**Dick Kuo, MD**, Houston, Texas, USA

**Richard Wolfe, MD**, Boston, Massachusetts, USA

**Allan B. Wolfson, MD**, Pittsburgh, Pennsylvania, USA

## GUIDE FOR AUTHORS

---

### Introduction

The Official Journal of the American Academy of Emergency Medicine.

### BEFORE YOU BEGIN

#### *Ethics in publishing*

For information on Ethics in publishing and Ethical guidelines for journal publication see <http://www.elsevier.com/publishingethics> and <http://www.elsevier.com/journal-authors/ethics>.

#### *Human and animal rights*

If the work involves the use of animal or human subjects, the author should ensure that the work described has been carried out in accordance with The Code of Ethics of the World Medical Association (Declaration of Helsinki) for experiments involving humans <http://www.wma.net/en/30publications/10policies/b3/index.html>; EU Directive 2010/63/EU for animal experiments [http://ec.europa.eu/environment/chemicals/lab\\_animals/legislation\\_en.htm](http://ec.europa.eu/environment/chemicals/lab_animals/legislation_en.htm); Uniform Requirements for manuscripts submitted to Biomedical journals <http://www.icmje.org>. Authors should include a statement in the manuscript that informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

#### *Conflict of interest*

All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. If there are no conflicts of interest then please state this: 'Conflicts of interest: none'. See also <http://www.elsevier.com/conflictsofinterest>. Further information and an example of a Conflict of Interest form can be found at: [http://help.elsevier.com/app/answers/detail/a\\_id/286/p/7923](http://help.elsevier.com/app/answers/detail/a_id/286/p/7923).

#### *Submission declaration and verification*

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis or as an electronic preprint, see <http://www.elsevier.com/postingpolicy>), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection service CrossCheck <http://www.elsevier.com/editors/plagdetect>.

#### *Changes to authorship*

This policy concerns the addition, deletion, or rearrangement of author names in the authorship of accepted manuscripts:

*Before the accepted manuscript is published in an online issue:* Requests to add or remove an author, or to rearrange the author names, must be sent to the Journal Manager from the corresponding author of the accepted manuscript and must include: (a) the reason the name should be added or removed, or the author names rearranged and (b) written confirmation (e-mail, fax, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Requests that are not sent by the corresponding author will be forwarded by the Journal Manager to the corresponding author, who must follow the procedure as described above. Note that: (1) Journal Managers will inform the Journal Editors of any such requests and (2) publication of the accepted manuscript in an online issue is suspended until authorship has been agreed.

*After the accepted manuscript is published in an online issue:* Any requests to add, delete, or rearrange author names in an article published in an online issue will follow the same policies as noted above and result in a corrigendum.

#### *Copyright*

This journal offers authors a choice in publishing their research: Open access and Subscription.

*For subscription articles*

Upon acceptance of an article, authors will be asked to complete a 'Journal Publishing Agreement' (for more information on this and copyright, see <http://www.elsevier.com/copyright>). An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the Publisher is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations (please consult <http://www.elsevier.com/permissions>). If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. Elsevier has preprinted forms for use by authors in these cases: please consult <http://www.elsevier.com/permissions>.

#### *For open access articles*

Upon acceptance of an article, authors will be asked to complete an 'Exclusive License Agreement' (for more information see <http://www.elsevier.com/OAauthoragreement>). Permitted reuse of open access articles is determined by the author's choice of user license (see <http://www.elsevier.com/openaccesslicenses>).

#### **Retained author rights**

As an author you (or your employer or institution) retain certain rights. For more information on author rights for:

Subscription articles please see <http://www.elsevier.com/journal-authors/author-rights-and-responsibilities>.

Open access articles please see <http://www.elsevier.com/OAauthoragreement>.

#### **Role of the funding source**

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

#### **Funding body agreements and policies**

Elsevier has established agreements and developed policies to allow authors whose articles appear in journals published by Elsevier, to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit <http://www.elsevier.com/fundingbodies>.

#### **Open access**

This journal offers authors a choice in publishing their research:

##### **Open access**

- Articles are freely available to both subscribers and the wider public with permitted reuse
- An open access publication fee is payable by authors or their research funder

##### **Subscription**

- Articles are made available to subscribers as well as developing countries and patient groups through our access programs (<http://www.elsevier.com/access>)
- No open access publication fee

All articles published open access will be immediately and permanently free for everyone to read and download. Permitted reuse is defined by your choice of one of the following Creative Commons user licenses:

**Creative Commons Attribution-NonCommercial-ShareAlike (CC BY-NC-SA):** for non-commercial purposes, lets others distribute and copy the article, to create extracts, abstracts and other revised versions, adaptations or derivative works of or from an article (such as a translation), to include in a collective work (such as an anthology), to text and data mine the article, as long as they credit the author(s), do not represent the author as endorsing their adaptation of the article, do not modify the article in such a way as to damage the author's honor or reputation, and license their new adaptations or creations under identical terms (CC BY-NC-SA).

**Creative Commons Attribution-NonCommercial-NoDerivs (CC BY-NC-ND):** for non-commercial purposes, lets others distribute and copy the article, and to include in a collective work (such as an anthology), as long as they credit the author(s) and provided they do not alter or modify the article.

Elsevier has established agreements with funding bodies, <http://www.elsevier.com/fundingbodies>. This ensures authors can comply with funding body open access requirements, including specific user licenses, such as CC BY. Some authors may also be reimbursed for associated publication fees. If you need to comply with your funding body policy, you can apply for the CC BY license after your manuscript is accepted for publication.

To provide open access, this journal has a publication fee which needs to be met by the authors or their research funders for each article published open access.

Your publication choice will have no effect on the peer review process or acceptance of submitted articles.

The open access publication fee for this journal is **\$2,500**, excluding taxes. Learn more about Elsevier's pricing policy: <http://www.elsevier.com/openaccesspricing>.

### **Language (usage and editing services)**

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's WebShop (<http://webshop.elsevier.com/languageediting/>) or visit our customer support site (<http://support.elsevier.com>) for more information.

### **Informed consent and patient details**

Studies on patients or volunteers require ethics committee approval and informed consent, which should be documented in the paper. Appropriate consents, permissions and releases must be obtained where an author wishes to include case details or other personal information or images of patients and any other individuals in an Elsevier publication. Written consents must be retained by the author and copies of the consents or evidence that such consents have been obtained must be provided to Elsevier on request. For more information, please review the *Elsevier Policy on the Use of Images or Personal Information of Patients or other Individuals*, <http://www.elsevier.com/patient-consent-policy>. Unless you have written permission from the patient (or, where applicable, the next of kin), the personal details of any patient included in any part of the article and in any supplementary materials (including all illustrations and videos) must be removed before submission.

### **Submission**

Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

#### *Submit your article*

Please submit your article via <http://ees.elsevier.com/jem>.

### **Sections**

Please refer to the Section Explanations to determine which article type to select in EES (in other words, which section to submit a manuscript to). Please note that the following sections are for invited manuscripts only: Difficult Airway, Cardiology Commentary, Best Clinical Practice, Technical Tips, Trauma Reports, Harvard Case Presentations, Evidence Based Medicine, and Abstracts.

### **Text Basics**

Be sure that all references are cited in numerical order in the text. All tables and figures must be cited in the text, numbered according to the order in which they appear. Data appearing in tables or figures should be summarized, not duplicated, in the text. All data cited in the text should be checked carefully against the corresponding data in the tables to ensure that they correspond. For drugs and chemicals, the generic name should be used at first mention and preferably thereafter. Trade names may appear in parentheses and should be capitalized. Patients' names, initials, or hospital numbers should not be used. Please use North American spelling conventions, ie do not use the vowel combination "ae" or

oe in medical terms. It is preferable to set the language (under Tools) for your document to English (U.S.) Every effort should be made to avoid medical jargon (such as "high index of suspicion," instead suggest an alternate like be vigilant or high level of suspicion, clinically suspicious, etc.) Use the term emergency physician, not emergency medicine physician, and emergency department (ED) rather than emergency room (ER). Please eliminate the term "and/or" throughout the manuscript and use "or" instead. In this context, "or" implies "and" and is cleaner and more concise. The preferred term is "dysrhythmia", not "arrhythmia" Please spell out "examination" rather than "exam" Temperatures should be given in Celsius; Fahrenheit equivalents may follow in parentheses Please use ECG instead of EKG Please spell out "laboratory" rather than "lab" Any ambiguous symbols (e.g., the letter O versus numeral 0, the letter I versus the numeral 1) should be identified.

### Style

**Sources:** Manuscripts are to be prepared according to the *CBE Style Manual* (5th ed.) by Council of Biology Editors, Inc. (Council of Biology Editors, Inc., Bethesda, MD 20814 USA; 1983). *Dorland's Illustrated Medical Dictionary* (WB Saunders, Philadelphia) should be used for spelling of medical terms, and Webster's *Ninth New International* or *New Collegiate* dictionaries (G. and C. Merriam Co., Springfield, MO) for spelling and hyphenation of nonmedical terms. For further information on general style (grammar, capitalization, and so on), see *A Manual of Style* (The University of Chicago Press, Chicago).

**Numbers:** Use numerals for all units of measure and time; and for all numbers greater than ten. Spell out the numbers one through ten only for general usage (e.g., "we considered only two possibilities"). Spell out numbers beginning a sentence.

### Referees

Please submit the names and institutional e-mail addresses of several potential referees. For more details, visit our [Support site](#). Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

## PREPARATION

### Required format for manuscript text

Manuscripts should be organized in one of the following formats: For **interventional studies:** *Introduction, Materials and Methods, Results, Discussion, Limitations* (should be the last paragraph of the Discussion as a separate subheading) and *Conclusions* For **any paper involving a case report:** Headings for *Introduction, Case Report, Discussion, and Why should an emergency physician be aware of this?* Other descriptive headings and subheadings may be used if appropriate. **Techniques and Procedures** submissions should have separate sections for *Introduction, Discussion, and Conclusions*. Discussion should include all other subheadings (i.e., *Technique, etc.*) **Clinical Reviews** submissions should have separate sections for *Introduction, Discussion, and Conclusions*. Discussion should include all other subheadings. Please include an Article Summary. **Ethics** submissions: Body of manuscript needs sections; *Introduction, Case Report* (if applicable) and, *Discussion* (with subsections) and *Conclusion*. **Visual Diagnosis** submissions need only have sections for; *Introduction, Case Report, and Discussion*, and should not have an abstract. **Letters to the Editor and Reply to the Letter to the Editor** that refer to a specific article in the *Journal* must include the original citation in the reference section. Begin all Letters with the phrase; *To the Editor,*

### Article Summary

The Article Summary is to be written by the authors **and required for all interventional studies and clinical reviews**. Other article types do not require an Article Summary.

In the Article Summary, please write out the following four questions (include the questions in the manuscript) and provide brief answers. Limit answers to one or two sentences for the first two questions, and no more than three key findings or three ways patient care is impacted. 1) Why is this topic important? 2) What does this study attempt to show? (change study to review for Clinical Reviews) 3) What are the key findings? 4) How is patient care impacted?

### Appendices

If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

### Essential title page information

- **Title.** Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
- **Author names and affiliations.** Where the family name may be ambiguous (e.g., a double name), please indicate this clearly. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
- **Corresponding author.** Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. **Ensure that phone numbers (with country and area code) are provided in addition to the e-mail address and the complete postal address. Contact details must be kept up to date by the corresponding author.**
- **Present/permanent address.** If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

### Structured Abstract and Keywords

The title of the article should be followed by a **structured abstract of no more than 250 words**. For any **study of interventional design (research study)**, please include the following sections in the abstract: *Background; Objectives; Methods* (with optional subheadings of Design, Patients, or Setting); *Results; and Conclusion*. For **any paper involving a case report**, please include the following headings in the abstract: *Background; Case Report; and "Why should an emergency physician be aware of this?"* For **Techniques and Procedures**, Abstract should have separate headings for *Background, Discussion and Conclusions*. For **Clinical Reviews**, Abstract should have separate headings for *Background, Objective of the Review, Discussion and Conclusions*. **Ethics** submissions, Abstract should have separate headings for; *Background, case report* (if applicable), and *Discussion* Following the abstract, please list five keywords for indexing. **Visual Diagnosis, Letters to the Editor, Medical Classics, and Humanities and Medicine** sections should not include an abstract.

### Abbreviations

No abbreviations should appear in the article title. Please define all abbreviations on first usage in the Abstract and again on first usage in the main body of the text and use abbreviation thereafter. Only standard abbreviations, as recommended in Medical Style and Format by Huth, may be used without definition.

### Acknowledgements

Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

### Units

Follow internationally accepted rules and conventions: use the international system of units (SI). If other units are mentioned, please give their equivalent in SI.

### Math formulae

Please submit math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

### Footnotes

Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors can build footnotes into the text, and this feature may be used. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list.

### Artwork

*Electronic artwork*  
*General points*

- Make sure you use uniform lettering and sizing of your original artwork.
- Embed the used fonts if the application provides that option.
- Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Provide captions to illustrations separately.
- Size the illustrations close to the desired dimensions of the printed version.
- Submit each illustration as a separate file.

A detailed guide on electronic artwork is available on our website:

<http://www.elsevier.com/artworkinstructions>

**You are urged to visit this site; some excerpts from the detailed information are given here.**

#### *Formats*

If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format.

Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please 'Save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

EPS (or PDF): Vector drawings, embed all used fonts.

TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.

TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.

TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi.

#### **Please do not:**

- Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

#### *Color artwork*

Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF), or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color in the printed version. **For color reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article.** Please indicate your preference for color: in print or online only. For further information on the preparation of electronic artwork, please see <http://www.elsevier.com/artworkinstructions>.

Please note: Because of technical complications that can arise by converting color figures to 'gray scale' (for the printed version should you not opt for color in print) please submit in addition usable black and white versions of all the color illustrations.

#### *Figure captions*

Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (**not** on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

#### **Tables**

Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate page(s) at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules.

#### **References**

##### *Citation in text*

Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the

journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

#### *Reference links*

Increased discoverability of research and high quality peer review are ensured by online links to the sources cited. In order to allow us to create links to abstracting and indexing services, such as Scopus, CrossRef and PubMed, please ensure that data provided in the references are correct. Please note that incorrect surnames, journal/book titles, publication year and pagination may prevent link creation. When copying references, please be careful as they may already contain errors. Use of the DOI is encouraged.

#### *Web references*

As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

#### *References in a special issue*

Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

#### *Reference style*

Authors are responsible for the accuracy and completeness of the references. Type references double spaced and number them consecutively in the order in which they are first mentioned in the text, **not alphabetically**. Identify references in the text, tables, and legends by Arabic numerals in parentheses. References cited only in tables or figure legends should be numbered in accordance with a sequence established by the first mention in the text of the particular table or figure.

Examples of the correct format are as follows:

#### **Journal reference**

Dunford JV, Castillo EM, Chan TC, et al. Impact of the San Diego Serial Inebriate Program on Use of Emergency Medical Resources. *Ann of Emerg Med* 2006;47:328-336.

#### **Book reference**

Goldfrank LR, Kirkstein R. Toxicologic emergencies: a handbook in problem solving. New York: Appleton-Century-Crofts; 1978:43-7.

#### **Website reference**

The General Laws of Massachusetts. Part I Administration of the Government. Title XVII. Public Welfare. Chapter 123. Mental Health. Section 35. Commitment of alcoholics or substance abusers. <http://www.mass.gov/legis/laws/mgl/123-35.htm>. Accessed July 1, 2008.

"Unpublished observations" and "personal communications" should *not* appear in the references, but should be inserted in parentheses in the text. Information obtained from manuscripts that have been submitted for publication but not yet accepted should be cited in parentheses in the text: include authors and manuscript title followed by "submitted for publication." Manuscripts that have been accepted for publication but have not yet been published may appear in the reference list: include the authors, manuscript title, and name of journal followed by "in press" in brackets.

#### **Video data**

Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file's content. In order to ensure that your video or animation material is directly usable, please provide the files in one of our recommended file formats with a preferred maximum size of 50 MB. Video and animation files supplied will be published online in the electronic version

of your article in Elsevier Web products, including ScienceDirect: <http://www.sciencedirect.com>. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our video instruction pages at <http://www.elsevier.com/artworkinstructions>. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

### **Supplementary data**

Elsevier accepts electronic supplementary material to support and enhance your scientific research. Supplementary files offer the author additional possibilities to publish supporting applications, high-resolution images, background datasets, sound clips and more. Supplementary files supplied will be published online alongside the electronic version of your article in Elsevier Web products, including ScienceDirect: <http://www.sciencedirect.com>. In order to ensure that your submitted material is directly usable, please provide the data in one of our recommended file formats. Authors should submit the material in electronic format together with the article and supply a concise and descriptive caption for each file. For more detailed instructions please visit our artwork instruction pages at <http://www.elsevier.com/artworkinstructions>.

### **Submission checklist**

The following list will be useful during the final checking of an article prior to sending it to the journal for review. Please consult this Guide for Authors for further details of any item.

#### **Ensure that the following items are present:**

One author has been designated as the corresponding author with contact details:

- E-mail address
- Full postal address
- Phone numbers

All necessary files have been uploaded, and contain:

- Keywords
- All figure captions
- All tables (including title, description, footnotes)

Further considerations

- Manuscript has been 'spell-checked' and 'grammar-checked'
- References are in the correct format for this journal
- All references mentioned in the Reference list are cited in the text, and vice versa
- Permission has been obtained for use of copyrighted material from other sources (including the Internet)

Printed version of figures (if applicable) in color or black-and-white

- Indicate clearly whether or not color or black-and-white in print is required.
- For reproduction in black-and-white, please supply black-and-white versions of the figures for printing purposes.

For any further information please visit our customer support site at <http://support.elsevier.com>.

## **AFTER ACCEPTANCE**

### **Use of the Digital Object Identifier**

The Digital Object Identifier (DOI) may be used to cite and link to electronic documents. The DOI consists of a unique alpha-numeric character string which is assigned to a document by the publisher upon the initial electronic publication. The assigned DOI never changes. Therefore, it is an ideal medium for citing a document, particularly 'Articles in press' because they have not yet received their full bibliographic information. Example of a correctly given DOI (in URL format; here an article in the journal *Physics Letters B*):

<http://dx.doi.org/10.1016/j.physletb.2010.09.059>

When you use a DOI to create links to documents on the web, the DOIs are guaranteed never to change.

### **Proofs**

One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or, a link will be provided in the e-mail so that authors can download the files themselves. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to download Adobe Reader version 9 (or

higher) available free from <http://get.adobe.com/reader>. Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the Adobe site: <http://www.adobe.com/products/reader/tech-specs.html>.

If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and return by fax, or scan the pages and e-mail, or by post. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

### **Offprints**

The corresponding author, at no cost, will be provided with 25 free paper offprints, or, alternatively, a personalized link providing 50 days free access to the final published version of the article on [ScienceDirect](http://www.sciencedirect.com). This link can also be used for sharing via email and social networks. For an extra charge, more paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier's WebShop (<http://webshop.elsevier.com/myarticleservices/offprints>). Authors requiring printed copies of multiple articles may use Elsevier WebShop's 'Create Your Own Book' service to collate multiple articles within a single cover (<http://webshop.elsevier.com/myarticleservices/booklets>).

### **Author Inquiries**

For inquiries relating to the submission of articles (including electronic submission) or the status of a submission, please contact Terrie Best, Editorial Manager, by telephone (619) 294-3723 or email [jemedit@ucsd.edu](mailto:jemedit@ucsd.edu). For detailed instructions on the preparation of electronic artwork, please visit <http://www.elsevier.com/artworkinstructions>. Accepted articles can be tracked at <http://www.elsevier.com/trackarticle>.

For technical support during the submission process, please contact [support@elsevier.com](mailto:support@elsevier.com).
