

JOURNAL OF TAIBAH UNIVERSITY MEDICAL SCIENCES

AUTHOR INFORMATION PACK

TABLE OF CONTENTS

•	Description	p.1
•	Editorial Board	p.1
•	Guide for Authors	n 4

ISSN: 1658-3612

DESCRIPTION

The Journal of Taibah University Medical Sciences is a peer reviewed, tri-annual publication. Authors are invited to submit articles for publication, reporting original work in clinical and basic medical sciences covering topics from Medicine, Dentistry, Nursing, Pharmacy, and Applied Medical Sciences. Review and Editorial articles are by invitation only. However, those received and found to be of an outstanding nature will be considered for publication. Other regular features within the journal include, Case Reports, Letters to the Editor, and Updates which detail symposia, conferences and workshops located primarily in the Kingdom of Saudi Arabia and the Gulf countries.

The Journal has recently devoted a new Students' Section where the research projects written by the students shall be entertained. All students from the **medical**, **dental**, and **allied science** faculties are invited to participate in this educational and research activity. The peer review shall be performed by senior academicians with a view to guide and supervise the students in medical research and publications.

EDITORIAL BOARD

Editor-in-Chief

Khalid Ibrahim Khoshhal, Associate Professor of Orthopedics and Consultant Pediatric Orthopedic Surgeon, Vice Dean for Graduate Affairs, College of Medicine, Taibah University, Almadinah Almunawwarah, Saudi Arabia, **Email:** tmj@taibahu.edu.sa

Associate Editor

Salman Yousuf Guraya, Professor of Surgery and Consultant Minimally Invasive Surgeon, College of Medicine, Taibah University, Almadinah Almunawwarah, Saudi Arabia, **Email:** tmj@taibahu.edu.sa

Editorial Board

Atef Monir Diab, Professor of Molecular Microbiology, Department of Medical Laboraties Technology, College of Applied Medical sciences, Taibah University, Ministry of Higher Education, Almadinah Almunawarrah, Saudi Arabia **El-Sayed El-Awady**, Professor of Pharmacology and Toxicology, Department of Pharmacology and Toxicology, College of Pharmacy, Taibah University, Almadinah Almunawwarah, Saudi Arabia

Mohamed Anwar Ramadan, Professor of Immuno-Molecular and Cellular Medical Parasitology, Department of Medical Laboratories Technology, College of Medical Rehabilitation Sciences, Taibah University, Almadinah Almunawwarah, Saudi Arabia

Salman Yousuf Guraya, Professor of Surgery, Consultant Minimally Invasive Surgeon, College of Medicine, Taibah University, Ministry of Higher Education, Almadinah Almunawwarah, Saudi Arabia

Fawzia Ahmed Habib, Associate Professor and Consultant of Obstetrics and Gynecology, Vice Dean for Female Section Affairs, College of Medicine, Taibah University, Almadinah Almunawwarah, Saudi Arabia

Khalid Ibrahim Khoshhal, Associate Professor of Orthopedics and Consultant Pediatric Orthopedic Surgeon, Vice Dean for Graduate Affairs, College of Medicine, Taibah University, Almadinah Almunawwarah, Saudi Arabia **Tamer Mohamed Hifnawy**, Associate Professor of Public Health and Community Medicine, College of Dentistry, Taibah University; Certified trainer in International Research Ethics; Consultant of Public Health and Community Medicine, Saudi Arabia

Publication Assistants

Zain Sahl Farsi,

Muhammad Asad Malik,

English Linguistic Experts
Ahmed Mohammad Ismail Zafer,
Elisabeth Haseltine,

Arabic Linguistic Expert
Hussain Abdullah Yamany,

Advisory Board

Ayman Abdo, Associate Professor of Medicine and Gastroenterology, College of Medicine, King Saud University, Riyadh, Kingdom of Saudi Arabia

Khalid Bin Abdulrahman, Professor of Family Medicine and Medical Education, College of Medicine, Al-Imam University, Riyadh, Kingdom of Saudi Arabia

Mohammad Ajabnoor, Professor of Clinical Biochemistry, College of Medicine and Allied Sciences, King Abdulaziz University, Jeddah, Kingdom of Saudi Arabia

Ibrahim Al Alwan, Professor of Pediatrics and Pediatric Endocrinology, College of Medicine, King Saud bin Abdulaziz University for Health Sciences, Riyadh, Kingdom of Saudi Arabia

Saleh Al-Damegh, Professor of Radiology, College of Medicine, Qassim University, Kingdom of Saudi Arabia **Mubarak Al Faran**, Professor of Ophthalmology, College of Medicine, King Saud University, Riyadh, Kingdom of Saudi Arabia

Mohamad Alhadramy, Professor of Medicine and Endocrinology, Barakat Taibah Medical Center, Almadinah Almunawwarah, Kingdom of Saudi Arabia

Abdulmonem Al Hayani, Professor of Anatomy, King Abdulziz University, Jeddah, Kingdom of Saudi Arabia. **Nasir Al Jurayyan**, Professor of Pediatrics and Pediatric Endocrinology, College of Medicine, King Saud University, Riyadh, Kingdom of Saudi Arabia

Tareq Lotfy Al-Khateeb, Professor of Dental Surgery, College of Dentistry, King Abdulaziz University, Jeddah, Kingdom of Saudi Arabia

Abdulkader Allam, Associate Professor of Medicine and Cardiology, College of Medicine, Taibah University, Almadinah Almunawwarah, Kingdom of Saudi Arabia

Saeed Abu-Eshy Almalki, Professor of Surgery, College of Medicine, Najran University, Najran, Kingdom of Saudi Arabia

Adnan Almazrooa, Associate Professor of Anesthesia and I.C.U, Taibah University, Almadinah Almunawwarah, Kingdom of Saudi Arabia

Mohammad Al-Mugeiren, Professor of Pediatrics and Pediatric Nephrology, College of Medicine, King Saud University, Riyadh, Kingdom of Saudi Arabia

Mansour Al Nozha, Professor of Medicine and Cardiology, Almadinah Almunawwarah, Kingdom of Saudi Arabia **Khaldoon Al-Roomi,** Associate Professor of Family and Community Medicine, College of Medicine, Arabian Gulf University, Manama, State of Bahrain

Abdullah Al-Rubaish, Associate Professor of Medicine and Pulmonology, Dammam University, Dammam, Kingdom of Saudi Arabia

Mussaad Al-Salman, Professor of Vascular Surgery, College of Medicine, King Saud University, Riyadh, Kingdom of Saudi Arabia

Basil Alshaikh, Associate Professor of Physiology, College of Medicine, Dammam University, Dammam, Kingdom of Saudi Arabia

Idriss Muneer Al-Turk, Professor of Bacteriology, College of Science, Taibah University, Almadinah Almunawwarah, Kingdom of Saudi Arabia

Ali Sulaiman Al Tuwaijri, Professor of Physiology, College of Medicine, King Saud bin Abdulaziz University, Riyadh, Kingdom of Saudi Arabia

Jamal Al-Wakeel, Professor of Medicine and Nephrology, College of Medicine, King Saud University, Riyadh, Kingdom of Saudi Arabia

Mohamed Najib Attala, Professor of Anesthesiology, Cleveland Clinic, Cleveland, OH, USA

Tony Freemont, Professor of Osteoarticular Pathology, University of Manchester and Manchester Academic Health Sciences Centre, Manchester, United Kingdom

Andy Garner, Professor of Pharmacology, Keele Univeristy, Keele, United Kingdom

Tawfiq Ghabra, Associate Professor of Community Medicine, College of Medicine, Tabuk University, Tabuk, Kingdom of Saudi Arabia

Hossam Hamdy, Professor of Pediatric Surgery, University of Sharjah, Sharjah, UAE

James Jarvis, Associate Professor of Orthopedic Surgery, University of Ottawa, Children's Hospital of Eastern Ontario, Ottawa, Ontario, Canada

Omar Kasule, Professor of Epidemiology and Bioethics, King Fahad Medical City, Riyadh, Kingdom of Saudi Arabia **Mamoun Kremli,** Professor of Pediatric Orthopedic Surgery, AlMaarefa College, Riyadh, Kingdom of Saudi Arabia **Nick London,** Professor of Vascular and Endocrine Surgery, Leicester University NHS, Leicester, United Kingdom **Waleed Milaat,** Professor of Family and Community Medicine, King Abdulaziz University, Jeddah, Kingdom of Saudi Arabia

Khalid Murshid, Associate Professor of Surgery, College of Medicine, Taibah University, Almadinah Almunawwarah, Kingdom of Saudi Arabia

Walid Murshid, Professor of Neurosurgery, College of Medicine, Taibah University, Almadinah Almunawarrah, Kingdom of Saudi Arabia

Esmail Niazy, Professor of Pharmaceutics, College of Pharmacy, Taibah University, Almadinah Almunawwarah, Kingdom of Saudi Arabia

Mustafa Salih, Professor of Pediatrics and Pediatric Neurology, College of Medicine, King Saud University, Riyadh, Kingdom of Saudi Arabia

Abdel Karim Tilmisany, Professor of Pharmacology, Ibn Sina College, Jeddah, Kingdom of Saudi Arabia

GUIDE FOR AUTHORS

BEFORE YOU BEGIN

Ethics in publishing

For information on Ethics in publishing and Ethical guidelines for journal publication see http://www.elsevier.com/publishingethics and http://www.elsevier.com/publishingethics and http://www.elsevier.com/publishingethics and http://www.elsevier.com/ethicalguidelines.

Policy and Ethics

The work described in your article must have been carried out in accordance with *The Code of Ethics of the World Medical Association (Declaration of Helsinki) for experiments involving humans* http://www.wma.net/en/30publications/10policies/b3/index.html; *EC Directive 86/609/EEC for animal experiments* http://ec.europa.eu/environment/chemicals/lab_animals/legislation_en.htm; *Uniform Requirements for manuscripts submitted to Biomedical journals* http://www.icmje.org. The manuscript should contain a statement that the work has been approved by the appropriate ethical committees related to the institution(s) in which it was performed and that subjects gave informed consent to the work (see declarations section above). Studies involving experiments with animals must state that their care was in accordance with institution guidelines. This must be stated at an appropriate point in the article.

Conflict of interest

All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/ registrations, and grants or other funding. See also http://www.elsevier.com/conflictsofinterest. Further information and an example of a Conflict of Interest form can be found at: http://elsevier6.custhelp.com/app/answers/detail/a_id/286/p/7923/.

Submission declaration

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere including electronically in the same form, in English or in any other language, without the written consent of the copyright-holder.

Authorship

All authors should have made substantial contributions to all of the following: (1) the conception and design of the study, or acquisition of data, or analysis and interpretation of data, (2) drafting the article or revising it critically for important intellectual content, (3) final approval of the version to be submitted.

Changes to authorship

This policy concerns the addition, deletion, or rearrangement of author names in the authorship of accepted manuscripts:

Before the accepted manuscript is published in an online issue: Requests to add or remove an author, or to rearrange the author names, must be sent to the Journal Manager from the corresponding author of the accepted manuscript and must include: (a) the reason the name should be added or removed, or the author names rearranged and (b) written confirmation (e-mail, fax, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Requests that are not sent by the corresponding author will be forwarded by the Journal Manager to the corresponding author, who must follow the procedure as described above. Note that: (1) Journal Managers will inform the Journal Editors of any such requests and (2) publication of the accepted manuscript in an online issue is suspended until authorship has been agreed.

After the accepted manuscript is published in an online issue: Any requests to add, delete, or rearrange author names in an article published in an online issue will follow the same policies as noted above and result in a corrigendum.

Clinical trial results

In line with the position of the International Committee of Medical Journal Editors, the journal will not consider results posted in the same clinical trials registry in which primary registration resides to be prior publication if the results posted are presented in the form of a brief structured (less than 500

words) abstract or table. However, divulging results in other circumstances (e.g., investors' meetings) is discouraged and may jeopardise consideration of the manuscript. Authors should fully disclose all posting in registries of results of the same or closely related work.

Copyright

All queries regarding copyrights should be directed to Taibah University or the Editor-in-Chief of the journal. Permission of the Publisher is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations. If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article.

Role of the funding source

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated. Please see http://www.elsevier.com/funding.

Funding body agreements and policies

Elsevier has established agreements and developed policies to allow authors whose articles appear in journals published by Elsevier, to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit http://www.elsevier.com/fundingbodies.

Language and language services

Please write your text in good English (American or British usage is accepted, but not a mixture of these).

Patient details

Unless you have written permission from the patient (or, where applicable, the next of kin), the personal details of any patient included in any part of the article and in any supplementary materials (including all illustrations and videos) must be removed before submission.

Submission

Submission to this journal proceeds totally online and you will be guided stepwise through the creation and uploading of your files. The system automatically converts source files to a single PDF file of the article, which is used in the peer-review process. Please note that even though manuscript source files are converted to PDF files at submission for the review process, these source files are needed for further processing after acceptance. All correspondence, including notification of the Editor's decision and requests for revision, takes place by e-mail removing the need for a paper trail.

Submit vour article

Please submit your article via http://ees.elsevier.com/jtumed

Referees

Please submit, with the manuscript, the names, addresses and e-mail addresses of three potential referees. Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

PREPARATION

Use of wordprocessing software

It is important that the file be saved in the native format of the wordprocessor used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the wordprocessor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier: http://www.elsevier.com/guidepublication). Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on Electronic artwork.

To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your wordprocessor.

Article structure

Subdivision - unnumbered sections

Divide your article into clearly defined sections. Each subsection is given a brief heading. Each heading should appear on its own separate line. Subsections should be used as much as possible when cross-referencing text: refer to the subsection by heading as opposed to simply 'the text'.

Introduction

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

Material and methods

Provide sufficient detail to allow the work to be reproduced. Methods already published should be indicated by a reference: only relevant modifications should be described.

Results

Results should be clear and concise.

Discussion

This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

Conclusions

The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

Appendices

If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

Essential title page information

- *Title.* Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
- **Author names and affiliations.** Where the family name may be ambiguous (e.g., a double name), please indicate this clearly. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
- Corresponding author. Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. Ensure that phone numbers (with country and area code) are provided in addition to the e-mail address and the complete postal address. Contact details must be kept up to date by the corresponding author.
- **Present/permanent address.** If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

Abstract

A concise and factual abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, References should be avoided, but if essential, then cite the author(s) and year(s). Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

Highlights

Highlights are a short collection of bullet points that convey the core findings of the article. Highlights are optional and should be submitted in a separate file in the online submission system. Please use 'Highlights' in the file name and include 3 to 5 bullet points (maximum 85 characters, including spaces, per bullet point).

Keywords

Immediately after the abstract, provide a maximum of 6 keywords, using American spelling and avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

Abbreviations

Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article.

Acknowledgements

Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

Math formulae

Present simple formulae in the line of normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

Footnotes

Footnotes should be used sparingly. Number them consecutively throughout the article, using superscript Arabic numbers. Many wordprocessors build footnotes into the text, and this feature may be used. Should this not be the case, indicate the position of footnotes in the text and present the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list.

Table footnotes

Indicate each footnote in a table with a superscript lowercase letter.

Artwork

Image manipulation

Whilst it is accepted that authors sometimes need to manipulate images for clarity, manipulation for purposes of deception or fraud will be seen as scientific ethical abuse and will be dealt with accordingly. For graphical images, this journal is applying the following policy: no specific feature within an image may be enhanced, obscured, moved, removed, or introduced. Adjustments of brightness, contrast, or color balance are acceptable if and as long as they do not obscure or eliminate any information present in the original. Nonlinear adjustments (e.g. changes to gamma settings) must be disclosed in the figure legend.

Electronic artwork

General points

- Make sure you use uniform lettering and sizing of your original artwork.
- Embed the used fonts if the application provides that option.
- Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Provide captions to illustrations separately.
- Size the illustrations close to the desired dimensions of the printed version.
- Submit each illustration as a separate file.

A detailed guide on electronic artwork is available on our website:

http://www.elsevier.com/artworkinstructions

You are urged to visit this site; some excerpts from the detailed information are given here. Formats

If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format.

Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please 'Save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

EPS (or PDF): Vector drawings, embed all used fonts.

TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.

TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi. TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale), keep to a minimum of 500 dpi.

Please do not:

- Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

Color artwork

Please make sure that artwork files are in an acceptable format (TIFF, EPS or MS Office files) and with the correct resolution.

Figure captions

Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (**not** on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

Tables

Number tables consecutively in accordance with their appearance in the text. Place footnotes to tables below the table body and indicate them with superscript lowercase letters. Avoid vertical rules. Be sparing in the use of tables and ensure that the data presented in tables do not duplicate results described elsewhere in the article.

References

Citation in text

Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

Web references

As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

References in a special issue

Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

Reference style

Text: Indicate references by superscript numbers in the text. The actual authors can be referred to, but the reference number(s) must always be given.

List: Number the references in the list in the order in which they appear in the text. Examples:

Reference to a journal publication:

1. Van der Geer J, Hanraads JAJ, Lupton RA. The art of writing a scientific article. *J Sci Commun* 2010;**163**:51–9.

Reference to a book:

2. Strunk Jr W, White EB. *The elements of style.* 4th ed. New York: Longman; 2000.

Reference to a chapter in an edited book:

3. Mettam GR, Adams LB. How to prepare an electronic version of your article. In: Jones BS, Smith RZ, editors. *Introduction to the electronic age*, New York: E-Publishing Inc; 2009, p. 281–304. Note shortened form for last page number. e.g., 51–9, and that for more than 6 authors the first 6 should be listed followed by 'et al.' For further details you are referred to 'Uniform Requirements for Manuscripts submitted to Biomedical Journals' (J Am Med Assoc 1997;**277**:927–34) (see also http://www.nlm.nih.gov/bsd/uniform_requirements.html).

Journal abbreviations source

Journal names should be abbreviated according to:

List of title word abbreviations: http://www.issn.org/2-22661-LTWA-online.php; NLM Catalog (Journals referenced in the NCBI Databases): http://www.ncbi.nlm.nih.gov/nlmcatalog/journals; CAS (Chemical Abstracts Service): via http://www.cas.org/content/references/corejournals.

Video data

Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file's content. In order to ensure that your video or animation material is directly usable, please provide the files in one of our recommended file formats with a preferred maximum size of 50 MB. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect: http://www.sciencedirect.com. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our video instruction pages at http://www.elsevier.com/artworkinstructions. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

Submission checklist

The following list will be useful during the final checking of an article prior to sending it to the journal for review. Please consult this Guide for Authors for further details of any item.

Ensure that the following items are present:

One author has been designated as the corresponding author with contact details:

- Job Title
- Department and Institution
- E-mail address
- Full postal address
- · Phone numbers

All necessary files have been uploaded, and contain:

- Keywords
- All figure captions
- All tables (including title, description, footnotes)

Further considerations

- Manuscript has been 'spell-checked' and 'grammar-checked'
- References are in the correct format for this journal
- All references mentioned in the Reference list are cited in the text, and vice versa
- Permission has been obtained for use of copyrighted material from other sources (including the Web)
- Color figures are clearly marked as being intended for color reproduction on the Web (free of charge) and in print, or to be reproduced in color on the Web (free of charge) and in black-and-white in print
- If only color on the Web is required, black-and-white versions of the figures are also supplied for printing purposes.

AFTER ACCEPTANCE

Use of the Digital Object Identifier

The Digital Object Identifier (DOI) may be used to cite and link to electronic documents. The DOI consists of a unique alpha-numeric character string which is assigned to a document by the publisher upon the initial electronic publication. The assigned DOI never changes. Therefore, it is an ideal medium for citing a document, particularly 'Articles in press' because they have not yet received their full bibliographic information. Example of a correctly given DOI (in URL format; here an article in the journal *Physics Letters B*):

http://dx.doi.org/10.1016/j.physletb.2010.09.059

When you use a DOI to create links to documents on the web, the DOIs are guaranteed never to change.

Proofs

One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or, a link will be provided in the e-mail so that authors can download the files themselves. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to download Adobe Reader version 7 (or higher) available free from http://get.adobe.com/reader. Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the Adobe site: http://www.adobe.com/products/reader/tech-specs.html.

If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and return by fax, or scan the pages and e-mail, or by post. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately – please let us have all your corrections within 48 hours. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility. Note that Elsevier may proceed with the publication of your article if no response is received.

© Copyright 2012 Elsevier | http://www.elsevier.com
