Infectious Diseases
Clinical Infection in Practice
Official Journal of the British Infection Association
Editor-in-Chief: Martin Wiselka
The journal provides a forum for the advancement of knowledge and discussion of clinical infection in practice. It embraces relevant clinical research and clinical management issues, including case reports and case series demonstrating novel or interesting findings. This is of particular value in a field where clinicians are often faced with relatively rare conditions or clinical problems where the only supportive literature is at case report level. It is aimed at all specialists and trainees working in clinical infection-related disciplines including clinical microbiologists/virologists, infectious diseases and tropical disease physicians, public health specialists and supporting professional staff.

4 issues per year • 2590-1702
www.journals.elsevier.com/clinical-infection-in-practice

Clinical Microbiology and Infection
Official Publication of the European Society of Clinical Microbiology and Infectious Diseases (ESCMID)
Editor-in-Chief: Leonard Leibovici
This authoritative, peer-reviewed journal covers basic and applied research relevant to therapy and diagnostics in the fields of microbiology, infectious diseases, virology, parasitology, immunology and epidemiology.

12 issues per year, ISSN: 1198-743X
www.journals.elsevier.com/clinical-microbiology-and-infection
Clinical Microbiology Newsletter
Editors: Carey-Ann Burnham, Christopher Doern, Elli Theel, Donna Wolk
Highly respected for its ability to keep pace with advances in this fast moving field, Clinical Microbiology Newsletter has quickly become a benchmark for anyone in the lab. Twice a month the newsletter reports on changes that affect your work, ranging from articles on new diagnostic techniques, to surveys of how readers handle blood cultures, to editorials questioning common procedures and suggesting new ones.
24 issues per year, ISSN: 0196-4399
www.journals.elsevier.com/clinical-microbiology-newsletter

Diagnostic Microbiology and Infectious Disease
Editor-in-Chief: Mark Holodniy
Diagnostic Microbiology and Infectious Disease keeps you informed of the latest developments in clinical microbiology and the diagnosis and treatment of infectious diseases. This peer-reviewed journal examines new procedures, unusual cases, controversial issues and important new literature.
12 issues per year, ISSN: 0732-8893
www.journals.elsevier.com/diagnostic-microbiology-and-infectious-disease

EBioMedicine
Part of The Lancet Discovery Science
Editor-in-Chief: Julie Stacey
eBioMedicine is the premium gold open access venue for translational biomedical research. The journal publishes original research that elucidates, or aims to modify, disease pathways and mechanisms with the goal of advancing our knowledge in any biomedical discipline with relevance to human health as well as relevant reviews, commentaries, and opinion pieces.
12 issues per year, ISSN: 2352-3964
www.ebiomedicine.com
Infectious Diseases

IDCases
Editor-in-Chief: Larry Lutwick
IDCases is an open access, peer-reviewed journal dedicated to publishing case reports in general infectious diseases.
4 issues per year, ISSN: 2214-2509
www.journals.elsevier.com/idcases

IJID Regions
An official journal of the International Society for Infectious Diseases (ISID)
Editor-in-Chief: Dr Eskild Peterson
IJID Regions aims to publish high-quality, evidence-based infectious disease science of regional interest and relevance. Enhance visibility of regional research with focus on those infectious diseases that are common in under-resourced countries and settings. Publish research that can be utilized by national and regional health clinicians, scientists, health systems, and public health policy makers.
4 issues per year, ISSN: 2772-7076
www.journals.elsevier.com/ijid-regions

Indian Journal of Tuberculosis
Editor-in-Chief: Dr. Vijay Arora
Indian Journal of Tuberculosis (IJTBJ) is an international peer-reviewed journal devoted to tuberculosis and diseases of the lung. The journal publishes research on clinical, epidemiological, public health and social aspects of tuberculosis. Article types accepted include original research articles, viewpoints, reviews, success stories, interesting case series and case reports on patients suffering from pulmonary, extra-pulmonary tuberculosis as well as other respiratory diseases.
Indexed in Scopus and Medline.
4 issues per year, ISSN 0019-5707
www.journals.elsevier.com/indian-journal-of-tuberculosis
Infection, Disease & Health
Official Journal of the Australasian College for Infection Prevention and Control

Editor-in-Chief: Brett Mitchell

Infection, Disease & Health is a platform for the publication and dissemination of knowledge in the area of infection and disease causing infection in humans. The journal publishes research, reviews, concise communications, commentary and other articles concerned with infection and disease affecting the health of an individual, organisation or population.

4 issues per year, ISSN 2468-0451
www.journals.elsevier.com/infection-disease-and-health

Infection Prevention in Practice
Official Journal of the Healthcare Infection Society

Editor: Gemma Winzor

Infection Prevention in Practice provides a comprehensive educational resource for all those working in the field of infectious disease prevention and treatment, through the sharing of local research studies, experiences, case reports, novel techniques, best practice and outbreak reports from clinical professionals globally, with a focus on developing countries.

4 issues per year, ISSN: 2590-0889
www.journals.elsevier.com/infection-prevention-in-practice

Infectious Diseases Now
Official Journal of SPILF, French Infectious Diseases Society (Société de Pathologie Infectieuse de Langue Française)

Editor-in-Chief: Jean-Paul Stahl

Infectious Diseases Now (formerly Médecine et Maladies Infectieuses) publishes in English the highest quality original material, both scientific and clinical, on the various infectious pathologies and their pathogens. It publishes scientific articles in English, which address the various infectious pathologies and their pathogens. The journal’s areas of study include clinical, prevention, biology, nosocomial infections, epidemiology and therapeutics.

8 issues per year, ISSN: 2666-9919
www.journals.elsevier.com/infectious-diseases-now
Infectious Medicine

Official journal of the Tsinghua University Press

Editor-in-Chief: Xuejie Yu

Infectious Medicine is an open access journal publishing papers on any aspect of infection and infectious disease, especially research on the intersection of emerging infectious diseases and animal-borne infectious diseases. Articles from any field of infectious diseases and pathogens including viruses, bacteria and parasites will be considered if the article is relevant to the understanding or manipulation of a disease state, diagnosis, and treatment, or understanding the pathogenesis of a disease or host-pathogen interaction.

4 issues per year, ISSN: 2772-431X

www.journals.elsevier.com/infectious-medicine

International Journal of Antimicrobial Agents

Official Journal of International Society of Antimicrobial Chemotherapy

Editor-in-Chief: Jean-Marc Rolain

The International Journal of Antimicrobial Agents provides comprehensive and up-to-date peer reviewed reference information on the physical, pharmacological, in vitro and clinical properties of individual antimicrobial agents.

12 issues per year, ISSN: 0924-8579

www.journals.elsevier.com/international-journal-of-antimicrobial-agents

International Journal of Infectious Diseases

Official Journal of International Society for Infectious Diseases

Editor-in-Chief: Eskild Petersen

The International Journal of Infectious Diseases (IJID) is a peer-reviewed, open access journal and publishes original clinical and laboratory-based research, together with reports of clinical trials, reviews and some case reports dealing with the epidemiology, clinical diagnosis, treatment and control of infectious diseases with particular emphasis placed on those diseases that are most common in under-resourced countries.

12 issues per year, ISSN: 1201-9712

www.journals.elsevier.com/international-journal-of-infectious-diseases
Journal of Clinical Tuberculosis and Other Mycobacterial Diseases

Editor-in-Chief: Zelalem Temesgen

This open access, peer-reviewed journal aims to provide a forum for clinically relevant articles on all aspects of tuberculosis and other mycobacterial infections, including (but not limited to) epidemiology, clinical investigation, transmission, diagnosis, treatment, drug-resistance and public policy. It encourages the submission of clinical studies, thematic reviews and case reports.

Published continuously, ISSN: 2405-5794
www.journals.elsevier.com/journal-of-clinical-tuberculosis-and-other-mycobacterial-diseases

Journal of Clinical Virology

Official Journal of Pan American Society for Clinical Virology and the European Society for Clinical Virology

Editors-in-Chief: Bert Niesters, Benjamin Pinsky

Journal of Clinical Virology is an international journal publishing papers on any aspect of human virology that directly pertains to virus induced clinical conditions.

12 issues per year, ISSN: 1386-6532
www.journals.elsevier.com/journal-of-clinical-virology

Journal of Clinical Virology Plus

Official Journal of Pan American Society for Clinical Virology and the European Society for Clinical Virology

Editors-in-Chief: Catherine Moore

Journal of Clinical Virology Plus is an open access journal publishing papers on any aspect of human virology that directly pertains to virus-induced clinical conditions. Articles from any field of virological study will be considered if the article is relevant to the understanding or manipulation of a disease state, such as new data on the detection, diagnosis and epidemiology of viral infection in the human host.

4 issues per year, ISSN: 2667-0380
www.journals.elsevier.com/journal-of-clinical-virology-plus
Infectious Diseases

**Journal of Global Antimicrobial Resistance**

*An official journal of and owned by the International Society of Antimicrobial Chemotherapy, the Global Chinese Association of Clinical Microbiology and Infectious Diseases, and the Asia-Pacific Society of Clinical Microbiology and Infection*

**Editor-in-Chief:** Stefania Stefani

The *Journal of Global Antimicrobial Resistance (JGAR)* is a quarterly journal run by an international Editorial Board that focuses on the global spread of antibiotic-resistant microbes.

**4 issues per year, ISSN: 2213-7165**

---

**Journal of Hospital Infection**

*Official Journal of the Healthcare Infection Society*

**Editor:** Jim Gray

The journal seeks to promote collaboration between the many disciplines in infection control in different countries resulting in multidisciplinary and international coverage of the latest developments in this crucial area.

**12 issues per year, ISSN: 0195-6701**

[www.journals.elsevier.com/journal-of-hospital-infection](http://www.journals.elsevier.com/journal-of-hospital-infection)

---

**Journal of Infection**

*Official Journal of the British Infection Association*

**Editor-in-Chief:** Robert Read

The *Journal of Infection* publishes original papers on all aspects of infection – clinical, microbiological and epidemiological. The journal seeks to bring together knowledge from all specialties involved in infection research and clinical practice, and present the best work in the ever-changing field of infection.

**12 issues per year, ISSN: 0163-4453**

[www.journals.elsevier.com/journal-of-infection](http://www.journals.elsevier.com/journal-of-infection)
Journal of Infection and Chemotherapy

Official Journal of the Japanese Society of Chemotherapy and The Japanese Association for Infectious Diseases

Editor-in-Chief: Satoshi Takahashi

The Journal of Infection and Chemotherapy welcomes original papers, laboratory or clinical, as well as case reports, notes, committee reports, surveillance and guidelines from all parts of the world on all aspects of chemotherapy, covering the pathogenesis, diagnosis, treatment, and control of infection, including treatment with anticancer drugs. Experimental studies on animal models and pharmacokinetics, and reports on epidemiology and clinical trials are particularly welcome.

12 issues per year, ISSN: 1341-321X

www.journals.elsevier.com/journal-of-infection-and-chemotherapy

Journal of Infection and Public Health

The Official Publication of the Saudi Arabian Ministry of National Guard Health Affairs, King Saud Bin Abdulaziz University for Health Sciences and Saudi Association for Public Health

Editor-in-Chief: Sameera Al Johani

The Journal of Infection and Public Health aims to be the foremost scientific, peer-reviewed journal encompassing infection prevention and control, microbiology, infectious diseases, public health and the application of healthcare epidemiology to the evaluation of health outcomes. The point of view of the journal is that infection and public health are closely intertwined and that advances in one area will have positive consequences on the other.

12 issues per year, ISSN: 1876-0341

www.journals.elsevier.com/journal-of-infection-and-public-health

Journal of Migration and Health

Editor-in-Chief: Helena Legido-Quigley

Journal of Migration and Health is a broad scope open access journal publishing research, reviews, and other publication forms on any topics relevant to Migration and Health. This includes, but is not limited to, Infectious Diseases, non-communicable diseases, psychological conditions, as well as provision of and access to healthcare and related topics.

2 issues per year, ISSN: 2666-6235

www.journals.elsevier.com/journal-of-migration-and-health
The Lancet Global Health
Editor: Zoë Mullan
The Lancet Global Health is an online-only, open access journal committed to evidence based medicine and public health in low income and middle-income countries. It publishes high-quality original research, commentary, correspondence, and blogs on a wide range of global health topics, including infectious diseases and neglected tropical diseases.
12 issues per year, ISSN: 2214-109X
www.thelancet.com/infection

The Lancet HIV
Editor: Peter Hayward
The Lancet HIV is an online journal, publishing high-impact original research, expert commentary, and informative editorials. The journal aims to provide context and insight into the research and treatment shaping HIV/AIDS today, as the interaction of the virus with other chronic conditions begins to present a host of new medical challenges.
12 Issues per year, ISSN: 2352-3018
www.thelancet.com/hiv

The Lancet Infectious Diseases
Editor: John McConnell
The Lancet Infectious Diseases offers a global and authoritative forum for high-impact research and opinion with relevance to clinical decision making. The journal provides comprehensive coverage across the broad spectrum of clinical infectious diseases, including antibiotic resistance, HIV/AIDS, healthcare association infections, malaria, emerging infections, tuberculosis, and public health.
12 issues per year, ISSN: 1473-3099
www.thelancet.com/infection
New Microbes and New Infections

Editor-in-Chief: Prof. Dr. Patricia Schlagenhauf-Lawlor

*New Microbes and New Infections* offers clinicians and researchers a rapid route to publication and the opportunity to publish in a highly visible global forum. This peer-reviewed, open access journal publishes the latest research, with a particular focus on new genomes, new microbes and new technology applied to the diagnosis of infectious/tropical diseases.

6 issues per year, ISSN: 2052-2975

www.journals.elsevier.com/new-microbes-and-new-infections

---

Travel Medicine and Infectious Disease

The official journal of the Royal College of Physicians and Surgeons of Glasgow and the Latin American Society for Travel Medicine. Affiliated with the German Society for Tropical Medicine and International Health

Editor-in-Chief: Prof. Dr. Alfonso J. Rodriguez-Morales

*Travel Medicine and Infectious Disease* publishes original papers, reviews and consensus papers on all aspects of travel medicine and infectious disease.

6 issues per year, ISSN: 1477-8939

www.journals.elsevier.com/travel-medicine-and-infectious-disease

---

Tuberculosis

Editor-in-Chief: Brian D. Robertson

The only journal dedicated to experimental biomedical research in tuberculosis, *Tuberculosis* focuses on the latest research advances relevant to tuberculosis control and elimination. The journal publishes original research and reviews on the host response and immunology of tuberculosis and the molecular biology, genetics and physiology of the organism.

6 issues per year, ISSN: 1472-9792

www.journals.elsevier.com/tuberculosis
Microbiology & Vaccinology
Anaerobe
Official Journal of the Anaerobe Society of the Americas, and the Japanese Association for Anaerobic Infection Research
Editor-in-Chief: Dr. Elisabeth Nagy
Anaerobe is essential reading for those who wish to remain at the forefront of discoveries relating to life processes of strictly anaerobes. The journal is multidisciplinary, and provides a unique forum for those investigating anaerobic organisms that cause infections in humans and animals, as well as anaerobes that play roles in microbiomes or environmental processes. Anaerobe publishes reviews, mini reviews, original research articles, notes and case reports.
6 issues per year, ISSN: 1075-9964
www.journals.elsevier.com/anaerobe

Epidemics
The Journal on Infectious Disease Dynamics
Editors-in-Chief: Dr. Katia Koelle, Dr. Cecile Viboud, Professor Joseph Wu
Epidemics is an open access journal that publishes papers on infectious disease dynamics in the broadest sense. Its scope covers both within-host dynamics of infectious agents and dynamics at the population level, particularly the interaction between the two. Areas of emphasis include: spread, transmission, persistence, implications and population dynamics of infectious diseases; population and public health as well as policy aspects of control and prevention; dynamics at the individual level; interaction with the environment, ecology and evolution of infectious diseases, as well as population genetics of infectious agents.
4 issues per year, ISSN: 1755-4365
www.journals.elsevier.com/epidemics
Microbiology & Vaccinology

Infection, Genetics and Evolution

Journal of Molecular Epidemiology and Evolutionary Genetics of Infectious Diseases (MEEGID)

Co-Editors-in-Chief: Fernando González-Candelas, PhD, Manuela Sironi, Ph.D

MEEGID is the main forum acting for the cross-fertilization between evolutionary science and biomedical research on infectious diseases. It welcomes articles dealing with the genetics and evolutionary biology of hosts, pathogens and vectors, and coevolution processes among them in relation to infection and disease manifestation.

From January 2022 Infection, Genetics and Evolution is an open access journal.

8 issues per year, ISSN 1567-1348

www.journals.elsevier.com/infection-genetics-and-evolution

International Journal of Medical Microbiology

Editor-in-Chief: Sebastian Suerbaum

This peer-reviewed journal focuses on genome and proteome analyses, studies dealing with the molecular mechanisms of pathogenicity and the evolution of pathogenic agents, the interactions between pathogens and host cells (‘cellular microbiology’) and molecular epidemiology. Two special themed issues are published each year.

8 issues per year, ISSN: 1438-4221

www.journals.elsevier.com/international-journal-of-medical-microbiology

Journal of Medical Mycology / Journal de Mycologie Médicale

Editors-in-Chief: Alix Coste, Christophe Hennequin, Christine Imbert

The Journal of Medical Mycology / Journal de Mycologie Médicale (JMM), the official journal of the French Society for Medical Mycology (SFMM), publishes in English works dealing with human and animal mycology.

The subjects treated are focused in particular on clinical, diagnostic, epidemiological, immunological, medical, pathological, preventive or therapeutic aspects of mycoses. JMM publishes (guest) editorials, original articles, reviews, case reports, technical notes, letters to the editor and information.

4 issues per year, ISSN: 1156-5233

www.journals.elsevier.com/journal-de-mycologie-medicale
Microbiology & Vaccinology

Medical Mycology Case Reports
Supported by the International Society for Human and Animal Mycology (ISHAM)
Editor-in-Chief: Professor Adilia Warris
MMCR is an open access journal devoted to the publication of case reports or case series (up to 5 cases) that concern medical or veterinary diseases caused by fungi. The journal aims to provide a valuable collection of fungal cases with clinically important information.
10 issues per year, ISSN: 2211-7539
www.journals.elsevier.com/medical-mycology-case-reports

Microbes and Infection
A publication of the Institut Pasteur
Editor-in-Chief: O. Dussurget
Microbes and Infection publishes in all fields of infection and immunity, covering the different levels of host-microbe interactions. Clinical studies, accounts of clinical trials and biomarker studies in infectious diseases, unless purely descriptive, are within the scope of the journal.
8 issues per year, ISSN: 1286-4579
www.journals.elsevier.com/microbes-and-infection

Vaccine
The official journal of The Japanese Society for Vaccinology
Editor-in-Chief: Gregory A. Poland
Vaccine is unique in publishing the highest quality science across all disciplines relevant to the field of vaccinology - all original article submissions across basic and clinical research, vaccine manufacturing, history, public policy, behavioral science and ethics, social sciences, safety, and many other related areas are welcomed. We invite authors to submit relevant basic science and clinical reviews, methodological articles, opinion and commentary pieces, visual pieces, and letters.
52 issues per year, ISSN: 0264-410X
www.journals.elsevier.com/vaccine
Vaccine: X

Editor-in-Chief: Gregory A. Poland

Vaccine: X is the open access journal of Vaccine and has the same aims and scope. The journal offers authors who want to publish in a gold open access journal the opportunity to make their work immediately and permanently accessible. Vaccine: X is unique in publishing high quality science across all disciplines relevant to the field of vaccinology – all original article submissions across basic and clinical research, vaccine manufacturing, history, public policy, behavioral science and ethics, social sciences, safety, and many other related areas are welcomed.

3 issues per year, ISSN: 2590-1362
journals.elsevier.com/vaccine-x

Elsevier Benefits for Authors

Mendeley Stats

Knowing the impact of your research can be invaluable when you’re applying for funding, seeking a new position or working towards a promotion. As a published author, Stats provides you with a unique, connected view of how your published articles are performing in terms of citations, views for articles you published in an Elsevier publication and Mendeley sharing. Mendeley Stats is an Elsevier service to authors but not limited to Elsevier published articles.

Based on Scopus it also provides citation information for articles published with other publishers. Get your stats at:

https://www.mendeley.com/stats/welcome

For tips on how authors can promote their work go to
