Power of Scopus

Leading in quality & quantity
Scopus continually processes, enriches and makes available a vast quantity of data, with rigorous quality-control standards to maintain the integrity of the database.

The gold standard
Scopus is recognized for its excellence by 5,000 customers including 150 leading research organizations who continue to choose Scopus for research assessment and evaluation purposes over any other competitor.

Complete coverage across the sciences
Scopus integrates broad and deep coverage of quality peer-reviewed literature and web resources across science, technology, health, the social sciences and the humanities. Titles on Scopus are classified under four subject clusters:

- **Health Sciences**: 25% (7,468 titles)
- **Life Sciences**: 16% (4,883 titles)
- **Physical Sciences**: 27% (8,102 titles)
- **Social Sciences**: 32% (9,692 titles)

*Includes active titles. Titles may fall into more than one subject area

A world of data to mine
Scopus delivers all metadata as provided by publishers, including: author(s), affiliation(s), document title, year, electronic identification (EID), source title, volume/issue/pages, citation count(s), source, document type and digital object identifier (DOI).
