A Toolbox Approach to Construct Broadly Applicable Metal-Free Catalysts for Photoredox Chemistry

Elisabeth Speckmeier§, Tillmann G. Fischer§, Kirsten Zeitler

Possible Modification Handles for Property Tuning of Visible Light Photocatalysts

Correlation of Redox Potentials and Influences of Donor/Acceptor Strength

Overview of Common Visible Light Photocatalysts and all Investigated Photocatalysts in this Study, Displaying their Redox Potentials vs SCE plus $E_{ox}$ Energies in Extended Latimer-Type Diagrams
