

Remdesivir Solution for injection

U.S. Trade Names

The list of names may not include all products that are available on the market.

What is this medicine?

REMDESIVIR (rem DE si veer) is an antiviral medicine used to treat COVID-19. It will not work for colds, flu, or other viral infections.

This medicine may be used for other purposes; ask your health care provider or pharmacist if you have questions.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- kidney disease
- liver disease
- an unusual or allergic reaction to remdesivir, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I use this medicine?

This medicine is for infusion into a vein. It is given by a health care professional in a hospital setting.

Talk to your pediatrician regarding the use of this medicine in children. While this drug may be prescribed for selected conditions, precautions do apply.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once. NOTE: This medicine is only for you. Do not share this medicine with others.

What if I miss a dose?

This does not apply.

What may interact with this medicine?

Do not take this medicine with any of the following medications:

- certain medicines for seizures like carbamazepine, phenobarbital, phenytoin, primidone
- chloroquine
- hydroxychloroquine
- rifampin
- rifapentine
- St. John's wort

This medicine may also interact with the following medications:

- dexamethasone
- eslicarbazepine
- oxcarbazepine
- rifabutin
- rufinamide

This list may not describe all possible interactions. Give your health care provider a list of all the medicines, herbs, non-prescription drugs, or dietary supplements you use. Also tell them if you smoke, drink alcohol, or use illegal drugs. Some items may interact with your medicine.

What side effects may I notice from receiving this medicine?

Side effects that you should report to your doctor or health care professional as soon as possible:

- allergic reactions like skin rash, itching or hives, swelling of the face, lips, or tongue
- breathing problems
- fast, irregular heartbeat

Side effects that usually do not require medical attention (report these to your doctor or health care professional if they continue or are bothersome):

- constipation
- diarrhea
- headache
- nausea

This list may not describe all possible side effects. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

What should I watch for while using this medicine?

Your condition will be monitored carefully while you are receiving this medicine.

Visit your doctor or health care professional for regular check-ups. Tell your doctor if your symptoms do not start to get better or if they get worse.

Where should I keep my medicine?

This drug is given in a hospital and will not be stored at home.

NOTE: This sheet is a summary. It may not cover all possible information. If you have questions about this medicine, talk to your doctor, pharmacist, or health care provider.
