Ei THESAURUS, 6th Edition

Features over 370 New Access and Retrieval Routes

Bio ceramics...fuzzy logic...nanosensors
...polyblends...and tissue engineering
are among the promising disciplines reflected by
the 371 new search terms featured in the sixth
edition of the **Ei Thesaurus**. This controlled set
of indexing terms – rigorously maintained and
refined by subject specialists – helps users
navigate over 11.9 million records in the **Ei
Compendex®** database with greater speed,
clarity, and creativity.

- Focus on a proven set of categories reduces irrelevant results and duplications.
- Synonyms and descriptive data help refine or expand queries.
- New terms embrace the latest and emerging disciplines across a range of engineering specialities.
