

Elsevier Major Reference Works 2023

Major Reference Works provide researchers and students with authoritative, fundamental knowledge, enabling them to successfully build knowledge and confidence in new and interdisciplinary subject areas.

87% of ScienceDirect users agree they need fundamental information in their work

Source: TechValidate survey of 270 users of Elsevier ScienceDirect. TechValidate. TVID: 9D4-230-2AD

Elsevier Major Reference Works 2023

- Provide a wealth of foundational knowledge in a field
- Are trusted and peer reviewed
- Offer interdisciplinary knowledge across a subject area
- Build fundamental knowledge and confidence in new and interdisciplinary subject areas
- Are aligned with other content types on ScienceDirect ensuring your researchers are making the most of your content and getting the full picture of a subject area
- Are surfaced through ScienceDirect Topics which provides critical contextual knowledge at a user's point of need

Major Reference Works are a long-term investment

The lifetime usage of Major Reference Works is greater over a longer period of time than other content types demonstrating the enduring value of this critical foundational content.

A recent study shows 30% of Major Reference Work usage is still generated 10 years after publication*

*Based on Usage Analysis on ScienceDirect

ELSEVIER

We have a wide range of new Major Reference Works for 2023 covering topics from sleep to toxicology to biodiversity

Comprehensive Computational Chemistry	1-Nov-23
Encyclopedia of Meat Sciences, 3rd Edition	1-Nov-23
Encyclopedia of Biodiversity, 3rd Edition	15-Nov-23
Comprehensive Precision Medicine	1-Dec-23

“Reading an article in a Major Reference Work is like attending a keynote address given by a recognized expert. These experts provide context, insight and information that would normally take days to acquire and process. I strongly recommend these articles as a great jumping off point for young scientists and/or more senior individuals looking to expand their programs.”

—Bernard D. Roitberg, Simon Fraser University
