Psychiatry Journals 2021

Alcohol
Publishes biomedical research on all aspects of the actions or effects of alcohol on the nervous system or on other organ systems. Includes studies on the causes and consequences of alcohol abuse and alcoholism, and biomedical aspects of diagnosis, etiology, treatment or prevention of alcohol-related health effects. The journal also covers the neurobiological, neurobehavioral, and pathophysiological processes associated with alcohol drinking, alcohol abuse, alcohol-seeking behavior, tolerance, dependence, withdrawal, protracted abstinence, and relapse. The effects of alcohol on brain mechanisms of neuroplasticity over the life span, biological factors associated with adolescent alcohol abuse, pharmacotherapeutic strategies in the treatment of alcoholism, biological and biochemical markers of alcohol abuse and alcoholism, pathological effects of uncontrolled drinking, biomedical and molecular factors in the effects on liver, immune system, and other organ systems, and biomedical aspects of fetal alcohol spectrum disorder are also covered.
www.sciencedirect.com/journal/alcohol

The American Journal of Geriatric Psychiatry
Official Journal of the American Association for Geriatric Psychiatry
Publishes on the diagnosis and classification of psychiatric disorders of later life, epidemiological and biological correlates of mental health of older adults, and psychopharmacology and other somatic treatments.

Archives of Psychiatric Nursing
Official Journal of the International Society of Psychiatric Mental-Health Nurses
Publishes original research of interest to psychiatric and mental health care nurses in its broadest perspective, including theory, practice, and research applications related to all ages, special populations, settings, and interdisciplinary collaborations in both the public and private sectors.

Asian Journal of Psychiatry
A general and comprehensive journal of psychiatry for psychiatrists, mental health clinicians, neurologists, physicians, students of mental health and those involved in mental health policy development. The journal bridges a knowledge gap between the application and transfer of research findings and clinical practice through Asia to and from the rest of the world with a focus on psychiatric research pertinent to Asia produced either within or from outside the continent. This includes preclinical, clinical, service system and policy development research relevant to psychiatry and the socio-cultural diversity of the region as it pertains to mental health.
www.sciencedirect.com/journal/asian-journal-of-psychiatry

Biological Psychiatry
A Journal of Psychiatric Neuroscience and Therapeutics
An Official Journal of the Society of Biological Psychiatry
Publishes on the nature, causes, mechanisms and treatments of disorders of thought, emotion, or behavior through basic and clinical contributions from all disciplines and research areas relevant to the pathophysiology and treatment of major psychiatric disorders. This includes original research representing an important new lead or significant impact on the field, particularly those addressing genetic and environmental risk factors, neural circuitry and neurochemistry, and important new therapeutic approaches.
Psychiatry Journals 2021

**Biological Psychiatry: Cognitive Neuroscience and Neuroimaging**

*An Official Journal of the Society of Biological Psychiatry*

Publishes studies using the tools and constructs of cognitive neuroscience, including the full range of non-invasive neuroimaging and human extra- and intracranial physiological recording methodologies. This includes basic and clinical studies that incorporate genetic data, pharmacological challenges, and computational modeling approaches.

**Biological Psychiatry: Global Open Science**

*An Official Journal of the Society of Biological Psychiatry*

Publishes basic, translational, and clinical contributions from scientists across the world in all disciplines, research areas, and research methods relevant to the pathophysiology and treatment of major psychiatric disorders. This includes novel results of original research which represent an important new lead or significant impact on the field, including those addressing genetic and environmental risk factors, neural circuitry, neurochemistry, hormonal function, and computational understanding across the lifespan, as well as important new therapeutic approaches. Reviews, meta-analyses, and commentaries that focus on topics of key research and broad interest are also encouraged, as well as pre-registered reports.

www.bpsgos.org | www.sciencedirect.com/journal/biological-psychiatry-global-open-science

**Biomarkers in Neuropsychiatry**

Publishes on neurobiologic, therapeutic and prognostic biomarkers associated with all brain disorders, neurologic and/or psychiatric. The journal covers a wide array of genetic, molecular, neuroimaging (MRI, MRS, fMRI and DTI), neurophysiological, neurochemical, endocrinological and immunological biomarkers, related to brain structure or function in all neuropsychiatric disorders and encourages interdisciplinary research collaboration across multiple scientific disciplines in an effort to facilitate the generation of breakthrough insights and novel biomarkers.

www.sciencedirect.com/journal/biomarkers-in-neuropsychiatry

**Brain Stimulation**

*Basic, Translational, and Clinical Research in Neuromodulation*

Publishes on the entire field of brain stimulation, including noninvasive and invasive techniques and technologies that alter brain function through the use of electrical, magnetic, radiowave, or focally targeted pharmacologic stimulation. Includes the effects of brain stimulation on basic processes such as gene expression and other aspects of molecular biology, neurochemical regulation, functional brain activity, sensorimotor function, and cognitive and affective processes at the systems level. The biophysics and biopsychophysics of stimulation paradigms as well as the use of these techniques as a probe to outline patterns of neural connectivity research on the therapeutic potential and adverse effects of the stimulation technologies are also covered.

**Comprehensive Psychiatry**

*Comprehensive Psychiatry* is an open access, peer-reviewed journal that publishes on all aspects of psychiatry and mental health with a mission to disseminate cutting edge knowledge in order to improve patient care and advance the understanding of mental illness. The journal aims to publish high quality papers with a particular emphasis on the clinical implications of the work including an improved understanding of psychopathology.

www.sciencedirect.com/journal/comprehensive-psychiatry
Comprehensive Psychoneuroendocrinology
A partner journal of Psychoneuroendocrinology
Publishes research covering the interrelated disciplines of psychology, neurobiology, endocrinology, immunology, neurology, and psychiatry, with an emphasis on multidisciplinary studies aimed at integrating these disciplines in terms of either basic research or clinical implications. A primary goal is to highlight how a variety of psychobiological factors interact in the expression of the stress response as it relates to the development and/or maintenance of neuropsychiatric disorders.

www.sciencedirect.com/journal/comprehensive-psychoneuroendocrinology

Drug and Alcohol Dependence
An International Journal on Biomedical and Psychosocial Approaches
Affiliated with the College on Problems of Drug Dependence
Publishes original research, scholarly reviews, commentaries, and policy analyses in the area of drug, alcohol and tobacco use and dependence. Topics include studies of the chemistry of substances of abuse, their actions at molecular and cellular sites, in vitro and in vivo investigations of their biochemical, pharmacological and behavioural actions, laboratory-based and clinical research in humans, substance abuse treatment and prevention research, and studies employing methods from epidemiology, sociology, and economics.

European Neuropsychopharmacology Neuroscience Applied
The Journal of the European College of Neuropsychopharmacology
Publishes clinical and basic science contributions that advance the science and treatment of disorders of the brain and enable translation into improved treatments and enhanced public health impact in neuropsychiatry. The journal aims to narrow the gap between advances in basic knowledge and experimental techniques in neuroscience and genomics with the translation of these findings by publishing discoveries that impact our understanding of the biological bases of mental disorders and the development and improvement of treatments, with a focus on prevention and recovery.

www.sciencedirect.com/journal/european-neuropsychopharmacology

Evolution and Human Behavior
Official Journal of the Human Behavior and Evolution Society
Publishes research reports and theory in which evolutionary perspectives are brought to bear on the study of human behavior. While primarily a scientific journal, papers from scholars in the humanities are encouraged as are papers reporting on theoretical and empirical work on other species provided the relevance to humans is apparent.

General Hospital Psychiatry
Psychiatry, Medicine and Primary Care
Publishes on the many linkages among psychiatry, medicine, and primary care. In emphasizing a biopsychosocial approach to illness and health, the journal provides a forum for professionals with clinical, academic, and research interests in psychiatry’s role in the mainstream of medicine.

www.sciencedirect.com/journal/general-hospital-psychiatry
Psychiatry Journals 2021

Internet Interventions
The Application of Information Technology in Mental and Behavioural Health
Official Journal of the International Society for Research on Internet Interventions and the European Society for Research on Internet Interventions
Publishes research on internet interventions and related areas with a focus on the promotion of mental health and featuring the Internet and/or technologies (e.g. computers, smartphone devices, tablets, and sensors) using the Internet as an underlying technology.
Topics also include:
• Integration of Internet interventions into existing systems of care
• Internet-based epidemiology
• Descriptions of new Internet-based technologies and experiments with clinical applications
• Economics of Internet interventions (cost-effectiveness)
• Health care policy and Internet interventions
• Internet psychometrics
• Ethical issues pertaining to Internet interventions and measurements
• Human-computer interaction and usability research with clinical implications
• Systematic reviews and meta-analysis on Internet interventions
www.sciencedirect.com/journal/internet-interventions

JAMDA
The Journal of Post-Acute and Long-Term Care Medicine
Publishes information and research on post-acute and long-term care for healthcare professionals, policy-makers, organizational leaders, educators, and advocates. Psychiatry-related topics covered by the journal include alzheimer’s and dementia, behavior disorders, cognition and memory, depression, palliative and hospice care, sleep-related issues, and other areas where psychiatric research and care intersect with short- and long-term care for patients.

Journal of Affective Disorders
Official Journal of the International Society for Affective Disorders
Publishes on affective disorders in the widest sense: depression, mania, mood spectrum, emotions and personality, anxiety and stress. Topics cover any aspect of affective disorders including neuroimaging, cognitive neurosciences, genetics, molecular biology, experimental and clinical neurosciences, pharmacology, neuroimmunoendocrinology, intervention and treatment trials.
www.sciencedirect.com/journal/journal-of-affective-disorders

Journal of Affective Disorders Reports
Publishes on affective disorders in the widest sense: depression, mania, mood spectrum, emotions and personality, anxiety, and stress with a focus on a shorter, single-point stories called a Report, in addition to a longer Article format.
www.sciencedirect.com/journal/journal-of-affective-disorders-reports

Journal of Anxiety Disorders
Publishes on all aspects of anxiety disorders for all age groups including disorders formerly categorized as anxiety disorders (obsessive-compulsive disorder, posttraumatic stress disorder) and the new category of illness anxiety disorder are also covered.
www.sciencedirect.com/journal/journal-of-anxiety-disorders
Journal of Behavior Therapy and Experimental Psychiatry
A Journal of Experimental Psychopathology
Primarily publishes experimental tests of psychological approaches to psychopathology including theoretically or clinically relevant differences between specific patient groups and other groups, if experimentally tested; mechanisms that cause, perpetuate, or reduce disorders; and diagnostic or therapeutic procedures. Contributions from medicine, biology, sociology, or epidemiology may also be published.
www.sciencedirect.com/journal/journal-of-behavior-therapy-and-experimental-psychiatry

Journal of Psychiatric Research
Publishes papers covering four key research areas:
- Clinical studies of all disciplines relating to psychiatric illness, as well as normal human behavior, including biochemical, physiological, genetic, environmental, social, psychological, and epidemiological factors
- Basic studies pertaining to psychiatry in such fields as neuropsychopharmacology, neuroendocrinology, electrophysiology, genetics, experimental psychology, and epidemiology
- The growing application of clinical laboratory techniques in psychiatry, including imagery and spectroscopy of the brain, molecular biology, and computer sciences
- Advances in basic and clinical research methodology, including the process of “bench to bedside” transfer of new research findings.
www.sciencedirect.com/journal/journal-of-psychiatric-research

Journal of Psychosomatic Research
Official Journal of the European Association of Psychosomatic Medicine and Affiliated with the International College of Psychosomatic Medicine
A multidisciplinary journal covering all aspects of the relationships between psychology and medicine. The broad scope ranges from basic human biological and psychological research to evaluations of treatment and services. Papers typically focus on illness or patients rather than healthy populations. Studies covering special populations, such as the elderly and children and adolescents, are also covered.
www.sciencedirect.com/journal/journal-of-psychosomatic-research

Journal of Substance Abuse Treatment
Publishes on the assessment and treatment of substance use and addictive disorders, including alcohol, illicit and prescription drugs, and nicotine with a focus on empirical research relevant for translation by treatment practitioners from all disciplines and across any setting where persons with substance use problems are encountered. Research covers assessment techniques and treatment approaches that have clear relevance for routine practice. Topics cover health services research, including the design, organization, delivery mechanisms and workforce characteristics of treatments in routine settings.

Journal of the Academy of Consultation-Liaison Psychiatry
(Formerly Psychosomatics)
Official Journal of the Academy of Consultation-Liaison Psychiatry
Publishes original research, review articles and clinical reports that address psychiatric aspects of medical illnesses and their management. Areas of particular interest include: the effect of co-morbid psychiatric conditions on the management of medical illness, the psychiatric management of patients with comorbid medical illness, educational content for physicians and others specializing in consultation-liaison (C-L) psychiatry, and the provision of psychiatric services to medical populations including integrated care.
Articles Through December 2020: www.sciencedirect.com/journal/psychosomatics
Journal of the American Academy of Child & Adolescent Psychiatry

Official Journal of the American Academy of Child & Adolescent Psychiatry
Publishes research with a primary focus on the mental health of children, adolescents, and families. Topics include genetic, epidemiological, neurobiological, and psychopathological research; cognitive, behavioral, psychodynamic, and other psychotherapeutic investigations; parent-child, interpersonal, and family research; and clinical and empirical research in inpatient, outpatient, consultation-liaison, and school-based settings. Child and family well-being is also covered through such subjects as health policy, legislation, advocacy, culture and society, and service provisions as related to the mental health of children and families.

Mental Health & Prevention
Publishes on the prevention of mental and behavioural disorders and mental ill health, and the promotion of mental well-being. The journal covers all aspects of prevention from basic research to social policy and is open to a wide range of methodologies, including qualitative and quantitative studies. The journal evaluates papers on the quality of the methodology rather than the study findings and welcomes protocol papers and negative results.

Personalized Medicine in Psychiatry
Dedicated to Advancing Basic, Clinical and Therapeutic Knowledge of Personalized Medicine in Psychiatry
Serves as a resource for basic and clinical investigators, neuroscientists, psychiatrists, psychologists, residents, and medical and graduate students. The journal publishes studies of endophenotypes and biological markers, pharmacological and psychotherapeutic approaches, educational and rehabilitation concerns, and environmental and behavioral, psychological and social research, with the aim of moving toward the search for individualized treatments tailored for each patient, all with a focus on identifying predictors of response in individual patients.

Progress in Neuro-Psychopharmacology & Biological Psychiatry
An International Research and Reviews Journal
A multidisciplinary journal that aims to ensure the rapid publication of authoritative reviews and research papers dealing with experimental and clinical aspects of neuro-psychopharmacology and biological psychiatry.

Psychiatry Research
Publishes rapid publication, short, complete, psychiatry research reports covering biochemical, physiological, genetic, psychological, and social determinants of human behavior; assessments of human behavior and subjective states; and the evaluation of somatic and non-somatic psychiatric treatments. The journal also covers clinically related basic studies in the fields of neuropharmacology, neurochemistry, neuroendocrinology, electrophysiology, psychology, genetics, and brain imaging are published. Significant methodological advances such as instrumentation, clinical scales, and assays directly applicable to psychiatric research are also published.

www.sciencedirect.com/journal/psychiatry-research
Psychiatry Journals 2021

Psychiatry Research: Neuroimaging
The Official Publication of the International Society for Neuroimaging in Psychiatry
Publishes on positron emission tomography, magnetic resonance imaging, computerized electroencephalographic topography, regional cerebral blood flow, computed tomography, magnetoencephalography, autoradiography, post mortem regional analyses, and other imaging techniques. Reports concerning results in psychiatric disorders, dementias, and the effects of behavioral tasks and pharmacological treatments are featured.
www.sciencedirect.com/journal/psychiatry-research-neuroimaging

Psychoneuroendocrinology
A partner journal of Comprehensive Psychoneuroendocrinology
The Official Journal of the International Society of Psychoneuroendocrinology
Publishes on the interrelated disciplines of psychology, neurobiology, endocrinology, immunology, neurology, and psychiatry, with an emphasis on multidisciplinary studies aiming at integrating these disciplines in terms of basic research or clinical implications. Understanding how a variety of psychobiological factors interact in the expression of the stress response as it relates to the development and/or maintenance of neuropsychiatric illnesses is a primary goal.
www.sciencedirect.com/journal/psychoneuroendocrinology

Schizophrenia Research
A Translational Journal of the Psychosis Spectrum
Publishes novel papers that contribute significantly to the understanding of the biology and treatment of schizophrenic disorders. The journal brings together biological, clinical, and psychological research in order to stimulate the synthesis of findings from all disciplines involved in improving patient outcomes in schizophrenia.
www.sciencedirect.com/journal/schizophrenia-research

Schizophrenia Research: Cognition
Publishes on all aspects of cognition in schizophrenia including clinical neuropsychology, neurocognition, social cognition, functional capacity, cognitive, affective, and social neuroscience, and aspects of everyday outcome as related to cognition.
www.sciencedirect.com/journal/schizophrenia-research-cognition

The Lancet Psychiatry
A multidisciplinary general psychiatry journal that promotes the improvement of, and advocacy for, mental health throughout the life course, through the dissemination of high-quality review, original research, and opinion. The journal delivers clinical coverage on psychopharmacology, psychotherapy, and psychosocial approaches to all psychiatric disorders.
