

## Introducing Technical Standards in Compendex on Engineering Village

From oil rigs & modern aircraft to batteries & flashlights, technical standards are the building blocks for how all engineering projects get built. Compendex on Engineering Village allows you to discover technical standards alongside the guidance on how to implement them.

### Standards in Compendex on Engineering Village™

#### Fact Sheet

#### Standards on Engineering Village are:

##### Validated and Trustworthy

Sourced from major standards providers.

##### Quickly Discoverable

Through controlled vocabulary and precise indexing.

#### Having standards in Compendex on Engineering Village will help:

Companies quickly reduce costs, improve quality, and innovate.

Academic institutions teach standards to students and help researchers with industry-funded projects.

#### With technical standards and engineering literature indexed side-by-side, you can answer questions like:

What specifications does this project require?

Who are the thought leaders of my topic of interest and what are they saying?

What breakthroughs have occurred and how do they affect my project?

What have others done in this field that should be replicated and/or avoided?

#### What standards are included in Engineering Village?

All standards from the Institute of Electrical and Electronics Engineering (IEEE), plus new and revised IEEE standards as they are published.

7,800+ standards from Ei Backfile (1884-1969)
