American Journal of Obstetrics & Gynecology

Editors-in-Chief: Catherine Bradley, MD, MSCE, Roberto Romero, MD, DMedSci

The American Journal of Obstetrics and Gynecology, “The Gray Journal”, covers the full spectrum of Obstetrics and Gynecology. The aim is to publish original research (clinical and translational), reviews, opinions, video clips, podcasts and interviews that will have an impact on the understanding of health and disease and that has the potential to change the practice of women’s health care. An important focus is the diagnosis, treatment, prediction and prevention of obstetrical and gynecological disorders.

12 issues per year • ISSN: 0002-9378
journals.elsevier.com/american-journal-of-obstetrics-and-gynecology

American Journal of Obstetrics & Gynecology – MFM

Editor-in-Chief: Vincenzo Berghella, MD

The American Journal of Obstetrics and Gynecology – MFM is focused on the latest research in the specialty of maternal-fetal medicine, or high-risk pregnancy. It includes practice-changing studies on maternal complications, fetal complications including prenatal diagnosis, ultrasound and genetics as well as prenatal care, intrapartum care, and postpartum issues. The Journal is a forum for trusted peer-reviewed research, preferentially randomized trials and meta-analyses of these trials, to supply researchers and clinicians with up-to-date guidance on how to best manage women with high-risk pregnancies and their unborn children.

First Issue published on Science Direct • ISSN: 2589-9333
journals.elsevier.com/american-journal-of-obstetrics-and-gynecology-mfm
AJOG Global Reports

Editor in Chief: Alison Cahill

AJOG Global Reports seeks to provide a forum for dialogue and education on matters that relate foremost to women’s health worldwide, with a special focus on regional reports and cross-border healthcare delivery. The journal publishes articles on all aspects of basic and clinical research in the fields of obstetrics and gynecology with an emphasis on matters of worldwide interest including gynecologic oncology, reproductive medicine, reproductive endocrinology, midwifery, and sexual medicine.

ISSN: 2666-5778

Get noticed Increase the impact of your research

Maximize your article’s visibility
SEO
Make your article more noticeable with search engine optimization (SEO).

With so many millions of research articles available, it could be easy for yours to get lost in the noise. By paying attention to a few points, you can make sure your article is search engine optimized and ready to be discovered by the broadest possible audience:

- Use keywords in title and abstract.
- Use headings with keywords.
- Use captions for images.
- Link to your article.

Promote your article
Share your article
Congratulations on your publication! Now your paper is online, you can promote it – sharing your paper with colleagues, the media and the general public can help you take the next step with your research, by attracting funding and collaborators.

Use these resources to share your article with the people who need it – and make an impact globally:

- Scholarly collaboration networks (SCNs): SCNs are platforms that host content and facilitate article sharing and collaboration among researchers.
- Share Link: 50 days’ free access.
- Find out how you can share your article more broadly – elsevier.com/sharing-articles
Promote your article (continued)

Media relations
- Explain the significance of your research and its key outcomes in lay language. Use this for press releases or sharing on social media.
- Make use of your institution’s communications channels such as press releases and newsletters.
- Contact your publisher if you think your article is interesting for a wider audience.

Benefit from sharing your data
- Get credit for the work you’ve done.
- Leads to more citations.
- Increases your exposure and may lead to new collaborations.
- Find out more: elsevier.com/authors/authorservices/research-data

Social media
There are billions of people on Facebook, Instagram, LinkedIn, TikTok, Twitter, WeChat, Weibo... and whatever the next platform will be. These are great places to share your research.
- Share links to your articles.
- Post regularly.
- Know the influential people in your field.
- Engage with others in discussions.

Tracking your article

Measure the success of your promotion
Are your efforts to promote your work leading to downloads and citations? By tracking the performance of your article, you can adjust the way you are sharing your work and make sure it’s getting to the right people.

- Scopus profile: Get credit for your work and explore your metrics. Validate your Scopus profile here: elsevier.com/solutions/scopus/advance-your-science
- Article metrics: Article-level metrics let you track the impact of your publications in different areas, from traditional scientific literature (citations) to broader society (social media shares). elsevier.com/authors/journal-authors/measuring-an-articles-impact

Fertility and Sterility

*Official Journal of the American Society for Reproductive Medicine*

Editors-in-Chief: Craig Niederberger, MD, Antonio Pellicer, MD

*Fertility and Sterility*® is an international journal for obstetricians, gynecologists, reproductive endocrinologists, urologists, basic scientists and others who treat and investigate problems of infertility and human reproductive disorders. The journal publishes juried original scientific articles in clinical and laboratory research relevant to reproductive endocrinology, urology, andrology, physiology, immunology, genetics, contraception, and menopause. The journal encourages and supports meaningful basic and clinical research, and facilitates and promotes excellence in professional education, in the field of reproductive medicine.

12 issues per year • ISSN: 0015-0282
journals.elsevier.com/fertility-and-sterility
F&S Reports
Official Journal of the American Society for Reproductive Medicine

Editor-in-Chief: Richard Paulson

F&S Reports is an Open Access journal that will publish original papers, reviews, and case reports involving clinical and basic research in the field of human reproduction.

ISSN: 2666-3341
journals.elsevier.com/fands-reports

F&S Reviews
Official Journal of the American Society for Reproductive Medicine

Editor in Chief: Anne Steiner, MD, MPH

F&S Reviews publishes both systematic and comprehensive, authoritative review articles spanning reproductive medicine or science. F&S Reviews accepts the following types of articles: systematic reviews, meta-analyses, comprehensive reviews, and critical analytic reviews of published literature. F&S Reviews does not accept the following types of articles: surveys, editorials, original research, or case reports.

ISSN: 2666-5719
journals.elsevier.com/fands-reviews
F&S Science

Official journal of the American Society for Reproductive Medicine

Editor in Chief: William Catherino

F&S Science publishes peer-reviewed original scientific articles in basic, laboratory, and translational research relevant to reproductive endocrinology, reproductive disorders, embryology, developmental biology, gonadal function, gamete biology, stem cell biology, urology, pathophysiology, immunology, genetics/epigenetics, contraception, fertility preservation, and menopause that has strong potential to transform clinical practice. F&S Science accepts original research and occasional editorials.

ISSN: 2666-335X
journals.elsevier.com/fands-science

Journal of Gynecology Obstetrics and Human Reproduction

The official Academic publication of the French College of Obstetricians and Gynecologists (CNGOF), formerly known as Journal de Gynécologie Obstétrique et Biologie de la Reproduction.

Editor-in-chief: Hervé Fernandez, MD, PhD

J Gynecol Obst Hum Reprod publishes, in English, research papers and techniques in the fields of Gynecology, Obstetrics, Neonatology and Human Reproduction: editorials, original articles, reviews, updates, technical notes, case reports, letters to the editor and guidelines.

10 issues per year • ISSN: 2468-7847
journals.elsevier.com/journal-of-gynecology-obstetrics-and-human-reproduction
Journal of Obstetrics and Gynaecology Canada

Editor-in-Chief: Togas Tulandi, MD, MHCM

*Journal of Obstetrics and Gynaecology Canada* publishes original research, reviews, case reports, and commentaries by Canadian and international authors. The Journal covers a wide range of topics in obstetrics and gynaecology and women’s health covering all life stages including the evidence-based clinical guidelines, committee opinions, and policy statements that derive from standing or ad hoc committees of the Society of Obstetricians and Gynaecologists of Canada. The Journal emphasizes vigorous peer-review and accepts papers in English and French. Abstracts for all papers are available in both languages. JOGC is indexed in Medline.

12 issues per year • ISSN: 1701-2163
journals.elsevier.com/journal-of-obstetrics-and-gynaecology-canada

Journal of Pediatric and Adolescent Gynecology

*The Official Journal of the North American Society of Pediatric and Adolescent Gynecology*

Editor-in-Chief: Paula J. Adams Hillard, MD

*Journal of Pediatric and Adolescent Gynecology* includes all aspects of clinical and basic science research in pediatric and adolescent gynecology. The Journal draws on expertise from a variety of disciplines including pediatrics, obstetrics and gynecology, reproduction and gynecology, reproductive and pediatric endocrinology, genetics, and molecular biology.

6 issues per year • ISSN: 1083-3188
journals.elsevier.com/journal-of-pediatric-and-adolescent-gynecology
Journal of Reproductive Immunology
The International Journal for Experimental and Clinical Reproductive Immunobiology
Affiliated with the European Society of Reproductive Immunology and with the International Society for Immunology of Reproduction
Chief Editors: Prof. Petra Arck, Joanne Kwak-Kim, Prof. Shigeru Saito, Hiroaki Shibahara

The aim of the Journal of Reproductive Immunology is to provide the critical forum for the dissemination of results from high quality research in all aspects of experimental, animal and clinical reproductive immunology. Within the journal, the Editors wish to bridge the gap between basic and clinical studies in all subareas of research relevant to reproductive immunobiology. This encompasses normal and pathological processes of reproductive tracts, gametes, fertilisation, implantation, gestation, parturition and lactation.

6 issues per year • ISSN: 0165-0378
journals.elsevier.com/journal-of-reproductive-immunology

Maturitas
An international journal of midlife health and beyond
Editor-in-Chief: Prof. Margaret Rees

Maturitas is an international multidisciplinary peer reviewed scientific journal of midlife health and beyond publishing original research, reviews, consensus statements and guidelines, and mini-reviews. The journal provides a forum for all aspects of postreproductive health in both genders ranging from basic science to health and social care.

12 issues per year • ISSN: 0378-5122
journals.elsevier.com/maturitas
Midwifery

Editor-in-Chief: Professor Debra Bick

Officially recognised by the European Midwives Association

Midwifery publishes the latest peer reviewed international research to inform the safety, quality, outcomes and experiences of pregnancy, birth and maternity care for childbearing women, their babies and families. The journal’s publications support midwives and maternity care providers to explore and develop their knowledge, skills and attitudes informed by best available evidence.

12 issues per year • ISSN: 0266-6138
journals.elsevier.com/midwifery

Placenta

The Official Journal of the International Federation of Placenta Associations.

Editors: M. Knöfler, A. Perkins, Y. Sadovsky

Placenta publishes high-quality original articles and invited topical reviews on all aspects of human and animal placentation, and the interactions between the mother, the placenta and fetal development. Topics covered include evolution, development, genetics and epigenetics, stem cells, metabolism, transport, immunology, pathology, pharmacology, cell and molecular biology, and developmental programming.

15 issues per year • ISSN: 0143-4004
journals.elsevier.com/placenta
Pregnancy Hypertension: An International Journal of Women’s Cardiovascular Health

Editor-in-Chief: Annemarie Hennessy, S. Ananth Karumanchi, MD

Pregnancy Hypertension: An International Journal of Women’s Cardiovascular Health aims to stimulate research in the field of hypertension in pregnancy, disseminate the useful results of such research, and advance education in the field. We publish articles pertaining to human and animal blood pressure during gestation, hypertension during gestation including: physiology of circulatory control, pathophysiology, methodology, therapy or any other material relevant to the relationship between elevated blood pressure and pregnancy.

4 issues per year • ISSN: 2210-7789
journals.elsevier.com/pregnancy-hypertension

Reproductive BioMedicine Online

An international journal devoted to biomedical research on human conception and the welfare of the human embryo

Official journal of the AAB College of Reproductive Biology (AAB-CRB), Alpha - Scientists in Reproductive Medicine, American College of Embryology (ACE), the Global Chinese Association for Reproductive Medicine (GCARM), the International Society for Fallopian Tubes and Reproductive Surgery (ISFT-RS), the International Society for In Vitro Fertilization (ISIVF), the Mediterranean Society for Reproductive Medicine (MSRM) and the Preimplantation Genetic Diagnosis International Society (PGDIS).

Editor-in-Chief: Bart Fauser

Reproductive BioMedicine Online covers the formation, growth and differentiation of the human embryo. It is intended to bring to public attention new research on biological and clinical research on human reproduction and the human embryo including relevant studies on animals.

12 issues per year • ISSN: 1472-6483
journals.elsevier.com/reproductive-biomedicine-online
Reproductive Biomedicine & Society Online

Editors-in-Chief: Sarah Franklin, Martin H. Johnson

Reproductive Biomedicine & Society Online is a new journal dedicated to interdisciplinary discussion and debate of the rapidly expanding field of reproductive biomedicine, particularly all of its many societal and cultural implications. It is intended to bring to attention new research in the social sciences, arts and humanities on human reproduction, new reproductive technologies, and related areas such as human embryonic stem cell derivation. Its audience comprises researchers, clinicians, practitioners, policy makers, academics and patients.

3 issues per year • ISSN: 2405-6618
journals.elsevier.com/reproductive-biomedicine-and-society-online

Sexual & Reproductive Healthcare

Official Journal of the Swedish Association of Midwives. Affiliated with the Norwegian Association of Midwives, the Danish Association of Midwives and the Icelandic Midwifery Association

Editor-in-Chief: Margareta Larsson

Sexual & Reproductive HealthCare welcomes original papers in all aspects of sexual and reproductive healthcare including: • Family planning and contraception • Pregnancy • Labour and birth • Breast feeding • Post-natal period and early parenthood • Abortion • Sexually transmitted infections • Involuntary childlessness • Issues related to the menopausal and post-menopausal years • Professional development and organization of sexual and reproductive healthcare.

4 issues per year • ISSN: 1877-5756
journals.elsevier.com/sexual-and-reproductive-healthcare
Taiwanese Journal of Obstetrics & Gynecology

Editor-in-Chief: Chih-Ping Chen

Taiwanese Journal of Obstetrics and Gynecology covers a broad range of clinical, basic science, and public policy topics in women's health. The journal publishes papers covering innovation and updates in the field addressing screening, diagnosis, management, and care for women's health, as well as evidence-based research, clinical experiences, and promotion of women’s-related health.

6 issues per year • ISSN: 1028-4559
journals.elsevier.com/taiwanese-journal-of-obstetrics-and-gynecology

The Journal of Minimally Invasive Gynecology

Editor-in-Chief: Tommaso Falcone, MD

The Journal of Minimally Invasive Gynecology, formerly titled The Journal of the American Association of Gynecologic Laparoscopists, is an international clinical forum for the exchange and dissemination of ideas, findings and techniques relevant to gynecologic endoscopy and other minimally invasive procedures. The Journal, which presents research, clinical opinions and case reports from the brightest minds in gynecologic surgery, is an authoritative source informing practicing physicians of the latest, cutting-edge developments occurring in this emerging field.

7 issues per year • ISSN: 1553-4650
journals.elsevier.com/journal-of-minimally-invasive-gynecology
Women and Birth

*Official Journal of the Australian College of Midwives (ACM)*

Editor-in-Chief: Caroline SE Homer AO

*Women and Birth* a midwifery journal that publishes on all matters that affect women and birth, from pre-conceptual counselling, through pregnancy, birth, and the first six weeks postnatal. All papers accepted will draw from and contribute to the relevant contemporary research, policy and/or theoretical literature. We seek research papers, quality assurances papers (with ethical approval) discussion papers, clinical practice papers, case studies and original literature reviews.

6 issues per year • ISSN: 1871-5192

journals.elsevier.com/women-and-birth

Women’s Health Issues

*Official Publication of the Jacobs Institute of Women’s Health*

Editor-in-Chief: Amita N. Vyas, PhD, MHS

*Women’s Health Issues (WHI)* is a peer-reviewed, bimonthly, multidisciplinary journal that publishes research and review manuscripts related to women’s health care and policy. As the official journal of the Jacobs Institute of Women's Health, it is dedicated to improving the health and health care of all women throughout the lifespan and in diverse communities. The journal seeks to inform health services researchers, health care and public health professionals, social scientists, policymakers, and others concerned with women’s health.

6 issues per year • ISSN: 1049-3867

journals.elsevier.com/womens-health-issues
Scopus

75M+ records. 24,600 titles. 5,000 publishers.

Scopus is a source-neutral abstract and citation database, curated by independent subject matter experts. It places powerful discovery and analytics tools in the hands of researchers, librarians, institutional research managers, and funders.

Scopus generates precise citation search results and automatically updated researcher profiles, creating richer connections between people, published ideas, and institutions. In addition to protecting the integrity of the scholarly record, Scopus helps bolster institutional research performance, rank, and reputation.

Scopus includes
75+ million records
- 68 million post-1970 records, including references
- 6.5+ million pre-1970 records going back as far as 1788
- 8.5+ million Open Access articles
- 9+ million Conference papers

24,600+ active titles
- 23,500+ peer-reviewed journals, of which more than 4,000 are Gold Open Access
- 740+ book series
- 300+ trade publications
- Articles-in-press (i.e., articles that have been accepted for publication) from over 8,000 titles from international publishers, including Cambridge University Press, the Institute of Electrical and Electronics Engineers (IEEE)

194,000+ books
- Including monographs, edited volumes, major reference works and graduate level text books
- Focuses on social sciences and arts & humanities, but also includes science, technology & medicine (STM)

Scopus content coverage by subject area:

- Health Sciences: 25% of titles, 7,468 titles
- Physical Sciences: 27%, 8,102 titles
- Life Sciences: 16%, 4,883 titles
- Social Sciences: 32%, 9,692 titles

Independent Content Selection

Newly suggested titles are reviewed – using transparent criteria – by the independent and international Scopus Content Selection & Advisory Board (CSAB). Visit our info site to learn more about Scopus content policies: www.elsevier.com/solutions/scopus/content/content-policy-and-selection

Note: Journal titles may belong to more than one subject area.
Source: Scopus title list, February 2019
Go beyond search.

Research is a complex pursuit. More than ever, finding the right result is as important as uncovering trends, discovering sources and collaborators, and analyzing the results for further insights.

In addition to the search tools designed to help navigate across the over 75 million items indexed, Scopus also provides features to help researchers go beyond search, into discovery and analysis.

Search:
- Search by document, author or affiliation, or use Advanced Search
- Refine results by access type, source type, year, language, author, affiliation, funding sponsor and more
- Link to full-text articles your institution already subscribes to, along with other library resources
- Use the Document Download Manager to bulk retrieve results in .pdf format
- Export data to reference managers such as Mendeley, RefWorks and EndNote
- Stay up-to-date with Email Alerts, RSS and HTML feeds

Discover:
- Find related documents by shared references, authors and/or keywords
- Identify collaborators or subject experts with Author Identifier
- Clarify your identity through integration with ORCID
- Identify and match an organization with its research output using Affiliation Identifier
- Benefit from indexing with Universal Discovery Services: EBSCOHost, Primo and Summon
- Take advantage of interoperability with other Elsevier solutions including ScienceDirect, Reaxys, Engineering Village and SciVal

Analyze:
- Track citations over time for a set of authors or documents using Citation Overview
- Assess trends in search results with Analyze Results
- View h-index for specific authors
- Analyze an author’s publishing output and research impact with Author Evaluator
- Gain insight into journal performance with Compare Journals, a tool allowing you to analyze journals across multiple metrics, including CiteScore, SNIP and SJR

Seamless Integration
Did you know? Scopus has free APIs that allow you to use select data – such as cited by counts – on your web site, institutional repository or research information system.
