Journals List

Geofacets contains easily discoverable maps, figures and tables sourced from dozens of esteemed geoscience publications that can be integrated into essential geoscience tools.
Geofacets sources maps and tables from essential geoscience publications and works with several esteemed publishers.

Elsevier is the world's leading provider of academic information, serving more than 30 million professionals worldwide. For over 40 years, Elsevier has provided the upstream oil & gas industry with trusted content from our books and journals, and innovative research tools like Geofacets.
Dates listed are for map content only.
Dates for figure & table content may vary.

The American Association of Petroleum Geologists is an international organization with over 38,000 members in 100-plus countries. AAPG works to advance the science of geology, especially as it relates to petroleum, natural gas, other subsurface fluids and mineral resources.

AAPG Bulletin 2006 – present
AAPG Environmental Geosciences 2006 – present
AAPG Memoirs 2010 – present
AAPG Studies in Geology 2010 – present
AAPG Archie Series 2010 – present
AAPG Hedberg Series 2010 – present

American Geophysical Union is an international scientific society of nearly 60,000 members representing 139 countries. AGU provides a collaborative and engaging forum for the Earth and space science community online and through scholarly journals, books, meetings, career services, education and student programs, and science policy resources.

Journal of Advances in Modeling Earth Systems 2009 – present
Geochemistry, Geophysics, Geosystems 2000 – present
Geophysical Research Letters 1974 – present
Paleoceanography 1986 – present
Reviews of Geophysics 1963 – present
Tectonics 1968 – present
Established in 1909, the Bureau of Economic Geology in the Jackson School of Geosciences is the oldest research unit at The University of Texas at Austin. In addition to functioning as the State Geological Survey of Texas, the Bureau conducts research focusing on the intersection of energy, the environment and the economy, where significant advances are being made tackling tough problems globally. The Bureau creates partnerships with federal, state and local agencies, academic institutions, industry, nonprofit organizations, and foundations to conduct high-quality research and disseminate the results to the scientific and engineering communities as well as to the broad public.

**Geological Circulars**  
1965 – 2003

**Reports of Investigations**  
1946 – present

**Atlases of Major Oil and Gas Reservoirs**  
1983 – 1989

The Canadian Society of Petroleum Geologists aims to advance the professions of the energy geosciences - as it applies to geology; foster the scientific, technical learning and professional development of its members; and promote the awareness of the profession to industry and the public.

**CSPG Bulletin**  
2000 – present

**CSPG Special Publications**  
2000 – 2002

For 125 years, the Geological Society of America has delivered trusted scientific findings through its journals and publications, including market-leading *Geology* and the acclaimed Decade of North American Geology book series. Its authoritative collection of geoscience research provides valuable insights that can be directly applied to the exploration of conventional and unconventional oil and gas resources.

**Decade of North American Geology Book Series**  
1982 – 2005

**Geology**  
1973 – present

**Geosphere**  
2005 – present

**GSA Bulletin**  
1890 – present

**GSA Field Guides**  
1999 – present

**GSA Memoirs**  
1934 – present

**GSA Reviews in Engineering Geology**  
1962 – present

**GSA Special Papers**  
1934 – present

**Lithosphere**  
2009 – present

The Geological Society of London Lyell Collection, one of the largest integrated collections of earth science literature, delivers a wealth of knowledge from the complete collection of GSL’s journals, special publications and book series, and covers subject areas such as exploration geology, geophysics, geochemistry and petrophysics. Scientific insights derived from this research can be applied to the exploration of conventional and unconventional oil and gas resources.

**Engineering Geology Special Publications**  
1985 – present

**Geochemistry: Exploration, Environment, Analysis**  
2001 – present

**Journal of Micropaleontology**  
1982 – present

**Journal of the Geological Memoirs**  
1845 – present

**Petroleum Geology Conference Series**  
1993 – present

**Petroleum Geoscience**  
1995 – present

**Proceedings of the Yorkshire Geological Society**  
1839 – present

**Quarterly Journal of Engineering Geology and Hydrogeology**  
1967 – present

**Scottish Journal of Geology**  
1965 – present

**Special Publications**  
1964 – present

**Transactions of the Geological Society of London**  
1811 – 1856
IPA’s mission is to be the voice of the upstream oil and gas industry in Indonesia and to work collaboratively with all stakeholders to promote the industry for the benefit of government, investors, communities, employees, customers and the environment.

Proceedings of the Indonesian Petroleum Association 1972 – present
Proceedings of the Carbonate Seminar September 1976
Proceedings of the Carbonate Rocks and Reservoirs of Indonesia: A Core Workshop 5th October 1992
Proceedings of the Clastic Rocks and Reservoirs of Indonesia: A Core Workshop 11th October 1992
Proceedings of the International Symposium on Sequence Stratigraphy in SE Asia May 1996
Proceedings, Deepwater and Frontier Exploration in Asia & Australasia Symposium 7th – 8th December 2004

Society of Economic Geologists is an international organization committed to advancing the science and the discovery of mineral resources. The Society’s market-leading journal Economic Geology is widely recognized as the authoritative reference on ore deposit geology. Its content is particularly useful to researchers attempting to better understand geological processes, decision-makers attempting to assess mineral resource potential of areas and explorationists attempting to discover new ore bodies.

Economic Geology 1905 – present

Economic Geology contains the results of basic and applied research focused on the geology and genesis of ore deposits from throughout the world. Papers specifically include the most up to date geological maps of world-class ore deposits, and information regarding their tectonic setting, geological history, age of ore formation, mineralogy, hydrothermal alteration, geochemistry, structural geology, exploration guidelines and processes of formation.

Founded in 1930, the Society of Exploration Geophysicists is a not-for-profit organization committed to connecting and inspiring the people and science of geophysics. With 30,000+ members in 138 countries, SEG provides educational resources to the geosciences community through publications, books, events, forums, professional development courses and more.

Geophysics 1936 – present
Interpretation 2013 – present
The Leading Edge 1995 – present

Society for Sedimentary Geology is an international not-for-profit society dedicated to the dissemination of scientific information on sedimentology, stratigraphy, paleontology and many related specialties. The society has a long tradition of publishing papers that become benchmark contributions to sedimentary geology. With top technical journals and book series, including the Journal of Sedimentary Research and PALAIOS, SEPM is a definitive source of essential scientific insights for the exploration of conventional and unconventional oil and gas resources.

Core Workshop Notes 1980 – present
Journal of Sedimentary Research 1931 – present
PALAIOS 1986 – present
Special Publications 1929 – present
Wiley publishes on behalf of more societies and professional associations than any other publisher and is committed to supporting the geoscience community. With an extensive portfolio in Earth and environmental sciences, Wiley's content contains a wealth of important maps and data for natural resource exploration geoscientists.

**USGS**

The U.S. Geological Survey USGS is the largest water, earth, and biological science and civilian mapping agency of the US. It collects, monitors, analyzes, and provides science about natural resource conditions, issues, and problems.

**SPE**

SPE is the largest individual member organization serving managers, engineers, scientists and other professionals worldwide in the upstream segment of the oil and gas industry. SPE principally collects and disseminates technical knowledge concerning the exploration, development and production of oil and gas resources.

- **SPE Conference Papers** Various**
- **SPE Journal** Various**
- **Journal of Canadian Petroleum Technology** Various**
- **Journal of Petroleum Technology** Various**
- **Oil and Gas Facilities** Various**
- **SPE Drilling & Completion** Various**
- **SPE Economics & Management** Various**
- **SPE Production & Facilities** Various**
- **SPE Production & Operations** Various**
- **SPE Projects** Various**
- **Facilities & Construction** Various**
- **SPE Reservoir Evaluation & Engineering** Various**

**WILEY**

Wiley publishes on behalf of more societies and professional associations than any other publisher and is committed to supporting the geoscience community. With an extensive portfolio in Earth and environmental sciences, Wiley’s content contains a wealth of important maps and data for natural resource exploration geoscientists.

- **Basin Research** 1988 – present
- **Boreas** 1972 – present
- **Earth Surface Processes and Landforms** 1976 – present
- **Geobiology** 2003 – present
- **Geofluids** 2001 – 2016
- **Geological Journal** 1951 – present
- **Geophysical Prospecting** 1953 – present
- **Island Arc** 1992 – present
- **Journal of Metamorphic Geology** 1983 – present
- **Journal of Petroleum Geology** 1978 – present
- **Lethaia** 1968 – present
- **Palaeontology** 1999 – present
- **Resource Geology** 1998 – present
- **Sedimentology** 1962 – present
- **Terra Nova** 1989 – present

---

*This is an intermittent publication series. Not every year has a published volume.

**For the years 2000 – present, from these journals, those publications have been chosen which cover the following topics - Reservoir Characterization, Unconventional and Complex Reservoirs, Well & Reservoir Surveillance and Monitoring, Fluid Characterization, Reservoir Fluid Dynamics, Non-Traditional Resources, Storage Reservoir Engineering. This content addition will be in phased over a 12-month period (approx.) beginning Dec 2019.
Geofacets helps oil and gas companies prioritize opportunities, optimize resources, and manage risk. It combines a vast, vetted library of maps, figures and tables with powerful location-based search, so companies find information fast. Whether georeferencing maps or structuring tabular data, Geofacets formats content so it’s easier to integrate and analyze.
