Showcase and manage undergraduate work to drive programme visibility and engagement

Showcasing student work in Digital Commons™ shows prospective students around the globe what kind of education they can expect to receive at your institution.

From honours theses and dissertations to student-edited publications, fieldwork and creative arts, students do their best work when they know it will be shared with potential employers, graduate schools, parents and their peers.

How does undergraduate research support recruitment goals?

At California Polytechnic University, the university president “got excited when he understood that he could point prospects and their parents to…examples of what their students can accomplish at Cal Poly”.

**Quoted from a speech by Michael Miller, Dean of Library Services, Cal Poly, Closing Remarks, Putting Knowledge to Work: Building an Institutional Repository for Your Campus, October 10th, 2008.**

Showcase exemplary student work to drive programme visibility and engagement

- **Honors theses and capstones**
  
  Give students a permanent and visible record of their achievements

- **Undergraduate research**
  
  Support student research initiatives on campus

- **Student research journals**
  
  Drive active learning around the publication process and visibility of student research

- **Global readership**
  
  Connect your students to a worldwide audience

- **Student events and conferences**
  
  Show prospective students what they can achieve

- **Student programmes and student experiences**
  
  Highlight the uniqueness of your institution's undergraduate education

Join the largest collection of undergraduate research online

The Undergraduate Research Commons brings together exemplary undergraduate work from hundreds of colleges and universities: Student journals and conferences, faculty-mentored research, honours and dissertations and signature collections of unique undergraduate publications.

Visitors can identify exciting undergraduate research programmes and find peer-reviewed student journals and conferences where they can submit their own work.

Makes sure your undergraduates’ best work appears alongside the research of their peers, and that prospective students can find your programmes.

Digital Commons
Institutional repository and publishing platform to increase visibility and impact

- Faculty scholarship & research
