Scopus offers researchers an extensive global and interdisciplinary research database of abstracts and citations from over 5,000 international publishers, patent records from 5 major patent offices, and over 400,000 conference papers from 6,000 conference events.

The combination of integrated content breadth and smart tools to track, analyze and visualize research ensures that corporate researchers can feel confident they are not missing vital research or commercial applications impacting today’s decisions and tomorrow’s products.

What can Scopus do for you?

- Identify Top Global Authors / Key Opinion Leaders
- Identify Top Universities / Partners
- Get Attention for Your Work & See Who is Building On What You Do
- Track and Create Impact in the Market
- Build Your Knowledge
Scopus contains over 525,000 peer-reviewed articles on food and nutrition sciences going back to 1945, with over 91% of this research volume occurring within the past 40 years. Since 1985, the United States has been the global leader in food and nutrition sciences research with over 21% share of published research, followed by the United Kingdom (6.2%) and China (5.4%). When tracking publication growth over this period, research growth accelerated significantly in late nineties, driven by significant rise in research coming from institutions in emerging economies.

Since 2013, China (14.5%) has closed the gap with research leader United States (16.0%) in global share of food and nutrition sciences research. Spain (5.9%), Brazil (4.8%), and Italy (4.5%) round out the top five in research leadership in the last few years. With both global breadth and historic depth, Scopus helps users to easily build a comprehensive overview of the research landscape.

*Pinpoint the People That Matter:* Identify partners and key influencers within a research field that offer potential collaboration opportunities based on publication output and impact. Universities in the Netherlands, China and Brazil are leading the way producing the next generation of researchers in food and nutrition sciences. Scopus gives you quick and comprehensive insights into major research players.

Build Your Knowledge (Reading List):

Make sure your R&D teams are reading and publishing in the best journals. Of the ten sources with the highest number of articles published in 2013-15, the *Applied and Environmental Microbiology*, *Food Chemistry*, and *Journal of Dairy Science* have received the highest numbers of cumulative citations. In addition *Applied and Environmental Microbiology*, *Food Chemistry* and *Food Research International* have the highest three-year impact in the field.

Methodology:

This report is based on Scopus serial journal publications as well as conference proceedings in sources classified in the Food Science and Nutrition & Dietetics subject categories, based on Scopus All Science Journal Classification (ASJC). This report reviews trends in food and nutrition sciences.

This report aims to identify leading authors and research groups as well as sources in this growing field.
“Scopus helps me to quickly build a basis to make a decision on next steps and prepare us for more extensive literature searches as we go through the process and approach submission to regulatory authorities and a complete launch... It quickly delivers the basics that we need to understand things.”

James, Research Pathologist, Medical Device R&D, Scopus user
