1. Introduction

This document describes the changes to Contrast to be released in conjunction with EW release 2016.2 (*Month TBC* 2016).

The complete Contrast documentation [1 and 2] will be updated to include the changes described below. With particular reference to Contrast-out, implementation of the new versions of the schemas by receiving systems does not necessarily entail implementation of every new thing in the schemas.

The following sections describe the changes and list the differences with respect to previous versions.

2. Explanation of the changes

2.1. Enhanced element 'suppl' to handle more digits

Support to handle lengthy digits is introduced to element 'suppl' in CONTRAST IN journal schemas, wherever applicable.

3. Summary of changes with respect to previous Contrast versions

3.1. in-journal-2016.2

journal-item-issue.xsd	<ul style="list-style-type: none">Updated pattern of elements 'suppl-pattern' and 'suppl-pattern-with-spinoff' to handle lengthy digits.
