

Step 1.
普通の水素原子を描き、
Chargeを“0”に設定する

Step 2.
重水素の場合はIsotopeを“H-2*”/“D*”に指定する
三重水素の場合は、Isotopeを“H-3”/“T”に指定する

Step 3.
on all atomsで検索する

This image shows the Reaxys search interface with the MarvinSketch editor overlaid. In the Reaxys interface, the 'Substances and Properties' tab is active, and the search criteria are set to 'on all atoms'. The MarvinSketch editor shows the 'Edit Atom' menu with 'Isotope' set to 'Off'. Red arrows point to the 'H-2*' and 'T' options in the 'Isotope' dropdown, with labels '重水素' (Deuterium) and '三重水素' (Tritium) respectively. The browser window title is 'MarvinSketch (ChemAxon) - Mozilla Firefox'.
