

Five Facts About Research Data Management from Elsevier

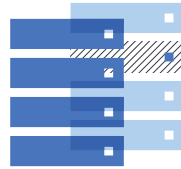

Elsevier publishes open access, as well as having an active involvement in Research Data Management (RDM). Here are five things you need to know.

4
Modules

Fact 1
Elsevier's Mendeley Data platform supports the entire lifecycle of research data

The 4 modules that make up Mendeley Data are designed to help the research community discover, collect and share research data.

20m
datasets

Fact 4
Mendeley Data can increase the exposure and impact of research

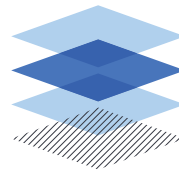

Mendeley Data Search indexes over 20 million datasets from thousands of global repositories. Nine million datasets are 'deep indexed', meaning that the metadata in the index is enriched with underlying data to improve ranking and findability.

16
open data
licenses

Fact 2
Researchers own and control data, Elsevier does not

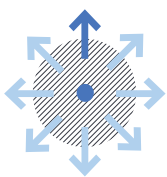

Mendeley Data allows researchers to keep data private, or publish it under one of 16 open data licenses

20+
Projects globally

Fact 5
Elsevier is an active participant in the open data community

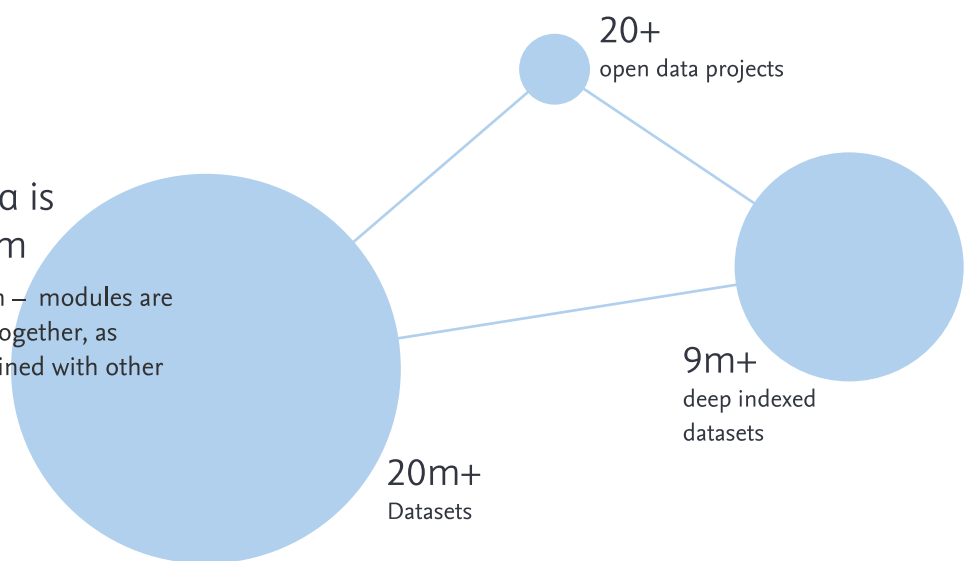

Elsevier partners with the open data community, and is currently working on more than 20 projects globally

Flexible
platform

Fact 3
Mendeley Data is an open system

It is a flexible platform — modules are designed to be used together, as standalones, or combined with other RDM tools you use.
