

ScienceDirect Corporate Edition
Added value for researchers in the
Chemicals industry

Harnessing the power of interdisciplinary research

Tap into a wealth of interdisciplinary research as you strive to make discoveries and bring innovations to market. With ScienceDirect you can access the widest range of scientific and technical journals and books, putting the critical information you need at your fingertips.

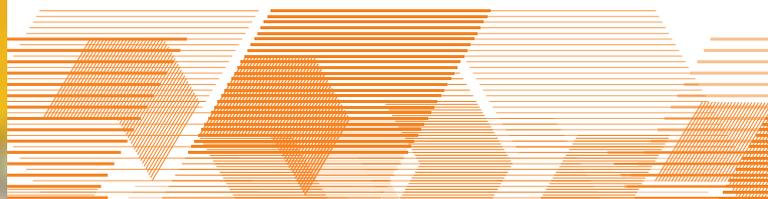

Equipped with the latest developments and dynamic tools, you can make smart, fast decisions that boost your R&D.

Access to the latest developments can help you get ahead with the latest advancements in the Chemicals industry, such as nanotechnology, additive manufacturing and printed technologies, graphene and bio-based chemicals, giving you the competitive advantage you need in an increasingly global industry.

The right knowledge can help you navigate shifting consumer demands for sustainable products while keeping costs low.

ELSEVIER

ACCELERATE YOUR RESEARCH

Make sure you don't miss out on critical developments as you strive to bring innovations, products and technologies to market. ScienceDirect Corporate Edition covers all the topics you need to accelerate your research, with publications by authoritative researchers across the board.

- **Smart decisions based on trusted, peer-reviewed information**
Get interdisciplinary insights from a vast range of information across subject areas
- **Cutting-edge content and supplementary material to accelerate your R&D**
Delve into more than 15 million articles with embedded audio, video and data
- **Additional research paths help you navigate your options**
Discover what your peers are reading, giving you new perspectives and insights
- **Maximize your investment**
Benefit immediately with web-based access, training and support programs

BROADEN YOUR KNOWLEDGE HORIZONS

Searching for solutions to problems that arise during product development or process improvement is a vital part of R&D. In the increasingly interdisciplinary research world, answers can be found in unexpected places.

By harnessing the power of integrated knowledge, Chemicals researchers are accelerating their discoveries and developments. Our customers are gaining increasing value from ScienceDirect, with unlimited access to an ever-expanding library of content across a wide range of subject areas.

Chemicals researchers are applying knowledge from a variety of disciplines gained on ScienceDirect, with a focus on subjects outside of just Chemistry and Chemical Engineering:

- Materials Science
- Mathematics
- Agriculture & Biological Sciences
- Biochemistry, Genetics & Microbiology
- Engineering
- Energy

Chemicals companies access information in journals across the wide range of disciplines available in ScienceDirect Corporate Edition. Top titles include:

- Tetrahedron Letters
- Computers & Chemical Engineering
- Applied Catalysis B: Environmental
- Food and Chemical Toxicology
- Journal of Power Sources
- Polymer
- Journal of Materials Processing Technology
- Chemical Engineering Journal
- Trends in Plant Science
- Solar Energy Materials and Solar Cells

Valuable book content across a wide range of disciplines is also available and completely integrated with journal content in ScienceDirect Corporate Edition. Top titles include:

- Smart Polymers and their Applications
- Molecular Biology Techniques (Third Edition)
- Organic Light-Emitting Diodes (OLEDs)
- Ideas of Quantum Chemistry (Second Edition)

Take advantage of a wide variety of published content, available at your fingertips.

Journals: Every year, Elsevier publishes more than 250,000 peer-reviewed articles in 2,300 journals, and continues to add new journal titles to the platform.

Books: Elsevier publishes more than 13,000 book titles across a wide range of subjects, including:

- eBooks
- eTextbooks
- Major Reference Works
- Reference Modules
- Book and Handbook Series
