

Knovel: Over 15 Years of Providing Answers to Engineers

With **Knovel**, engineers solve problems faster, avoid re-work, and accelerate time to market. Knovel continually improves its platform and content year-over-year to ensure that engineers get answers faster, while helping organizations mitigate risk, improve engineering outcomes, and achieve operational excellence.

Smart Search and Analytics

Providing the Relevant Answer Quickly

Taxonomy tools and sophisticated tagging to make content more discoverable

Workflow Integrations

Providing Seamless Answers to Questions Where Engineers Work

Improved integrations with EDS, Primo, and Summon—‘best practices’ ensure that Knovel is fully optimized in your discovery implementation

Integration with Engineering Village—making identifying research topics, defining research goals, and solving problems seamless

Enhanced user interface and user experience for engineers accessing Knovel—both online and offline—through iOS and Android tablet devices

Looking Back at 2016...

Information Essentials—
Solving Problems for Engineers

2016 Content Growth in Knovel by the Numbers

1,000

New **Resources** Added

15%

Growth in Overall Content

400+

New **Interactive** Equation Worksheets

40%

Of new **content** from partners outside of North America

2,000,000

New **data points** (fully searchable, interactive content in table cells, or a single graph)

63,000,000

Total number of interactive and **searchable data** (database, graph, tables, equations)

NEW regulatory information from the Code of Federal Regulations (CFR) 2015

NEW Partners:

Water Environment Federation
PIANC

Society for Fire Protection
Engineering

Fives North American
Combustion

TMS (The Minerals, Metals &
Materials Society)

VDE Verlag

Royal Aeronautical Society

Bloomsbury

And Looking Ahead to 2017...

Information Essentials—Solving
Problems for Engineers

Investing in new partnerships with premier engineering publishers and information providers, while adding hundreds of new resources

Additional partnerships with publishers and information providers outside of North America

Millions of new data points (fully searchable interactive content in a graph or table)

Hundreds of new interactive
equation worksheets

Smart Search and Analytics

Providing the Relevant Answer Quickly

Helping engineers obtain answers faster by suggesting relevant topics to refine their query

Delivering richer answers to engineers by recommending pertinent, similar resources based on a selected title and search

Enabling efficient problem solving by surfacing connections between related content and tools

Workflow Integrations

Providing Seamless Answers to Questions
Where Engineers Work

In addition to existing mobile tablet access, extending secure offline access to Knovel users via desktops and smartphone devices
