

Reliable and current drug prices are essential for making good business decisions.

That's why Elsevier created RxPrice Verify, a monthly price service giving you instant access to accurate drug pricing information through your web browser.

## RxPrice Verify

QUICK AND EASY DRUG  
PRICE VERIFICATION

### Reported Prices

- AWP (Average Wholesale Price)
- WAC (Wholesale Acquisition Cost)
- DP (Direct Price)
- CMS-FUL (Federal Upper Limit)
- NADAC (National Average Drug Acquisition Cost)
- PAC\* (Predictive Acquisition Cost)  
*\* Price type available with upgrade*
- FSS (Federal Supply Schedule, including Big 4)
- None (e.g. pharmacy samples or government supported products)

### Calculated Prices

- C-AWP 1.20 and 1.25 (Calculated Average Wholesale Price)
- C-CMS-FUL (Calculated Federal Upper Limit)

### How It Helps

**QUICK SEARCH** Easily find the individual product prices you need in one step.

**PRODUCT SEARCH** Include as many products as you need to create side-by-side comparisons. Search results can be viewed online or imported into Excel or Access for further analysis.

**HISTORICAL PRODUCT PRICES** RxPrice Verify helps you find drug prices based on defined date ranges.

### FIND PRICES BASED ON DEFINED DATE

**OR RANGE** You can search and set prices based on claim date or other events, ensuring you always have the right price.

### ALLOWS FOR TRENDING OF PRICE

**UPDATES** Fed by current and historical information, RxPrice Verify lets you track price trends, so you can make accurate projections.

### Why It's Better

- **ONE-CLICK** data exports of information into external programs like Excel or Access
- **FASTER ACCESS** to monthly updates than other monthly pricing services
- **ENSURES ACCURATE** and transparent industry pricing due to editorial control and policies
- **NO SOFTWARE** to install and no programming required
- **INTUITIVE USER INTERFACE** means virtually no training needed
- **ACCESSIBLE ANYWHERE** through the Internet
