You deserve more from your drug information solution. You need a single resource that aligns your efforts to improve accuracy and patient outcomes. That's Clinical Pharmacology from Elsevier.

Clinical Pharmacology puts everything you need within three clicks of the mouse. Our web-based tool divides the information you need into five streamlined categories (reports, list, find, patient education, and resource center) along with a search box and advanced drug identifier tool.

Trusted by more than 2,000 hospitals, Clinical Pharmacology is accepted as a professional drug reference by all 50 State Boards of Pharmacy. It is also officially recognized as a drug compendium for use in Medicare coverage decisions regarding the appropriate use of drugs and biologics for patients with cancer by the Centers for Medicare and Medicaid Services (CMS).

Clinical Pharmacology Mobile provides fast, easy and convenient access to many of the features and functions of Clinical Pharmacology. With its current and continuous updates, our mobile solution requires no downloading or synching. Just log in and go! You get timely drug information and accurate answers to your everyday medication questions with enhanced speed, ease and convenience. Clinical Pharmacology Mobile runs on a wide range of devices including iOS (iPhone®, iPod touch® and iPad® 2), BlackBerry, Android, Symbian and Windows Mobile.

How It Helps

MAXIMIZE TIME Receive the information you need in a few clicks. No other drug information resource works as simply and efficiently as Clinical Pharmacology. We know how valuable your time is.

USE A SINGLE SOLUTION Clinical Pharmacology is the single most powerful resource for your drug-related answers. It becomes an even more complete solution as you integrate it with other clinical and evidence-based databases like ClinicalKey and Mosby’s Nursing Consult.

ENHANCE PATIENT CARE FDA-mandated MedGuide handouts are included and properly formatted for immediate distribution to patients. Consumer versions of reports are also available with one click.

IMPROVE OUTCOMES Applicable information goes beyond drug, manufacture and interaction data. A Lifestyles popup box considers common characteristics that may affect use. Accuracy is ensured through real-time content updates and a vigorous editorial process.

STREAMLINE WORKFLOW From printing selected parts of a monograph to online tutorials that are ACPE approved for CE credits, Clinical Pharmacology helps you do your job even better.

OPTIMIZE FLEXIBILITY Content is available via the Internet, intranet, mobile applications or through content licensing and data integration arrangements.
Why It’s Better
At Elsevier, we created Clinical Pharmacology to be a different kind of drug information resource. The kind of single resource you can trust to have a positive impact on every aspect of your healthcare organization.

OTHER PRODUCTS: Periodic updates.
CLINICAL PHARMACOLOGY: Real-time updates provide the latest information possible from leading authoritative sources. Think of it as just-in-time peace of mind.

OTHER PRODUCTS: Hard to learn and use.
CLINICAL PHARMACOLOGY: Simple, intuitive and easy-to-use, get to the right information when you need it. Serious data made simple.

OTHER PRODUCTS: Patient education seems like an afterthought.
CLINICAL PHARMACOLOGY: Patient education is one of five main sections providing comprehensive, detailed and properly formatted handouts for patient education, not patient edification. Patient education materials are also available for approximately 4,000 diagnoses/diseases, and include explanation, symptoms and treatments. This information complements the drug information patient education sheets already included for all applicable medications.

OTHER PRODUCTS: Summary data in multiple locations.
CLINICAL PHARMACOLOGY: Detailed clinical reports for drug interactions, lab reference, adverse reactions, IV compatibility, product and clinical comparisons. It’s all in one section simply titled, Reports.

OTHER PRODUCTS: Less is…still less.
CLINICAL PHARMACOLOGY: Improving workflow means making it easier, better, simpler, faster and more efficient. Designed by people like you for people like you, we have one goal in mind: making your work life easier.

OTHER PRODUCTS: Technology gets in the way.
CLINICAL PHARMACOLOGY: By definition, a solution solves a problem. What you need, when you need it and where you need it. That’s our solution.

Highest Scores in Two Independent Research Studies
In “Evaluation of the Functionality of Subscription and Free Online Drug Information Databases,” a study by Nova Southeastern University College of Pharmacy, Clinical Pharmacology earned the highest score for scope as well as the highest composite score based on 15 categories of questions.

In “Comparison of Tertiary Drug Information Databases,” a study by Butler University College of Pharmacy and Health Sciences, Clinical Pharmacology scored highest among the tertiary online drug information databases for clinical dependability and completeness based on 100 drug information questions.
