

Scopus

An eye on global research:

5,000 publishers. Over 71M records and 23,700 titles.

Scopus, the largest curated abstract and citation database of peer-reviewed literature, features smart tools to track, analyze and visualize research.

Updated daily, Scopus delivers the most comprehensive overview of the world’s research output in the fields of science, technology, medicine, social sciences and arts and humanities. As research becomes increasingly global, interdisciplinary and collaborative, you need to make sure that crucial research from around the world is not missed.

Scopus includes:

- Over 71 million records
 - 64+ million post-1970 records, including references
 - 6.5+ million pre-1970 records going as far back as 1788
- Over 23,700 peer-reviewed journals, of which more than 4,000 are full Gold Open Access
- Over 1.4 billion cited references after 1970
- More than 166,000 books
 - Including monographs, edited volumes, major reference works and graduate level text books
 - Focuses on social sciences and arts & humanities, but also includes science, technology & medicine (STM)

- More than 600 book series
- Over 8.3 million Conference papers
- Over 300 trade publications
- Articles-in-press (i.e., articles that have been accepted for publication) from over 3,750 titles from international publishers, including Cambridge University Press, the Institute of Electrical and Electronics Engineers (IEEE), Nature Publishing Group, Springer, Wiley-Blackwell and, of course, Elsevier.

Scopus is updated daily and titles are evaluated regularly, therefore the numbers presented here are subject to change.

Scopus content coverage by subject area:

Independent Content Selection

Newly suggested titles are reviewed – using transparent criteria – by the independent and international Scopus Content Selection & Advisory Board (CSAB). Visit our info site to learn more about Scopus content policies: elsevier.com/solutions/scopus

Note: Journal titles may belong to more than one subject area.

Go beyond search.
Search. Discover. Analyze.

Research is a complex pursuit. More than ever, finding the right result is as important as uncovering trends, discovering sources and collaborators, and analyzing the results for further insights.

In addition to the search tools designed to help navigate across the over 71 million items indexed, Scopus also provides features to help researchers go beyond search, into discovery and analysis.

Search:

- Search by document, author or affiliation, or use Advanced Search
- Refine results by source type, year, language, author, affiliation and more
- Link to full-text articles your institution already subscribes to, along with other library resources
- Use the Document Download Manager for Chrome and Firefox browsers to bulk retrieve results in .pdf format
- Export data to reference managers such as Mendeley, RefWorks and EndNote
- Stay up-to-date with Email Alerts, RSS and HTML feeds

Discover:

- Find related documents by shared references, authors and/or keywords
- Identify and match an organization with its research output using Affiliation Identifier
- Identify collaborators or subject experts with Author Identifier
- Clarify your identity through integration with ORCID

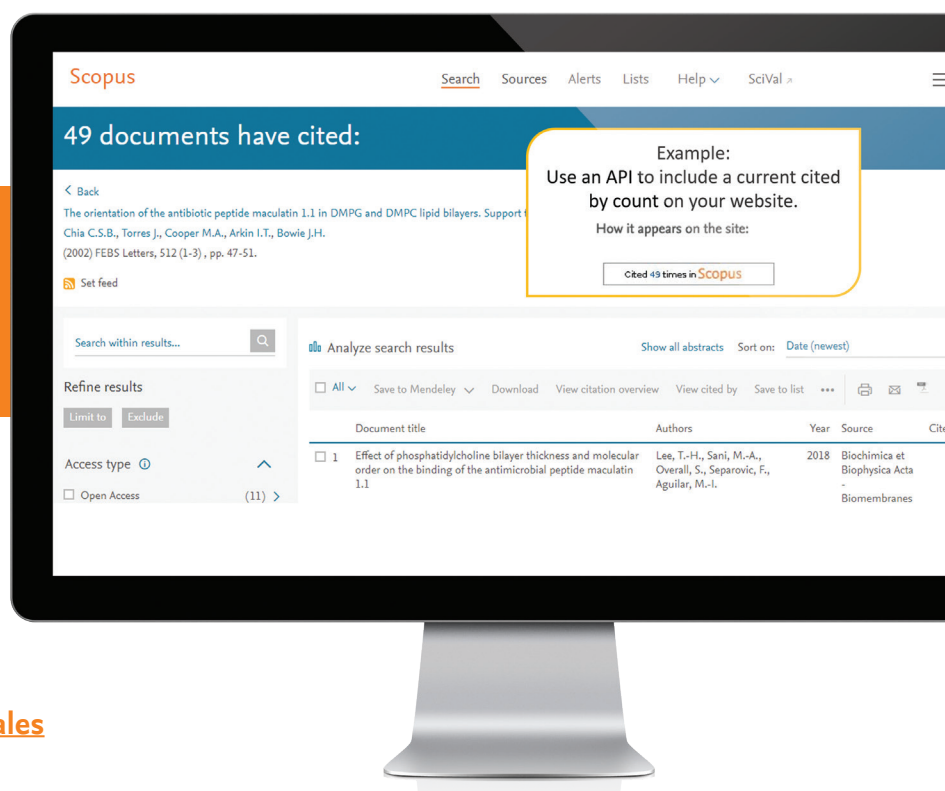

- Benefit from indexing with Universal Discovery Services: EBSCOHost, Primo and Summon
- Take advantage of interoperability with ScienceDirect, Reaxys and Engineering Village

Analyze:

- Track citations over time for a set of authors or documents using Citation Overview
- Assess trends in search results with Analyze Results
- View *h*-index for specific authors
- Analyze an author's publishing output and research impact with Author Evaluator
- Gain insight into journal performance with Compare Journals, a tool allowing you to analyze journals across multiple metrics, including CiteScore, SNIP and SJR
- Access document performance with five PlumX Metrics categories: Usage, Captures, Mentions, Social Media and Citations beyond Scopus

Seamless Integration

Did you know? Scopus has free APIs that allow you to use select data – such as cited by counts – on your web site, institutional repository or research information system.
