Elsevier’s Author Resources

**BENEFIT**
FROM ELSEVIER’S AUTHOR RESOURCES

No matter where you are in the publishing process, Elsevier’s Author Resources is your link to all the resources you need to plan, write, submit, and promote your research.

**Research Planning Resources**
- Read our guide to understanding the publishing process
- Find collaborators and connect with colleagues and peers through Mendeley
- Learn how to write successful funding applications

**Writing Resources**
- Learn about scientific misconduct and ethics
- Improve research writing skills with online courses
- Access resources to translate your paper into English and improve illustrations and artwork
- Find unique tools to enrich your paper

**Submission Resources**
- Find the right journal and review open access options
- Learn about our Article Transfer Service to automatically maximize publication options
- Discover how the review process works and your role in it
- Learn how to make your research data accessible, discoverable and usable to others

**Post-publication Promotion Resources**
- Read our guide to getting your research noticed
- Learn about Elsevier’s Share Links program to freely share your research online
- Order professional reprints, journal copies and posters
- Monitor the citation and usage data on your publications through Mendeley

Elsevier’s Research Elements Journals

What are Research Elements Journals?
Elsevier’s Research Elements journals are a suite of open access, multidisciplinary journals dedicated solely to publishing research elements articles.

What are Research Elements Articles?
Research elements articles are brief, peer-reviewed articles that complement full research papers and describe output that has come about as a result of following the research cycle – this includes things like data, methods and protocols, software, code, hardware and more.

Sharing research output in the form of a research elements article ensures your work is discoverable, comprehensible and reproducible.

Additionally, articles in our Research Elements journals are easy to prepare and submit via a template, are subject to a peer review process, receive a DOI and are fully citable.

Open access
At the core of Elsevier’s publishing mission

Over 90 percent of the journals we launch are open access. In 2019 we published over 49,000 gold open access articles, a double-digit growth on the previous year. Today Elsevier is one of the world’s fastest-growing open access publishers.

Whatever your discipline, there’s an open access home for your research. With over 2,300 journals that offer gold open access publishing options, we’ve got you covered.

Here are some of the benefits you’ll enjoy:

**High visibility**
Reach the audience your research deserves

**Proven trust**
140 years’ experience curating and verifying scientific knowledge

**Top quality**
Rigorous standards & quality journals across the board

**Powerful innovation**
Access to state-of-the-art innovations that measure your impact and make your life easier

**Wide choice**
Select the publishing model that’s right for you
