

# How CHORUS works when publishing with Elsevier

  
Author submits their manuscript to the journal of their choice

  
Author identifies their source of funding

  
Article is accepted after peer review

  
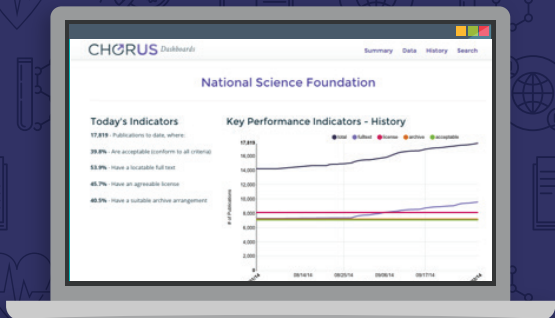

Article is assigned with a unique ID and funding body ID

  
Publisher sends this information to Crossref as part of the metadata of the article.

  
The article is published on the publisher's platform

  
Publisher ensures access to the best available version meaning...

  
Readers of an open access article or researchers affiliated with a subscribing library, will see the final version of the article

Data is fed through to CHORUS dashboards where funders can monitor and track real time compliance

  
Article is permanently preserved via CLOCKSS, PORTICO and other 3rd party dark archives

  
The article can also be text mined via Crossref's TEXT and DATA MINING SERVICE

  
Article is also indexed and can be found via the CHORUS portal or funder's repository

  
Article is indexed and can be found by any existing search engine

  
Other readers will see the full text of the accepted manuscript after an embargo expires
