

Maintain and access
policy documents
anywhere, anytime.

PolicyStat simplifies policy management, making policies easy to update, manage and access.

Healthcare staffing and operational environments are becoming more and more complex and the challenge of these along with low policy adoption rates by staff and poor communication are making it more difficult to adhere to regulatory compliance, yet the need to set policies and effectively communicate them to all employees across the entire environment is critical for patient safety.

What is PolicyStat?

PolicyStat is policy management software that gets your staff the information they need when they need it. Shorter and consistently positive inspection, audit and survey results as well as better patient care just got a lot easier with PolicyStat.

Efficient Policy and Procedure Management Software

Approval workflows and archiving help you know the status of each and every policy in your library. Keeping policies current and easy for your staff to find reduces risks and eliminates surprises. You get the confidence and support you need to do more in less time.

Compliance Features

Complete Automation

Our powerful policy compliance software automatically keeps track of expiration dates and notifies managers of expiring policies.

Easy Updating

The built-in editor means you don't need to download any documents or email the policies to others for approval – others can update policies right inside the editor.

Smart Searching

Our policy compliance software lets you easily tag and group policies or procedures related to a particular audit, so you can find all policies related to Joint Commission or HIPAA in a single search.

*Access the right documents in seconds
25-50% time savings*

Eliminate policy redundancies by 50%

Product features

Policy and Procedure Software

- Unlimited documents
- Supports all document types
- Customer-branded look and feel

Easy for End-Users

- User-friendly interface
- Google-like quick search
- Browser translation adaptability
- Full-text searching
- Easy sharing
- Printable documents
- Watermarked hard copies

Automated Everything

- Approver dashboard
- Automated review & approval process
- Configurable approval flows

- User account management
- Permission level control
- Restrict access / rights to certain policies
- Template control & styling

No IT or IS Involvement

- Web-based
- Automatic deployment of new features & fixes
- In-browser editor
- Encryption
- Electronic signature / validation
- Active Directory real-time authentication
- Active Directory retrieval of groups & users

Hassle-Free Implementation

- Consultation & planning
- Quick system configuration
- Data import services
- Data cleansing & formatting services
- Online training
- Hard-copy data backup service (optional)
- Ongoing online support
- Support videos & tutorials

Compliance & Risk Tools

- Required reading / Acknowledgements
- Versioning & archiving
- Automatic (& override) version control
- Grouping & searching by audit

Decrease operational costs by 80%

What users say about PolicyStat.

“PolicyStat is simple, easy to use and very user friendly. I really like the search functionality and the ability to drill down with the advanced search. This will be very beneficial to our facility and staff as it works better than our previous solution. I really like PolicyStat™”.

Kathy Silliman, Clinical Program Developer, Kindred Healthcare
