</table>
| **[P.01]** Fatigue failure analysis of steel rebars: Metallurgical evaluation and numerical simulation  
G. Pantazopoulos*, I. Pressas, A. Vazdirvanidis, ELKEME - Hellenic Research Centre for Metals S.A., Greece |
| **[P.02]** Linear and nonlinear lateral-torsional buckling of castellated beams  
S. Elaiwi, B. Kim, LY. Li*, Plymouth University, UK |
| **[P.03]** Analytical model for predicting brittle failures of bolted ultra-high performance concrete joints  
C. Echavarria#1, B. Echavarria#2, H. Canola#3, #1Universidad Nacional de Colombia, Colombia, #2Integral S.A., Colombia, #3Institución Universitaria Colegio Mayor de Antioquia, Colombia |
| **[P.04]** Analysis of causes of cracking of marble slabs built in large-area floors in commercial buildings  
J. Hola#1, L. Sadowski#2, A. Nowacki#2, #1Wroclaw University of Science and Technology, Poland, #2The Building Research Institute, Poland |
| **[P.05]** Failure of RC balconies during earthquake  
H. Gokdemir, Eskisehir Osmangazi University, Turkey |
| **[P.06]** Failure mechanism of reinforced concrete subjected to projectile impact loading  
X.Z. Xu*, T.B. Ma, J.G. Ning, Beijing Institute of Technology, China |
| **[P.07]** The impact of construction quality on the safety of prefabricated multi-family dwellings  
P. Knyziak, Warsaw University of Technology, Poland |
| **[P.08]** Consequences of an incorrect assessment of a structure damaged by explosion  
J.R. Krentowski*, K. Zminsi, Bialystok University of Technology, Poland |
| **[P.09]** Comparison of the effect of different additives on acoustic emission parameters obtained during three-point bending tests of alkali-activated slag composites  
L. Topolár*, P. Rovnaník, P. Schmid, Brno University of Technology, Czech Republic |
| **[P.10]** Physically based constitutive modeling of concrete fatigue and practical numerical method for cyclic loading simulation  
Z.D. Ding*, X.D. Ren#, #1Hefei University of Technology, China, #2Tongji University, China |
| **[P.11]** Causes of failure in concrete elements buried in lagoon water  
| **[P.12]** Seismic vulnerability assessment for historical areas of Timisoara city, Romania  
I. Apostol*, M. Mosoarca, N. Chieffo, Politehnica University of Timisoara, Romania |
| **[P.13]** Full revitalization as a way to avoid structural failure  
P. Knyziak*1, P. Bieranowski1, 1Warsaw University of Technology, Poland, 2University of Warmia and Mazury in Olsztyn, Poland |
| **[P.14]** An experimental study on the integral-moderate hollow shear wall of reinforced concrete  
G. Wang*, Q.M. Wang, Chengdu University of Technology, China |
| **[P.15]** Failure and overhaul of a historic brick tower  
J. Hulimka, M. Kaluza*, J. Kubica, Silesian University of Technology, Poland |
| **[P.16]** Failure effect of seismic tsunami in buildings  
A. Gunaydin, H. Gokdemir*, Eskisehir Osmangazi University, Turkey |
| **[P.17]** Experimental analysis of the acoustic responses of cement composites during the static modulus of elasticity test  
D. Kocáb, B. Kucharczykova, L. Topolár, R. Holamová*, L. Pazdera, Brno University of Technology, Faculty of Civil Engineering, Czech Republic |
| **[P.18]** Safety assessment of a prefabricated T-shaped prestressed concrete beam of a bridge damaged due to a vehicle impact  
M. Miśkiewicz, D. Bruski*, J. Chrościelewski, K. Wilde, Gdansk University of Technology, Poland |
| **[P.19]** Failure analysis of hollow-core slabs in building under construction  
R. Szelag, Bialystok University of Technology, Poland |

</tbody>
</table>
Micro crack detection of mechanical part using coherence function near resonance frequency
C.J. Kim*, I.P. Kang, J.H. Sohn, B.T. Kim, Pukyong National University, Republic of Korea

A methodology to obtain local displacements and strains of components based on low-cost cameras and computer vision technics
C. Cabo*, C. Ordoñez, M. Muniz-Calvente, M. Lozano, I. García, M. López Aenlle, University of Oviedo, Spain

Availability analysis and optimal design for multi-state weighted k-out-of-n systems with component performance requirements
Z.W. Chen*, T.D. Zhao, J. Jiao, F.C. Ren, Beihang University, China

Reliability analysis of stochastic structure with multi-failure mode based on mixed Copula
Y.T. Sun, L.F. Luo*, Q. Zhang, X.R. Qin, Tongji University, China

Evaluation of the reliability of high pressure die cast aluminium alloy radiators
G. Timelli*, A. De Mori, S. Capuzzi, University of Padova, Italy

The applicability of predicting methods of network systems reliability based on operational data
K. Miszta-Kruk, Warsaw University of Technology, Poland

Impact of identification of the frequency histogram of belt failures on its cross-section on innovative modifications of the belt construction
M. Bajda*, R. Blazej, L. Jurdziak, Wroclaw University of Science and Technology, Poland

A new remained useful life (RUL) prediction method of the speed reducer subjected to random loads based on the efficiency degradation
S.H. Jeong, Y.J. Nam*, S.W. Lee, Korea Institute of Industrial Technology, Republic of Korea

Environmental risk assessment of production processes using the E-FMEA method as a tool to eliminate non-conformities
M. Roszak*, M. Spilka, A. Kania, Silesian University of Technology, Poland

The possibility of using the 2024 aluminium alloy drill pipe that was processed superficially to reduce failure during dynamic loading
L. Belkacem*, N. Abdelbaki, M. Gaceb, E. Bouali, M. Bettayeb, University of Mohamed Bougara, Algeria, University Akli Mohand Oulhadj, Algeria

System failure estimation based on field data and semi-parametric splines utilisation
D. Valis*, J.J. Kolacek, O. Pokora, University of Defence, Czech Republic, Masaryk University, Czech Republic, University of Economics and Innovation, Poland

Stress and failure analysis of the connecting-rod of diesel engine
L. Witek*, P. Zelek, Rzeszow University of Technology, Poland

Case study of cracking of intake valves for automotive
J.H. Lee*, W.J. Yang, Korea Institute of Materials Science, Republic of Korea

Fracture mechanism of steel plate loaded by explosive-induced shock wave
J.Q. Li*, X.Z. Xu, Y. Duan, H.L. Ren, Beijing Institute of Technology, China

Damage mechanism and numerical simulation of vehicle structures under explosive loading
K. Zheng*, J.G. Ning, T.B. Ma, Beijing Institute of Technology, China

The lifetime prediction of epoxy resin adhesive based on small-sample data
Y.P. Zhu*, T.D. Zhao, J. Jiao, Z.W. Chen, Beihang University, China

A failure investigation in the railroad industry
F. Nascimento*, P.F. Gorjão, C. Araújo, Instituto de Soldadura e Qualidade, Portugal

Failure analysis of a brass clamp
F. Nascimento*, P.F. Gorjão, C. Araújo, Instituto de Soldadura e Qualidade, Portugal

Failure analysis of main bay hoist wire rope of a torpedo ladle crane in a steel making shop
U. Pal*, G. Mukhopadhyay, S. Bhattacharya, TATA Steel, India

Failure analysis of main bay hoist wire rope of a torpedo ladle crane in a steel making shop
U. Pal*, G. Mukhopadhyay, S. Bhattacharya, TATA Steel, India

Failure analysis on bursts of two tires of one B737-300 airplane
M.L. Xie*, H.J. Tang, China Academy of Civil Aviation Science and Technology, China

Multidimensional analysis of the impact of construction parameters of conveyor belts on the failures formation in the belt in loading points
U. Pal*, G. Mukhopadhyay, S. Bhattacharya, TATA Steel, India
M. Bajda, L. Jurdziak, Wroclaw University of Science and Technology, Poland

Analysis of changes in the length of belt sections and the number of splices in the belt loops on conveyors in an underground mine
M. Bajda*, R. Blazej, L. Jurdziak, Wroclaw University of Science and Technology, Poland

Structural computational analysis via FEM of a failed tireproof screw used in the fixation of rails in sleepers
T.M.M. Moreira, R.A.M. Silveira, L.B. Godefroid*, G.L. Faria, Federal University of Ouro Preto, Brazil

Based-numerical failure analysis of acryl conical frustum viewport for deep submersible
Q.H. Du*, W.C. Cui, Shanghai Ocean University, China

Analysis of causes of aluminium and copper wire breakages during the drawing process
B. Smyrak*, T. Knych, B. Jurkiewicz, M. Zasadzinska, AGH University of Science and Technology, Poland

Failure analysis on drive gear of aero engine
R. Chen*, L. Chen, W. Li, X. Xiao, G. Fu, Beijing Aeronautical Technology Research Center, China

Peridynamic analysis of drill-induced borehole damage
J. Chen*, Q. Wang1, Y. Zhang1, China University of Petroleum (East China), China, Rice University, USA

The propagating behaviors of penetrated fatigue crack under the effect of stress concentration
C.H. Lin, National Cheng Kung University, Taiwan

A bi-level surrogate model to identify material parameters of ductile fracture criterion
Y. Hou*, A. Dumon1, P. Culière3, M. Rachik2, Zhengzhou University, China, Université de Technologie de Compiègne, France, ESI-Group, France

Research of large scale mechanical structure crack growth method based on finite element parametric submodel
Y.T. Sun, J.J. Zhai*, Q. Zhang, X.R. Qin, Tongji University, China

Temper embrittlement of low carbon 9%Ni low carbon steel
S.S.M. Tavares*, D.A.L. Correa2, C. Barbosa2, R.P.C. da Cunha2, J.L.M. Andia3, Universidade Federal Fluminense, Brazil, Instituto Nacional de Tecnologia, Brazil, SENAIRJ, Brazil

Fracture behaviors of CW/TP316L stainless steel under dynamic and cyclic loading conditions
J.W. Kim*, S.E. Kim1, Y.J. Kim2, Chosun University, Republic of Korea, Korea University, Republic of Korea

Solution of the untightness of electronic control units
M. Henter, Robert Bosch Kft., Hungary

Failure investigation of contamination trace on printed circuit board – possible approaches
B. Gedai, Robert Bosch Kft., Hungary

Case study of sealing investigation of electronic engine control unit
B. Heves*, S. Forgács, Robert Bosch Kft., Hungary

Failure analysis of conductive adhesive
N. Fehérvári, A. Petrik*, Robert Bosch kft., Hungary

Avionics system failure analysis and verification based on model checking
H.L. Wang*, D.M. Zhong, T.D. Zhao, Beihang University, China

Failure analysis and reliability prediction of circuit board based on physics of failure
J. Jiao, X.L. De*, Z.W. Chen, T.D. Zhao, Beihang University, China

Study on improvement of lifetime and performance of sliding electrical contacts for automobiles
H. Lim*, S. Lee, S. Wei, Korea Automotive Technology Institute, Republic of Korea

Study on brittle characteristic of fused silica header driven by piezo actuator
J.Y. Park1, D.W. Lee1, Y.M. Heo1, M.W. Cho2, G.S. Yoon3, Korea Institute of Industrial Technology, Republic of Korea, Inha University, Republic of Korea

Failure of a hydrogen damage in water wall tube of coal boiler
J.S. Oh*, G.M. Yang1, K.B. Yoon3, Chung Ang University, Republic of Korea,
