

# DATA IN BRIEF

## ARTICLE AT A GLANCE...

### TITLE

Describes the dataset and includes the word 'data' or 'dataset'.  
Includes authors' full names, email addresses and institution. The corresponding author is indicated.

### ABSTRACT

✓ Concisely describes the data, its collection process, analysis and reuse potential.  
✗ Do not: provide conclusions, results, or mention the word 'study'.  
Maximum 500 words.

### KEYWORDS

Include 4-8 keywords relevant to your article/dataset.

### SPECIFICATION TABLE

Functions as a metadata table. By reading the information provided here others should be able to reuse, reproduce or replicate your data.  
(Refer to the [template](#) for more instructions.)

### VALUE OF DATA

In brief bullet points explain the value of your dataset, avoiding novelty claims and vague statements:

- Why are your data useful or important to the research community?
- Who can use/benefit from the data?
- How can the data be (re)used for further insights or analysis?

### DATA DESCRIPTION

✓ Briefly, describe and refer to each **data file** included in the article and supplementary files or in the repository.  
✗ Do **not** include any background, insights or interpretation.  
✓ All data including supplementary files, or files deposited on a repository must be shared in an **open format** that is easily accessible to most people who may reuse the data.  
No word limit.

### EXPERIMENTAL DESIGN, MATERIAL AND METHODS

Provide a detailed description of how the data were acquired and analysed. Aid data reproduction and reuse by offering a more comprehensive description than any related article or previous articles.  
No word limit.

### DECLARATIONS

Ethics Statement, competing interest and CRediT author statement are obligatory. Refer to our [Guide for Authors](#) for more information.

### REFERENCES

- The journal uses a numbered reference style, see our [Guide for Authors](#) for more details.
- If you have one, cite your related research article here as well as in the Specification Table under the Related Research Article section.
- Include a citation of your dataset if it is deposited in a repository.

**IMPORTANT:** you must write your article using the Data in Brief article [template](#) found on the journal homepage.
