Trends in Anaesthesia & Critical Care

Instructions for Authors:

Trends in Anaesthesia and Critical Care (TACC) is a journal of Original Airway Management Articles, Reviews, Focus, Opinions, Letters, Discussions and Book Reviews designed to help our general audience of students, basic scientists, pharmacologists, physician scientists and clinicians to stay abreast of current trends throughout the field and to facilitate communication between these groups of highly trained professionals. Please follow these instructions carefully as our editorial policy differs in important respects from that of primary research journals:

Manuscripts are peer reviewed and commissioning does not guarantee publication. If you cannot complete your manuscript by the deadline, please inform us of the delay and indicate the target date for completion.

Peer review • Trends in Anaesthesia and Critical Care is a peer-reviewed journal. Manuscripts that fail to meet our criteria for scientific content and style may be rejected, but more usually authors are asked to submit a revised version based on referees’ and Editor’s recommendations. Further editing will take place after acceptance.

Copyright • A ‘Transfer of Copyright’ agreement will be sent to you on acceptance of your article.

- Authors must sign the ‘Transfer of Copyright’ agreement before publication. This enables Elsevier Ltd to protect the copyrighted material for the authors, but does not relinquish the authors’ proprietary rights (e.g. patent rights). The copyright transfer covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm, or any other reproductions of a similar nature, and translations. This includes the right to adapt the article for use in conjunction with computer systems and programs, including reproduction or publication in machine-readable form and in corporation in retrieval systems.

- Authors are responsible for obtaining permission from the copyright holder to reproduce any material (including figures, tables, multi-media or excerpts) in which copyright subsists. Please use the attached Copyright Permission Request Form.

Ethics in Publishing:

General Statement Ethics • The Editor(s) and Publisher of this Journal believe that there are fundamental principles underlying scholarly or professional publishing. While this may not amount to a formal ‘code of conduct’, these fundamental principles with respect to the authors’ paper are that the paper should: i) be the authors’ own original work, which has not been previously published elsewhere, ii) reflect the authors’ own research and analysis and do so in a truthful and complete manner, iii) properly credit the meaningful contributions of co-authors and co-researchers, iv) not be submitted to more than one journal for consideration, and v) be appropriately placed in the context of prior and existing research. Of equal importance are ethical guidelines dealing with research methods and research funding, including issues dealing with informed consent, research subject privacy rights, conflicts of interest and sources of funding. While it may not be possible to draft a ‘code’ that applies adequately to all instances and circumstances, we believe it useful to outline our expectations of authors and procedures that the Journal will employ in the event of questions concerning author conduct.

Conflicts of Interest • The Publisher now requires authors to declare any conflicts of interest that relate to papers accepted for publication in this Journal. A conflict of interest may exist when an author or the author’s institution has a financial or other relationship with other people or organizations that may inappropriately influence the author’s work. A conflict can be actual or potential and full disclosure to the Journal is the safest course. All submissions to the Journal must include disclosure of all relationships that could be viewed as presenting a potential conflict of interest. The Journal may use such information as a basis for editorial decisions and may publish such disclosures if they are believed to be important to readers in judging the manuscript. A decision may be made by the Journal not to publish on the basis of the declared conflict. For more information, please refer to: http://www.elsevier.com/wps/find/authorshome.authors/conflictsofinterest.
Submission:

Submission to this journal proceeds totally online and you will be guided stepwise through the creation and uploading of your files. The system automatically converts source files to a single PDF file of the article, which is used in the peer-review process. Please note that even though manuscript source files are converted to PDF files at submission for the review process, these source files are needed for further processing after acceptance. All correspondence, including notification of the Editor's decision and requests for revision, takes place by e-mail removing the need for a paper trail.

Please submit your article via https://www.evise.com/evise/faces/pages/navigation/NavController.jspx?JRNL_ACR=TACC.

TACC Airway Management Original Articles welcome all areas of airway management from anesthesia, critical care, and emergency medicine in- and outside of hospitals, to teaching and training issues in airway management, as well as emerging concepts and ideas about equipment for airway management in human or manikin studies, as long as the authors can demonstrate their clinical or educational relevance of the issues investigated and described in their articles with the final aim to improved safe patient care. Our audience ranges from student to professor, and so articles must be accessible to a wider readership.

Please avoid jargon, but do not oversimplify: be accurate and precise throughout.

Authors should note that all articles are subject to a rigorous peer review process and commonly accepted ethical rules, liken written informed consent by the patients or study participants as well as ethic committee approval is mandatory. Reviewers will have to answer for each article the following questions before they can finally recommend a suggestion to the editor about acceptance of an article to be published: Was the subject addressed in the submitted article worthy of investigation and publishing? Is the information presented new? Are the conclusions drawn by the authors supported by their data? Is the manuscript appropriate for the EMAS section? Is the organization of the manuscript appropriate? Are the figures, tables and supplementary data appropriate? And finally was the conduct of the study ethically acceptable?

To help you prepare your article, please take careful note of the following guidelines (especially limits and ‘Article structure’). A more detailed formatting checklist follows these instructions.

Title • Titles should be short and enticing (no more than eight words).
Authors names • No more than 7 authors - Full contact details for all authors (indicate corresponding author).

Structured Abstract with headings to include: Background, Aim, Methods, Results, Conclusion • Briefly explain the necessary background and encapsulate the take-home message. • Please emphasize the recent developments that make your research timely. • Between 100 and 500 words. • Must not contain reference citations

Article structure • Introduction: please indicate the timeliness and rationale for your article (why the subject is important; why now). • Use concise logical subheadings and provide clear links between sections. Please end with a brief summary of your article, a strong take-home message and include a clear indication of future research.

Length • 3500 words: this limit does not include text in boxes, tables, figure legends abstract or references

Figures • Should always have a short, explanatory title to preface the legend. • Legends must fully explain the figure without reference to the text.

Tables • Require a single-sentence title but no legend. • Abbreviations (if not defined in the main text) and full explanations should be footnoted (using letters).

Text Boxes • Ideal for providing explanations of basic concepts or theories, giving detailed mechanisms or discussing case studies. • Text Boxes can occasionally contain small figures and tables. • 400 words max per Box (refs. to be listed in main reference list only: see checklist). • No more than 4 boxes per article.

Outstanding questions • Can be summarized in a box (not included in box count).

Glossary Box • Used for specialist language (not included in box count).

References • The limit of 30-35 references should not be exceeded.
