INSTRUCTIONS TO AUTHORS

Available online at http://www.journals.elsevierhealth.com/periodicals/ajpa/authorinfo

The American Journal of Pathology is the official journal of the American Society for Investigative Pathology (ASIP), seeks to publish high-quality original papers on all aspects of the molecular and cellular biology and mechanisms of disease. It is committed to manuscripts that advance basic and translational knowledge of the pathogenesis, classification, diagnosis, and mechanisms of disease, without preference for a specific methodological approach. Manuscripts should be carefully selected for their significance to the general field of pathology, and should present novel, relevant experimental models using cellular, molecular, animal, biological, chemical, and immunological approaches in conjunction with morphology.

Manuscript Categories. Regular Articles are categorized in the Table of Contents according to the following research topics: Biomarkers, Genomics, Proteomics, and Gene Regulation; Biophysical Imaging and Computational Biology; Cardiovascular, Pulmonary and Renal Pathology; Cell Injury, Repair, Aging and Apoptosis; Epithelial and Mesenchymal Cell Biology; Gastrointestinal, Hepatobiliary and Pancreatic Pathology; Growth Factors, Cytokines, Cell Cycle Molecules; Immunopathology and Infectious Diseases; Matrix Pathobiology; Metabolic, Endocrines and Gerontological Pathology; Molecular Pathogenesis of Genetic and Inherited Diseases; Musculoskeletal Pathology; Neurobiology; Stem Cells, Tissue Engineering and Hematopoietic Elements; Tumorigenesis and Neoplastic Progression; and Vascular Biology, Atherosclerosis and Endothelium Biology. Not all topic areas will appear in each issue, as this is dependent on the content of original research accepted for publication. Upon acceptance, authors will be asked to classify their manuscript on a 4-category scale and the Editors will make the final determination regarding topic category placement.

Short Communications are intended to provide a forum for the rapid publication of timely and significant findings, in brief. Manuscripts in this category should be concise but definitive. They may be descriptive and less mechanistic than Regular Articles, and must not exceed 12 double-spaced typed pages (excluding references and legends) and a maximum of 3 to 4 figures and tables. Categorization of manuscripts in this category is at the Editor’s discretion.

In addition to original research articles, the Journal publishes articles categorized as Reviews, Mini-Reviews, Editorial Perspectives, and Commentary. Authors who wish to publish a Review or Mini-Review should send their curriculum vitae along with an outline of the proposed article for prior approval by the Editor-in-Chief. Reviews must have around 5000 words, with 50 references, and 2 tables or figures (one of which is mechanistic); Mini-Reviews have a maximum of 4,000 words, 50 references, and 2 tables or figures (one of which is mechanistic). Reviews and Mini-Reviews should include a concise mechanistic insight into the current state of research in the discussed topic. Commentaries are submitted by invitation only and relate to a concurrently published article. All invited papers are subject to the same review process as unsolicited articles.

Review Process. The Editors perform an initial evaluation on all submissions to determine whether they believe the manuscript will achieve a sufficient priority score to warrant publication. Priority is determined by the Editors in relation to other papers being considered. The aim is that expeditious treatment will enable authors to submit their manuscripts elsewhere as soon as feasible and without unnecessary delays. For manuscripts submitted for external review, the Editor-in-Chief assigns manuscripts to Associate Editors according to their expertise. The Associate Editor will solicit reviewers (typically, two external reviewers). Authors are encouraged to identify up to five potential reviewers. Authors may also request that specific reviewers not be used according to their expertise. The Editors do have the authority to utilize such a reviewer if it is necessary for expert peer review. It is the practice of the Journal to conduct a blinded peer-review process. The Editor-in-Chief may return the manuscript to the authors without outside review if the Editors find it inappropriate for publication in this Journal. Appeals (rebuttals) to editorial decisions must be submitted within 60 days of the date received.

Review Decisions. Only a portion of manuscripts will be accepted for publication. A number of worthy manuscripts will be rejected based on priority. The Journal will advise authors whether the manuscript is accepted, accepted with revisions, rejected but encourage resubmission (after major revision), or rejected. A manuscript may be returned to the authors without outside review if the Editors find it inappropriate for publication in this Journal. Appeals (rebuttals) to editorial decisions must be submitted within 60 days to be considered.

Journal Scientific Integrity Policy. The Journal has developed principles for defining scientific misconduct as well as procedures for handling such matters. General information as well as detailed information can be found at http://www.journals.elsevierhealth.com/policies/ajpa/content/integrity. To report suspected misconduct relating to authors, reviewers, or Editors, send written complaint to the American Journal of Pathology, 2620 Rockville Pike, Bethesda, Maryland, USA 20814-3993 or ajp@asip.org. Issues relating to staff conduct should be directed to the ASP Executive Officer at American Society for Investigative Pathology, 2620 Rockville Pike, Bethesda, Maryland, USA 20814-3993 or mesobel@asip.org.

Author Conduct. Authorship is defined as 1) substantial contributions to conception and design, or acquisition of data, or analysis and interpretation of data; 2) drafting the manuscript or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3. When submitting a manuscript to the Journal, the corresponding author takes responsibility on behalf of all authors for the authorship, authenticity, and integrity of the research being reported. Authors should take special care that manuscripts submitted to the Journal are prepared in accordance with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals (see http://www.icmje.org); in particular the ethical considerations regarding authorship, conflicts of interest, redundant publication, and disclosure of funding sources. Research subjects should be carefully adhered to. Additionally, the Journal takes great care to secure the confidentiality and treatment and confidentiality of research subjects should be carefully adhered to. For authors to identify or attempt to communicate directly with peer reviewers or Associate Editors regarding their manuscript. The Editors will consider any deliberate ethical violation in either the reported research or the manuscript preparation and review to be actionable misconduct, the potential results of which may be manuscript rejection or public article retraction, reporting of conduct to the authors’ governing institutions, and the denial to consider any future submissions to the Journal. Willful misconduct does not include incidents of honest misunderstanding or inadvertent error. Detailed information regarding possible misconduct can be found in the Journal Scientific Integrity Policy at http://www.journals.elsevierhealth.com/periodicals/ajpa/content/integrity.

Manuscript Submission. Manuscripts should be submitted online via the Rapid Review system (http://www.rapidreview.com/ASIP2/CALogon.jsp). Detailed instructions on preparing and submitting files can be found on the author submission website at the above URL. Authors having difficulty submitting files online should complete the online submission form on Rapid Review to receive the assigned manuscript number. With the manuscript number clearly noted, electronic files (manuscript text, figures, and tables) should be be sent electronically to the Editorial Office at ajp@asip.org or sent on disk by mail to: Michael P. Lisanti, M.D., Ph.D., Editor-in-Chief, The American Journal of Pathology, 9650 Rockville Pike, Bethesda, Maryland, USA 20814-3993. When submitting a manuscript, authors must include a list of nonstandard abbreviations to aid reviewers; specifications (eg, font size and type, margin settings, etc) are left to the authors’ discretion (http://www.rapidreview.com/ASIP2/CALogon.jsp). Authors are encouraged to include a list of nonstandard abbreviations as part of the final article. In addition, authors should be ready to comply with Editors’ requests for copies of any similar works in preparation, copies of cited manuscripts that are subtopics (such as “in press,” “in preparation,” “to appear,” etc) and data not shown but summarized in the manuscript that may aid the review process.

Title Page. The title page must include a concise title accurately reflecting the findings of the work; full names (not initials) of all authors; department, institution and address where the research was performed; number of text pages, tables, and figures; a running head (no more than 40 characters or less); grant numbers and sources of support; name, address, phone, fax, and email of the corresponding author; and name and address of author who should receive reprint requests if different from corresponding author. If an author changes employment after the study was performed, the new affiliation information for that author should be included as a footnote. Any relationships (eg, employment, consultancies, board membership, stock ownership, funding, honoraria, expert testimony, patents or royalties, travel reimbursements, industry-supplied free reagents, etc) with any organization or entity having a direct financial or personal interest in the subject matter or materials discussed in the article should also be clearly stated.

Abstract. An abstract of 220 words or less should be prepared on a separate sheet. It should be intelligible to the general reader without reference to the text. The abstract should clearly summarize the background, methodology, results, and significance of the study. Abbreviations and citations should be avoided.

Text. The remaining sections of the text, which should include Introduction, Materials and Methods, Results, Discussion, and Acknowledgments (in this order), need to appear on separate pages. The remaining sections of the manuscript should be submitted online in their first occurrence and then may be referenced in abbreviation through the remainder of the manuscript. Manuscripts must include a list of gene and protein symbols, to facilitate standardization of scientific communication. Consult the Human Genome Organisation Gene Nomenclature Committee website (http://www.genenames.org) for gene symbols and UniProt (http://www.uniprot.org) for protein names and symbols. For a complete list of other
For Materials and Methods, authors should describe experimental and statistical methods in enough detail that other researchers can replicate results and evaluate claims. A description of methods that are known (eg, PROT, with the accession numbers included in the manuscript. When providing supplier information for materials sources, the company name and city, and city and state, and/or zip code. Descriptive text must be clearly indicated. Publication in the Journal implies that the authors agree, upon reasonable request, to share any materials or data that are integral to the results presented. The grouping of images from different parts of the same gel or blot, graphs should be submitted in grayscale or color, paying special attention to the figure legends. For text within tables, include line graphs, and any other notations. Descriptive text, rather than the tables, should be used to describe outliers (eg, closed circles, open boxes, hatched bars, etc); alternatively, a legend key should be included in the figure. Statistical significance should be defined by asterisks (*, **, ***), or by other sequential symbols: **, ***. These may be doubled if needed. P values should be labeled by symbol in the image, with conditions appearing only in the legend. All abbreviations should also be defined.

Examples follow:

References:

Books:

In press:

To be used only for papers accepted for publication. Cite as for journal with (in press) in place of volume and page numbers. Include digital object identifier (doi) when available for online early publications.

Submit papers/unpublished data: Cite in text only.

Web Data:

Submit self-contained data sets section below for proper use of web site references. Use the doi when available. Include the name of the institution sponsoring the web site, URL address with direct linkage to the resource (Cite in text only).

Tables: Tables should be typed double-spaced and submitted after the main text on separate pages, as part of the manuscript. The preferred format file for Tables is MS Word; figure file formats (including those embedded in the text) are unacceptable. Tables should be black and white only and should not contain figures or other non-typset images. Color or gray shading is not permitted. Emphasis may be represented by bold, italic, and underlining. Table footnotes should contain operational symbols (eg, *.*, **, etc) or titles for each panel; labels should be labeled chronologically from left to right. Figure panels submitted on separate pages will be rearranged from the publication. Figures should be sized to fit one column (8 cm) or two columns (17 cm). Maximum page length is 22.5 cm. Figures deviating from these specifications will be returned to the authors. The Editors reserve the right to accept only the original data, which the authors must make available. Information can be found in the Journal Scientific Integrity Policy at http://www.journals.elsevierhealth.com/periodicals/aip/content/integrity.

Digital Art: Digital figure files are required for submission. The American Journal of Pathology requires that all digital images are RGB color mode. Images submitted in RGB will retain the vivid reds, greens, and blues of the original digital files for online publication. Authors should therefore submit all figures, graphs (including new and revised manuscripts) in the RGB color mode. The preferred file formats for digital art are PDF, TIFF, and EPS. For detailed instructions on preparing digital art for submission or production, visit http://www.asip.org/pubs/AuthorNotice.cfm. Contact healthpermissions@elsevier.com regarding permission to deposit manuscripts in any non-AJP Prepository without prior permission by the Journal a violation of copyright.

Embargo Policy: All information regarding the content of submitted or accepted manuscripts is strictly confidential. Information contained in or about accepted articles (eg, tables, figures) must be embargoed by the news media until the Journal embargo date has passed, not to exceed the publication date of the article. For detailed information on embargo release dates or embargo information, and date of access.

Contact healthpermissions@elsevier.com regarding deposition of manuscripts in any non-Journal Prepository. Authors of accepted manuscripts will be charged $95 per supplemental figure file to be published in the Journal's online database. Authors should contact asipproduction@elsevier.com.

Disclosure and Conflicts of Interest: All authors must disclose any current or former relationships (eg, employment, consultancies, board membership, stock ownership, funding, honoraria, expert testimony, patents or royalties) that may be perceived as directly or indirectly related to the work described in their article. In order to ensure that the information is up to date, authors should err on the side of full disclosure and should contact the Editorial Office if they have questions or concerns. This information should be provided at the time of submission and reiterated as part of copyright assignment. Failure to do so may result in manuscript rejection or editorial retraction of the article. Further information can be

approved nomenclature organizations (eg, bacteria, viruses, mice), please contact the Editorial Office.

Preparation of Images (Ethics): Authors should provide complete author citation (including the year of publication, volume and page numbers, and/or that regulations concerning the use of animals in research were adhered to. Authors should describe all descriptors: arrows, arrowheads, scale bars, insets, asterisks, boxes/circles/etc in line graphs, and any other notations. Descriptive text, rather than the tables, should be used to describe outliers (eg, closed circles, open boxes, hatched bars, etc); alternatively, a legend key should be included in the figure. Statistical significance should be defined by asterisks (*, **, ***), or by other sequential symbols: **, ***. These may be doubled if needed. P values should be labeled by symbol in the image, with conditions appearing only in the legend. All abbreviations should also be defined.

Failure to do so may result in manuscript rejection or editorial retraction of the article. Further information can be
found in the Journal Scientific Integrity Policy at http://www.journals.elsevierhealth.com/periodicals/ajpa/content/integrity. Upon manuscript acceptance, all coauthors will be instructed to formally disclose all potential conflicts.

**Publication Charges**

**Figure and Table Charges:** Authors will be charged $550 per color figure, $50 per black & white or grayscale figure, and $50 per composed table, per printed page (i.e., figures or tables necessitating more than one printed page will incur an additional charge). Corresponding authors of published manuscripts who are currently, dues-paying regular members of ASIP at the time of submission will receive one free color figure as a benefit of membership; page charges will not be waived for ASIP members.

**Page Charges:** Authors will be charged $95 per printed page. Manuscripts arising from research in developing countries may be eligible for waiver of publication charges only if all authors are located in a qualifying country (for a list of eligible countries, see Group A and Group B countries at http://www.who.int/hinari/eligibility/en). Otherwise, page charges will not be waived, except for solicited editorials.

**Approval of Fees and Invoicing:** A summary of publication charges (figures, tables, and supplemental data) will be presented to the corresponding author of accepted manuscripts for approval prior to publication; final page charges cannot be determined until final publication. Color figure charges will not be waived, but color figures may be published in black and white, pending editorial approval. Requests for black and white figure publication must be made prior to execution of the publication charge approval form to avoid color charges. A final invoice will be presented immediately after publication; full payment is expected at that time. Failure to pay publication charges may result in the authors' inability to publish future articles in *The American Journal of Pathology*.

**Open Choice.** In addition to publication charges outlined above, authors may elect to participate in the Journal’s Open Choice program. Articles published under Open Choice will become immediately accessible on the Journal website upon publication, without the twelve-month subscriber-only access delay. Authors wishing to participate should contact the Editorial Office following manuscript acceptance. All copyright restrictions regarding reuse still apply. Cost to participate is $1500, which must be received before article restriction is lifted.

**Reprints.** Reprints should be ordered when page proofs are returned; an order form is included with the proofs. Late reprint orders may result in additional fees. Author reprints will be supplied in CMYK color mode because it is a printed medium, but electronic reprints will be supplied in RGB color mode for visualization on screen. There is no extra charge for color reprints. Each coauthor will receive one complimentary electronic (secure PDF) reprint. Additional electronic reprints can be ordered at the time page proofs are returned or at a later date. No hardcopy complimentary reprints are provided by the publisher.

**Proofs.** The corresponding author will be contacted by email once proofs are ready, and will be directed to download electronic proofs from a secure website. Electronic page proofs will be provided in RGB, thus reflecting the online quality. Image files will be converted to CMYK for the printed journal; all images published online will be in RGB. Full instructions on completing proof corrections will be provided with the downloaded proof. The author should check the proofs carefully, mark any printer’s errors, and answer queries as requested. Author changes should be kept to a minimum. Proof corrections and replacement figures (if any) must be returned within 48 hours to avoid any delay in publication.

**Cover Figure.** The cover figure is selected by the Editors from illustrations appearing in the current issue. Authors are encouraged to suggest a figure for consideration or include an additional cover figure submission along with their manuscript submission. Cover figures are published at no charge; cover reprints are available as cover stock reprints or posters (no complimentary cover reprints are provided by the publisher).

**Editorial Communications.** All correspondence concerning editorial matters should be addressed to the Editor-in-Chief at *The American Journal of Pathology*, 9650 Rockville Pike, Bethesda, Maryland, USA 20814-3993, faxed to 301-634-7961, or emailed to ajp@asip.org. Appeals (rebuttals) to editorial decisions must be submitted within 60 days to be considered. Letters to the Editor will be printed at the Editors’ discretion in the Correspondence section.

**Corrections** are published upon request and after editorial review. Retractions are published upon request of authors or their institutions and may also be published by the Journal following a determination of scientific misconduct. Notes of Concern are published in response to editorial concerns relating to scientific or publishing misconduct by authors or reviewers or to alert the scientific community of an ongoing investigation.

[Revised: January 2012]
