- Guide for Authors p.4

DESCRIPTION

Asian Journal of Urology (AJUR), launched in October 2014, is an international peer-reviewed Open Access journal jointly founded by Shanghai Association for Science and Technology (SAST) and Second Military Medical University (SMMU). AJUR aims to build a communication platform for international researchers to effectively share scholarly achievements. It focuses on all specialties of urology both scientifically and clinically, with article types widely covering editorials, opinions, perspectives, reviews and mini-reviews, original articles, cases reports, rapid communications, and letters, etc.

Fields of particular interest to the journal including, but not limited to:
- Surgical oncology
- Endourology
- Calculi
- Female urology
- Erectile dysfunction
- Infertility
- Pediatric urology
- Renal transplantation
- Reconstructive surgery
- Radiology
- Pathology
- Neurourology

Indexed in ESCI and Embase.

EDITORIAL BOARD

Editors-in-Chief
Yinghao Sun, Shanghai Changhai Hospital, Department of Urology, Shanghai, China

HonoraryEditors-in-Chief
Leland W. K. Chung, Dept. of Medicine, Cedars-Sinai Medical Center, Los Angeles, California, USA
Michael J. Droller, Department of Urology, Mount Sinai Medical Center, New York, NY, USA

Associate Editors-In-Chief
Per-Anders Abrahamsson, Division of Urological Cancer, University Hospital Malmö, Malmö, Sweden
Allen W. Chiu, School of Medicine, National Yang Ming University, Taipei
Mahesh Desai, Dept. of Urology, Muljibhai Patel Urological Hospital, Nadiad, India
Jalil Hosseini, Shohada-e-Tajrish Hospital and Infertility and Reproductive Health Research Center, Reconstructive Urology Division, Tehran, Iran
Tom F. Lue, Dept. of Urology, School of Medicine, University of California at San Francisco (UCSF), San Francisco, California, USA
Seiji Naito, Graduate School of Medical Science, Kyushu University, Fukuoka, Japan
Arthur D. Smith, North Shore Long Island Jewish Medical Center, The Arthur Smith Institute for Urology, New York, USA
Gyung Tak Sung, Department of Urology, Dong-A Medical Center, Pushan National University, Busan, The Republic of Korea

Associate Editor
Gonghong Wei, Faculty of Biochemistry and Molecular Medicine, University of Oulu, Oulu, Finland

Editorial Advisors
Walter Artibani, Department of Urology, University of Verona, Padova, Italy
Christopher Chapple, Dept. of Urology, Royal Hallamshire Hospital, Sheffield, Sheffield, UK
Haojie Huang, Mayo Clinic College of Medicine, Department of Urology, Rochester, Minnesota, USA
Jiaoti Huang, Dept. of Pathology, Duke University School of Medicine, Durham, North Carolina, USA
Eric A. Klein, Zegarac-Pollock Professor of Surgery; Institute Vice Chair for Surgical Innovations, Cleveland Clinic, Cleveland, Ohio, USA
Philip S. Li, Cornell University, Weill Medical College, New York, New York, USA
Francesco Montorsi, Ospedale San Raffaele, Università Vita-Salute San Raffaele, Milan, Italy
Howard R. Soule, Prostate Cancer Foundation, Santa Monica, California, USA
Hein Van Poppel, Department of Urology, University Hospital, Leuven, Belgium
Manfred Wirth, Department of Urology, Technische Universität Dresden, Dresden, Germany
Jianfeng Xu, Center for Cancer Genomics, Wake Forest School of Medicine, Winston-Salem, USA

Assistant Editor-in-Chief
Shancheng Ren, Shanghai Changhai Hospital, Department of Urology, Shanghai, China

Editorial Board
Aziz Abdullah, Liaquat National Hospital, Karachi, Pakistan
Hideyuki Akaza, Research Centre for Advanced Science and Technology, The University of Tokyo, Tokyo, Japan
Neil Bhowmick, Dept. of Medicine, Cedars-Sinai Medical Center, Los Angeles, California, USA
Gerald Brock, Department of Urology, University of Western Ontario, London, Canada
William Catalona, Urology, Northwestern University Feinberg School of Medicine, Chicago, Illinois, USA
Myung-Soo Choo, Asan Medical Center, University of Ulsan College of Medicine, Seoul, The Republic of Korea
Yao-Chi Chuang, Dept. of Urology, Kaohsiung Chang Gung Memorial Hospital, Keelung, Taiwan
Robert Clayton, Dept. of Urology, University of California at Irvine, Orange, California, USA
Jean de la Rosette, Dept. of Urology, Universiteit van Amsterdam, Academisch Medisch Centrum (AMC), Amsterdam, Netherlands
John Denstedt, Schulich School of Medicine and Dentistry, University of Western Ontario, London, Ontario, Canada
Colin P. Dinney, Anderson Cancer Center, University of Texas, Houston, Texas, USA
Shin Egawa, Dept. of Urology, Jikei University School of Medicine, Tokyo, Japan
El-Attar, National Cancer Institute, Cairo University, Giza, Egypt
Robert Alan Figlin, Samuel Oschin Comprehensive Cancer Institute, Cedars-Sinai Medical Center, Los Angeles, California, USA
Keong Tatt Foo, Dept. of Urology, Singapore General Hospital, Singapore, Singapore
Michael Freeman, Dept. of Surgery, Division Urology, Cedars-Sinai Medical Center, Los Angeles, California, USA
Xin Gao, Third Affiliated Hospital, Sun Yat-Sen University, Guangzhou, China
Martin Gleave, The Vancouver Prostate Centre and Department of Urological Sciences, University of British Columbia, Vancouver, Canada
Andreas Gross, Dept. of Urology, Asklepios Klinik Barmbek, Hamburg, Germany
Narmada Gupta, Department of Urology, Medanta Kidney and Urology Institute, Delhi, India
Jia He, Department of Health Statistics, Second Military Medical University, Shanghai
Jian Huang, Second Affiliated Hospital, Sun Yat-Sen University, Guangzhou, China
Lap Hong Ian, University of Macau, Macau, China
Adrian Joyce, Pyrah Dept. of Urology, St James’s University Hospital, Leeds, England, UK
Steven A. Kaplan, Weill Cornell Medical College, Cornell University, New York, New York, USA
Louis R. Kavoussi, Chairman, Dept. of Urology, The Smith Institute for Urology, New York City, New York, USA
Elijah Kehinde, Dept. of Surgery, Nazarbayev University, Astana, Kazakhstan
Deeprak Kirpekar, Seth Ramdas Shah Memorial Hospital, Pune, India
Chuize Kong, First Hospital, China Medical University, Shenyang, China
Rajeev Kumar, Dept. of Urology, All India Institute of Medical Sciences, New Delhi, India
Hann-Chorng Kuo, Hualien Tzu Chi Hospital, Taiwan
Natasha Kyriianou, University of Kentky College of Medicine, Lexington, Kentucky, USA
Richard Lee, Dept. of Stem Cell and Regenerative Biology, Brigham and Women’s Hospital, Cambridge, Massachusetts, USA
Toh Khai Lee, Toh Khai Lee Urology Clinic, Mount Elizabeth Medical Centre, Singapore, Singapore
Hong Li, Sichuan University, Chengdu, China
Kirk Lo, University of Toronto, Toronto, Ontario, Canada
Tadashi Matsuda, Kansai Medical University, Osaka, Japan
Mani Menon, Vattikuti Urology Institute, Henry Ford Health System, Detroit, Michigan, USA
Yuanjie Niu, Dept. of Urology, Tianjin Medical University Cancer Institute & Hospital, Tianjin, China
David J. Ralph, Dept. of Urology, University College London/University College Hospitals Trust, England, UK
Douglas Scherr, Dept. of Urology, Weill Medical College and the New York Presbyterian Hospital, New York, New York, USA
David Schulsinger, Dept. of Urology, Stony Brook University, New York, New York, USA
Marshall Leedy Stoller, Dept. of Urology, School of Medicine, University of California at San Francisco (UCSF), San Francisco, California, USA
Yeh-Hong Tan, Department of Urology, Mount Elizabeth Hospital, Singapore, Singapore
Cigdem Tanrikut, Cornell Institute for Reproductive Medicine, Massachusetts General Hospital & Harvard Medical School, Boston, Massachusetts, USA
Guang Zhou Teh, Department of Urology, Sarawak General Hospital, Kuching, Malaysia
Timothy Thompson, Dept. of Urology, University of Texas M.D. Anderson Cancer Center, Houston, Texas, USA
Rainy Umbo, Faculty of Medicine, University of Indonesia, Jakarta, Indonesia
Rakesh Verma, Bir Hospital; Dept. of Surgery, National Academy of Medical Sciences, Kathmandu, Nepal
Jianye Wang, Beijing Hospital, Beijing, China
Qiang Wei, Dept. of Urology, Sichuan University, Chengdu, China
David Winkle, School of Medicine, University of Queensland, Brisbane, Queensland, Australia
Henry Woo, Sydney Adventist Hospital Clinical School, The University of Sydney, New South Wales, Australia
Shujie Xia, Department of Urology, Shanghai General Hospital, Shanghai, China
Liping Xie, Department of Urology, The First Affiliated Hospital, School of Medicine, Zhejiang University, Hangzhou, China
Dingwei Ye, Dept. of Urology, Fudan University, Shanghai, China
Zhangguang Ye, Tongji Medical College; Dept. of Urology, Huazhong University of Science and Technology, Wuhan, China
Ming Kwong Yiu, Queen Mary Hospital, The University of Hong Kong, Hong Kong
Weide Zhong, Department of Urology, Guangzhou First People’s Hospital, Guangzhou, China
GUIDE FOR AUTHORS

Guide for Authors
Asian Journal of Urology is an international peer-reviewed journal jointly founded by Shanghai Association for Science & Technology (SAST) and Second Military Medical University. It focuses on all specialities of urology both basically and clinically (including, but not limited to, surgical oncology, endourology, calculi, female urology, erectile dysfunction, pediatrics, renal transplantation, reconstructive surgery, infertility, radiology, pathology, and neuourology).

Manuscript Submission
Manuscripts for Asian Journal of Urology should be submitted via the homepage of the journal at http://www.ajurology.com or via the online manuscript submission and review system at http://mc03.manuscriptcentral.com/aju.
If you have any questions for papers' preparation, please contact Editorial office of Asian Journal of Urology via ajurology@smmu.edu.cn.

Article types
Editorials
Editorials usually provide commentary and analysis concerning an article in the issue or the whole special issue of the Journal in which they appear. They may include one figure or table. They are nearly always solicited, although unsolicited editorials may occasionally be considered. Editorials are limited to 750 words, with up to 10 references.

Reviews
Reviews should include the urological questions or issues which are importance for biomedical research, clinical practice, special practice, or public health; description of how the relevant evidence was identified, assessed for quality, and selected for inclusion; synthesis of the available evidence such that the best-quality evidence (e.g., randomized clinical trials, meta-analyses, systematic reviews, and high-quality prospective cohort studies) should receive the greatest emphasis; and discussion of controversial aspects and unresolved issues. Authors will be asked to describe characteristics of the literature search performed for their review. A narrative (unstructured) or structured abstract is required and should not exceed 250 words. Maximum length: 6000 words of text (not including abstract, tables, figures, references, and online-only material), with no more than a total of four tables and/or figures and no more than 50-75 references.

Mini-reviews
Mini-reviews are much more focused than Reviews. A Mini-review introduces the reader to a particular area of an author's research through a concise overview of a selected topic. The content should balance scope with depth, and references to important works from others that are significant to the topic, should be included. It is shorter (approximately 2000 words). However, it should still have an Abstract (no more than 150 words) that should similarly arouse the readers' interest.

Original articles
Original articles typically include basic research, randomized trials, intervention studies, cohort studies, case-control studies, epidemiologic assessments, other observational studies, surveys with high response rates, cost-effectiveness analyses and decision analyses, and studies of screening and diagnostic tests. These articles should be arranged as follows: Title Page, Abstract, Introduction, Materials (Patients) and Methods, Results, Discussion, Conclusions, References, Tables, Legends. A structured abstract is required and must conform to the following style: Objective, Materials (Patients) and Methods, Results, Conclusion. Maximum length: 5000 words of text (not including abstract, tables, figures, references, and online-only material). There should be no more than eight tables and/or figures.

Clinical experiences
Clinical experiences report the experience for diagnosis, treatment or prevention of urological diseases. A structured abstract is required. Maximum length: 2000 words of text (not including abstract, tables, figures, references, and online-only material) with no more than a total of five tables and/or figures.
Clinical images
Clinical images are intended to provide a visual image of an interesting and unique urological observation. A 500-word description (including acknowledgment, all text, tables, figure legends, and references) of the clinical issue, the patient's urological findings, and the image should be included. There should be no more than two images and four references.

Case reports
Case reports include short reports or original studies or evaluations or unique, first-time reports or clinical cases (individual or a series). Maximum length: 1000-2000 words (including acknowledgment, abstract, all text, tables, figure legends, and references), with no more than 15 references and four tables and/or figures.

Letters
Letters should be useful to urological practitioners. The length should not exceed 1000 words. There should be no more than two tables and/or figures and 10 references.

Special feature
Urological data include 1) the number, distribution and features of urological institutes, equipments, and researching faculty in various countries in the world; 2) the data analysis of international cutting-edge researches on urology, such as new theories, techniques, projects, clinical trials, awards, patents, and outcomes transforming; 3) quantitative analysis on urological literatures to provide references for future researches. Submissions could be research article (3000-4000 words), commentary (1000-2000 words), or meta-analysis (4000-6000 words).
Asian focus welcomes researches with typical Asian features, including those on epidemiical, genetical, regional areas, and occupational, frequently occurring diseases, as well as disease spectrum and other representing the current situations in Asia (Asian countries' names are preferred appearing in the title). It also includes policy and guide interpretation in Asian countries and regions. Submissions could be research article (3000-4000 words), review (4000-6000 words), commentary (1000-2000 words), opinion or view points (1000-2000 words).

Use of inclusive language
Inclusive language acknowledges diversity, conveys respect to all people, is sensitive to differences, and promotes equal opportunities. Articles should make no assumptions about the beliefs or commitments of any reader, should contain nothing which might imply that one individual is superior to another on the grounds of race, sex, culture or any other characteristic, and should use inclusive language throughout. Authors should ensure that writing is free from bias, for instance by using 'he or she', 'his/her' instead of 'he' or 'his', and by making use of job titles that are free of stereotyping (e.g. 'chairperson' instead of 'chairman' and 'flight attendant' instead of 'stewardess').

Manuscript preparation
• Covering letter
Submitted manuscripts should be accompanied by a covering letter giving details of:
1) The title of the manuscript and its main point;
2) A statement that the manuscript has not been published in part or whole (except in the form of abstract) or is not under consideration for publication elsewhere in any language;
3) A statement that all authors have agreed to be so listed and have seen and approved the manuscript, its consent and its submission to Asian Journal of Urology;
4) A full current postal address, telephone, and current email address. We usually communicate with authors by email.
• Subdivision - numbered sections
Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. (the abstract is not included in section numbering). Any subsection may be given a brief heading. Each heading should appear on its own separate line.
• Title page
The title page should contain
1) Title
2) Authorship: Please include affiliation details for all authors. Indicate the email address of the corresponding author.
3) Running title
• Abstract
• Keywords (five to eight)
Please include at least five descriptive keywords (maximum of eight) that capture the main topics of the article.

- Main Text (Key body of work, normally divided into sections and described by short headings)
- Author contributions
- Conflicts of interest

In the interests of transparency and to help readers to form their own judgments of potential bias, Asian Journal of Urology requires authors to declare to the editors any conflicts of interests in relation to the work described.

- Acknowledgments (including any personal thanks as well as listing the source of research funds)
- References

Authors are responsible for the accuracy of the references. Published articles as well as those in press (please state the name of the journal) may be included. In the text of the manuscript, references to the literature should be numbered consecutively. Each reference should be numbered individually and listed at the end of the manuscript; examples are given below. All authors should be quoted for papers with up to six authors; for papers with six or more authors, the first six authors only should be quoted, followed by et al.

Example:
Journal article up to six authors (list all authors):

Journal article more than six authors (list first six and add et al.):

Book:

Chapter in a book:

- Table and figure captions (numbered in sequence as they appear in the text)
- Figure legends
- Tables

Tables must be concise and cited consecutively using Arabic numerals in the text (Table 1, Table 2, etc.).

- Figures
- Figures (photographs, drawings, diagrams and charts) should be clear, easily legible and cited consecutively using Arabic numerals in the text (Figure 1, Figure 2, etc.).
- Black and white images (photographs, line drawings, graphs etc.) should be saved and supplied as TIFF, or JPEG files with a minimum resolution of 600 dpi.
- Colour images should be saved and supplied as TIFF, or JPEG files with a minimum resolution of 350 dpi.
- If a figure comprises more than one glossy photograph, these should be marked A, B, C, etc.
- Scale markers should be indicated in the photographs.
- Supplementary information

Supplementary information is peer-reviewed material directly relevant to the conclusion of an article that cannot be included in the printed version owing to space or format constraints. It is posted on the journal's website and linked to the article when the article is published online and supplementary information may consist of data files, graphics, videos or extensive tables.

**Ethical Standards and Policies**

*Asian Journal of Urology* considers publication misconduct to be a serious breach of ethics. Misconduct can include failure to disclose a significant conflict of interest, plagiarism, duplicate submission, data falsification, and inappropriate image manipulation.

Authors who submit manuscripts to *Asian Journal of Urology* must submit some author statements together in the manuscript system, thereby affirming the following information, all of which are included in the final published article:

- Authorship contributions,
- Institutional Review Board approval and informed consent statement (human studies),
- Institutional Animal Care and Use Committee approval (animal studies),
•Role of study sponsor,
•Financial disclosures,
•Funding sources.

To be considered as an author of a paper, an individual must have been involved with each of the below activities:
(1) Conception and design of the study;
(2) Generation, collection, assembly, analysis and/or interpretation of data;
(3) Drafting or revision of the manuscript;
(4) Approval of the final version of the manuscript.

Potential Conflicts of Interest
You need to pay attention to some Potential Conflicts of Interest:
a. Editors: Editors who make final decisions about manuscripts must have no personal, professional, or financial involvement in any of the issues they might judge.
b. Authors: Conflicts of Interest for an author may arise if there exists a financial arrangement (e.g., employment, consultancies, honoraria, stock ownership or options, expert testimony, grants/patents received, and royalties) with a company whose product figures prominently in the submitted manuscript or with a company that makes a competing product.
c. Reviewers: Conflicts of Interest for reviewers exist when they have had an ongoing collaboration, original publications, or grants with the authors within the previous two years, except when part of a multicenter group from a different site; are from the same institution as the authors; or have any financial arrangements (e.g., employment, consultancies, honoraria, stock ownership or options, expert testimony, grants/patents received, and royalties) with a company whose product figures prominently in the submitted manuscript or with a company that makes a competing product.

Potential Conflicts of Interest are to be disclosed at the beginning of the peer-review process. Asian Journal of Urology follows the International Committee of Medical Journal Editors (ICMJE) Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals (http://www.icmje.org/recommendations/) and we also follow the Committee on Publication Ethics (COPE) guidelines. All the contributions being considered for publication in Asian Journal of Urology should meet the criteria in the ICMJE Recommendations. Especially the manuscripts reporting studies involving human subjects, statements identifying the appropriate institutional review board approving the studies and confirming that informed consents were obtained from all subjects must appear in the method section. We also suggest that researchers carrying out experiments with animals refer to the ARRIVE guidelines.

Data visualization
Include interactive data visualizations in your publication and let your readers interact and engage more closely with your research. Follow the instructions here to find out about available data visualization options and how to include them with your article.

Copyright
Upon acceptance of an article, authors will be asked to complete a "License to Publish". Acceptance of the license will ensure the widest possible dissemination of information. An email will be sent to the corresponding author confirming receipt of the manuscript together with a "License to Publish" form or a link to the online version of this license. Permission of the journal is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations (please consult Asian Journal of Urology ajurology@smmu.edu.cn). If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article.

Language
Please write your text in good English (American or British usage is accepted, but not a mixture of these).

Page Charge and Color Charge
We are waiving all fees for authors, including page charge, cost for color photos and cover images now.
