The journal *Earth System Governance* addresses governance processes and institutions at all levels of decision-making - from local to global - within a planetary perspective that seeks to align our current institutions and governance systems with the fundamental 21st century challenges of global environmental change and earth-system transformation. The journal intends to be interdisciplinary with a firm grounding in the social sciences and humanities, and covers research on all regions and sectors.

The journal is a flagship publication of the global *Earth System Governance research alliance*, and is available to publish cutting-edge research presented at the annual Earth System Governance conferences, academic workshops, synthesising events by the Earth System Governance research taskforces, and similar activities.

The journal welcomes original Research Articles as well as engaging Policy Perspectives, provocative Commentaries, longer Review Articles, and concise conference reports from the Earth System Governance community. The journal manager can be reached at ESG@elsevier.com.

Directory of Open Access Journals (DOAJ)

**EDITORIAL BOARD**

*Editor-in-Chief*

Frank Biermann, Utrecht University Department of Innovation Environmental and Energy Sciences, Utrecht, Netherlands

Earth system governance, global sustainability, international organizations, global justice

*Managing Editor*

Carole-Anne Sénit, Faculty of Geosciences, Copernicus Institute of Sustainable Development - Utrecht University, Utrecht, Netherlands

Global governance, civil society, legitimacy, sustainable development, planetary justice

*Associate Editors*

Michele Betsill, Colorado State University Department of Political Science, Fort Collins, Colorado, United States of America
Jeroen van der Heijden, Victoria University of Wellington School of Government, Wellington, New Zealand
urban climate governance, environmental governance, regulatory governance, regulatory stewardship, public administration

Agni Kalfagianni, Utrecht University Department of Innovation Environmental and Energy Sciences, Utrecht, Netherlands

Louis Kotzé, North-West University Faculty of Law, Potchefstroom, South Africa

Kyla Tienhaara, Queen's University School of Environmental Studies, Kingston, Ontario, Canada
Environmental governance, green economy, green new deal, foreign investment

Fariborz Zelli, Lund University Department of Political Science, Lund, Sweden
international institutions, climate change, forestry, environmental peacebuilding, political theory

Editorial Board Members
Kenneth W. Abbott, Arizona State University Sandra Day O'Connor College of Law, Phoenix, Arizona, United States of America

Neil W. Adger, University of Exeter College of Life and Environmental Sciences, Exeter, United Kingdom

Steinar Andresen, Fridtjof Nansens Institute, Lysaker, Norway

Cristina Yumie Aoki Inoue, University of Brasilia Institute of International Relations, Brasilia, Brazil

Walter F. Baber, California State University Long Beach, Long Beach, California, United States of America

Karim Bäckstrand, Stockholm University Department of Political Science, Stockholm, Sweden

Xuemei Bai, Australian National University Fenner School of Environment and Society, Canberra, Australia

 Urbanization, urban systems, urban environment, global sustainability, transition and transformation

Ana Flávia Barros-Platiau, University of Brasilia Institute of International Relations, Brasilia, Brazil

Robert V. Bartlett, University of Vermont College of Arts and Sciences, Burlington, Vermont, United States of America

Steven Bernstein, University of Toronto - Mississauga Department of Political Science, Mississauga, Ontario, Canada

Eduardo Brondizio, Indiana University Bloomington Department of Anthropology, Bloomington, Indiana, United States of America

Harriett Bulkeley, Durham University Department of Geography, Durham, United Kingdom

Sarah Burch, University of Waterloo Department of Geography and Environmental Management, Waterloo, Ontario, Canada

Benjamin Cashore, Yale University School of Forestry and Environmental Studies, New Haven, Connecticut, United States of America

Jennifer Clapp, University of Waterloo School of Environment Resources and Sustainability, Waterloo, Ontario, Canada

Trade and food security, financialization in food systems, transnational corporations, food assistance, food system sustainability

Leila da Costa Ferreira, State University of Campinas Environmental Studies and Research Centre, CAMPINAS, Brazil

Environmental sociology, Interdisciplinarity, Social theory, Climate changes

Liang Dong, China Foreign Affairs University, Beijing, China

Climate Policy, International Development, International Organization, Global Governance

Peter Driessen, Utrecht University Department of Innovation Environmental and Energy Sciences, Utrecht, Netherlands

John Dryzek, University of Canberra Institute for Governance & Policy Analysis, Bruce, Australian Capital Territory, Australia

Robyn Eckersley, The University of Melbourne School of Social and Political Sciences, Melbourne, Australia

Klaus Eisenack, Humboldt University of Berlin Albrecht Daniel-Thaer Institute of Agriculture and Horticulture, Berlin, Germany

Lorraine Elliott, Australian National University Department of International Relations, Canberra, Australia

Robert Falkner, The London School of Economics and Political Science Department of International Relations, London, United Kingdom

International climate politics; Nonstate actors; Business power; Private environmental governance; Paris Agreement; English School of International Relations

Christopher Gordon, University of Ghana Institute for Environment and Sanitation Studies, Accra, Ghana

Roberto P. Guimarães, Research Network on Interdependent Inequalities in Latin America, Rio de Janeiro, Brazil

Julia Guivant, Federal University of Santa Catarina Centre of Philosophy and Humane Sciences, Florianópolis, Brazil

Climate change, environmental risks, sustainable food, risk perception

Aarti Gupta, Wageningen University Social Sciences, Wageningen, Netherlands

Joyeeta Gupta, University of Amsterdam Department of Human Geography Planning and International Development Studies, Amsterdam, Netherlands
environmental law, politics and policy; development studies, inclusive development, sustainable development, water governance, climate governance, forest governance, ecosystem governance, North-South relations

**Peter M. Haas**, University of Massachusetts Amherst Department of Political Science, Amherst, Massachusetts, United States of America

**Matthew Hoffmann**, University of Toronto Department of Political Studies, Toronto, Ontario, Canada

**Anne Jernbeck**, Lund University Centre for Sustainability Studies, Lund, Sweden

**Andrew J. Jordan**, University of East Anglia School of Environmental Sciences, Norwich, United Kingdom

**Norichika Kanie**, Keio University Graduate School of Media and Governance, Fujisawa, Japan

**Prakash Kashwan**, University of Connecticut Humanities Institute, Storrs, Connecticut, United States of America

**Rakhyun Kim**, Utrecht University, Utrecht, Netherlands

**Peter M. Haas**, University of Massachusetts Amherst Department of Political Science, Amherst, Massachusetts, United States of America

**Matthew Hoffmann**, University of Toronto Department of Political Studies, Toronto, Ontario, Canada

**Anne Jernbeck**, Lund University Centre for Sustainability Studies, Lund, Sweden

**Andrew J. Jordan**, University of East Anglia School of Environmental Sciences, Norwich, United Kingdom

**Norichika Kanie**, Keio University Graduate School of Media and Governance, Fujisawa, Japan

**Prakash Kashwan**, University of Connecticut Humanities Institute, Storrs, Connecticut, United States of America

**Rakhyun Kim**, Utrecht University, Utrecht, Netherlands

global environmental politics, international environmental law, global governance, complex adaptive systems, network science, multilateral environmental agreements, international organizations

**Tatiana Kluvankova**, Centre of Trans-disciplinary Studies of Institutions Evolution and Policies, Bratislava, Slovakia

Institutional ecological experimental economics; Governance and social innovations; Commons; Ecosystem service governance; Biodiversity; Climate change

**Annica Kronell**, University of Gothenburg The School of Global Studies, Goteborg, Sweden

**Louis Lebel**, Unit for Social and Environmental Research Chiang Mai University, Chiang Mai, Thailand

Goverance of ecosystem services Coproduction of knowledge Politics of adaptation Governance and resilience Sustainable production and consumption Water governance Environmental politics in Southeast Asia Sustainability experiments in Southeast Asia Sustainable aquaculture Sustainability standards and certification scheme

**Diana Liverman**, The University of Arizona School of Geography and Development, Tucson, Arizona, United States of America

Climate vulnerability and adaptation, Food, Environmental Governance

**Eva Lövbrand**, Linkoping University Environmental Change Theme, Linköping, Sweden

**François Mancebo**, Reims Champagne-Ardenne University, Reims, France

Urban and regional planning, sustainability science, multilevel governance, agency, urban agriculture

**James Meadowcroft**, Carleton University School of Public Policy and Administration, Ottawa, Ontario, Canada

**Dirk Messner**, United Nations University Institute for Environment and Human Security, Bonn, Germany

Global change; Digitalization; Sustainable Development; Transformation towards the Decarbonisation of the global Economy; Global Governance; Evolution of human cooperation

**Ronald B. Mitchell**, University of Oregon Department of Political Science, Eugene, Oregon, United States of America

**Tiffany Morrison**, ARC Centre of Excellence for Coral Reef Studies, Townsville, Queensland, Australia

Polycentric Governance; Scale; Networks; Conflict; Marine Policy; Climate Policy; Political Geography

**David N. Munigai**, University of Nairobi Wangari Maathai Institute for Peace and Environmental Studies, Nairobi, Kenya

Peter Newell, University of Sussex Department of International Relations, Brighton, United Kingdom

Climate change, energy transitions, political economy

**Jens Newig**, Leuphana University of Lüneburg, Luneburg, Germany

**Måns Nilsson**, Stockholm Environment Institute, Stockholm, Sweden

**Karen O'Brien**, University of Oslo Department of Sociology and Human Geography, Oslo, Norway

**Sebastian Oberthür**, VUB Institute for European Studies, Brussel, Belgium

EU climate policy/law; International climate governance; Role of the EU in global environmental governance; EU and international energy policy; EU external policy; leadership; International institutions; Compliance and implementation; International negotiations

**Hiroshi Ohta**, Waseda University Faculty of Political Science and Economics, Tokyo, Japan

**Chukwumerije Okereke**, Alex Ekwueme Federal University Department of Political Science, Abakaliki, Nigeria

**Lennart Olsson**, Lund University Centre for Sustainability Studies, Lund, Sweden

**Kate O'Neill**, University of California Berkeley Department of Environmental Science Policy and Management, Berkeley, California, United States of America

**Susan Park**, The University of Sydney Department of Government and International Relations, Sydney, Australia International Organisations, Global Governance, development finance, accountability, environmental NGOs

Åsa Persson, Stockholm Environment Institute, Stockholm, Sweden

Goverance, SDGs, climate adaptation, policy integration

**Arthur C. Petersen**, University College London Department of Science Technology Engineering and Public Policy, London, United Kingdom

Science–policy interface, Dealing with uncertainty, Philosophy of culture, Risk governance, Science and religion
Hens Runhaar, Utrecht University, Utrecht, Netherlands and Forest and Nature Conservation Policy Group, Wageningen University and Research, the Netherlands
Governance of nature and biodiversity; Nature-inclusive agriculture; Nature-based solutions for sustainable cities

Agus Sari, Eco Securities Indonesia PT, Jakarta, Indonesia

David Schlosberg, The University of Sydney Department of Government and International Relations, Sydney, Australia

Heike Schroeder, University of East Anglia School of International Development, Norwich, United Kingdom

Michelle Scobie, The University of the West Indies Sir Arthur Lewis Institute for Social and Economic Studies St Augustine, St. Augustine, Trinidad and Tobago

Webster, Dartmouth College, Hanover, New Hampshire, United States of America

Oran R. Young, University of California Santa Barbara David Bren School of Environmental Science and Management, Santa Barbara, California, United States of America
environmental governance
GUIDE FOR AUTHORS

Types of article

**Research Articles** report the results of original research. The material must not have been previously published elsewhere. Research articles are usually up to 8,000 words, even though articles up to 10,000 words may be accepted if the type of analysis justifies this. Please select Article Type “Research Paper” when submitting your paper in Editorial Manager.

**Review Articles** critically synthesise a body of academic literature in a field relevant to earth system governance research. They may be submitted or invited. Review articles are usually up to 12,000 words and must include a Methods section explaining how the literature for review was selected. Reviews should point to future research directions and may include clear policy implications that need to be addressed in a specific section of the paper. Please select Article Type “Review article” when submitting your paper in Editorial Manager.

**Perspectives** provide an opportunity for authors to present a novel or distinctive viewpoint on any subject within the journal’s scope, with a strong focus on current advances and future directions, including policy recommendations. Perspective articles should be well grounded in evidence and adequately supported by citations as necessary, but should be forward-looking and provide a stimulating and thought-provoking line of argument that advances in thinking or debate about earth system governance. Perspectives may range from 2,000 to 4,000 words. Please select Article Type “Perspectives” when submitting your paper in Editorial Manager.

**Commentaries** are typically commissioned, but sometimes the journal accepts unsolicited commentaries. Commentaries range from 1,000-2,000 words. They include a few references, and up to two tables and figures. The journal accepts two types of commentaries: • Linked commentaries that refer to another article published in ESG. They serve as a forum to contextualize the specific research findings, provide extra information, or present criticism related to the subject of the research article. • Standalone commentaries discuss controversial policy concerns. They present the author’s perspective but articles must be written in an evidence-based, scholarly style. Please select Article Type “Commentary” when submitting your paper in Editorial Manager.

**Special Issues.** A Special Issue (SI) is a coherent collection of 10-15 papers on a specific theme of research and scholarship that falls within the aims and scope of the journal and has a broad international appeal. Research Papers form the core of a Special Issue, and should be accompanied by an introductory Editorial. Guest Editors are encouraged to include other article types such as Perspectives, Review Articles, or Comments. Special Issues are proposed and orchestrated by one or more guest editor under the guidance of a member of the journal's editorial team.

Submission checklist

You can use this list to carry out a final check of your submission before you send it to the journal for review. Please check the relevant section in this Guide for Authors for more details.

Ensure that the following items are present:

One author has been designated as the corresponding author with contact details:
• E-mail address
• Full postal address

All necessary files have been uploaded:

**Manuscript:**
• Include keywords
• All figures (include relevant captions)
• All tables (including titles, description, footnotes)
• Ensure all figure and table citations in the text match the files provided
• Indicate clearly if color should be used for any figures in print

**Graphical Abstracts / Highlights files** (where applicable)

**Supplemental files** (where applicable)

Further considerations
• Manuscript has been 'spell checked' and 'grammar checked'
• All references mentioned in the Reference List are cited in the text, and vice versa
• Permission has been obtained for use of copyrighted material from other sources (including the Internet)
• A competing interests statement is provided, even if the authors have no competing interests to declare
• Journal policies detailed in this guide have been reviewed
• Referee suggestions and contact details provided, based on journal requirements

For further information, visit our Support Center.

BEFORE YOU BEGIN

Ethics in publishing
Please see our information pages on Ethics in publishing and Ethical guidelines for journal publication.

Declaration of competing interest
All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. Authors should complete the declaration of competing interest statement using this template and upload to the submission system at the Attach/Upload Files step. Note: Please do not convert the .docx template to another file type. Author signatures are not required. If there are no interests to declare, please choose the first option in the template. This statement will be published within the article if accepted. More information.

Submission declaration and verification
Submission of an article implies that the work described has not been published previously (except in the form of an abstract, a published lecture or academic thesis, see 'Multiple, redundant or concurrent publication' for more information), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection service Crossref Similarity Check.

Use of inclusive language
Inclusive language acknowledges diversity, conveys respect to all people, is sensitive to differences, and promotes equal opportunities. Content should make no assumptions about the beliefs or commitments of any reader; contain nothing which might imply that one individual is superior to another on the grounds of age, gender, race, ethnicity, culture, sexual orientation, disability or health condition; and use inclusive language throughout. Authors should ensure that writing is free from bias, stereotypes, slang, reference to dominant culture and/or cultural assumptions. We advise to seek gender neutrality by using plural nouns ("clinicians, patients/clients") as default/wherever possible to avoid using "he, she," or "he/she." We recommend avoiding the use of descriptors that refer to personal attributes such as age, gender, race, ethnicity, culture, sexual orientation, disability or health condition unless they are relevant and valid. These guidelines are meant as a point of reference to help identify appropriate language but are by no means exhaustive or definitive.

Author contributions
For transparency, we encourage authors to submit an author statement file outlining their individual contributions to the paper using the relevant CRediT roles: Conceptualization; Data curation; Formal analysis; Funding acquisition; Investigation; Methodology; Project administration; Resources; Software; Supervision; Validation; Visualization; Roles/Writing - original draft; Writing - review & editing. Authorship statements should be formatted with the names of authors first and CRediT role(s) following. More details and an example

Changes to authorship
Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the journal Editor. To request such a change, the Editor must receive the following from the corresponding author: (a) the reason
for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors after the manuscript has been accepted. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum.

**Copyright**

Upon acceptance of an article, authors will be asked to complete a 'License Agreement' (see more information on this). Permitted third party reuse of open access articles is determined by the author's choice of user license.

**Author rights**

As an author you (or your employer or institution) have certain rights to reuse your work. More information.

*Elsevier supports responsible sharing*

Find out how you can share your research published in Elsevier journals.

**Role of the funding source**

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

**Open access**

Please visit our Open Access page for more information.

*CC BY-NC-ND license*

For non-commercial purposes, lets others distribute and copy the article, and to include in a collective work (such as an anthology), as long as they credit the author(s) and provided they do not alter or modify the article.

The open access fee for this journal is USD 1300 for Research articles and Perspectives and USD 1600 for Review articles, excluding taxes. Learn more about Elsevier's pricing policy.

**Waiving**

If an author would like their article to be published under a gold open access model, but cannot afford the APC, then individual waiver requests are considered on a case-by-case basis and may be granted in cases of genuine need. Priority for this waiver program will be given to applications by authors from countries eligible for the Research4Life program.

*Elsevier Researcher Academy*

Researcher Academy is a free e-learning platform designed to support early and mid-career researchers throughout their research journey. The "Learn" environment at Researcher Academy offers several interactive modules, webinars, downloadable guides and resources to guide you through the process of writing for research and going through peer review. Feel free to use these free resources to improve your submission and navigate the publication process with ease.

*Language (usage and editing services)*

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's Author Services.

**Submission**

Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peer-review process. Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. All correspondence, including notification of the Editor's decision and requests for revision, is sent by e-mail.

**Referees**
Please submit the names and institutional e-mail addresses of several potential referees. For more details, visit our Support site. Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

**PREPARATION**

**NEW SUBMISSIONS**
Submission to this journal proceeds totally online and you will be guided stepwise through the creation and uploading of your files. The system automatically converts your files to a single PDF file, which is used in the peer-review process.
As part of the Your Paper Your Way service, you may choose to submit your manuscript as a single file to be used in the refereeing process. This can be a PDF file or a Word document, in any format or layout that can be used by referees to evaluate your manuscript. It should contain high enough quality figures for refereeing. If you prefer to do so, you may still provide all or some of the source files at the initial submission. Please note that individual figure files larger than 10 MB must be uploaded separately.

**References**
There are no strict requirements on reference formatting at submission. References can be in any style or format as long as the style is consistent. Where applicable, author(s) name(s), journal title/book title, chapter title/article title, year of publication, volume number/book chapter and the article number or pagination must be present. Use of DOI is highly encouraged. The reference style used by the journal will be applied to the accepted article by Elsevier at the proof stage. Note that missing data will be highlighted at proof stage for the author to correct.

**Formatting requirements**
There are no strict formatting requirements but all manuscripts must contain the essential elements needed to convey your manuscript, for example Abstract, Keywords, Introduction, Materials and Methods, Results, Conclusions, Artwork and Tables with Captions.
If your article includes any Videos and/or other Supplementary material, this should be included in your initial submission for peer review purposes.
Divide the article into clearly defined sections.

**Figures and tables embedded in text**
Please ensure the figures and the tables included in the single file are placed next to the relevant text in the manuscript, rather than at the bottom or the top of the file. The corresponding caption should be placed directly below the figure or table.

**Peer review**
This journal operates a double anonymized review process. All contributions will be initially assessed by the editor for suitability for the journal. Papers deemed suitable are then typically sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles. The Editor’s decision is final. Editors are not involved in decisions about papers which they have written themselves or have been written by family members or colleagues or which relate to products or services in which the editor has an interest. Any such submission is subject to all of the journal’s usual procedures, with peer review handled independently of the relevant editor and their research groups. More information on types of peer review.

**Double anonymized review**
This journal uses double anonymized review, which means the identities of the authors are concealed from the reviewers, and vice versa. More information is available on our website. To facilitate this, please include the following separately:
*Title page (with author details):* This should include the title, authors' names, affiliations, acknowledgements and any Declaration of Interest statement, and a complete address for the corresponding author including an e-mail address.
*Anonymized manuscript (no author details):* The main body of the paper (including the references, figures, tables and any acknowledgements) should not include any identifying information, such as the authors' names or affiliations.

**REVISED SUBMISSIONS**
Use of word processing software

Regardless of the file format of the original submission, at revision you must provide us with an editable file of the entire article. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier). See also the section on Electronic artwork.

To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor.

Article structure

Subdivision - numbered sections

Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text'. Any subsection may be given a brief heading. Each heading should appear on its own separate line.

Introduction

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

Material and methods

Provide sufficient details to allow the work to be reproduced by an independent researcher. Methods that are already published should be summarized, and indicated by a reference. If quoting directly from a previously published method, use quotation marks and also cite the source. Any modifications to existing methods should also be described.

Results

Results should be clear and concise.

Discussion

This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

Conclusions

The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

Appendices

If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

Essential title page information

• Title. Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.

• Author names and affiliations. Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. You can add your name between parentheses in your own script behind the English transliteration. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.

• Corresponding author. Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. This responsibility includes answering any future queries about Methodology and Materials. Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.

• Present/permanent address. If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.
**Highlights**

Highlights are optional yet highly encouraged for this journal, as they increase the discoverability of your article via search engines. They consist of a short collection of bullet points that capture the novel results of your research as well as new methods that were used during the study (if any). Please have a look at the examples here: [example Highlights](#).

Highlights should be submitted in a separate editable file in the online submission system. Please use 'Highlights' in the file name and include 3 to 5 bullet points (maximum 85 characters, including spaces, per bullet point).

**Abstract**

A concise and factual abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, References should be avoided, but if essential, then cite the author(s) and year(s). Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

**Graphical abstract**

Although a graphical abstract is optional, its use is encouraged as it draws more attention to the online article. The graphical abstract should summarize the contents of the article in a concise, pictorial form designed to capture the attention of a wide readership. Graphical abstracts should be submitted as a separate file in the online submission system. Image size: Please provide an image with a minimum of 531 × 1328 pixels (h × w) or proportionally more. The image should be readable at a size of 5 × 13 cm using a regular screen resolution of 96 dpi. Preferred file types: TIFF, EPS, PDF or MS Office files. You can view Example Graphical Abstracts on our information site.

Authors can make use of Elsevier's Illustration Services to ensure the best presentation of their images and in accordance with all technical requirements.

**Keywords**

Immediately after the abstract, provide a maximum of 6 keywords, using American spelling and avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

**Abbreviations**

Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article.

**Acknowledgements**

Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

**Formatting of funding sources**

List funding sources in this standard way to facilitate compliance to funder's requirements:

Funding: This work was supported by the National Institutes of Health [grant numbers xxxx, yyy]; the Bill & Melinda Gates Foundation, Seattle, WA [grant number zzzz]; and the United States Institutes of Peace [grant number aaaa].

It is not necessary to include detailed descriptions on the program or type of grants and awards. When funding is from a block grant or other resources available to a university, college, or other research institution, submit the name of the institute or organization that provided the funding.

If no funding has been provided for the research, please include the following sentence:

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

**Units**

Follow internationally accepted rules and conventions: use the international system of units (SI). If other units are mentioned, please give their equivalent in SI.
Math formulae
Please submit math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

Footnotes
Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors build footnotes into the text, and this feature may be used. Should this not be the case, indicate the position of footnotes in the text and present the footnotes themselves separately at the end of the article.

Artwork
Electronic artwork
General points
• Make sure you use uniform lettering and sizing of your original artwork.
• Preferred fonts: Arial (or Helvetica), Times New Roman (or Times), Symbol, Courier.
• Number the illustrations according to their sequence in the text.
• Use a logical naming convention for your artwork files.
• Indicate per figure if it is a single, 1.5 or 2-column fitting image.
• For Word submissions only, you may still provide figures and their captions, and tables within a single file at the revision stage.
• Please note that individual figure files larger than 10 MB must be provided in separate source files.

A detailed guide on electronic artwork is available.
You are urged to visit this site; some excerpts from the detailed information are given here.

Formats
Regardless of the application used, when your electronic artwork is finalized, please 'save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):
EPS (or PDF): Vector drawings. Embed the font or save the text as 'graphics'.
TIFF (or JPEG): Color or grayscale photographs (halftones): always use a minimum of 300 dpi.
TIFF (or JPEG): Bitmapped line drawings: use a minimum of 1000 dpi.
TIFF (or JPEG): Combinations bitmapped line/half-tone (color or grayscale): a minimum of 500 dpi is required.
Please do not:
• Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); the resolution is too low.
• Supply files that are too low in resolution.
• Submit graphics that are disproportionately large for the content.

Color artwork
Please make sure that artwork files are in an acceptable format (TIFF or JPEG), EPS (or PDF) or MS Office files and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites). Further information on the preparation of electronic artwork.

Illustration services
Elsevier’s Author Services offers Illustration Services to authors preparing to submit a manuscript but concerned about the quality of the images accompanying their article. Elsevier’s expert illustrators can produce scientific, technical and medical-style images, as well as a full range of charts, tables and graphs. Image 'polishing' is also available, where our illustrators take your image(s) and improve them to a professional standard. Please visit the website to find out more.

Figure captions
Ensure that each illustration has a caption. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

Text graphics
Text graphics may be embedded in the text at the appropriate position. See further under Electronic artwork.
Tables
Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate page(s) at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules and shading in table cells.

References
Citation in text
Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

Reference links
Increased discoverability of research and high quality peer review are ensured by online links to the sources cited. In order to allow us to create links to abstracting and indexing services, such as Scopus, CrossRef and PubMed, please ensure that data provided in the references are correct. Please note that incorrect surnames, journal/book titles, publication year and pagination may prevent link creation. When copying references, please be careful as they may already contain errors. Use of the DOI is highly encouraged.

A DOI is guaranteed never to change, so you can use it as a permanent link to any electronic article. An example of a citation using DOI for an article not yet in an issue is: VanDecar J.C., Russo R.M., James D.E., Ambeh W.B., Franke M. (2003). Aseismic continuation of the Lesser Antilles slab beneath northeastern Venezuela. Journal of Geophysical Research, https://doi.org/10.1029/2001JB000884. Please note the format of such citations should be in the same style as all other references in the paper.

Web references
As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

Data references
This journal encourages you to cite underlying or relevant datasets in your manuscript by citing them in your text and including a data reference in your Reference List. Data references should include the following elements: author name(s), dataset title, data repository, version (where available), year, and global persistent identifier. Add [dataset] immediately before the reference so we can properly identify it as a data reference. The [dataset] identifier will not appear in your published article.

References in a special issue
Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

Reference style
Text: All citations in the text should refer to:
1. Single author: the author's name (without initials, unless there is ambiguity) and the year of publication;
2. Two authors: both authors' names and the year of publication;
3. Three or more authors: first author's name followed by 'et al.' and the year of publication.

Citations may be made directly (or parenthetically). Groups of references can be listed either first alphabetically, then chronologically, or vice versa.

Examples: 'as demonstrated (Allan, 2000a, 2000b, 1999; Allan and Jones, 1999).... Or, as demonstrated (Jones, 1999; Allan, 2000)... Kramer et al. (2010) have recently shown ...'

List: References should be arranged first alphabetically and then further sorted chronologically if necessary. More than one reference from the same author(s) in the same year must be identified by the letters 'a', 'b', 'c', etc., placed after the year of publication.

Examples:
Reference to a journal publication:

Reference to a journal publication with an article number:

Reference to a book:

Reference to a chapter in an edited book:

Reference to a website:

Reference to a dataset:

Journal abbreviations source
Journal names should be abbreviated according to the List of Title Word Abbreviations.

Video
Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file's content. In order to ensure that your video or animation material is directly usable, please provide the file in one of our recommended file formats with a preferred maximum size of 150 MB per file, 1 GB in total. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our video instruction pages. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

Data visualization
Include interactive data visualizations in your publication and let your readers interact and engage more closely with your research. Follow the instructions here to find out about available data visualization options and how to include them with your article.

Supplementary material
Supplementary material such as applications, images and sound clips, can be published with your article to enhance it. Submitted supplementary items are published exactly as they are received (Excel or PowerPoint files will appear as such online). Please submit your material together with the article and supply a concise, descriptive caption for each supplementary file. If you wish to make changes to supplementary material during any stage of the process, please make sure to provide an updated file. Do not annotate any corrections on a previous version. Please switch off the 'Track Changes' option in Microsoft Office files as these will appear in the published version.

Research data
This journal encourages and enables you to share data that supports your research publication where appropriate, and enables you to interlink the data with your published articles. Research data refers to the results of observations or experimentation that validate research findings. To facilitate reproducibility and data reuse, this journal also encourages you to share your software, code, models, algorithms, protocols, methods and other useful materials related to the project.
Below are a number of ways in which you can associate data with your article or make a statement about the availability of your data when submitting your manuscript. If you are sharing data in one of these ways, you are encouraged to cite the data in your manuscript and reference list. Please refer to the "References" section for more information about data citation. For more information on depositing, sharing and using research data and other relevant research materials, visit the research data page.

Data linking
If you have made your research data available in a data repository, you can link your article directly to the dataset. Elsevier collaborates with a number of repositories to link articles on ScienceDirect with relevant repositories, giving readers access to underlying data that gives them a better understanding of the research described.

There are different ways to link your datasets to your article. When available, you can directly link your dataset to your article by providing the relevant information in the submission system. For more information, visit the database linking page.

For supported data repositories a repository banner will automatically appear next to your published article on ScienceDirect.

In addition, you can link to relevant data or entities through identifiers within the text of your manuscript, using the following format: Database: xxxx (e.g., TAIR: AT1G01020; CCDC: 734053; PDB: 1XFN).

Mendeley Data
This journal supports Mendeley Data, enabling you to deposit any research data (including raw and processed data, video, code, software, algorithms, protocols, and methods) associated with your manuscript in a free-to-use, open access repository. During the submission process, after uploading your manuscript, you will have the opportunity to upload your relevant datasets directly to Mendeley Data. The datasets will be listed and directly accessible to readers next to your published article online.

For more information, visit the Mendeley Data for journals page.

AFTER ACCEPTANCE
Online proof correction
To ensure a fast publication process of the article, we kindly ask authors to provide us with their proof corrections within two days. Corresponding authors will receive an e-mail with a link to our online proofing system, allowing annotation and correction of proofs online. The environment is similar to MS Word: in addition to editing text, you can also comment on figures/tables and answer questions from the Copy Editor. Web-based proofing provides a faster and less error-prone process by allowing you to directly type your corrections, eliminating the potential introduction of errors. If preferred, you can still choose to annotate and upload your edits on the PDF version. All instructions for proofing will be given in the e-mail we send to authors, including alternative methods to the online version and PDF.

We will do everything possible to get your article published quickly and accurately. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. It is important to ensure that all corrections are sent back to us in one communication. Please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.

Offprints
The corresponding author will be notified and receive a link to the published version of the open access article on ScienceDirect. This link is in the form of an article DOI link which can be shared via email and social networks. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier’s Author Services.

Additional information

AUTHOR INQUIRIES
Visit the Elsevier Support Center to find the answers you need. Here you will find everything from Frequently Asked Questions to ways to get in touch.
You can also check the status of your submitted article or find out when your accepted article will be published.
