**DESCRIPTION**

*Geography and Sustainability* aims to serve as the focal point for developing, coordinating and implementing interdisciplinary research and education to promote sustainable development through an integrated geography perspective. The journal encourages wider analysis and innovative thinking about global and regional sustainability by bridging and synthesising natural and human sciences.

*Geography and Sustainability* welcomes original, high-quality research articles, review articles, short communications, technical comments, perspective articles and editorials on the following themes: Geographical Processes: Interactions with and between water, soil, atmosphere and the biosphere and their spatio-temporal variations; Human-Environmental Systems: Interactions between humans and the environment, resilience of socio-ecological systems and vulnerability; Ecosystem Services and Human Wellbeing: Ecosystem structure, processes, services and their linkages with human wellbeing; Sustainable Development: Theory, practice and critical challenges in sustainable development; Geo-data and Sustainability Models: Geodata and models to support sustainable development and decision-making.

**ABSTRACTING AND INDEXING**

Directory of Open Access Journals (DOAJ)
Scopus

**EDITORIAL BOARD**

*Editor-in-Chief*
Bojie Fu, Faculty of Geographical Science, Beijing Normal University, Beijing, China and Research Center for Eco-Environmental Sciences, Chinese Academy of Sciences, Beijing, China
Land use change, Landscape ecology, ecosystem services, ecosystem assessment, soil erosion, land degradation, global environment change, geography, environmental sustainability, ecohydrology

*Associate Editors-in-Chief*
Junguo Liu, Southern University of Science and Technology, School of Environmental Science and Engineering, Guangdong, China
Water Resources, Hydrology, Global Environmental Change, Ecological Restoration
Paulo Pereira, Mykolas Romeris University, Vilnius, Lithuania
Soil degradation, Soil erosion, Soil processes, Forest Fires, Spatial Analysis, Mapping, Geostatistics, Ecosystem Services

**Neil Sipe,** The University of Queensland School of Earth and Environmental Sciences, St Lucia, Australia
Urban and Regional Planning

**Changqing Song,** Beijing Normal University, Faculty of Geographical Science, Beijing, China
Human geography

**Hanqin Tian,** Auburn University School of Forestry and Wildlife Sciences, Auburn, Alabama, United States of America
Ecosystem and global ecology

**Wenwu Zhao,** Beijing Normal University, Faculty of Geographical Science, Beijing, China
Coupled human and natural systems, land use, ecohydrology, landscape ecology

**Editorial Board Members**

**Dra. Nicole Bernex,** Pontifical Catholic University of Peru Humanities Department, Lima, Peru
Climate change, water resources, regional development

**Igor Bogunovic,** University of Zagreb Faculty of Agriculture Department of General Plant Production, Zagreb, Croatia
Soil Degradation

**Eric Brevik,** Dickinson State University, Department of Natural Sciences, Dickinson, North Dakota, United States of America
Soil science and geology

**Fahu Chen,** Institute of Tibet Plateau Research, CAS Key Laboratory of Alpine Ecology, Beijing, China
Climate and Environmental Change, Past Human-Environmental Interaction

**Francesco Cherubini,** Norwegian University of Science and Technology, Department of Energy and Process Engineering, Trondheim, Norway
Modelling and quantification of climate change impacts from anthropogenic emissions and disturbances of terrestrial ecosystems, environmental sustainability analysis, sustainable land management, and analysis and process development of advanced biofuels and biorefinery systems

**Robert Costanza,** Australian National University Crawford School of Public Policy, Canberra, Australia
Transdisciplinary integration, Ecological economics, Ecosystem services, Landscape ecology, Integrated ecological and socioeconomic modeling, Energy and material flow analysis, Environmental policy, Social traps, Incentive structures and institutions

**Hancheng Dai,** Peking University College of Environmental Science and Engineering, Beijing, China
Climate change economics

**Carl Folke,** Beijer Institute of Ecological Economics, Stockholm, Sweden
Social-ecological systems

**Peng Gong,** Tsinghua University Department of Earth Sciences, Beijing, China
Land change science

**Canfei He,** Peking University College of Urban and Environmental Sciences, Beijing, China
Economic Geography

**Chansheng He,** Western Michigan University, Department of Geography, Kalamazoo, Michigan, United States of America
Watershed Hydrology, Ecosystem Indicators

**Yan Li,** Beijing Normal University, Beijing, China
Vegetation and climate interaction

**Jianguo Liu,** Michigan State University, Center for Systems Integration and Sustainability, East Lansing, Michigan, United States of America
Coupled human and natural systems

**Yansui Liu,** Institute of Geographic Sciences and Natural Resources Research Chinese Academy of Sciences, Beijing, China
Land use, regional agriculture and rural development, new countryside construction, land resources

**Yihe Lü,** Research Centre for Eco-Environmental Sciences Chinese Academy of Sciences, Beijing, China
Ecosystem services

**Yonglong Lu,** Research Centre for Eco-Environmental Sciences Chinese Academy of Sciences, Beijing, China
Environmental management and policy, regional ecological risk assessment

**Sandra Luque,** French National Institute for Agricultural Research INRAE, Paris, France
UMR TETIS Land, environment, remote sensing and spatial information

**Mike Meadows,** University of Cape Town Department of Environmental and Geographical Science, South Africa
Physical geography, geomorphology, quaternary palaeoenvironments, soil erosion, land degradation

**Safa Motesharrei,** University of Maryland at College Park Department of Atmospheric and Oceanic Science, College Park, Maryland, United States of America
Applied Mathematics, dynamic modeling, earth-human systems

**Walter Musakwa,** University of Johannesburg, Department of Town and Regional Planning, Johannesburg, South Africa
Urban sustainability, urban development, geographic information system

**Michael Obersteiner**, International Institute for Applied Systems Analysis, Laxenburg, Austria
Modelling and future scenarios, Biodiversity, Economics, Global terrestrial ecosystems, Sustainability, Food security

**Toshiya Okuro**, The University of Tokyo Department of Ecosystem Studies, Tokyo, Japan
Landscape-ecological studies on land conservation and restoration

**Shilong Piao**, Peking University College of Urban and Environmental Sciences, Beijing, China
Global climate change and land surface ecosystem

**Brian Robinson**, McGill University Department of Geography, Montreal, Quebec, Canada
Livelihoods, environment and development

**Andres Rodriguez-Pose**, The London School of Economics and Political Science Department of Geography and Environment, London, United Kingdom
Economic geography

**Celine Rozenblat**, University of Lausanne, Institute of Geography and sustainability, Lausanne, Switzerland
Urban systems and resilience

**Matthias Ruth**, University of York, Edmonton, Alberta, UK
Industrial ecology, Environmental economics, Resource economics, Environmental policy, Resource policy, Dynamic modelling

**Serge Schmitz**, University of Liege Department of Geographic Sciences, Liège, Belgium
Sustainable development, land use planning, environmental impact assessment

**Carla Sofia Santos Ferreira**, University of Stockholm Department of Physical Geography, Stockholm, Sweden
Land use changes, land degradation, water resources, nature-based solutions

**Soroosh Sorooshian**, University of California Irvine, Center for Hydrometeorology and Remote Sensing, Irvine, California, United States of America
Hydrometeorology, water resources systems, climate studies, application of remote sensing

**Jane Southworth**, University of Florida Department of Geography, Gainesville, Florida, United States of America
Geo-spatial analysis and techniques, Earth system science

**Mark Stafford Smith**, Commonwealth Scientific and Industrial Research Organisation, Canberra, Australia
Biogeography, Climate change impacts on biodiversity and ecosystems, Human-nature interactions, Nature conservation and management, Sustainability

**Paolo Tarolli**, University of Padua Department of Land Environment Agriculture and Forestry, Legnaro PD, Italy
Digital Terrain Analysis; Human–Earth interactions; Earth surface processes analysis; High-resolution topography; Natural Hazards; Landslides; Geomorphology; LiDAR; Structure from Motion; GIS.

**Peter Verburg**, VU University Amsterdam Institute for Environmental Studies, Amsterdam, Netherlands
Shuai Wang, Beijing Normal University, Faculty of Geographical Science, Beijing, China
Eco-hydrology, ecosystem services, landscape ecology

**Yongping Wei**, The University of Queensland School of Earth and Environmental Sciences, St Lucia, Australia
Global environmental change, sustainable water and land management, human-environmental systems

**Bingfang Wu**, Institute of Remote Sensing and Digital Earth Chinese Academy of Sciences, Beijing, China
Remote sensing methodologies and applications in agriculture, water resource and ecosystem, especially in monitoring of crops, evapotranspiration (ET) and drought

**Jianguo Wu**, Arizona State University School of Life Sciences, Tempe, Arizona, United States of America
Landscape ecology, sustainability science, ecosystem services

**Linxiu Zhang**, Institute of Geographic Sciences and Natural Resources Research Chinese Academy of Sciences, Beijing, China
Rural development, rural education, off-farm employment, public investment, poverty

**Lu Zhang**, Commonwealth Scientific and Industrial Research Organisation, Canberra, Australia
Surfacewater Hydrology

**Qiang Zhang**, Beijing Normal University, Faculty of Geographical Science, Beijing, China
Hydro-meteorology, Hydrology, Water resources

**Yangjian Zhang**, Institute of Geographic Sciences and Natural Resources Research Chinese Academy of Sciences, Beijing, China
High cold ecosystem and global climate change

**Hua Zheng**, Research Centre for Eco-Environmental Sciences Chinese Academy of Sciences, Beijing, China
Ecosystem services, land use change, ecological restoration, socio-ecological system
GUIDE FOR AUTHORS

INTRODUCTION

Types of Paper

Contributions falling into the following categories will be considered for publication: Full length articles or original research papers, review articles, short communications, technical comments, perspective articles, and editorials. Please ensure that you select the appropriate article type from the list of options when making your submission. Authors contributing to special issues should ensure that they select the special issue article type from this list.

Submission checklist

You can use this list to carry out a final check of your submission before you send it to the journal for review. The following electronic files should be uploaded: Cover letter Conflict of Interest Title Page with author information Manuscript without author information (include abstract, key words, text, references, figure and table captions) Highlights Graphical Abstract Figure files (in .tif, .eps or .jpg format) Each figure file must be numbered and uploaded separately. Table files Supplemental files (where applicable)

Once all the files are uploaded, build the PDF file through the Editorial Manager (online submission system), view the merged PDF file, and approve it. Your manuscript will then be submitted to the Editorial Office and will be assigned to an Editor for review processing.

All correspondence relating to manuscript submission and other queries should be addressed to the Editorial Office: geosus@bnu.edu.cn

BEFORE YOU BEGIN

Ethics in publishing

Please see our information pages on Ethics in publishing and Ethical guidelines for journal publication.

Declaration of interest

All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential competing interests include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. Authors must disclose any interests in two places: 1. A summary declaration of interest statement in the title page file (if double anonymized) or the manuscript file (if single anonymized). If there are no interests to declare then please state this: 'Declarations of interest: none'. This summary statement will be ultimately published if the article is accepted. 2. Detailed disclosures as part of a separate Declaration of Interest form, which forms part of the journal's official records. It is important for potential interests to be declared in both places and that the information matches. More information.

Submission declaration and verification

Submission of an article implies that the work described has not been published previously (except in the form of an abstract, a published lecture or academic thesis, see 'Multiple, redundant or concurrent publication' for more information), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder. To verify originality, your article may be checked by the originality detection service Crossref Similarity Check.

Use of inclusive language

Inclusive language acknowledges diversity, conveys respect to all people, is sensitive to differences, and promotes equal opportunities. Content should make no assumptions about the beliefs or commitments of any reader; contain nothing which might imply that one individual is superior to another on the grounds of age, gender, race, ethnicity, culture, sexual orientation, disability or health condition; and use inclusive language throughout. Authors should ensure that writing is free from bias, stereotypes, slang, reference to dominant culture and/or cultural assumptions. We advise to seek gender neutrality by using plural nouns ("clinicians, patients/clients") as default/wherever possible.
to avoid using "he, she," or "he/she." We recommend avoiding the use of descriptors that refer to personal attributes such as age, gender, race, ethnicity, culture, sexual orientation, disability or health condition unless they are relevant and valid. These guidelines are meant as a point of reference to help identify appropriate language but are by no means exhaustive or definitive.

**Changes to authorship**

This policy concerns the addition, deletion, or rearrangement of author names in the authorship of accepted manuscripts: *Before the accepted manuscript is published in an online issue*: Requests to add or remove an author, or to rearrange the author names, must be sent to the Journal Manager from the corresponding author of the accepted manuscript and must include: (a) the reason the name should be added or removed, or the author names rearranged and (b) written confirmation (e-mail, fax, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Requests that are not sent by the corresponding author will be forwarded by the Journal Manager to the corresponding author, who must follow the procedure as described above. Note that: (1) Journal Managers will inform the Journal Editors of any such requests and (2) publication of the accepted manuscript in an online issue is suspended until authorship has been agreed. *After the accepted manuscript is published in an online issue*: Any requests to add, delete, or rearrange author names in an article published in an online issue will follow the same policies as noted above and result in a corrigendum.

**Copyright**

Upon acceptance of an article, authors will be asked to complete a 'License Agreement' (see more information on this). Permitted third party reuse of open access articles is determined by the author's choice of user license.

**Author rights**

As an author you (or your employer or institution) have certain rights to reuse your work. More information.

**Role of the funding source**

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated.

**Open access**

Please visit our Open Access page for more information.

**Language (usage and editing services)**

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier's Author Services.

**Submission**

Submission to this journal proceeds totally online. Use the following guidelines to prepare your article. Via the homepage of this journal [https://www.journals.elsevier.com/geography-and-sustainability](https://www.journals.elsevier.com/geography-and-sustainability) you will be guided stepwise through the creation and uploading of the various files. The system automatically converts source files to a single Adobe Acrobat PDF version of the article, which is used in the peer-review process. Please note that even though manuscript source files are converted to PDF at submission for the review process, these source files are needed for further processing after acceptance. All correspondence, including notification of the Editor's decision and requests for revision, takes place by e-mail and via the author's homepage, removing the need for a hard-copy paper trail.

**Referees**

Please submit the names and institutional e-mail addresses of several potential referees. For more details, visit our Support site. Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

**Additional information**
PREPARATION

Peer review
This journal operates a double blind review process. All contributions are sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles. The Editor's decision is final. For more information on the types of peer review, please visit: https://www.elsevier.com/reviewers/peer-review.

Use of word processing software
It is important that the file be saved in the native format of the word processor used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the word processor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier). Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on Electronic artwork.

To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor.

Article structure

Subdivision - numbered sections
Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text'. Any subsection may be given a brief heading. Each heading should appear on its own separate line.

Introduction
State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

Material and methods
Provide sufficient details to allow the work to be reproduced by an independent researcher. Methods that are already published should be summarized, and indicated by a reference. If quoting directly from a previously published method, use quotation marks and also cite the source. Any modifications to existing methods should also be described.

Theory/calculation
A Theory section should extend, not repeat, the background to the article already dealt with in the Introduction and lay the foundation for further work. In contrast, a Calculation section represents a practical development from a theoretical basis.

Results
Results should be clear and concise.

Discussion
This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

Conclusions
The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

Appendices
If there is more than one appendix, they should be identified as A, B, etc. Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Similarly for tables and figures: Table A.1; Fig. A.1, etc.

Essential title page information
- Title. Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
• **Author names and affiliations.** Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. You can add your name between parentheses in your own script behind the English transliteration. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lowercase superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.

• **Corresponding author.** Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. This responsibility includes answering any future queries about Methodology and Materials. **Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.**

• **Present/permanent address.** If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

**Highlights**
Highlights are optional yet highly encouraged for this journal, as they increase the discoverability of your article via search engines. They consist of a short collection of bullet points that capture the novel results of your research as well as new methods that were used during the study (if any). Please have a look at the examples here: example Highlights.

Highlights should be submitted in a separate editable file in the online submission system. Please use 'Highlights' in the file name and include 3 to 5 bullet points (maximum 85 characters, including spaces, per bullet point).

**Abstract**
A concise and factual abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, References should be avoided, but if essential, then cite the author(s) and year(s). Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

**Graphical abstract**
Although a graphical abstract is optional, its use is encouraged as it draws more attention to the online article. The graphical abstract should summarize the contents of the article in a concise, pictorial form designed to capture the attention of a wide readership. Graphical abstracts should be submitted as a separate file in the online submission system. Image size: Please provide an image with a minimum of $531 \times 1328$ pixels (h \times w) or proportionally more. The image should be readable at a size of $5 \times 13$ cm using a regular screen resolution of 96 dpi. Preferred file types: TIFF, EPS, PDF or MS Office files. You can view Example Graphical Abstracts on our information site.
Authors can make use of Elsevier's Illustration Services to ensure the best presentation of their images and in accordance with all technical requirements.

**Keywords**
Immediately after the abstract, provide a maximum of 6 keywords, using American spelling and avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

**Abbreviations**
Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article.

**Acknowledgements**
Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).
**Nomenclature and units**
Follow internationally accepted rules and conventions: use the international system of units (SI). If other quantities are mentioned, give their equivalent in SI. You are urged to consult *IUPAC: Nomenclature of Organic Chemistry* for further information.

**Math formulae**
Please submit math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text (if referred to explicitly in the text).

**Footnotes**
Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors can build footnotes into the text, and this feature may be used. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list.

**Artwork**

*Electronic artwork*

**General points**
- Make sure you use uniform lettering and sizing of your original artwork.
- Embed the used fonts if the application provides that option.
- Aim to use the following fonts in your illustrations: Arial, Courier, Times New Roman, Symbol, or use fonts that look similar.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Provide captions to illustrations separately.
- Size the illustrations close to the desired dimensions of the published version.
- Submit each illustration as a separate file.
- Ensure that color images are accessible to all, including those with impaired color vision.

A detailed [guide on electronic artwork](https://www.elsevier.com/locate/geosus) is available.

**You are urged to visit this site; some excerpts from the detailed information are given here.**

**Formats**
If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply ‘as is’ in the native document format. Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please ‘Save as’ or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

- EPS (or PDF): Vector drawings, embed all used fonts.
- TIFF (or JPEG): Color or grayscale photographs (halftones), keep to a minimum of 300 dpi.
- TIFF (or JPEG): Bitmapped (pure black & white pixels) line drawings, keep to a minimum of 1000 dpi.
- TIFF (or JPEG): Combinations bitmapped line/halftone (color or grayscale), keep to a minimum of 500 dpi.

**Please do not:**
- Supply files that are optimized for screen use (e.g., GIF, BMP, PICT, WPG); these typically have a low number of pixels and limited set of colors;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

**Color artwork**
Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF), or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color in the printed version. **For color reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article.** Please indicate your preference for color: in print or online only. [Further information on the preparation of electronic artwork](https://www.elsevier.com/locate/geosus).
Illustration services

Elsevier's Author Services offers Illustration Services to authors preparing to submit a manuscript but concerned about the quality of the images accompanying their article. Elsevier's expert illustrators can produce scientific, technical and medical-style images, as well as a full range of charts, tables and graphs. Image 'polishing' is also available, where our illustrators take your image(s) and improve them to a professional standard. Please visit the website to find out more.

Figure captions

Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

Tables

Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate page(s) at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules and shading in table cells.

References

Citation in text

Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

Reference links

Increased discoverability of research and high quality peer review are ensured by online links to the sources cited. In order to allow us to create links to abstracting and indexing services, such as Scopus, CrossRef and PubMed, please ensure that data provided in the references are correct. Please note that incorrect surnames, journal/book titles, publication year and pagination may prevent link creation. When copying references, please be careful as they may already contain errors. Use of the DOI is highly encouraged.

A DOI is guaranteed never to change, so you can use it as a permanent link to any electronic article. An example of a citation using DOI for an article not yet in an issue is: VanDecar J.C., Russo R.M., James D.E., Ambeh W.B., Franke M. (2003). Aseismic continuation of the Lesser Antilles slab beneath northeastern Venezuela. Journal of Geophysical Research, https://doi.org/10.1029/2001JB000884. Please note the format of such citations should be in the same style as all other references in the paper.

Web references

As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

Data references

This journal encourages you to cite underlying or relevant datasets in your manuscript by citing them in your text and including a data reference in your Reference List. Data references should include the following elements: author name(s), dataset title, data repository, version (where available), year, and global persistent identifier. Add [dataset] immediately before the reference so we can properly identify it as a data reference. The [dataset] identifier will not appear in your published article.

References in a special issue

Please ensure that the words 'this issue' are added to any references in the list (and any citations in the text) to other articles in the same Special Issue.

Reference management software

Most Elsevier journals have their reference template available in many of the most popular reference management software products. These include all products that support Citation Style Language styles, such as Mendeley. Using citation plug-ins from these products, authors only need to select
the appropriate journal template when preparing their article, after which citations and bibliographies will be automatically formatted in the journal's style. If no template is yet available for this journal, please follow the format of the sample references and citations as shown in this Guide. If you use reference management software, please ensure that you remove all field codes before submitting the electronic manuscript. More information on how to remove field codes from different reference management software.

Reference style

Text: Single author: the authors name (without initials, unless there is ambiguity) and the year of publication; Two authors: both authors' names and the year of publication; Three or more authors: first author's name followed by "et al. " and the year of publication. Citations may be made directly (or parenthetically). Groups of references should be first listed chronologically, then alphabetically.

Examples: "as demonstrated (Allan and Jones, 1995; Allan, 1996a, 1996b, 1999). Kramer et al. (2000) have recently shown ... " List:
Please ensure that every reference cited in the text is also present in the reference list. Do not list references that are not cited in the text. References (single or multi-authored) should first be arranged alphabetically and then further sorted chronologically if necessary. More than one reference from the same author(s) in the same year must be identified by the letters "a", "b", "c", etc., placed after the year of publication. Note: All authors should be listed by name. Journal names should be abbreviated according to the List of Title Word Abbreviations.

Examples

Reference to journal publication with an article number:

Reference to a paper in press with DOI:

Reference to a book:

Reference to a chapter in an edited book:

Reference to a paper in a conference proceeding:

Reference to a thesis or dissertation:

Reference to a report:

Reference to a dataset:

Reference to a non-English reference:
For organization author with a relative long name, be sure to list its full name and add its abbr. in parentheses:

Video
Elsevier accepts video material and animation sequences to support and enhance your scientific research. Authors who have video or animation files that they wish to submit with their article are strongly encouraged to include links to these within the body of the article. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. All submitted files should be properly labeled so that they directly relate to the video file’s content. In order to ensure that your video or animation material is directly usable, please provide the file in one of our recommended file formats with a preferred maximum size of 150 MB per file, 1 GB in total. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect. Please supply 'stills' with your files: you can choose any frame from the video or animation or make a separate image. These will be used instead of standard icons and will personalize the link to your video data. For more detailed instructions please visit our video instruction pages. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content.

Supplementary material
Supplementary material such as applications, images and sound clips, can be published with your article to enhance it. Submitted supplementary items are published exactly as they are received (Excel or PowerPoint files will appear as such online). Please submit your material together with the article and supply a concise, descriptive caption for each supplementary file. If you wish to make changes to supplementary material during any stage of the process, please make sure to provide an updated file. Do not annotate any corrections on a previous version. Please switch off the 'Track Changes' option in Microsoft Office files as these will appear in the published version.

AFTER ACCEPTANCE
Use of the Digital Object Identifier
The Digital Object Identifier (DOI) may be used to cite and link to electronic documents. The DOI consists of a unique alpha-numeric character string which is assigned to a document by the publisher upon the initial electronic publication. The assigned DOI never changes. Therefore, it is an ideal medium for citing a document, particularly 'Articles in press' because they have not yet received their full bibliographic information. The correct format for citing a DOI is shown as follows (example taken from a document in the journal Physics Letters B): doi:10.1016/j.physletb.2010.09.059 When you use the DOI to create URL hyperlinks to documents on the web, they are guaranteed never to change.

Proofs
One set of page proofs (as PDF files) will be sent by e-mail to the corresponding author (if we do not have an e-mail address then paper proofs will be sent by post) or a link will be provided in the e-mail so that authors can download the files themselves. To ensure a fast publication process of the article, we kindly ask authors to provide us with their proof corrections within two days. Elsevier now provides authors with PDF proofs which can be annotated; for this you will need to download the free Adobe Reader, version 9 (or higher). Instructions on how to annotate PDF files will accompany the proofs (also given online). The exact system requirements are given at the Adobe site. If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return them to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and scan the pages and return via e-mail. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. It is important to ensure that all corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility.
**Offprints**
The corresponding author will, at no cost, receive a customized Share Link providing 50 days free access to the final published version of the article on ScienceDirect. The Share Link can be used for sharing the article via any communication channel, including email and social media. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Both corresponding and co-authors may order offprints at any time via Elsevier's Author Services. Corresponding authors who have published their article gold open access do not receive a Share Link as their final published version of the article is available open access on ScienceDirect and can be shared through the article DOI link.

**APC Charges**
The gold open-access fee for publishing in Geography and Sustainability will be US$ 1,700. While, we are offering a 50% discount off the open-access fee for all articles submitted before 22 February 2021. Authors with high-quality papers can apply for a full waiver of the open-access fee by contacting geosus@bnu.edu.cn. Should the waiver be approved, the open-access fee will be covered by Faculty of Geographical Science, Beijing Normal University. For more information, please visit the journal’s Guide for Authors or open access page.

**AUTHOR INQUIRIES**
Visit the Elsevier Support Center to find the answers you need. Here you will find everything from Frequently Asked Questions to ways to get in touch.
You can also check the status of your submitted article or find out when your accepted article will be published.
