DESCRIPTION
The *International Journal of Nursing Studies* (IJNS) provides a forum for original research and scholarship about health care delivery, organisation, management, workforce, policy and research methods relevant to nursing, midwifery and other health related professions. The IJNS aims to support evidence informed policy and practice by publishing research, systematic and other scholarly reviews, critical discussion, and commentary of the highest standard.

The journal particularly welcomes studies that aim to evaluate and understand complex health care interventions and health policies and which employ the most rigorous designs and methods appropriate for the research question of interest. The journal also seeks to advance the quality of research by publishing methodological papers introducing or elaborating on analytic techniques, measures, and research methods.

The journal has been publishing original peer-reviewed articles of interest to the international health care community since 1963, making it one of the longest standing repositories of scholarship in this field. The IJNS offers authors the benefits of:

- A highly respected journal in its field with consistently high impact
- Indexed in major databases: PubMed, Medline, Thomson Reuters - Science Citation Index, Scopus, Thomson Reuters - Social Science Citation Index, CINAHL and the BNI (British Nursing Index).
- A truly global readership
- Highly efficient editorial processes: average time from submission to first decision of 4 weeks
- Rapid initial screening for suitability and editorial interest
- Excellent peer reviewers drawn from a range of health service research disciplines
- Final online publication as soon as 2 weeks post-acceptance.

The IJNS endorses the Equator Network ([http://www.equator-network.org/](http://www.equator-network.org/)) an international initiative that seeks to improve reliability and value of research literature in health care by promoting transparent and accurate reporting of studies. We ask our authors to make use of appropriate...
reporting guidelines to ensure excellence in scientific reporting. Guidelines for authors can be accessed at http://ees.elsevier.com/ijns.

AUDIENCE

Nurses, midwives, educators, administrators and researchers in all areas of nursing and caring sciences.

EDITORIAL BOARD

Editor-in-Chief
Ian Norman, PhD, RN, BABCP, FRNC, FEANS, FAAN, Professor & Executive Dean, Florence Nightingale Faculty of Nursing and Midwifery, 57 Waterloo Road, London, SE1 8WA, UK (Senior Editorial Assistant: Stephanie Waller; Editorial Assistant Isabell Mayr)

Executive Editor
Peter Griffiths, University of Southampton, Southampton, UK

Honorary Editors
Rosemary Crow, Guildford, UK
Jenifer Wilson-Barnett, London, UK

Statistical Editors
Jason Beckstead, Tampa, FL, USA
Trevor Murrells, London, UK

Associate Editors
Chiara Dall’ora, University of Southampton, Southampton, UK
Patricia Davidson, Johns Hopkins University, Baltimore, MD, USA
Christine Duffield, University of Technology, Sydney, Broadway, NSW, Australia
Donna Haiduven, University of South Florida, Tampa, USA
Ruth Harris, King’s College London, London, UK
Jan Kottner, Charité - Universitätsmedizin Berlin, Berlin, Germany
Sharon McKinley, Sydney, NSW, Australia
Christopher McLean, University of Southampton, Southampton, UK
Nancy Nivison Menzel, University of Nevada at Las Vegas, Las Vegas, USA
Chizu Mimura, Himorogi Psychiatric Institute, Tokyo, Japan
Micah David James Peters, University of South Australia, Adelaide, Australia
Lusine Poghosyan, Columbia University, USA
Roberta Sammut, Faculty of Health Sciences, University of Malta, Malta
Lisette Schoonhoven, University Medical Center Utrecht (UMC Utrecht), Utrecht, Netherlands
Michael Simon, Institut für Pflegewissenschaft, Universität Basel, Basel, Switzerland
Rhayun Song, Chungnam National University, Daejeon, The Republic of Korea
Allison Squires, College of Nursing, New York University, New York, USA
Jason Wasiak, University of Melbourne and Monash University, Melbourne, Australia
Alison While, King's College London, London, UK
Lisa Whitehead, Edith Cowan University, Joondalup, Australia
Franziska Zuniga, Universität Basel, Basel, Switzerland

Nick Sevdalis, Imperial College London, London, UK
Maritta Välimäki, University of Turku, Finland
GUIDE FOR AUTHORS

Your Paper Your Way
We now differentiate between the requirements for new and revised submissions. You may choose to submit your manuscript as a single Word or PDF file to be used in the refereeing process. Only when your paper is at the revision stage, will you be requested to put your paper in to a 'correct format' for acceptance and provide the items required for the publication of your article.
To find out more, please visit the Preparation section below.

INTRODUCTION
The International Journal of Nursing Studies (IJNS) provides a forum for publication of scholarly papers that report research findings, research-based reviews, discussion papers and commentaries which are of interest to an international readership of practitioners, educators, administrators and researchers in all areas of nursing, midwifery and the caring sciences.

Papers should address issues of international interest and concern and present the study in the context of the existing international research base on the topic. Those which focus on a single country should identify how the material presented might be relevant to a wider audience and how it contributes to the international knowledge base. Selection of papers for publication is based on their scientific excellence, distinctive contribution to knowledge (including methodological development) and their importance to contemporary nursing, midwifery or related professions.

Submission to this journal proceeds totally online and you will be guided stepwise through the creation and uploading of your files. The system automatically converts your files to a single PDF file, which is used in the peer-review process.

Amongst the many submissions received we recognise that some will have been previously formatted for another journal. The Your Paper Your Way service (described later) means that authors can submit these papers to the IJNS without worrying about formatting the manuscript again to exacting specifications.

The IJNS also offers a rapid review service for newsworthy papers under our 4* submission service.

Types of papers
The IJNS publishes original research, reviews, and discussion papers. In addition we publish editorials and letters. Where a case is made we will also publish protocols of trials which meet our general criteria for interest and significance.

Research Papers — 2,000–7,000 words
Full papers reporting original research can be a maximum of 7000 words in length, although shorter papers are preferred. Research papers should adhere to recognised standards for reporting (see guidance below and the Author Checklist).

Studies reporting on the development of scales, measures or questionnaires
The IJNS publishes instrument development or validation papers if they are accompanied by a copy of the full instrument, included as a supplementary file at submission stage so it can be published as an appendix online if accepted.

Reviews and Discussion Papers — 2,000–7,000 words
We publish systematic reviews (addressing focused research questions) and broader literature reviews (such as scoping reviews). Systematic reviews should adhere to recognised standards for reporting (see guidance below and the Author Checklist)
We also publish discussion papers, which are scholarly articles of a debating or discursive nature. In all cases, there must be engagement with and critical analysis of a substantive body of research or other scholarship.

Letters to the editor — up to 1000 words
Designed to stimulate academic debate and discussion, the Editor invites readers to submit letters which should refer to and comment on recent content in the journal, introduce new comment and discussion of clear and direct relevance to the journal's aim and scope or briefly report data or research findings that may not warrant a full paper. Letters are restricted to a maximum of 10 references, from up to 5 authors.

**Editorials — 1,000–2,000 words**
Authors who have ideas for editorials which address issues of substantive concern to the discipline, particularly those of a controversial nature or linked directly to current/forthcoming content in the journal, should contact the Editor in Chief (ijns@kcl.ac.uk).

**General guidance and preferred article types**
Selection of papers for publication is based on their scientific excellence, distinctive contribution to knowledge (including methodological development) and their importance to contemporary nursing, midwifery or related professions. We strongly recommend prospective authors to consult our editorial on common reasons papers are rejected, which outlines avoidable pitfalls as well as the types of articles we prefer https://doi.org/10.1016/j.ijnurstu.2016.03.017. We are unlikely to publish studies of new instruments unless the instrument is useful for directly guiding clinical practice (e.g. diagnostic/ screening instruments) and there is validation against a robust criterion. Preliminary instrument development studies indicating the need for further development, translations from one language to another and other pilot studies are unlikely to be accepted. We do not publish studies undertaken on animals.

**Submission system**
Submission to this journal is online at https://ees.elsevier.com/ijns/ . You will be guided stepwise through the creation and uploading of your files.

**Elsevier Researcher Academy**
Researcher Academy is a free e-learning platform designed to support early and mid-career researchers throughout their research journey. The "Learn" environment at Researcher Academy offers several interactive modules, webinars, downloadable guides and resources to guide you through the process of writing for research and going through peer review. Feel free to use these free resources to improve your submission and navigate the publication process with ease.

**BEFORE YOU BEGIN**

**Ethics in publishing**
The IJNS is a supporter of the Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals, issued by the International Committee for Medical Journal Editors (ICMJE), and to the Committee on Publication Ethics (COPE) code of conduct for editors. Our guidelines should be read in conjunction with this broader guidance. The ICJME requirements can be found at http://www.icmje.org/ and the COPE’s guidelines at http://publicationethics.org. The work to be described in your article must have been carried out in accordance with The Code of Ethics of the World Medical Association for experiments involving humans (Declaration of Helsinki) and research on health databases (Declaration of Taipei) https://www.wma.net/what-we-do/medical-ethics/. Further information on Ethics in Publishing and Ethical guidelines for journal publication can be found at: https://www.elsevier.com/authorethics and https://www.elsevier.com/ethicalguidelines

**Reporting guidelines**
The editors require that manuscripts adhere to recognized reporting guidelines relevant to the research design used and require authors to submit a checklist verifying that essential elements have been reported for all primary research and systematic reviews. We suggest that you consult the guidelines at an early stage of preparing your manuscript. You can search for the correct guideline for your study using the tools provided by the EQUATOR network: http://www.equator-network.org/ The guideline used must be indicated in the journal's Author Checklist, which is to be submitted with every paper.

**STUDY REGISTRATION**
We encourage the prospective registration of studies and require it for clinical trials (as defined by the International Committee of Medical Journal Editors). Registration should occur by the time of patient enrolment. Where a study has been registered, please give the registration number within at the end of the abstract and in the body of the paper. Authors seeking to publish a prospective intervention study (other than clinical trials) that has not been registered in advance are encouraged to register at the earliest opportunity before submitting for publication.
Informed consent and ethical approval

Informed consent must be sought from participants who are able to give it and this should be documented in the paper. Where informed consent is not obtained, consistent with recognised ethical principles and local legal frameworks this must also be documented in your paper. Ethical approval must be stated at an appropriate point in the article. The approving body and approval number should be identified in the manuscript. If the study was exempt from such approval the basis of such exemption and the regulatory framework must be described.

Patient details

The personal details of any patient included in any part of the article and in any supplementary materials (including all illustrations and videos) must be removed before submission. Where an author wishes to include case details or other personal information or images of patients or any other individuals in an Elsevier publication, appropriate consents, permissions and releases must be obtained by the author. Written consents must be retained by the author but copies should not be provided to the journal unless specifically requested. For more information, please review the Elsevier Policy on the Use of Images or Personal Information of Patients or other Individuals (see https://www.elsevier.com/about/policies/patient-consent

Copyright

If excerpts from other copyrighted works are to be included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. This includes permission to translate scales where a third party holds the copyright.

MULTIPLE, REDUNDANT OR CONCURRENT PUBLICATION

To aid editorial decisions about distinctiveness and to avoid redundant or duplicate publication, we ask that you provide full references of any publications drawing on the same data in the journals Author Checklist. If the sources are not readily available please upload a copy of the manuscript for editors to consider. If other publications are under review or in preparation this should be mentioned in your letter to the Editor. To verify originality, your article may be checked by the originality detection service Crossref similarity Check.

All published and in press accounts of the wider study must be referred to in the paper and the relationship between this and other publications from the same study must be made clear. It is not sufficient to simply cite a prior publication, rather text must clearly state that results are from the same study. Submission of an article implies that the work described has not been published previously (except in the form of an abstract), a published lecture or academic thesis that it is not under consideration for publication elsewhere, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright-holder.

Preprints

Preprints can be shared anywhere at any time, in line with Elsevier’s sharing policy. Sharing your preprints e.g. on a preprint server will not count as prior publication (see ‘Multiple, redundant or concurrent publication’ for more information).

AUTHORSHIP, CONTRIBUTORS AND ACKNOWLEDGEMENTS

All authors should have made substantial contributions to all of the following: (1) the conception and design of the study, or acquisition of data, or analysis and interpretation of data, (2) drafting the article or revising it critically for important intellectual content, (3) final approval of the version to be submitted. Everyone who meets these criteria should be listed as an author. You will be asked to confirm this on submission. Other individuals who made substantial contributions (e.g., collecting data, providing language help, writing assistance or proofreading the article, etc.) should not be listed as authors but should be acknowledged in the paper. Those who meet some but not all of the criteria for authors can be identified as ‘contributors’ at the end of the manuscript with their contribution specified. For papers with ten or more authors, we ask that you give a collective name for the research group (e.g. ATLAS Research Group) to appear at the front of the article and list all authors at the end of the paper.

Changes to authorship

Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. It is important that all authors agree this. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved
by the journal Editor. To request such a change, the Editor will require from the **corresponding author**: (a) the reason for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the change. In the case of addition or removal of authors, this includes confirmation from the author being added or removed.

**CONFLICT OF INTEREST**

All authors must disclose any financial and personal relationships with other people or organizations that could influence their work. Potential conflicts of interest do not necessarily preclude publication and authors are advised to err on the side of transparency and openness in declaring any relevant relationships. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. If there are no conflicts of interest then please state this: 'Conflicts of interest: none'. See also [https://www.elsevier.com/conflictsofinterest](https://www.elsevier.com/conflictsofinterest).

**ROLE OF THE FUNDING SOURCE**

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. If the funding source(s) had no such involvement then this should be stated. If you received no external funding (i.e. other than your main employer) please state 'no external funding'. Please see [https://www.elsevier.com/funding](https://www.elsevier.com/funding).

**Manuscript Preparation**

**Documents required for submission (overview).**

**Title page** (with author details) - This should include the title, authors' names and affiliations, and a complete address for the corresponding author including telephone and e-mail address. Twitter handles for one, or all, authors may also be included on the Title Page if they wish for these to be published.

**Blinded manuscript** (no author details) - The main body of the paper including where relevant the abstract, contribution statements, references, figures, tables and any acknowledgements. This should not include any identifying information, such as the authors' names or affiliations. Please ensure that the manuscript includes page numbers for ease of reference during the review process.

**Covering letter** - to the Editor in which you address any matters you may wish the editors to consider (for example requests for exceptions to policy or the relationship of this work to other studies, elaboration on potential conflicts of interest).

**Additionally, the following are required for all full papers (excluding letters and editorials)**

**Reporting guideline checklist** - Additional reporting guidelines checklist for the relevant research design. For discussion papers and non-systematic reviews, where no checklist applies, upload a file with 'reporting guideline not applicable'

**Contribution of the Paper** - A series of short single sentence bullet points summarising "What is already known about this the topic?" (2 or 3 bullets) and "What this paper adds" (2 or 3 bullets).

**Author Checklist** - a brief checklist to ensure that you have provided all essential information. The **Author Checklist** is available as a word file.

**Title page**

**Title.** Concise and informative. The journal requires titles for research and review papers to be in the format Topic (or question): method (e.g. Nurse staffing in intensive care units: a systematic review). The country in which the study was conducted should not normally be named in the title unless it is an essential element (for example a national survey). **Author names.** Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. You can add your name between parentheses in your own script behind the English transliteration. **Affiliations.** Give the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and the e-mail address of each author. **Corresponding author.** Clearly
indicate who will handle correspondence at all stages of refereeing and publication. This responsibility includes answering queries about the research that may arise after publication. **Present/permanent address.** If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main affiliation address. Use superscript Arabic numerals for such footnotes.

**Blinded manuscript**

It is the authors' responsibility to ensure that the manuscript file contains no details that readily identify them to prospective reviewers. However, we recognise that on occasion essential information or the nature of the work itself may make it impossible to guarantee anonymity to authors. Authors may exercise discretion in relation to redacting details of prior research.

Authors who reveal their identity in the manuscript will be deemed to have declined anonymity and the review will be single blind (i.e. authors do not know reviewers' identities).

The blinded manuscript must include the following essential elements (except as noted above):

If you received no external funding (i.e. other than your main employer) please state 'no external funding'. Please see https://www.elsevier.com/funding.

The gold open access publication fee for this journal is **USD 3150**, excluding taxes. Learn more about Elsevier's pricing policy: https://www.elsevier.com/openaccesspricing.

This journal has an embargo period of 12 months.

**Submit your article**

Please submit your article via http://ees.elsevier.com/ijns.

**Referees**

Authors may choose to submit the names and institutional e-mail addresses of three potential referees. For more details, visit our Support site. Note that the editor retains the sole right to decide whether or not the suggested reviewers are used.

**Trial or other study registration**

We encourage the prospective registration of studies. Where a study has been registered please give the number in your Author Checklist (e.g. ISRCTN) and include the registration number within the title, abstract or body of the paper as appropriate.

**Review process**

The decision to publish a paper is based on an editorial assessment and peer review.

 Initially all papers are assessed by an editorial committee consisting of 2 or more members of the editorial team. The prime purpose is to decide whether to send a paper for peer review and to give a rapid decision on those that are not.

Editorials and Letters may be accepted at this stage but in all other cases the decision is to reject the paper or to send it for peer review. Papers which do not meet basic standards or are unlikely to be published irrespective of a positive peer review, for example because their novel contribution is insufficient or the relevance to the discipline is unclear, may be rejected at this point in order to avoid delays to authors who may wish to seek publication elsewhere. Occasionally a paper will be returned to the author with requests for revisions in order to assist the editors in deciding whether or not to send it out for review. Authors can expect a decision from this stage of the review process within 2–3 weeks of submission.

Manuscripts going forward to the review process are reviewed by members of an international expert panel. All such papers will undergo a double blind peer review by two or more reviewers, plus an Associate Editor. We take every reasonable step to ensure author identity is concealed during the review process but it is up to authors to ensure that their details of prior publications etc. do not reveal their identity. Authors who reveal their identity in the manuscript will be deemed to have declined anonymity and the review will be single blind (i.e. authors do not know reviewers' identities).
We aim to complete the review process within 8 weeks of the decision to review although occasionally delays do happen and authors should allow at least 12 weeks from submissions before contacting the journal. The Editor-in-Chief reserves the right to the final decision regarding acceptance.

**Formatting requirements**

There are no strict formatting requirements but all manuscripts must contain the essential elements needed to convey your manuscript, for example Abstract, Keywords, Introduction, Materials and Methods, Results, Conclusions, Artwork and Tables with Captions and "Contribution of Paper" (where applicable).

If your article includes any Videos and/or other Supplementary material, this should be included in your initial submission for peer review purposes.

Divide the article into clearly defined sections.

**Double-blind review**

This journal uses double-blind review, which means that both the reviewer and author name(s) are not allowed to be revealed to one another for a manuscript under review. The identities of the authors are concealed from the reviewers, and vice versa. For more information please refer to https://www.elsevier.com/reviewers/peer-review. To facilitate this, please include the following separately:

**ALL SUBMISSIONS**

The following documents are needed for all submissions (please refer to the Author Checklist for further guidance on preparing your manuscript).

**Title page** (with author details) – This should include the title, authors' names and affiliations, and a complete address for the corresponding author including telephone and e-mail address. Twitter handles for one, or all, authors may also be included on the Title Page if they wish for these to be published.

**Blinded manuscript** (no author details) – The main body of the paper (including the references, figures, tables and any Acknowledgements) should not include any identifying information, such as the authors' names or affiliations. Please ensure that the manuscript includes page numbers for ease of reference during the review process.

**Author Checklist** – completed reporting guidelines for the relevant research design.

**Covering letter** – to the editor in which you detail authorship contributions and other matters you wish the editors to consider.

**Contribution of the Paper**

All submissions (with the exception of Letters and Editorials) should include "Contribution of the Paper" statements. This should take the form of a clear summary of 'What is already known about the topic?' and 'What this paper adds', identifying existing research knowledge relating to the specific research question / topic and a summary of the new knowledge added by this study. Under each of these headings, please provide clear statements in the form of two or three short bullet points for each. The statements should be placed in the manuscript file between the Abstract and the main body of text, as well as supplied as a separate standalone file at submission.

Do not give general statements in what is known, instead focus on the results of research addressing the same question(s). Do NOT give process statements of what the paper does. eg. "This review demonstrates that nurse-led intermediate care reduces hospital stay but increases total inpatient stay" (outcome) NOT "This review considers the impact of nurse-led intermediate care on acute stay and total inpatient stay" (process)

Contribution of the Paper statements ('What is already known about the topic?' and 'What this paper adds') should be uploaded as a separate file at submission; and included as bullet points, under the correct heading, between the Abstract and the main body of text in the manuscript file (authors are asked to refer to a recent copy of the journal for guidance) The statements in the separate file and in the manuscript should be identical.
REVISED SUBMISSIONS
At revision stage the following documentation is required:
• a separate "Response to Reviewers" file – Responses to the reviewers' and editors' comments.
• a revised blinded manuscript with changes clearly highlighted.

Revised submissions should be accompanied by a letter which responds point by point to the reviewers' and editors' comments, and changes to the revised paper should be highlighted so they can be spotted easily by the reviewers to whom the paper is normally returned for further review/comment.

Use of word processing software
Regardless of the file format of the original submission, at revision you must provide us with an editable file of the entire article. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier). See also the section on Electronic artwork.
To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor.

GENERAL GUIDANCE
Title
The title should be in the format 'Topic / question: design/type of paper' and identify the population / care setting studied. (e.g. The effectiveness of telephone support for adolescents with insulin dependent diabetes: controlled before and after study). The country in which the study was conducted should not normally be named in the title.

Abstract
Abstracts should be less than 400 words, and should not include references or abbreviations. Abstracts of research papers must be structured and should adopt the headings suggested by the relevant reporting guidelines (see below). In general they should include the following: Background; Objectives; Design; Settings (do not specify actual centres, but give the number and types of centre and geographical location if important); Participants (details of how selected, inclusion and exclusion criteria, numbers entering and leaving the study, relevant clinical and demographic characteristics); Methods; Results, report main outcome(s)/findings including (where relevant) levels of statistical significance and confidence intervals; and Conclusions, which should relate to study aims and hypotheses. Abstracts for reviews should provide a summary under the following headings, where possible: Objectives, Design, Data sources, Review methods, Results, Conclusions. Abstracts for Discussion Papers should provide a concise summary of the line of argument pursued and conclusions.

Keywords
Provide between four and ten key words in alphabetical order, which accurately identify the paper's subject, purpose, method and focus. Use the Medical Subject Headings (MeSH®) thesaurus or Cumulative Index to Nursing and Allied Health (CINAHL) headings where possible (see http://www.nlm.nih.gov/mesh/meshhome.html).

Abbreviations, acronyms and initialisms
As a rule the International Journal of Nursing Studies does not permit the use of abbreviations, acronyms and initialisms (abbreviations for brevity). We make a limited number of exceptions but we do not allow the use of any abbreviations that are not widely recognised. The limited exceptions include cases where the abbreviated form has near universal recognition (e.g. USA), statistical terms and tests (e.g. df, t, ANOVA) and instruments that are generally identified by their initials or an abbreviation (e.g. SF36)

As a rule, any abbreviations which the authors intend to use should be written out in full and followed by the letters in brackets the first time they appear, thereafter only the letters without brackets should be used. For additional guidance, see the editorial policy/style on abbreviations, initialisms and acronyms.

Statistics
Standard methods of presenting statistical material should be used. Where methods used are not widely recognised explanation and full reference to widely accessible sources must be given. Exact p values should be given to no more than three decimal places. Wherever possible give both point
estimates and 95% confidence intervals for all population parameters estimated by the study (e.g. group differences, frequency of characteristics) Identify the statistical package used (please note that SPSS has not been "Statistical Package for the Social Sciences" for many years).

**Tables and figures**
There should be no more than five tables and figures in total and these should be included in the manuscript at the appropriate point. All tables and figures should be clearly labelled. If your manuscript includes more than 5 tables in total, or for very large tables, these can be submitted as Supplementary Data and will be included as such in the online version of your article.

**Appendices**
Normally there should be no appendices although in the case of papers reporting tool development or the use of novel questionnaires authors must include a copy of the tool as an appendix unless all items appear in a table in the text.

**Informed consent**
Where applicable authors should confirm that informed consent was obtained from human subjects and that ethical clearance was obtained from the appropriate authority.

**Permissions**
Permission to reproduce previously published material must be obtained in writing from the copyright holder (usually the publisher) and acknowledged in the manuscript.

**Word limits**
Our experience suggests that all things being equal, readers find shorter papers more useful than longer ones. Given this, and competition for space in the Journal, shorter papers of between 2,000 and 3,500 words are preferred. However, full papers may be up to 7,000 words in length, plus tables, figures, and references. Ordinarily there should be no appendices although in the case of papers reporting tool development or the use of novel questionnaires it is usual to include a copy of the tool as an appendix.

**Artwork**
There should be no more than five tables and figures in total. All tables and figures should be clearly labelled. If your manuscript includes more than 5 tables in total, or for very large tables, these can be submitted as Supplementary Data and will be included as such in the online version of your article.

**Colour artwork**
Please make sure that artwork files are in an acceptable format (TIFF (or JPEG), EPS (or PDF), or MS Office files) and with the correct resolution. If, together with your accepted article, you submit usable colour figures then Elsevier will ensure, at no additional charge, that these figures will appear in colour in the printed version. For colour reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article. Please indicate your preference for colour: in print or online only. For further information on the preparation of electronic artwork, please see https://www.elsevier.com/artworkinstructions.

Please note: Because of technical complications that can arise by converting colour figures to 'gray scale' (for the printed version should you not opt for color in print) please submit in addition usable black and white versions of all the colour illustrations.

**Tables**
Please submit tables as editable text and not as images. Tables can be placed next to the relevant text in the article. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules.

**Citation in text**
Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.
Users of Mendeley Desktop can easily install the reference style for this journal by clicking the following link:
http://open.mendeley.com/use-citation-style/international-journal-of-nursing-studies
When preparing your manuscript, you will then be able to select this style using the Mendeley plug-ins for Microsoft Word or LibreOffice.

Reference management software
This journal has standard templates available in key reference management packages EndNote (http://www.endnote.com/support/enstyles.asp) and Reference Manager (http://refman.com/support/rmstyles.asp). Using plug-ins to word processing packages, authors only need to select the appropriate journal template when preparing their article and the list of references and citations to these will be formatted according to the journal style which is described below.

Queries
For questions about the editorial process (including the status of manuscripts under review) please contact the editorial office ijns@kcl.ac.uk. For technical support on submissions please contact https://service.elsevier.com.
